REPORT ON FAMINE IN THE DISTRICT OF BANKURA FOR THE WEEK ENDING THE 12th JULY 1919.

RAINFALL was general during the week, but more rain is wanted for transplantation. Seventy-six relief-works were open during the week. The number of persons relieved on works was 4,279. The number of persons in receipt of gratuitous relief was 20,278, viz., 15,237 on cash doles in 115 unions, 3,651 on paddy-husking advances, 853 weavers and 537 better class poor. The total number of persons relieved was 24,557. The decrease in the number of persons on relief-works was due to rain and agricultural operations. Some works are being closed. The number of persons relieved on private works was 1,733. Also four charitable societies relieved 1,615 other persons by rice doles. Theft of food-grains and petty dacoities attributable to distress are increasing. The physical condition of workers and public health are good. Cloth is being distributed to destitutes. The relief measures are adequate. The price of common rice varies from 5½ to 5¼ seers per rupee.

RESOLUTION REGARDING ELECTION AND APPOINTMENT OF HOOGHLY-CHINSURA MUNICIPALITY.

GOVERNMENT OF BENGAL.

MUNICIPAL DEPARTMENT.

Municipal.

CALCUTTA, THE 17TH JULY 1919.

RESOLUTION No. 1946M.

IN Resolution No. 704T.M., dated the 4th October 1918, the Commissioners of the Hooghly-Chinsurah Municipality were superseded for a period of one year, under section 65 of the Bengal Municipal Act, for persistent default in the performance of their duties. The period of supersession will expire on the 8th October next and the Governor in Council is pleased to announce that on the expiration of the period, the Municipality will be reconstituted by election and appointment, and have the privilege of electing its own Chairman.

By order of the Governor in Council,

S. W. GOODE,

Offg. Secy. to the Govt. of Bengal.

RESOLUTION ON THE REPORT OF THE DEPARTMENT OF FISHERIES, BENGAL AND BIHAR AND ORISSA, FOR THE YEAR ENDING THE 31ST MARCH 1919.

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Fishery Branch.

DACCA, THE 21ST JULY 1919.

RESOLUTION No. 834T.R.

READ—

The Report of the Department of Fisheries, Bengal and Bihar and Orissa, for the year ending the 31st March 1919.

MR. SOUTHWELL held charge of the Department till the 24th December 1918, when, owing to a breakdown in health, he went on combined leave for fifteen months, leaving charge of his office to Dr. Baini Prasad, Superintendent of Fisheries.

2. During the year under review an experimental change was made in the organisation of the Department. In order to decentralize the work and to bring the Department into closer touch with organised private enterprise it was suggested that a district fishery officer should be attached to each district. An experiment was accordingly inaugurated at the end of the year by the appointment of three district fishery officers. Their main duties will ultimately be to make a complete survey of the districts allotted to them from the fishery point of view; to keep themselves in touch with fishermen and owners of fisheries; to initiate co-operative societies amongst fishermen; to replenish fisheries, both Government and public; and to facilitate the work of export and import. This list is a comprehensive one and contains duties which in the present state of the fisheries and the condition of the fishermen of the province are by no means a sinecure if properly performed.

3. The investigations of the Department into the habits of fish and the experiments in breeding proceeded on the same lines as in previous years. The *hilsa* investigations as usual occupied a prominent place, but the season was unfavourable for useful work on account of the erratic nature of the monsoon. The monsoon was also responsible for a shortage of the quantity of carp fry available for distribution, but it is satisfactory to note that reports from the previous year's purchasers of fry show that the distribution has so far attained a fair result. An experiment was made in curing and preserving *bhekti* and other fish for the Calcutta market, but, apart from the paucity of demand for such preserved fish amongst the Indian population in Calcutta, such an experiment can only be financially successful if the curing and drying operations are carried on where the fish is caught in large quantities. In this connection it is interesting to note that a smoking factory has been established at Tamluk and, on the advice of the Fishery Department, remodelled. The experiment the Director of Fisheries proposes to undertake for the culture of fresh-water mussels in some of the Dacca experimental tanks will be watched with interest in view of the want of raw material for buttons.

4. Twelve new co-operative societies of fishermen were established during the year, 8 in Bengal and 4 in Bihar and Orissa; the total number is now 27. These societies were mainly established by the efforts of

the department of co-operative credit, but it is expected that in future the district fishery officers will be able to take a more active part in the establishment of such societies.

5. The statistics of fish traffic into Calcutta during the year under report (306,037 maunds) show an increase of imports over the past 4 years, except the year 1917, when 317,146 maunds were imported.

6. The problems which have to be solved by the Department are difficult and will require time for their investigation. The public are primarily interested in the cheapness of fish as an article of diet; but the close combine which controls the sale of fish in Bengal and the indiscriminate destruction of fry are the two main obstacles with which the Department is confronted in its efforts to ameliorate the situation. With the appointment of the proposed district fishery officers something may be done to rouse a more popular interest in the problems of the Department as well as to come into close touch with the industries, but it is necessary to proceed slowly and to learn by experience. In the present report there are various references as to the manner in which the Department can further be developed, for example by the establishment of centres for investigation in the culture of carp. The Industrial Commission has also indicated that the Fishery Department in Bengal should be more fully developed. All these are projects which will involve a considerable financial outlay; and they will be considered in due course when Mr. Southwell returns from leave.

7. The Governor in Council has much pleasure in acknowledging the good services of Mr. Southwell, Dr. Baini Prasad and their assistants.

By order of the Governor in Council,

M. C. McALPIN,

Secy. to the Govt. of Bengal.

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR JUNE 1919.

1. **Character of the Season.**—During the month the rainfall was below the normal in all the districts excepting in the 24-Parganas, Khulna, Midnapore, Howrah, Jalpaiguri, Darjeeling, Rangpur, Malda, Bakarganj, Chittagong, Noakhali and the Cooch Behar State. The usual rainfall statement is appended.

2. **Progress of Agricultural Operations.**—The harvesting of jute and autumn paddy commenced in the lower lying tracts of some of the eastern districts. The preparation of lands for the winter rice crop made favourable progress. More rain was needed for the transplanting operation.

3. **State of Standing Crops.**—The condition of jute and autumn paddy and other standing crops was, on the whole, satisfactory.

4. **Prospects and Probable Outturn.**—Prospects of various autumn crops and deep-water winter paddy were generally hopeful.

5. **Damage to Standing Crops.**—No crop reported to have suffered any damage.

6. **Condition of Agricultural Stock.**—Cattle disease was reported from places in the districts of Midnapore, Dacca, Tippera and Murshidabad.

7 **Failure of Pasturage and Fodder.**—The supply of fodder was sufficient.

8. **Prices of Food-grains.**—During the second fortnight of the month under review, the prices of the cheapest variety of rice rose in 6 districts, fell in 10, and remained stationary in the rest. It varied from 4 seers 14 chitaks a rupee in the Noakhali to 6 seers and 4 chitaks in the Jessore district.

9. **Condition of Agricultural People.**—Distress continued to prevail in the Brahmanbaria subdivision of the Tippera district. Relief measures are being taken.

J. C. ROY,

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 17th July 1919.

Summary.—During the week moderate to heavy rain fell throughout the province. Reaping of autumn paddy, cutting, steeping and washing of jute continue in the low-lying tracts of Eastern Bengal. Transplanting of winter paddy is progressing briskly. Prospects of standing crops are generally reported to be satisfactory. Damage to jute by insects is reported from parts of West Bengal. The average price of common rice for the province has risen by about 1·66 per cent. as compared with that of the previous week. The average number of persons engaged daily on test works in the Brahmanbaria subdivision of Tippera was 1,248.

REPORT ON FAMINE IN THE DISTRICT OF BANKURA FOR THE WEEK ENDING 19TH JULY 1919.

DURING the week the rainfall was general but scanty. More rain is wanted for transplantation on high land. Sixty-seven works were open during the week. The number of persons relieved on works was 3,917. The number of persons in receipt of gratuitous relief was 21,130, viz., 16,054 on cash doles in 124 unions, 3,683 on paddy-husking advances, 853 weavers and 540 better class poor. The total number of persons relieved was 25,047. The decrease in the number of persons on relief works was due to the diversion of workers to agricultural operations, while the increase in numbers on gratuitous relief was due to the extension of relief to nine new unions. No further extension of gratuitous relief centres is expected. The number of persons relieved on private works was [illegible]. Also four charitable societies relieved 1,527 other persons by rice doles. The physical condition of workers and public health are generally good. Sporadic cases of cholera are reported. Cloth is being distributed to destitutes. The relief measures are adequate. The price of common rice varies from 5⅝ to 5¼ seers per rupee. Burma rice is being sold by the District Board.

M. C. MCALPIN,
Secy. to the Govt. of Bengal.

Dacca, the 28th July 1919.

APPOINTMENT OF A COMMITTEE TO CONSIDER CERTAIN QUESTIONS CONNECTED WITH THE CONSTITUTION AND FUNCTIONS OF TEXT-BOOK COMMITTEES IN BENGAL.

GOVERNMENT OF BENGAL.

GENERAL DEPARTMENT.

Education Branch.

CALCUTTA, THE 29TH JULY 1919.

RESOLUTION—No. 1286Edn.

THE Governor in Council has decided to appoint a Committee consisting of the following gentlemen to advise Government on certain questions connected with the constitution and functions of text-book committees in Bengal :—

(1) Mr. T. O. D. Dunn, Secretary, Calcutta Text-book Committee (President)
(2) Mr. W. E. Griffith, Secretary, Dacca Text-book Committee.
(3) The Hon'ble Babu Brojendra Kishore Roy Chowdhury.
(4) The Hon'ble Dr. A. Suhrawardy.
(5) Babu G. C. Bose, Principal, Bangabasi College, Calcutta.
(6) Babu S. C. Bose, Head Master, Mitra Institution, Bhowanipur.
(7) Babu S. C. Sanyal, Secretary, Calcutta Historical Society.
(8) Babu Santosh Kumar Lahiri of Messrs. S. K. Lahiri & Co., Calcutta.
(9) Babu Bama Charan Auddy of Messrs. S. C. Auddy & Co., Calcutta.
(10) Babu Brojendra Mohan Dutt of the Students' Library, Dacca.
(11) Mr. J. W. Gunn, Assistant Director of Public Instruction, Bengal (Secretary).

2. The questions on which the Committee are asked to advise are as follows :—

(*i*) The constitution and functions of a Text-book Committee.
(*ii*) The determination of a definition of a satisfactory text-book for middle and primary schools.
(*iii*) The principles on which the Education Department should proceed to curtail the list of text-books for middle and primary schools and the possibility of preventing a list of excessive length in future.

ORDER.—Ordered that the resolution be published in the *Calcutta Gazette*, that copies with copies of the letter from the Government of India, Department of Education, No. 175, dated the 12th February 1919, be forwarded to the President and members of the Committee for information.

Ordered also that a copy be forwarded to the Director of Public Instruction, Bengal, for information.

By order of the Governor in Council,

S. W. GOODE,

Offg. Secy. to the Govt. of Bengal.

DEPARTMENT OF AGRICULTURE, BENGAL.

Forecast of the Summer *Til* Crop of Bengal, 1919-20.

(Note.—On an average of the five years ending 1916-17, the area under til in Bengal has represented about 4·8 per cent. of the total area under til in British India.)

Character of the season.—The scarcity of rain from the sowing time up till the middle of April proved very unfavourable to the crop throughout the province. As a consequence, the growth of the crop was retarded in most places. Considerable damage, due to drought, is reported from many districts, notably from Jessore, Burdwan, Hooghly, Howrah, Pabna and Noakhali. Good showers in the latter part of April somewhat improved the prospects. In the following two months, the rainfall, though on the whole defective, was generally helpful to the growth of the crop. On the whole the weather has not been generally favourable for the crop.

Acreage.—The total area sown with the crop this year is reported to be 167,300 acres as compared with 168,900 acres (revised) last year.

Outturn.—According to the estimates of district officers, the average outturn of the crop for the province works out at 76 per cent. of the normal this year against 70 per cent. last year. Taking the normal yield at 6½ maunds per acre, the gross outturn for the province is estimated at 28,600 tons against 26,600 tons (revised) last year or an increase of about 7·5 per cent.

ROBERT S. FINLOW,

Offg. Director of Agriculture, Bengal.

DACCA, *the 23rd July 1919.*

APPENDIX I.

Forecast of the Summer *Til* crop of Bengal, 1919-[illegible].

District	Estimated normal area under summer *til*	Estimated area under summer *til*		Taking 100 to represent the normal, what would be the average outturn per acre cropped		Date by which sowing generally began this year and whether that date was early, normal or late.	Date by which harvesting generally commenced this year and whether that date was early, normal or late	Remarks by District Officers.
		Last year	This year	Last year	This year

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the [illegible]

Summary.—During the week heavy rain fell throughout the province, excepting in some parts of West Bengal, where the fall was light to moderate. Transplanting of winter paddy is progressing fairly. Harvesting autumn paddy, cutting and steeping of jute continue in Eastern Bengal. Damage to jute by insects is reported from places of West Bengal. The condition and prospects of standing crops are generally reported to be favourable. The average price of common rice for the province has risen by about 2·66 per cent. as compared with that of the previous week. The average number of persons engaged daily on test works in the Brahamanbria subdivision was 641.

Serial No	District and subdivision	Rainfall	Price of common rice, in seers per rupee. This week	Price of common rice, in seers per rupee. Previous week	Character of the weather condition of crops, etc

Civil Surgeons. Taken as a whole the table possesses a relative value, although the figures for individual districts probably only approximate

those of the respective districts as per Government of Bengal, Municipal Department, Order No. 118San., dated the 8th February 1918.
to the Government of India, Education Department, Order No. 93, dated the 28th March 1918.

CHARLES A. BENTLEY,
Sanitary Commissioner for Bengal.

DEPARTMENT OF STATISTICS, INDIA.

CALCUTTA TRADE FLUCTUATIONS.

THE following tables are intended to show the trade by all routes, *i.e.*, by rail, river, canal, road, and sea, of the Calcutta block* in certain selected articles during the months of April and May, 1919, as compared with the corresponding period of 1918 and 1917. The statistics have been compiled from returns furnished by the Collector of Customs, Calcutta, Railway Audit Offices, Steamer Companies, the Commissioners for the Port of Calcutta, the Collectors of the 24-Parganas and Howrah, and the Assistant Engineer, Calcutta Canals.

General Summary.

Imports.—The imports of rice, including paddy†, into Calcutta by rail, river, canal, road, and sea (coastwise) during the months of April and May, 1919, amounted to 4,294,000 maunds, as against 2,317,000 maunds in the corresponding period of the preceding year,—an increase of 85 per cent. There was an increase (55 per cent) in the imports of coal and coke (17,679,000 maunds as against 11,388,000 maunds last year). The imports by rail, river, road, and sea (coastwise) of Indian cotton piecegoods showed an increase of 96 per cent, the total value amounting to Rs. 1,14,15,000 as against Rs. 58,07,000 in 1918. The quantity of indigo imported during the months of April and May, 1919, decreased from 3,000 maunds to 112 maunds. The imports of raw jute amounted to 398,000 bales as against 525,000 bales,—a decrease of 24 per cent. The importations of gunny bags also showed a decrease of 33 per cent (46 million bags as against 69 millions in the preceding year). The total imports of oilseeds (linseed and rape and mustard seed) increased by 60 per cent from 986,000 maunds to 1,580,000 maunds. The imports of sugar decreased by 10 per cent from 148,000 maunds to 133,000 maunds and those of tea by 5 per cent from 309,000 maunds to 292,000 maunds.

Exports.—The exports of cotton piecegoods, foreign, from Calcutta by all routes during the months of April and May, 1919, increased by 24 per cent (Rs. 5,46,70,000 as against Rs. 4,39,72,000 last year). The exports of gunny bags (including the exports by sea to foreign countries) decreased from 203 million bags to 182 million bags. The quantity of kerosene oil despatched from Calcutta and Budge-Budge by internal routes and by sea (coastwise) decreased from 801,000 maunds to 675,000 maunds, or by 16 per cent.

---

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore Docks.

† One maund of paddy is equivalent to 25 seers of rice.

* New gauge fixed at Rajmahal from 1st June 1910 in place of the gauge at Sahebganj. The zero of gauge at Rajmahal 56·46 ft. above M.S.-L. from 10th February 1916 to 15th June 1918. From the 16th June 1918 to 6th April 1919 April 1919 it is 56·319 ft. above M. S. L.

† To compare the reduced levels shown in these monthly printed statements before and after the 1st June 1908, 5·78 ft. October 1909).

(a) A new gauge fixed at Monghyr on 16th July 1914.

(b) From the 1st November 1915 the zero of gauge was 2·48 ft. above M.S.-L. Previous to that the zero was at M.S.-L zero is 1·509 ft. above M.-S.L.

(c) From the 25th January 1916 to 4th April 1919 the zero of gauge at Berhampore was 30·99 ft. above M.S.-L. From

(d) From the 25th October 1916 a temporary wooden gauge with its zero at 49·00 ft. above M.S.-L. was erected at 3rd June 1919. From 4th June 1919 the zero is 1·51 ft. above M. S.-L.

(e) Gauge shifted from Sabik Goalundo to Fakirabad from 30th June 1919.

The 29th July 1919.

REPORT ON FAMINE IN THE DISTRICT OF BANKURA FOR THE WEEK ENDING 26TH JULY 1919.

DURING the week the rainfall was general but scanty. More rain is urgently wanted for transplantation on high land. Sixty-six relief works were open during the week The number of persons relieved on works was 5,140. The number of persons in receipt of gratuitous relief was 20,838, viz., 15,722 on cash doles in 128 unions, 3,683 on paddy-husking advances, 853 weavers and 580 better class poor. The total number of persons relieved was 25,978 The increase in the number of persons on relief works was due to partial cessation of the field operations. The number of persons relieved on private works was 797. The charitable societies also relieved 718 other persons by weekly doles and 1,650 persons by daily doles and cooked food. Theft of food-grains and petty dacoities attributable to distress increased slightly during the week. The physical condition of workers and public health are generally good. Sporadic cases of cholera and fever were reported. Cloth is being distributed to destitutes. The relief measures are adequate. The price of common rice was 5½ seers per rupee. Burma rice is being sold.

Secy. to the Govt. of Bengal.

RAMNA, DACCA. *the 4th August 1919.*

REPORT ON THE ADMINISTRATION OF THE SALT DEPARTMENT IN BENGAL DURING THE YEAR 1918-19.

NOTIFICATION.

No. 2220S R.—The 29th July 1919.—The following extracts from the Report of the Commissioner of Excise and Salt, Bengal, on the administration of the Salt Department in the Presidency of Bengal during the year 1918-19, are published for general information.

C. F. PAYNE,
Secy. to the Govt. of Bengal.

No. 2158E., dated Calcutta, the 23rd June 1919.

From—S. C. MUKERJEE, ESQ., I.C.S., Commissioner of Excise and Salt, Bengal.

To—The Secretary to the Government of Bengal, Financial Dept.

I HAVE the honour to submit the following consolidated report on the administration of the Salt Department for the year 1918-19. The report deals with the preventive operations in the saliferous districts of the Presidency, which were under the control of the Commissioner of Excise and Salt, and with the importation and issues of salt under the control of the Customs authorities.

2. **Charge of the Department.**—Mr. A. N. Moberly, I.C.S., held charge from the 1st April to the 7th November 1918, and I was in charge for the rest of the year.

CHAPTER I.

General.

3. **Credit system of payment of duty.**—The Collector of Customs Calcutta, reports that securities to the extent of Rs. 72,83,000 were deposited during the year as compared with Rs. 51,84,200 in 1917-18. The amount of duty debited during the year under the system was Rs. 1,03,64.573 against Rs. 83,68,422 in the previous year. There were 55 depositors during the year, five of whom closed their accounts, leaving a balance of 50.

4. **Salt *golas* at Sulkea and Chittagong.**—During the year additions and alterations to *gola* No. 5 at Sulkea were taken in hand in order to convert it into a shed for housing and repairing salt tubs and trestles. Alterations to gangways and some improvements to a portion of the foreshore salt *golas* were completed. As regards the salt *golas* at Chittagong, the accommodation was fully taken up only once in the month of August 1918; on other occasions there was no difficulty about accommodation. In the course of the year a scheme was submitted to Government for the removal of the Sadar ghat *golas* to Moheshkhal at an estimated cost of Rs. 65.500. The proposal has recently been sanctioned by the Government of India and the work will be taken up as soon as the funds are allotted by the Public Works Department. The removal of the salt *golas* to the new site will remove to a great extent the difficulty at present experienced in quick despatch to ships and in wastages in transport.

5. **Consumption of duty-free salt for commercial purposes.**—The quantity of salt delivered free of duty for commercial purposes, or on which a drawback was subsequently allowed for the same reason, amounted to 7,380 maunds as compared with 12,300 maunds in 1917-18

6. **Manufacture of salt in Bengal.**—As stated in paragraph 6 of last year's report, enquiries regarding the manufacture of salt on a commercial scale were continued in the current year. In order to encourage such manufacture in Bengal it was made permissible by the Government of India

* * * * * * *

in the districts of 24-Parganas, Midnapore, Khulna, Bakarganj and Chittagong subject to the conditions of a license granted under the authority of

Government of Bengal. A firm in Calcutta has received permission to manufacture salt in one of the districts named above and the construction of the salt factory is in progress, but it is reported that no salt will be manufactured during the current year.

CHAPTER II.

Stocks, imports and clearances.

7. **Accounts of stocks and issues.**—The stocks, imports and clearances of salt in and from the ports of Calcutta and Chittagong for the years 1917-18 and 1918-19 are shown below :—

Stocks, imports, etc.	1917-18.	1918-19.
	Mds.	Mds.
Total of all stocks at the commencement of the year	11,86,461*	10,71,691
Total quantity imported during the year ...	85,50,142	1,01,50,730
Excess found in the *golas*	750	350
Total ...	97,37,353*	1,12,22,771
Quantity of duty-paid salt actually issued during the year	81,86,937*	94,10,928
Quantity which passed free of duty for the manufacture of glazed stoneware, etc. ...	12,300*	7,380
Quantity of non-duty-paid salt removed under bond to all inland warehouses ...	3,95,970	3,66,273
Quantity written off during the year for wastage or otherwise	70,455	1,25,596
Total ...	86,65,662*	99,10,177
Balance at the close of the year ...	10,71,691*	13,12,594

* Revised figures

Both the import and clearance figures show considerable increase.

8. **Imports.**— * * * * * * * * * * The total imports into Calcutta and Chittagong increased by 14·6 per cent. and 63·0 per cent., respectively. There was an increase in imports into Calcutta from the United Kingdom, Port Said and Bombay. The very large increase from Port Said was due mainly to the fact that shipping was more readily available from that port. The decrease from Spain was due to want of tonnage and that from Aden to the salt works of the Indo-Aden Company being out of commission for a time owing to trouble with their boilers. There were no imports into Chittagong from the United Kingdom except table-salt. The imports from Aden fell by 71,528 maunds and those from Port Said increased by 7,81,212 maunds. There were no imports into that port from Spain.

Out of the total importation of 89,67,125 maunds into the port of Calcutta, 72,75,686 maunds or 81 per cent. were bonded in the Sulkea *golas* during the year as against a percentage of 86 in the previous year. The percentage was smaller owing to larger clearances from board ship during the year.

9. **Sales of imported salt from shipboard and bond.**— * * In Calcutta the sales direct from shipboard show an increase of 67·4 per cent. and those from bond by 4·3 per cent. In Chittagong the sales direct from shipboard and bond increased by 51·7 per cent. and 44·0 per cent., respectively. There was an increase of 14·2 per cent. in the total sales of imported salt. All the vessels carrying salt to Calcutta were steamers.

10. **Transactions in the *golas*.**—The total transactions at the *golas* in Calcutta and Chittagong for the past five years are given below:—

YEAR				Calcutta.	Chittagong.
				Mds.	Mds.
1914-15	...	...	...	1,58,60,486	15,95,103
1915-16	...	...	...	1,55,57,771	17,35,807
1916-17	...	...	...	1,45,87,255	15,24,260
1917-18	...	...	...	1,36,05,327	13,64,536
1918-19	...	...	...	1,42,66,818	20,70,799

12. **Inland bonded warehouses.**—There were 10 private bonded warehouses in this Presidency against 11 in the previous year, viz., 2 at Naraingan (Dacca), 1 at Bhairab Bazar (Mymensingh), 1 at Madaripur (Faridpur), 4 at Jhalakati (Bakarganj), and 2 at Chandpur (Tippera). Two of the four *golas* at Jhalakati were closed during the year. The quantity of salt despatched to these 10 inland warehouses from shipboard and *golas* in the ports of Calcutta and Chittagong was 3,47,073 maunds, as compared with 3,77,070 maunds in 1917-18, showing a decrease by 7·9 per cent. There was an increase of 300 maunds or 1·6 per cent. in the quantity of salt despatched to the bonded warehouse at Ajmiriganj in Assam, the quantity despatched in the year being 19,200 maunds against 18,900 maunds in the previous year.

* * * * * * *

CHAPTER III.

Consumption and Prices.

15. **Consumption.**—The total quantity of salt which passed into consumption in this Presidency during the year 1918-19 was 76,51,968 maunds. This is exclusive of 29,82,037 maunds, the net export by rail, road or river, but inclusive of 568 maunds educed from saltpetre, and 7,380 maunds issued free of duty for commercial purposes.

16. **Prices of salt in Bengal generally.**—

* * * * * * * There was a decrease of 8 annas 6 pies in the average as compared with the previous year. It is reported that owing to larger supplies prices have been steadily falling and were much below the maximum prices fixed by Government. The average wholesale price per 100 maunds of Liverpool salt was Rs. 186-13-4 against Rs. 273-6-4 in the previous year.

* * * * * * * The maximum prices at which salt may be sold for delivery at the Sulkea and Chittagong salt *golas* are now fixed at the following rates per 100 maunds:—

			Ex-golas.	
			Sulkea.	Chittagong.
			Rs.	Rs.
Liverpool	...	...	188	198
Spanish	...	...	183	193
Port Said	...	...	180	190
Massowah	...	...	180	190
Aden Fine	...	...	180	190
Indo-Aden	...	...	179	189

At the same time the maximum retail price of salt was fixed at 1 anna 6 pies per seer in all places in the Presidency and Burdwan Divisions and 1 anna 9 pies per seer in all places in the Dacca, Chittagong and Rajshahi Divisions except the Chittagong Hill Tracts, where the maximum retail price is fixed at 2 annas per seer, and the Sadar, Kalimpong and Kurseong subdivisions of the district of Darjeeling, where the maximum retail price is fixed at 2 annas and 3 pies per seer.

* * * * * *

CHAPTER V.

Financial Results.

19 **Receipts and charges.**— * * * *

* * * The receipts show an increase by Rs. 2,64,423 or 2·4 per cent. and the charges by Rs. 28,523 or 9·2 per cent. The net revenue was Rs. 1,08,41,264, which was larger than that of the previous year by Rs. 2,35,900 or 2·2 per cent. The increase in the receipts occurred mainly under head "Import Duty on Salt." The charges do not include any share of cost of the Customs Preventive Service, which is largely employed in safeguarding the salt revenue. * * * * *

* * * * *

CHAPTER VI.

Miscellaneous.

20. **Saltpetre refineries and Soda factories.**—As in the preceding year, there were three licensed saltpetre refineries at Maniktola Sulkea and Kakurgachi, respectively. No license was issued in 1918-19 for the manufacture of sulphate of soda.

The quantity of refined saltpetre produced during the year was 11,701 maunds against 16,989 maunds in the previous year. The Collector of Excise, Calcutta, reports that the decrease was partly due to the bad management of the Sulkea refinery by the proprietors and partly to less demand for saltpetre. The quantity of salt educed in the process of refinement of saltpetre was 547 maunds as compared with 942 maunds in 1917-18, and the quantity of *sitta* (impure salt) left in the course of refinement, was 78 maunds against 191 maunds in the previous year. Five hundred and sixty-eight maunds of educed salt were sold during the year as compared with 696 maunds in 1917-18, the duty realized being Rs. 710 as compared with Rs 870 in the previous year. The license fees realized from the saltpetre refineries amounted to Rs. 150 as in the previous year.

* Includes Rs. 9,63,343 paid to the Calcutta Improvement Trust on account of excess stamp duty realised from several districts and also Rs. 4,90,000 being the provincial share of sale-proceeds of unified stamps credited to non-postal revenues.

† Includes Rs. 17,327 on account of district establishment, Rs. 1,245 on account of rewards, and Rs. 7,235 on account of contingencies.

‡ Includes Rs. 2,90,922 paid to the Calcutta Improvement Trust on account of excess stamp duty realised from several districts and also Rs. 4,90,000 being the provincial share of sale-proceeds of unified stamps credited to non-postal revenues.

DEPARTMENT OF AGRICULTURE, BENGAL.

First Forecast of the Sugarcane Crop of Bengal, 1919-20.

(Note.—On an average of the five years ending 1916-17, the area under sugarcane in Bengal has represented some 9·2 per cent. of the total area under sugarcane in British India.)

Character of the Season.—Owing to insufficient rainfall and consequent lack of soil-moisture the weather was not generally favourable at the time of planting. Subsequently, since the latter part of April, however, moderate rainfall has greatly helped the growth of the plants and the present outlook is hopeful.

Area Planted.—The total area planted with sugarcane for the province is reported to be 221,100 acres this year, against 217,600 acres in the corresponding forecast of last year.

ROBERT S. FINLOW,

Offg. Director of Agriculture, Bengal

DACCA, *the 1st August 1919.*

First Forecast of the Sugarcane Area of Bengal, 1919-20.

District.	Estimated normal area under sugarcane.	Estimated area under sugarcane.		Date by which the planting of cane generally commenced this year, and whether that date was early, normal or late.	Remarks by District Officers.
		Last year.	This year.		
1	2	3	4	5	6
	Acres	Acres.	Acres.		
24-Parganas	8,000*	4,100	5,000	Beginning of April. Normal.	The increase in area was due to good outturn and a high price of sugar obtained last year. The weather has been favourable.
Nadia	7,900	5,800	6,100	End of January. Normal.	The increase in area was due to high price of *gur*. The weather has been favourable.
Murshidabad ..	3,600	3,100	2,800	December to April. Normal.	The decrease in area was due to want of rain at the time of planting. At the beginning the weather was not favourable for want of rain which has affected the growth of the crop. Subsequently it has been favourable and the present condition of the crop is good.
Jessore	3,900	2,600	3,100	February and March. Normal	The increase in area was due to high price of sugar. The weather has been favourable. The crop is thriving well.
Khulna	1,500	1,100	1,000	February. Normal ...	The decrease in area as compared with last year was due to want of rain at the time of planting. The weather has been favourable for the growth of the crop
Burdwan	25,800	19,000	17,100	April to May. Normal	The decrease in area was due to unfavourable weather and to want of moisture in the soil. The weather was not favourable at the beginning, but subsequently it has been favourable.
Birbhum	9,000	11,000	11,000	May. Normal ..	The weather has been favourable
Bankura	15,000	11,500	10,500	Middle of May. Late	The decrease in area was due to want of rain at the time of planting. The planting was delayed owing to late rainfall. The rainfall of May and June helped the germination and growth of the crop.
Midnapore	6,600†	3,000	4,200	March and April. Normal.	The increase in area was due to rise in price of raw sugar. The weather has been favourable up till now
Hooghly	7,200	5,000	4,900	March. Normal ...	The decrease in area as compared with that of last year was due to want of timely rainfall. The weather has not been favourable.
Howrah	8,500	5,300	5,200	January to April ...	The weather on the whole has been favourable.
Rajshahi	18,000	13,200	13,100	End of January. Normal.	The decrease in area was due to unfavourable weather at planting time. Since then the weather has been favourable.
Dinajpur	35,000	30,500	29,600	January to March. Normal.	The decrease in area was due to want of timely rainfall. The weather has been fair
Jalpaiguri	5,000*	4,000	3,700	First week of December. Normal.	The weather was not favourable at the time of planting. It has since been favourable in some parts of the district.
Darjeeling	200*	200‡	200‡	Middle of March. Normal.	The weather was not favourable at planting time. Subsequently the character of the weather has been fair.
Rangpur	20,500	11,000	11,900	Middle of February. Normal.	The increase in area was due to high price of sugar last year. At the beginning the weather was not favourable, but subsequently it has been favourable.
Bogra	20,000	3,700	4,200	March and April ...	The increase in area was due to high price of *gur*. At the beginning the weather was not favourable, but subsequently it has been favourable to the growth of the crop
Pabna ...	10,000	9,700	9,700	Middle of April. Normal	The weather was dry at the time of planting. Subsequently the weather has been favourable.
Malda ...	300†	300§	300§	Ditto ...	At the time of planting the weather was not favourable for want of rain but subsequently it has been favourable for the growth of the crop.
Dacca ...	21,100	23,900	23,900	November to March. Normal.	The weather was not favourable at the time of planting, but subsequently it has been favourable.
Mymensingh ...	11,100	10,300	10,300	March. Normal, except at Jamalpur where it commenced in January which was early.	The weather has been favourable.
Faridpur	7,100	7,400	7,400	February. Normal ...	The weather has been favourable from the time of planting up till now.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 31st July 1919.

Summary.—During the latter part of the week, light to moderate rainfall accompanied by wind was general throughout the province. Transplantation of winter paddy is proceeding under generally favourable condition, but its progress is retarded in some districts of West and North Bengal for want of sufficient rainfall. Reaping of autumn paddy and cutting, steeping and washing of jute continue. Some small damage to standing jute and autumn paddy on low lands by floods is reported from places in the Eastern Bengal districts. The average price of common rice for the province has risen by about 1·18 per cent. as compared with that of the previous week. The average number of persons engaged daily on test works in the Brahamanbria subdivision of Tippera district was 90.

Serial No.	District and subdivision	Rainfall	Price of common rice, in seers per rupee.		Character of the weather, condition of crops, etc
			This week	Previous week	
1	2	3	4	5	6
		Inches			
1	24-PARGANAS	1·18	$5\frac{3}{16}$	$5\frac{5}{16}$	Transplanting of *aman* paddy continues. Fodder and water are sufficient. Condition and prospects of jute are good. Slight damage by insects is reported from Basirhat and Barasat subdivisions. The effects of weather are good.
	Diamond Harbour.	1·24	$5\frac{5}{8}$	$5\frac{3}{16}$	
	Barrackpore	0·58	5	5	
	Barasat ...	0·25	$5\frac{3}{8}$	$5\frac{3}{8}$

17	BOGRA ...	0·59	1½	5	Harvesting of *aus* paddy, cutting and steeping of jute and transplanting of winter paddy continue. Prospects of jute are fair. Fodder is insufficient in flooded area.
18	PABNA ...	0·95	5	5¼	Prospects of *aman* paddy are favourable, but it has slightly been damaged by flood. Autumn paddy to the extent of about 4 annas has been damaged by flood in the Sadar subdivision. About 2 annas jute has been damaged by flood. Damage by insects is reported from Sirajganj subdivision. Fodder is insufficient in some localities.
	Sirajganj ..	2·95	5¼	(*n*)	
19	MALDA ..	0·50	5	5¼	Weather cyclonic. Transplanting of winter paddy continues. Prospects of jute and other standing crops are fair. No damage to crop is reported. Harvesting of *bhadoi* paddy has commenced on low lands. Fodder and water are sufficient. Cattle-disease is reported from Gomostapur thana.

(*n*) Not reported

Serial No.	District and Subdivision.	Rainfall.	[illegible] This week.	[illegible] Previous week.	Character of the weather, condition of crops, etc.
1	2	3	4	5	6
		Inches.			
20	COOCH BEHAR	1·02	6⅝	6 7/16	Weather hot with occasional rains. Harvesting of *bitri* paddy is going on. Preparation of lands for winter paddy and transplantation of seedlings are in progress. Condition of jute and effects of weather on its growth are favourable. Cutting, steeping and washing have commenced. Fodder is sufficient.
21	DACCA ...	[illegible]43	4½ to 4¾	4½ to 4¼	Early in the week the weather was sultry with occasional showers. It has been cyclonic during the last two days. Harvesting of jute and *aus* paddy is in progress. The gradual rise of water is beneficial to broad-cast *aman* paddy. Prospects of jute and *aus* paddy are fair. Cattle-disease is reported in the northern parts of the Sadar subdivision.
	Manikganj ...	5·30	4½	4½	
	Narayanganj	4·90	5	4½	
	Munshiganj*	5·35	4¼	4½	
22	MYMENSINGH	2 69	4½	4½	Weather hot. Transplantation of winter paddy and harvesting of jute and *aus* paddy continue. Prospects of standing crops are good. No damage to jute is reported. Fodder and water are sufficient.
	Jamalpur ...	1·69	4½	4½	
	Tangail ...	2 50	4⅛	(n)	
	Netrakona .	3·76	4½	4½	
	Kishorganj...	5·12	4½	4½	
23	FARIDPUR ..	2 75	4¼	4	Weather gusty and not very favourable to the standing crops. *Aus* paddy and jute have been slightly damaged in the *bheel* area of Goalundo subdivision by the sudden rise of rivers Harvesting of jute and *aus* paddy continues. Prospects are fair. Fodder is sufficient
	Goalundo ..	1·74	4⅕	4⅐	
	Madaripur	2·58	4¼	4½	
	Gopalganj†	0 38	5	4½	
24	BAKARGANJ (BARISAL).	1 33	4¾	4¾	Prospects of jute and other standing crops are fair. Weather is not favourable to jute. No damage done to the crop Harvesting has commenced Fodder is sufficient. Cattle-disease is reported from Matbaria thana.
	Pirojpur ...	1·63	5	5	
	Patuakhali...	3·43	5	5¼	
	Dakshin Shabazpur (Bhola).	2·16	4¼	4½	
25	CHITTAGONG	4·89	5½	5½	Prospects of standing crops are good. Transplantation of *bhadoi* paddy is going on Harvesting of *aus* crops is going on in places. *Panga* salt is selling at 11 and 9 seers per rupee at Sadar and Cox's Bazar, respectively. Fodder is sufficient.
	Cox's Bazar	0·41	5	5½	
26	TIPPERA (COMILLA).	2 17	4	4¼	The prospects of *aus* paddy are fair and those of jute are good. Harvesting of jute and *aus* paddy is going on. 88 men and 2 children worked daily on an average in test works in Brahmanbaria subdivision. Price of rice is still very high.
	Brahmanbaria.	4 57	5	5	
	Chandpur ...	0·92	4⅛	4	

* Munshiganj being very near to Dacca and Narayanganj, its rainfall statistics are not quoted To give information regarding the northern part of the district rainfall figures for Kapasia thana are reported here

† The rainfall at Haridaspur, which is very near to Gopalganj, is shown here

(n) Not reported.

REPORT ON FAMINE IN THE DISTRICT OF BANKURA FOR THE WEEK ENDING THE 2ND AUGUST 1919.

DURING the week the rainfall was general and sufficient. Agricultural prospects are good. Sixty-two relief works were open during the week. The number of persons relieved on works was 6,346. The number of persons in receipt of gratuitous relief was 20,445, viz., 15,297 on cash doles in 128 unions, 3,683 on paddy-husking advances, 885 weavers and 580 better class poor. The total number of persons relieved was 26,791. The increase in the number of persons on relief works was due to a partial cessation of field operations. The number of persons relieved on private works was 690. The charitable societies relieved 631 persons on weekly doles and 1,450 on daily doles and by cooked food. The position in regard to crime was unchanged. The physical condition of workers and public health are generally good. Sporadic cases of influenza are reported. Cloth is being distributed to destitutes. The relief measures are adequate. The price of common rice varies from 5 to 5½ seers per rupee. Burma rice is being sold.

M. C. MCALPIN,
Secy. to the Govt. of Bengal.

DACCA, *the 11th August 1919.*

RESOLUTION REGARDING PEACE CELEBRATIONS.

GOVERNMENT OF BENGAL.

POLITICAL DEPARTMENT.

Political Branch.

DACCA, THE 11TH AUGUST 1919.

RESOLUTION—No. 2028P.D.

IN view of the announcement made by the Government of India that the main peace celebrations will be held in India in the cold weather, the Governor in Council has decided to appoint a small Committee to consider the form which the celebrations should take in Calcutta and to organise suitable arrangements. The leading Calcutta Associations which were consulted in the matter have nominated their representatives and the Governor in Council is now pleased to appoint the following gentlemen to be members of the Committee :—

(1) Major E. D. Raymond, D.S.O., Deputy Assistant Adjutant and Quartermaster-General, representing the General Officer Commanding the Presidency Brigade.
(2) The Hon'ble Mr. W. E. Crum, O.B.E., representing the Bengal Chamber of Commerce.
(3) The Master of the Calcutta Trades Association.
(4) Maharaja Sir Pradyot Kumar Tagore Bahadur, KT., representing the British Indian Association.
(5) The Hon'ble Maharaja Sir Manindra Chandra Nandi, K.C.I.E., representing the Bengal Landholders' Association.
(6) Mr. G. H. C. Ariff, representing the Indian Muslim Association.
(7) Khan Bahadur Maulvi Abdus Salam, representing the Central National Muhammadan Association.
(8) The Hon'ble Raja Reshee Case Law, C.I.E., representing the Bengal National Chamber of Commerce.
(9) Babu Keshoram Poddar, representing the Marwari Association.
(10) Dr. S. K. Mullick, M.D., C.B.E., representing the Calcutta Corporation.
(11) Mr. N. C. Sircar, representing the Indian Association.
(12) The Chairman of the Corporation of Calcutta.
(13) The Commissioner of Police, Calcutta.
(14) The Commissioner of the Presidency Division.
(15) The Collector of Calcutta.

3. The Chairman of the Calcutta Corporation will convene a preliminary meeting of the Committee at an early date for the purpose of electing a President and executive officers and arranging the general lines of action. The Committee are authorised to co-opt any additional members whose services would be useful, and it is open to them to act either as a whole or through sub-committees. It is the desire of Government to give the Committee a free hand in every respect in organising celebrations worthy of Calcutta, but the Governor in Council will be glad to give all the assistance in his power.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Chairman of the Calcutta Corporation for information and necessary action.

Ordered also that a copy of this resolution be forwarded to each member of the Committee for information and guidance.

Ordered also that a copy be published in the *Calcutta Gazette* for general information.

By order of the Governor in Council,

J. H. KERR,

Chief Secy. to the Govt. of Bengal.

REPORT ON THE WORKING OF THE LICENSED WAREHOUSE AND FIRE BRIGADE ACT, I OF 1893.

NOTIFICATION.

No. 311xM.—The 8th August 1919.—The following is published for general information, under section 41 of the Licensed Warehouse and Fire Brigade Act, 1893 (Bengal Act I of 1893).

S. W. GOODE,
Offg. Secy. to the Govt. of Bengal.

No. 27M./1-5, dated Chinsura, the 14th July 1919.

Memo. by—J. N. GUPTA, ESQ., M.B.E., I.C.S., Commissioner of the Burdwan Division.

COPY, with copies of the enclosures, submitted to the Secretary to the Government of Bengal, Municipal Department, Municipal Branch.

No. 1,576/XXIV-17, dated Howrah, the 2nd July 1919.

Memo. by—The Magistrate of Howrah.

COPY with the copies of the enclosures forwarded to the Commissioner of the Burdwan Division for information.

No. 778G., dated Howrah, the 20th June 1919.

From—THE HON'BLE BABU MAHENDRA NATH RAY, M.A., B.L., C.I.E., Chairman of the Howrah Municipality,

To—The Magistrate of Howrah.

I HAVE the honour to submit herewith the statements showing the warehouses licensed under the Fire Brigade Act, I of 1893, and receipts and disbursements on account of the same for the year 1918-19.

The collection of fees works out to be 90 per cent. of the current demand and 55 per cent. of the arrear demand, as against 98 per cent. of the current demand and 53 per cent. of the arrear demand reported for the year 1917-18.

The demand for the year 1918-19 amounts to Rs. 20,739 and the collection amounts to Rs. 18,753, as against the demand of Rs 18,301 and the collection of Rs. 17,895 for the year 1917-18.

This two-fold increase in the demand and collection as aforesaid necessitated no revision of the scale of fees levied under section 10 of the Act.

The direction contained in the first proviso to section 10 of the Act was followed.

STATEMENT OF RECEIPTS AND DISBURSEMENT, 1918-19.

DEPARTMENT OF AGRICULTURE, BENGAL.

First Forecast of the Cotton Crops of Bengal, 1919-20.

(Note.—On an average of the five years ending 1916-17, the area under the cotton crops in Bengal has represented some 0·3 per cent. of the total area under cotton in India.)

THERE are two crops—early and late. The "early" crop is chiefly grown in the Chittagong Hill Tracts and in the State of Hill Tippera and to a small extent in other districts. The "late" crop is grown in Bankura and Midnapore.

Character of the Season.—Owing to insufficient rain at sowing time, the weather was not generally favourable. Subsequent rainfall, however, being generally moderate has improved the prospects of the crop and the present condition, on the whole, is reported to be good.

Area Sown.—The area sown with early cotton is reported to be 70,272 acres this year, against 70,097 acres reported in the corresponding forecast of last year.

Of the late crop, 303 acres are reported to have been sown up to date against 700 acres in the corresponding forecast of last year.

ROBERT S. FINLOW,

Offg. Director of Agriculture, Bengal.

DACCA :

The 5th August 1919.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 7th August 1919.

Summary.—Excepting heavy showers in a few districts, light to moderate rain was general. Transplanting of winter paddy and reaping of autumn paddy and cutting, steeping and washing of jute are progressing. More rain is wanted in North Bengal for transplanting of winter paddy and steeping of jute. Some damage to jute by insect pests is reported from some places of West Bengal. The prospects of standing crops are reported to be fairly good. The average price of common rice for the province has risen by about 2·37 per cent. as compared with that of the previous week. The average number of persons engaged daily on test works in the Brahmanbaria subdivision of Tippera district was 84.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee. This week.	Price of common rice, in seers, per rupee. Previous week.	Character of the weather, condition of crops, etc.

REPORT ON FAMINE IN THE DISTRICT OF BANKURA FOR THE WEEK ENDING THE 9TH AUGUST 1919.

THE rainfall during the week was general and sufficient. Transplantation on high land has been nearly completed. The distress is decreasing owing to improvement of agricultural prospects. Fifty-four relief works were open during the week and the number of persons relieved on them was 4,001. The total number of persons on gratuitous relief was 19,505, viz., 14,357 on cash doles in 128 unions, 3,683 on paddy-husking advances, 885 weavers and 580 better class poor. The grand total of persons relieved was 23,506. The number of persons relieved on private works was 875. The charitable societies also relieved 765 persons on weekly rice doles and 1,150 on doles of cooked food. Crime against property continues to be high. The physical condition of persons on relief works and the public health was generally good. Sporadic cases of cholera and malaria are reported. Cloth is being distributed to destitutes. The relief measures are adequate. The price of common rice varied from 5¼ to 5½ seers per rupee. Burma rice is being sold.

M. C. MCALPIN,
Secy. to the Govt. of Bengal.

Dacca, the 14th August 1919.

CONSTITUTION OF A PERMANENT COMMITTEE UNDER RULE 3 OF THE RULES ISSUED UNDER THE MUHAMMADAN MARRIAGE REGISTRATION ACT, I OF 1876.

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Registration Branch.

DACCA, THE 11TH AUGUST 1919.

RESOLUTION—No. 1072T. R.

READ—

Resolution No. 1660T. R., dated the 21st October 1915, sanctioning the constitution of a permanent committee for the supervision of Muhammadan Registrars and Kazis in the Bengal Presidency.

Read also—

Rule 3 of the Rules under the Bengal Muhammadan Marriages and Divorces Registration Act, I of 1876, published with Government notification No. 4000-Regn., dated the 30th April 1918.

As the term of the permanent committee appointed under the Government Resolution quoted in the preamble has expired, the Governor in Council directs the constitution of a new permanent committee for the Bengal Presidency, which will be composed of the gentlemen named below :—

(1) Inspector-General of Registration, *President* (*ex-officio*).
(2) Mirza Saiyid Muhammad Kazem Shiraji.
(3) Shamsul Ulama Hedayet Hossain.
(4) Mr. S. Mahboob Ali.
(5) The Hon'ble Maulvi A. K. Fazlul Haq.
(6) The Hon'ble Dr. A. Suhrawardy.
(7) Nawab A. F. M. Abdur Rahman, Khan Bahadur.

ORDER—Ordered that this Resolution be published in the *Calcutta Gazette*.

Ordered also that copies of the Resolution be forwarded to the Inspector General of Registration and to all District Registrars for information.

By order of the Governor in Council,

M. C. McALPIN,

Secy. to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL REPORTS OF THE VETERINARY COLLEGE, AND OF THE CIVIL VETERINARY DEPARTMENT, BENGAL, FOR THE YEAR 1918-19.

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Agriculture Branch.

RAMNA (Dacca), THE 16TH AUGUST 1919

RESOLUTION—No. 1133T.R.

READ—

The Annual Reports of the Veterinary College and of the Civil Veterinary Department, Bengal, for the year 1918-19

COLONEL A. SMITH, Principal, Bengal Veterinary College, continued to hold charge of the College as well as of the office of Superintendent, Civil Veterinary Department, throughout the year, Mr. P. J Kerr and Mr. A D MacGregor being still absent on military duty. As in the previous year, all touring and inspection work of the department was performed by Babu Sarat Chandra Pal, Deputy Superintendent, who was on tour for 73 days, and inspected most of the important hospitals and dispensaries of the province. One veterinary assistant of the department returned from field service at the conclusion of the term of his agreement for two years, while seven others were on military duty.

2. The number of students at the Bengal Veterinary College at the end of the session was 165, of which number 63 belonged to Bengal, while most of the others came from Bihar and Assam. There has been a steady increase in the number of students the figures for the previous three years being 135, 148 and 157; of these numbers 51, 54 and 55 respectively belonged to Bengal. Thirty-three students graduated from the College at the close of the session. Nine graduates belonged to Bengal and have subsequently been employed as veterinary assistants; but there is still a demand for qualified assistants. To improve their prospects their pay has been raised from Rs. 30—$\frac{10}{5}$—70 per mensem to Rs. 50—$\frac{10}{2}$—100 per mensem. The Governor in Council trusts that the improved prospects will attract a large number and a better class of students to the Bengal Veterinary College and thereby improve the efficiency of the department

3. The report of the Civil Veterinary Department shows a considerable decrease in the mortality of animals from contagious diseases during the year, the total number of deaths reported being 15,569 as against 26,186 in the previous year, The most striking decrease was under the head rinderpest, the number of deaths being 10,772 as compared with 21,126 in the previous year. The decrease is reported to be due to the proper organisation of inoculation campaigns by the Veterinary Department in the affected localities. The death-rate from anthrax was, however, heavier this year than last year, owing to a particularly severe outbreak in the Sundarbans of the 24-Parganas. It is reported that, owing to the nature of this malady, its sudden onset and rapidly fatal termination only in a few cases were veterinary assistants able to reach the seat of trouble in time to be of any assistance.

There were virulent outbreaks of rinderpest during the year all over Calcutta and its suburbs. Prompt measures were taken in each outbreak to prevent its spread and inoculation was performed in 4,981 cases.

4. During the year under report the itinerant veterinary assistants visited 13,462 villages and treated 58,025 animals, compared with 11,520 villages and 67,333 animals in the previous year.

5. In Calcutta and its [illegible] Glanders and farcy were detected [illegible] and surra [illegible] stables against two and three respectively in the previous year. In the [illegible] 17 deaths from glanders were reported as against 27 in the previous year. The mortality was the highest in the district of Bakarganj, where 13 cases occurred.

6. The number of stud bulls kept by Government and local bodies increased from 68 in the previous year to 104 in the year under review. Only 44 of these are the property of local bodies.

7. Four new dispensaries were recognised at Siliguri, Bankura, Satkhira and Chuadanga during the year, thus bringing the total number of such institutions to 31 as against 27 in the preceding year. The number of patients treated during the year was 43,312 as against 34,889 in the previous year. The Superintendent reports that the increase in the number of cases shows that the usefulness of these institutions is being fully appreciated by the public. The Governor in Council notices with satisfaction that arrangements are being made by the District Boards of Noakhali Tippera and Bakarganj for the construction of veterinary dispensaries with quarters for veterinary assistants at Feni. Brahmanbaria and Patuakhali, respectively. No provision has, however, yet been made by the District Board of Murshidabad. Rajshahi, Jessore or Midnapore for such buildings. His Excellency in Council trusts that this omission will soon be remedied and that efforts will also be made by District Boards generally to bring the numbers of veterinary assistants in their district up to the sanctioned strength as soon as they can be supplied from the College by the Principal.

8. Though the report is evidence of the fact that much good work is being done by the department. the Governor in Council considers that, in order to popularise the work of the veterinary assistants and to extend their sphere of utility, each District Board should appoint a sub-committee consisting of two or three members to deal with the veterinary work of the Board.

9. The work of the Deputy Superintendent, Civil Veterinary Department, inspectors and of the staff of the Bengal Veterinary College was satisfactory. His Excellency in Council has much pleasure in acknowledging the valuable services of Colonel Smith and his zeal for the welfare of both the college and the department.

By order of the Governor in Council,

M. C. McALPIN

Secy. to the Govt. of Bengal.

REPORTS ON THE WORKING OF THE SHIPPING OFFICES IN BENGAL FOR THE YEAR 1918-19.

NOTIFICATION.

The 13th August 1919.

No. 102Marine.—The following annual reports on the working of the shipping offices in Bengal for the year 1918-19 are published for general information.

F. A. A. COWLEY,
Secy. to the Govt. of Bengal.

No. S.-1926, dated Calcutta, the 23rd July 1919.

From—The Shipping Master, Calcutta,

To—The Secretary to the Govt. of Bengal, Marine Department.

I HAVE the honour to submit herewith for the information of Government the Annual Report of the Calcutta Shipping Office for the year 1918-19.

A comparative statement of the number of seamen shipped and discharged under European and Indian articles for the years 1917-18 and 1918-19 is given below, from which it will be observed that the number of seamen shipped and discharged under European articles shows a little decrease, but a considerable increase is shown under the Indian articles. Further details as per Appendix I.

Shipped.

Articles.	1917-18.	1918-19.	Increase.	Decrease.
European	954	936	...	18
Indian	34,021	35,403	1,382	...
Total ...	34,975	36,339	1,382	18

Discharged.

Articles.	1917-18.	1918-19.	Increase.	Decrease.
European	1,499	1,746	247	...
Indian	23,730	25,439	1,709	...
Total ...	25,229	27,185	1,956	...

There were 66 Eurasians shipped on European and 193 on Indian articles during the year, as compared with 40 and 277 in the previous year.

Number of Chinese seamen shipped and discharged under Chinese articles during the present year is given below:—

Year.	Shipped.	Discharged.
1918-19	775	103

The figures below represent the number of seamen of various nationalities shipped and discharged at the consulates, details of which are shown in Appendix II.

These figures are not included in Appendix I.

Nationalities.	Shipped.	Discharged.	Nationalities.	Shipped.	Discharged.
Americans ...	4	...	Japanese ...	2	...
British ...	3	...	Norwegian ...	14	13
Chinese ...	51	18	Portuguese ...	1	...
Danish ...	9	5	Russians ...	[illegible]	1
Arabs ...	1	4	Spaniards ...	2	...
Egyptains ...	1	...	Swedish ...	30	19
Greeks ...	2	...			
Indians ...	1	9	Total ...	124	69

The number of seamen on European articles who deserted their vessels and failed to join was 11 and the numbers on Indian articles 393. The majority were replaced by substitutes.

Repatriation of distressed seamen.—The total number of seamen repatriated during the year was 84 of whom 54 were repatriated owing to illness, 14 on termination of agreement, one on account of injury, 10 under mutual consent, and 5 on account of venereal disease.

Relief to seamen.—The work-house afforded relief to 6 seamen at a cost of Rs. 253-8; of these one was sent to Lunatic Asylum at Ranchi, 3 absconded, one obtained employment, and one is still in that institution.

Twenty-five destitute seamen were admitted into the Sailors' Home during the year, and a loss of Rs. 253 was sustained owing to seamen being unable to pay their board: 15 seamen were relieved in the Alms House by the District Charitable Society at a cost of Rs. 1,486-8. Rupees 1,61,530 was paid to the crews of enemy vessels on account of balance of wages during the year, of which Rs. 29,742 was debited against the Board of Trade.

Compensation to Seamen of Sunken Vessels.—Rupees 1,860 was paid by the Government of Bengal for loss of effects to the surviving members of the crews of vessels sunk by enemy action and Rs. 5,124 by the Indian Relief Fund through this office as further compensation to the crews.

Relief granted to the dependants of interned seamen.—The amount of relief given to the dependants of seamen interned in Germany by the Indian Relief Fund through this office amounted to Rs. 4,440.

Administration of Trust Fund.—Appendix III shows the transactions during the year of funds held in trust under different heads.

Stamped papers to the value of Rs. 97-6 were used on account of security in disposing of the estates of deceased Indian seamen.

The balance of accumulated funds at the commencement of the year was Rs. 52,024 and the receipts during the year Rs. 1,68,424.

The payment from the funds amounted to Rs. 1,12,080, and Rs. 3,298 lapsed to Government, leaving a balance of Rs. 1,05,070 in deposit at the close of the year.

Transaction with Board of Trade.—Rupees 1,11,873 represents the transactions with the Board of Trade. The sum of Rs. 29,742 paid on account balance of wages to seamen of enemy vessels and Rs. 43,835 paid to seamen under the Board of Trade scheme for loss of their effects through enemy action are included in the total transaction with the Board of Trade.

European Seamen's Money Orders.—A sum of £ 366 was remitted by seamen to their relatives in the United Kingdom, as compared with £ 56 of the previous year.

Financial results.—The figures below give the financial result of the office for the last five years:—

Year.	Receipts.	Disbursements.	Savings
	Rs.	Rs.	Rs.
1914-15	1,04,854	61,599	43,345
1915-16	94,319	57,069	36,650
1916-17	94,074	69,238	24,736
1917-18	76,929	58,855	18,074
1918-19	86,356	60,250	26,106

A comparison in the savings of the present and the previous year shows an increase of Rs. 8,032 due to more fees and other receipts received during the year.

Expenditure.—Appendix IV details particulars of the receipts and expenditure of the year.

Administrative changes.—The following changes have taken place:—

Mr. C. S. Cameron has been acting as Assistant Shipping Master, Kidderpore, in place of Mr. C. H. Sharp who is still on leave and is in charge of the Discharge Certificate Department. The shipping and discharging work of the Branch Shipping Office has been done under the supervision of Mr. S. H. Reaks, M.B.E., who held the post of the Assistant Port Officer and Deputy Shipping Master throughout the year in addition to his own duties.

Captain D. F. Vines, O.B.E., R.I.M., was Shipping Master throughout the year under report.

No. 418., dated Chittagong, the 21st May 1919.

From—The Shipping Master, Chittagong,

To—The Commissioner of the Chittagong Division.

I HAVE the honour to submit herewith the Annual Administration Report of the Shipping Office for the financial year 1918-19, together with Appendices I to III.

2. **Financial results.**—The amount received during the year was Rs. 1,957 and that expended was Rs. 580. The accompanying statement I shows the particulars of the receipts and expenditure of the past two years with explanation of the principal fluctuations.

3. **Trust Funds.**—The opening balance of the year under review was Rs. 1,058 and the receipts Rs. 1,23,835 or Rs. 30,541 in excess of that of the previous year; the payments were Rs. 1,22,589, leaving a balance of Rs. 2,304 at the close of the year as shewn in statement II annexed.

4. **Seamen shipped and discharged.**—The number of seamen of all nationalities shipped and discharged during the year under report was 171 and 694 respectively, against 169 and 579 in the previous year as shewn in the statement III annexed.

5. **Inspection of vessels.**—The number of ships which arrived at this port during the year 1918-19 was 28 (excluding regular coasting steamers) against 22 in the previous year; of these 4 ships were manned solely by Europeans, 1 ship was manned by Japanese, 14 ships were manned by mixed crews of Europeans, Asiatics and Indians, and 9 ships were manned exclusively by natives of India. All the foreign-going ships were inspected by the Port Health Officer.

6. **Condition of seamen.**—There were 16 seamen admitted into the Chittagong General Hospital against 5 during the preceding year. Of the total admission 12 were discharged as cured, 2 discharged otherwise, one died and one is still in hospital. There were no cases of scurvy or death resulting from bad or insufficient food on board ships during the year under report.

7. **Seamen's Money Order.**—No remittances of wages were made to the United Kingdom by means of Seamen's Money Order.

8. **Deserters.**—Twelve lascars deserted during the year against 3 in the previous year. There was no deserter among European seamen.

9. **Deaths.**—Three deaths occurred among the sea-faring community at this port during the year under report. One Mr. Theodore Ericsson, a Swedish subject, carpenter on board the SS. *War Anemone*, whilst returning to the ship at night, accidentally fell into the river; his body was recovered three days after. One Din Mahamed, Indian fireman, on board the SS. *Marwari*, jumped overboard at sea and was never seen again.

10. **Offences.**—No cases were tried by the Magistrate under the Indian Merchant Shipping Act I of 1859 during the year under report.

STATEMENT I.

Showing the financial results of the working of the Shipping Office Chittagong for the year ending 31st March 1919.

Heads of receipts.	1918-19.	1917-18.	Increase.	Decrease.	Heads of expenditure.	1918-19.	1917-18.	Increase.	Decrease.

					Overtime fees	16	...	16§	...
Total ...	1,957	665	1,292	...	Total ...	580	677	34	131

* The increase of discharging fees is due to the greater number of vessels having paid off.
† The increase under this head is due to the balance of wages amounting to Rs. 1,046 of certain Indian seamen deserted from vessels having been forfeited to Government.
‡ The decrease is due to the present Shipping Clerk having been paid at Rs. 30, *i.e.*, the minimum pay of the post up to 5th October 1917.
§ This amount was drawn by officers performing overtime work afloat.

STATEMENT II.

Receipts and disbursements on behalf of Seamen discharged from the Port of Chittagong.

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR JULY 1919.

I. **Character of the Season.**—The rainfall throughout the province was in excess of the normal everywhere except in the districts of Murshidabad, Burdwan, Midnapore, Hooghly and Dinajpur, where the fall was slightly defective. The usual rainfall statement is appended.

II. **Progress of the Agricultural Operations.**—Transplantation of winter paddy was proceeding under generally favourable conditions, but the progress was retarded in some districts of North and West Bengal for want of sufficient rainfall. Reaping of autumn paddy and cutting, steeping and washing of jute continued.

III. **State of Standing Crops.**—The condition of autumn paddy, jute and other standing crops was fairly good on the whole.

IV. **Prospects and Probable Outturn.**—A fairly good outturn of autumn paddy is anticipated. The prospects of winter paddy were generally reported promising.

V. **Damage to Standing Crops.**—Slight damage to the jute crop by insect pests was reported from some districts, mostly in West Bengal. In the low-lying tracts of Pabna and Faridpur jute, autumn paddy and deep water *aman* paddy also suffered some damage by flood.

VI. **Condition of Agricultural Stock.**—The condition of agricultural stock was generally fair. Cattle-disease was found to exist in the districts of Nadia, Murshidabad, Khulna, Burdwan, Midnapore, Hooghly, Dinajpur, Jalpaiguri, Malda, Cooch-Behar, Bakarganj and Tippera.

VII. **Failure of Pasturage and Fodder.**—The supply of fodder was sufficient throughout the province, except in the flooded tract in the district of Bogra.

VIII. **Prices of Food-grains.**—During the second fortnight of the month under review the price of common rice for the province rose in nineteen districts, fell in three and remained stationary in the rest. It varied from 4 seers per rupee at Rangpur to 6 seers at Jessore, Khulna and Jalpaiguri.

IX.—**Condition of Agricultural People.**—Distress continued to prevail in the Brahmanbaria subdivision of Tippera. Relief measures continued.

J. C. ROY,
for *Director of Agriculture, Bengal.*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 14th August 1919.

Summary.—Light to moderate rain fell throughout the province. Reaping of autumn paddy is in progress. Transplanting of winter paddy and cutting, steeping and washing of jute are proceeding but the operations are being retarded in the northern and eastern districts for want of sufficient rain. Slight damage to jute by insects is reported from some West Bengal districts. The prospects of standing crops are reported to be fairly good. The average price of common rice for the province has risen by about 0·61 per cent. as compared with that of previous week. The average number of persons engaged daily in test works in the Brahmanbaria subdivision of Tippera district was 302.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee. This week.	Price of common rice, in seers, per rupee. Previous week.	Character of the weather, condition of crops, etc.

	Rampurhat	3·40	4¾	5	
8	BANKURA ...	2·30	5½	5½	Transplantation of paddy has been nearly finished. Prospects of standing crops are good. Export of rice and paddy continues.
	Vishnupur ...	2·19	5⅝	5½	
9	MIDNAPORE	7·53	5½	5¾	Transplantation of winter rice continues. Condition and prospects of jute, *bhadoi* paddy and other *bhadoi* crops are fair. Fodder and water are sufficient.
	Ghatal ...	5·84	5⅝	5⅝	
	Tamluk ...	1·22	6	6	
	Contai ...	5·16	6½	6½	
10	HOOGHLY ...	2·72	$4\frac{9}{16}$	4¾	Effects of weather on the growth of the crops are favourable. Price of rice is rising. Condition and prospects of jute are fair. Harvesting is going on. Cattle-disease is reported from Palba thana. Damage by insect-pests is reported from Sadar and Serampore subdivisions. Fodder is sufficient.
	Serampore ...	1·36	$5\frac{5}{16}$	$5\frac{5}{16}$	
	Arambagh ...	4·25	5¾	6	
11	HOWRAH ...	3·00	5	5	Weather seasonable. Condition of sugarcane is good. Transplantation of *aman* paddy continues. Condition of jute is good. Slight damage by insects has been done in Ulubaria subdivision. Harvesting of jute continues in low lands Fodder is sufficient.
	Ulubaria ...	4·89	5½	5½	
12	RAJSHAHI (RAMPUR-BOALIA).	3·84	4⅜	4½	The prospects of jute and other standing crops are favourable. Harvesting of jute and *aus* paddy continues. Damage by flood is reported from some places in Sadar subdivision. Fodder is sufficient.
	Naogaon ...	1·48	4¾	4¾	
	Nator ...	2·17	4¾	4½	
13	DINAJPUR ...	0·57	5⅛	5⅜	Prospects of jute and other *bhadoi* crops are not favourable in the Sadar subdivision. More rain is wanted in Sadar and Balurghat subdivisions for transplanting of winter paddy. Rice market is rising owing to exports.
	Thakurgaon	1·51	5½	6	
	Balurghat ...	0·78	4⅞	5	

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee. This week.	Previous week.	Character of the weather, condition of crops, etc.
1	2	3	4	5	6
		Inches			
14	JALPAIGURI	3·58	5	5½	Weather hot. Harvesting of jute continues. Water is insufficient for transplanting of winter paddy. Prospects of standing crops are fair. Fodder is sufficient.
	Alipur ...	2·47	5	5	
15	DARJEELING	5·12	4½	4½	Harvesting of potatoes and maize continues. Marua and cardamom are progressing. Standing crops are growing well. Condition and prospects of jute are fair. Effects of weather on the growth of jute are fair. No damage. Cutting and steeping of jute have begun. Transplanting of autumn paddy is retarded owing to drought in Terai. Winter paddy is being transplanted in the hills. The supply of fodder and water is sufficient. Stock of food-grains is insufficient.
	Kurseong ...	3·65	4½	4½	
	Siliguri ...	1·57	4	4	
	Kalimpong ...	6·59	5½	5	
16	RANGPUR ...	0·57	4¼	4	Weather seasonable. Cutting and steeping of jute and harvesting of *aus* paddy continue, but the steeping of jute is being retarded by want of rain. The condition and prospects of jute are good. More rain is urgently wanted for winter rice. Weather is not favourable for winter rice. Fodder and water are sufficient. Cattle-disease is reported from Domar, Saidpur and Nilphamari thanas.
	Nilphamari	0·28	4 1/16	4⅛	
	Kurigram ...	0·16	4½	5	
	Gaibandha ...	0·39	4½	4½	
17	BOGRA ...	1·66	4⅛	4½	More rain wanted. Harvesting of *aus* paddy, cutting and steeping of jute and transplanting of winter paddy continue. Steeping of jute is retarded for low flood. Prospects of jute are otherwise fair. Fodder is insufficient in flooded area.
18	PABNA ...	4·48	5	5	*Aus* paddy has been harvested. Jute crop has been harvested to the extent of four annas but the operation has been stopped in Sirajganj subdivision temporarily for want of water. Supply of fodder is tolerable.
	Sirajganj ..	0·43	4¼	4⅕	
19	MALDA ...	9·91	5	5	Weather hot and cloudy. Transplanting of winter paddy in Kharba thana is retarded for want of rain. Prospects of jute are fair. No damage to crop is reported. Harvesting of *bhadoi* paddy continues. Slight damage by flood is reported from Gomastapur. Fodder and water are sufficient.

Serial No.	Districts and subdivisions.	Rainfall.	Price of common rice, in seers, per rupee. This week.	Price of common rice, in seers, per rupee. Previous week.	Character of the weather, condition of crops, etc.
1	2	3	4	5	6
		Inches			
20	COOCH BEHAR	4·20	6 3/8	(n)	Weather hot with occasional rains. Harvesting of *bitri* paddy is going on. Preparation of lands for *haimanti* paddy going on and transplantation of its seedlings is retarded for want of rain. Prospects and condition of jute and effects of weather on its growth are favourable. Cutting, steeping and washing are going on. Fodder is sufficient.
21	DACCA ...	1·93	4 3/4	4 1/2	Weather seasonable. The decrease of water level is likely to cause damage to broadcast and transplanted *aman* paddy and to other standing crops. Harvesting of jute and sugarcane continues. Prospects of jute are fair.
	Manikganj ...	2·09	4 1/2	5 1/2	
	Narayanganj	0·99	4 1/2	4 1/2 to 4 3/4	
	Munshiganj*	0·94	4 1/2	5	
22	MYMENSINGH	0·26	4	4 3/8	Weather hot. More rain is badly wanted. Transplantation of winter paddy and harvesting of jute and *aus* paddy continue. Want of rain is affecting the transplantation of paddy and steeping of jute. Prospects are fair. Fodder is sufficient, but insufficiency of water is feared.
	Jamalpur ...	Nil	4 1/2	4 1/2	
	Tangail ...	3·76	4 1/8	4 1/8	
	Netrakona ...	1·01	4	4 1/4	
	Kishorganj ...	0·58	5 1/2	4 1/2	
23	FARIDPUR ...	4·49	4 7/8	4 3/4	Weather is favourable to the standing crops. Harvesting of *aus* paddy is nearly finished and that of jute continues. Prospects are fair. Fodder is available.
	Goalundo ...	2·14	5	4 4/7	
	Madaripur ...	2·71	4 5/8	4 5/8	
	Gopalganj† ...	2·27	5	4 1/4	
24	BAKARGANJ (BARISAL).	1·65	4 5/8 / 6 1/2‡	4 3/4	Prospects of jute are good and those of other crops fair. Weather is favourable to jute. No damage done to the crop. Harvesting continues. Fodder is sufficient. Cattle-disease is prevalent in Mathbaria thana.
	Pirojpur ...	2·21	4 3/8	(n)	
	Patuakhali ...	0·88	4 1/2 / 5‡	5	
	Dakshin Shabazpur (Bhola).	1·86	4 1/4	(n)	
25	CHITTAGONG	7·66	5	5 1/2	Prospects of standing crops are good. Cultivation of *aman* paddy is going on. Harvesting of *aus* crop is progressing. *Panga* salt is selling at 10 and 9 seers per rupee at Sadar and Cox's Bazar, respectively. Fodder is sufficient.
	Cox's Bazar	13·90	4 1/2	5	
26	TIPPERA (COMILLA).	3·02	4 13/16	4 13/16	The prospects of *aus* paddy are fair and those of jute are good. Harvesting of jute and *aus* paddy and transplanting of *aman* paddy are going on. More water is needed for steeping of jute and for the growth of *[illegible]arshall* paddy in Brahmanbaria subdivision: 287 men and 15 children worked daily on an average in test works and for eradicating water hyacinth in Brahmanbaria subdivision.
	Brahmanbaria.	0·69	4 28/35	5	
	Chandpur ...	1·85	4 13/16	4 1/2	

* Munshiganj being very near to Dacca and Narayanganj, its rainfall statistics are not quoted. To give information regarding the northern part of the district rainfall figures for Kapasia thana are reported here.

† The rainfall at Haridaspur, which is very near to Gopalganj, is shown here.

(n) Not reported. ‡ *Aus* rice.

RESOLUTION ON THE RECOMMENDATIONS OF THE PUBLIC SERVICES COMMISSION, REGARDING THE SANITARY DEPARTMENT.

GOVERNMENT OF BENGAL.

MUNICIPAL DEPARTMENT.

Sanitation Branch.

CALCUTTA, THE 22ND AUGUST 1919.

RESOLUTION No. 894San.

READ—

The Report of the Royal Commission on the Public Services in India.

THE recommendations of the Public Services Commission made in Chapter XI of Annexure XII, regarding the Sanitary Department, are under the consideration of the Governor in Council, and this Resolution is published in order to give the public an opportunity of expressing their views on the

formation and conditions of service of a public health service and on the question of recruitment for the higher administrative posts of that service.

2. The creation of a well-organized public health service is recognized as being a matter of the first importance. It is for the Imperial Government on the one hand to provide facilities for research into the epidemiology of disease and to place trained scientists who have made a special study of the causation and prevention of particular maladies at the service of the provincial Governments at times of unusual epidemics.

The organization of a public health staff is, on the other hand, a duty which devolves upon the local Governments. It has been pointed out that medical research in its relation to public health has outstripped the means for applying it and that what is required is to strengthen and, above all, to direct and organise the small band of sanitary officers in whose hands the improvement of the public health is placed. The municipal boards of this presidency have already appointed qualified medical officers of health or sanitary inspectors to advise them on the highly specialised problems of public health; a medical officer of health will shortly be added to the staff of each district board.

There will then exist in this Presidency the nucleus of a trained public health service. The appointment and recruitment of this staff on which the future sanitary progress of Bengal will so largely depend, raise three important questions on which the Governor in Council desires to ascertain the views of those interested in problems of public health :—

(*a*) the manner of selection and appointment of public health officers ;

(*b*) their status and conditions of service ; and

(*c*) the sources of recruitment for the higher administrative posts of the department.

In reference to (*a*). the Governor in Council has in contemplation the formation of a Bengal Advisory Board of Health, composed entirely of experts and containing a strong Indian element. It is suggested that the selection of candidates for the Department of Public Health might suitably form part of their functions. The question of the status and the conditions of service (*b*) of public health officers raises an important issue. It has been proposed that there should be in each province a general cadre from which local bodies should, through the medium of the Advisory Board of Public Health, obtain their medical officers of health. It is urged that the best means of securing an efficient public health department is the provincialization of the service. The officers employed by municipalities or district boards would be under the complete executive control of these bodies; their appointment, promotion suspension or dismissal would rest finally with the Advisory Board of Public Health. The preferences and dislike of local bodies, their award of praise or blame would receive the fullest consideration from the Advisory Board, but the fixity of tenure in his office which is necessary to ensure the independence and activity of a medical officer of health or sanitary inspector can, it is suggested, be only secured by the creation of a provincial cadre, the officers of which will be lent to local bodies, as assistant and sub-assistant surgeons are now deputed to work under dispensary committees.

It is recognized that such a proposal is not in accord with the accepted policy of relaxing outside control over local establishments and (subject to certain safeguards) of allowing local bodies, who pay for a staff, to appoint and dismiss it, but it is urged that in the case of the public health service this policy must yield to the necessity of enabling these officers to discharge their often unpopular duties in a fearless and impartial manner. In the United Kingdom it has been sought to achieve this end by requiring the sanction of the Local Government Board to the dismissal of medical officers of health employed by local bodies, but this control has not proved effective, and in view of the likelihood of a wide extension of a public health organisation

[illegible] the Governor in Council is led to consider [illegible] to anticipate evils which have already arisen in England and which, under a similar system, will no doubt arise in India.

3. The higher administrative posts, which the service will possess, will be those of the Sanitary and Deputy Sanitary Commissioners whose designations, it is proposed, might suitably be changed to "Director" and "Assistant Director", Public Health. These posts are at present filled by recruiting (1) members of the Indian Medical Service and (2) qualified private persons who do not belong to that service. The Commission desired that the employment of an Indian agency for the development of the sanitary administration in this country should be encouraged as much as possible. They recommended that facilities should be provided to enable statutory natives of India to obtain a diploma in public health and instruction on tropical hygiene without going to Europe, and the Governor in Council is in complete accord with the Commission in this matter. Courses in public health have already been established which will enable local bodies to obtain trained sanitarians as medical officers of health. It is, however, to be determined what qualifications the Assistant Directors of Public Health should be required to possess, and whether all such posts should be open to men recruited in India, or whether any fixed proportions should be laid down for Indians and non-Indians, or for members of the Indian Medical Service, or persons not belonging to that service.

It is pointed out that the large war reserve, which must be maintained for such a service as the Indian Medical Service must, for reasons of economy, be largely utilized in civil appointments during times of peace, and it is contended that the administrative experience and training in sanitary work which the officers of this service acquire must form the backbone of the higher administration of public health. On the other hand, it is urged that the Sanitary Department is by no means popular with the Indian Medical Service and that there is no reason why the public health service should not be Indianized from top to bottom, if proper facilities for the study of tropical medicine and of tropical hygiene are provided in India. Some general principle must be enunciated, but it may be convenient to state that principle with such elasticity as to allow the Advisory Board ample latitude in its application.

4. The question of the pay of Indian Medical Service officers in the department of Public Health will depend in the main upon the rates fixed for officers of that service generally.

Whether the present rate of pay for non-Indian Medical Service members, accompanying high administrative posts, is inadequate to attract and retain men of the right stamp is a matter for consideration. It is suggested that in any case the engagement of such officers or at least a five-year agreement, with provident fund benefits, is desirable.

5. It is requested that any suggestions or criticisms which any person or body of persons interested may desire to offer on the above questions may be forwarded to the Secretary to the Government of Bengal, Municipal Department, not later than the 7th September 1919.

By order of the Governor in Council,

S. W. GOODE,

Offg. Secy. to the Govt. of Bengal.

RESOLUTION ON THE [illegible]

GOVERNMENT OF BENGAL.

MARINE DEPARTMENT.

Marine Branch.

CALCUTTA, THE 25TH AUGUST 191[illegible].

RESOLUTION—No. 2678Marine.

READ—

Letter from the Vice-Chairman, Port Commissioners, Calcutta, No. 11846, dated the 20th February 1919, submitting the Budget Estimate of income and expenditure of the Howrah Bridge for the year 1919-20.

Receipts.—The total receipts during the year are estimated at Rs. 3,70,000 as compared with Rs 3,35,000 the revised estimate for 1918-19. In view of the actual earnings, viz, Rs. 1,00,646 from August to November 1918, from the East Indian Railway traffic to and from Howrah, which is the main source of revenue of the Bridge, the receipts under this head during the year have been placed at Rs 3 00,000 as against Rs. 2,65,000 during 1918-19.

Expenditure.—The total expenditure is estimated at Rs. 3,27,226 as against Rs. 2,64,217 the estimate, and Rs. 2,78,790 the revised estimate, for 1918-19. The increase in expenditure is due to the provision of Rs. 49,000 on account of heavy repairs to the two Bridge steamers *Howrah* and *Buckland*.

The anticipated surplus of Rs. 42,774 will be utilised in reducing the debt of the Bridge to the Port Commissioners, which it is estimated will stand at Rs. 5,29,419 on the 31st March 1920, as against Rs. 5,59,379, on the 31st March 1919

2. The Governor in Council approves the Budget Estimate under section 21 of the Howrah Bridge Act, 1871.

By order of the Governor in Council,

F. A. A. COWLEY,

Secy. to the Govt. of Bengal.

REPORT OF THE HONORARY COMMITTEE FOR THE MANAGEMENT OF THE ZOOLOGICAL GARDEN, CALCUTTA, FOR THE YEAR 1918-19.

NOTIFICATION.

No. 2238P.D.—The 19th August 1919.—The following extracts from the Annual Administration Report of the Zoological Garden, Calcutta, for the year 1918-19 and the Government letter No. 2236P.D., dated the 19th August 1919, acknowledging the receipt of the Report are published for general information.

J. H. KERR,
Chief Secy. to the Govt. of Bengal.

THE Honorary Committee have the honour to submit their report for the year ending 31st March 1919, the contents of which, as usual, include, among other items,—

(1) The Superintendent's report upon the Zoological collection.
(2) Monthly returns of visitors and a list of donors and their donations.
(3) Abstract of accounts of ordinary receipts and expenditure.

The Committee consisted of—

President :

The Hon'ble Mr. C. J. Stevenson-Moore, C.V.O., I.C.S.

Vice-President :

P. L. Buckland, Esq., F.Z.S.

Honorary Secretary and Treasurer :

W. K. Dods, Esq., to 28th February 1919.
W. Dods, Esq., from 1st March 1919.

Members of the Committee :

Nominated—
R. D. Mehta, Esq., C.I.E.
Dr. Nelson Annandale, B.A., D.Sc., C.M.Z.S.
W. R. Gourlay, Esq., C.I.E., I.C.S.
H. J. McIntosh, Esq.
Nawab Sir Asif Kadr Saiyid Wasif Ali Mirza, Khan Bahadur, Mahabat Jang, Nawab Bahadur of Murshidabad, K.C.S.I., K.C.V.O.
Lieutenant-Colonel Charles Robert Mortimer Green, M.D., F.R.C.S., I.M.S.
G. Girard, Esq., I.S.O., F.R.H.S.
The Hon'ble Sir Bijay Chand Mahtab, K.C.S.I., K.C.I.E., I.O.M., Maharajadhiraj Bahadur of Burdwan.
Shirley Tremearne, Esq.
David Ezra, Esq.
W. Dods, Esq.
Nawab A. F. M. Abdur Rahman, Khan Bahadur.
Lieutenant-Colonel Sir L. Rogers, Kt., C.I.E., M.D., I.M.S.
Lieutenant-Colonel C. R. Stevens, M.D., I.M.S.
C. W. E. Cotton, Esq., I.C.S.
Lieutenant-Colonel E. H. Brown, I.M.S. (Retired), M.D., D.P.H., F.R.C.S.E.
H. F. Yeoman, Esq.
Babu Surendra Nath Laha.

Ex-officio—
The Commissioners of Divisions in Bengal.
The Executive Engineer, 2nd Calcutta Division, Public Works Department.
The Sanitary Commissioner, Bengal.
The President of the Asiatic Society of Bengal.
The Director of Public Instruction, Bengal.
The Natural History Secretary of the Asiatic Society of Bengal.
The Director of Land Records, Bengal.

The Superintendent, Civil Veterinary Department, Bengal.
The Professor of Comparative Anatomy and Zoology, Medical College, Bengal.
The Superintendent of the Royal Botanic Garden, Sibpur.
The Chairman of the Calcutta Corporation.
The Principal of the Bengal Veterinary College.

PRINCIPAL EVENTS.

The transfer by the Government of Bengal to the Zoological Gardens of a plot of land including a portion of the road known as Duel Avenue and a piece of the compound of the Meteorological office was effected during the year under review. This plot formed an acute-angled wedge between the former area of the Zoological Gardens and the extension. The inclusion has rounded off the boundary and improved the appearance of the Gardens.

Work on the new extension was steadily carried on. The western portion was enclosed with iron-fencing to form a big paddock for the ruminants. On the south a new enclosure was made for the markhors. Within a high fence a crag-like cement structure was built up round the old survey mark, reproducing a mountain peak in miniature and furnishing the inmates with a colourable imitation of their natural habitat.

The boundary wall of the new extension as well as of the Hermitage along the Alipore Road was reconstructed in connection with the realignment of the Alipore Road which was sanctioned by Government.

* * * * *

IMPROVEMENTS.

Various improvements were carried out during the year. The brick wall round the Hippopotamus enclosure was further raised as the male hippo tried several times to scale it and seemed likely to succeed.

The Tapir enclosure was found insufficient to accommodate the growing number of these animals, and it was thought expedient to make additions to the existing building. New shelters were therefore constructed on the western side of the building facing the lake and the animals have now ample accommodation.

A new segregation shed was built in the Begunbari compound for the accommodation of sick animals.

ANNUAL REPAIRS.

The annual repairs to the buildings of the Garden were carried on departmentally as usual, and a good deal of painting was done during the year to the fences and iron-work.

* * *

STAFF AND ESTABLISHMENT.

There was no change in the superior staff except in the case of gate clerk, Babu Panchanan Mukherji, who died on 22nd October 1918. Babu Doyal Chandra Dass, retired gate clerk of the Garden, was appointed in his place as a temporary measure. On 1st January 1919 the services of the Superintendent were recognised by Government by the conferment of the title of Rai Bahadur upon him. The personnel consists of—

SUPERIOR STAFF.

Superintendent.
Mr. Bijay Krishna Basu, G.B.V.C., C.M.Z.S.

Assistant Superintendent.
Babu Somadev Ganguli.

Store-keeper.
Babu Jugal Kishore Roy.

Overseer.
Babu Niranjan Mukerji.

Clerk.

Babu Tarak Chandra Chatterji.

Gate Clerk.

Babu Doyal Chandra Dass.

VISITORS.

The attendance of paying visitors during the year was satisfactory, the turnstile records indicating a total for the year of 635,497, an increase of 52,154 as compared with the figures for 1917-18.

The following is a comparative table of visitors and gate receipts for the last three years:—

Year.			Visitors	Receipts.		
				Rs.	A.	P.
1916-17	...	...	671,495	50,024	11	0
1917-18	...	...	583,343	44,564	0	0
1918-19	...	...	635,497	48,490	0	0

A large number of children under four years of age and school children in charge of their teachers were admitted free. On the day of the Fancy Fair when no individual charge is levied, it is estimated that about 16,000 visitors entered the Garden. In addition 32,203 persons visited the Garden on free days, of which a list with the number of visitors on each will be found in Appendix C.

Special arrangements were made for the admission without payment of soldiers on leave and convalescent.

FINANCE.

The financial condition of the Garden has been on the whole satisfactory, and in spite of the fact that the cost of food-grains has considerably increased the expenditure has been kept down by rigid economy.

GARDEN.

The Garden was kept in excellent condition throughout the year. The lawns and paths were in good order and the show of flowers was a special attraction to the visitors.

CONCLUSION.

The Committee desire to express their thanks to the Corporation of Calcutta for their continued generosity in remitting the consolidated rates in respect of the Gardens.

The thanks of the Committee are also due to those ladies and gentlemen who have added to the Zoological collection by donations, a list of which is given in Appendix D, as well as to those who kindly offered to present animals to the Garden, but whose offers could not be accepted, either because the particular species of animals was already sufficiently well represented, or owing to want of accommodation.

The Committee in conclusion desire to express their thanks to the Railways and Steamer Companies for the conveyance of animals belonging to the Gardens free of charge.

WILLIAM DODS, *Honorary Secretary.*

C. J. STEVENSON-MOORE, *President.*

SUPERINTENDENT'S REPORT.

I HAVE the honour to submit the following report on the existing condition and the progress of the zoological collection.

The following comparative table shows how the various collections of specimens in the Gardens have stood during the last four years :—

Year.	Mammals.	Birds.	Reptiles.
1915-16 ...	351	1,940	198
1916-17 ...	318	1,975	263
1917-18 ...	316	2,026	199
1918-19 ...	299	1,944	171

ACQUISITIONS.

Among other acquisitions the following deserve special mention :—

1 Hoolock ...	Presented by M. Barnett, Esq.
1 Wreathed Hornbill ...	Presented by E. H. Turner, Esq.
2 White-tailed Guereza Monkeys.	Purchased.
2 Lion Cubs ...	Born.
1 Malabar Langur ...	Presented by F. Thompson, Esq.
1 Green Monkey ...	Born.
8 Ostriches ...	Purchased.
2 Brow-antlered Deer ...	Presented by V. H. F. Clarke, Esq.
1 Malayan Tapir ...	Born.
1 Hippopotamus ...	Born.
1 Goral ...	Presented by W. K. Dods, Esq.,
1 Tiger ...	Presented by the Raja of Khairagarh.
1 Snow Leopard ...	Purchased.
1 Great Kangaroo ...	Born.
1 Barasingha Deer ...	Presented by Lady C. Tottenham.
1 Black Leopard ...	Presented by Hassimuddin Hassain, Esq.
1 Serow ...	Purchased.
1 Black Leopard ...	Presented by Maulvi Habibulla.
1 Malayan Bear ...	Presented by Maulvi Habibulla.

The following consignment of animals was received from the Taronga Zoological Park Trust, Sydney, on exchange during the year :—

- 2 King Parrakeets.
- 3 Red-rumped Parrakeets.
- 3 Pennant's Parrakeets.
- 2 Yellow-collared Parrakeets.
- 3 Rosellas.
- 8 Cockateels.
- 14 Black Swans.

* * * * *

GENERAL CONDITION OF THE ANIMALS.

Except for an epidemic amongst the marsupials the general condition of the animals has been satisfactory. The mammals and birds have been free from epidemic disease, and the larger and the smaller carnivora are in prime condition.

The general health of the birds has been very good, and there have been no losses calling for special mention.

APPENDIX A.

Lowman, Mr. F. J.	1 Leopard, 1 Himalayan bear.
Lister, Mr. R. S. ..	1 Leopard cat.

M

Donor	Animal
Macleim, Mr. R. ...	1 Wild dog
Marcoolyn, Mr. H. B. .	1 Black-rumped magpie.
Mullins, Mr. R. ...	1 Bengal monitor
[illegible]	1 Malayan bear.
[illegible] Bhuban	1 Spotted deer.

O

Donor	Animal
Oakley, Mr. L. ...	1 Marsh crocodile

R

Donor	Animal
Roy Chowdhuri, Babu J. K.	1 Crested serpent Eagle.
Reed, Mr. W. A. ...	1 Nilgai.
Roosmalecocq, Lt.-Col. C. A.	1 Himalayan bear.

S

Donor	Animal
Solomon, Mrs. S. J. ...	1 Hog deer.
Seth, Babu Kamlal ..	1 Indian antelope
Sen, Babu Ananth Nath ...	1 Four-horned Antelope.
Seraikella, Feudatory Chief of	2 Ant-eaters.
Shaw, Babu Charan Behari	1 Spotted deer
Stevens, Mr. H. H. ...	1 Palm civet
Swan, Miss D. M. C. ...	1 Indian porcupine.
Stewart, Mr. D. M. ...	1 Wolf cub.

T

Donor	Animal
Taylor, Mr. R. W. ..	1 Fishing cat
Turner, Mr. E. H. ...	1 Wreathed hornbill.
Thompson, Mr. ...	1 Snake eating cobra
Thompson, Mr. F. ...	1 Malabar langur
Tottenham, Lady C. I. ...	1 Bara-singha deer.

W

Donor	Animal
Whitworth, Mr. R. .	1 Indian antelope

No. 2236P.D., dated Calcutta, the 19th August 1919.

From—The Hon'ble Mr. J. H. KERR, C.S.I., C.I.E., I.C.S., Chief Secretary to the Government of Bengal.

To—The Honorary Secretary, Zoological Garden, Calcutta.

I AM directed to acknowledge the receipt of the Report of the Honorary Committee for the Management of the Zoological Garden, Calcutta, for the year 1918-19, forwarded with your letter No. 57, dated the 1st August 1919, and to convey the thanks of the Governor in Council to the Committee for their management of the Garden during the year.

2. The acknowledgments of His Excellency in Council are due to the ladies and gentlemen named in Appendix D to the Report, who presented the Garden with various animals during the year

REPORT ON FAMINE IN THE DISTRICT OF BANKURA FOR THE WEEK ENDING [illegible] AUGUST 1919.

The rainfall during the week was general and sufficient. Transplantation is still going on. The distress is decreasing owing to improvement of the agricultural prospects. Fifty-seven relief works were open during the week. The number of persons relieved on works was 3,830. The number of persons in receipt of gratuitous relief was 18,402, viz., 13,254 on cash doles in 128 unions, 3,683 on paddy-husking advances, 885 weavers and 580 better class poor. The grand total of persons relieved was 22,232. The decrease in the number of persons in receipt of cash doles was due to better agricultural prospects and the harvesting of the early *bhadoi* crops. The number of persons relieved on private works was 300. The charitable societies also relieved 950 persons on weekly rice doles and 1,150 on daily rice doles and by cooked food. The position in regard to crime relating to food-grains was unchanged. Public health is generally good. Sporadic cases of cholera and malaria are reported. Cloth is being distributed to destitutes. The relief measures are adequate. The price of common rice varies from 5½ to 5¾ seers per rupee. Burma rice is being sold.

M. C. McALPIN,

Secy. to the Govt. of Bengal.

RAMNA (DACCA), *the 20th August 1919.*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the [illegible]

Summary.—During the week rainfall was generally light to moderate throughout the province. Harvesting of autumn paddy and jute are progressing. Transplanting of winter paddy and steeping and washing of jute are hampered in North and East Bengal for want of sufficient rainfall. Weeding of winter paddy has commenced in West Bengal. Slight damage to jute by insect pests continues to be reported from some West Bengal districts. The prospects of standing crops are generally satisfactory. The price of common rice for the province has risen by about 3½ per cent. as compared with that of previous week. The average number of persons engaged daily in test works in Brahmanbaria subdivision of Tippera district was 452.

Executive Engr., Dacca Division.

REPORT ON THE STATE OF THE SALT MARKET FOR THE FIRST QUARTER OF THE YEAR 1919-20.

GOVERNMENT OF BENGAL.

FINANCIAL DEPARTMENT.

Separate Revenue Branch (Salt).

No. 2475S.R.

Dated Calcutta, the 26th August 1919.

THE following report on the state of the salt market for the first quarter of the year 1919-20, comprising the months of April, May and June 1919, in the Presidency of Bengal, is published for general information.

2. The quantity of salt of every description cleared during the quarter amounted to 2,071,412 maunds (including 1,506,424 maunds issued under the credit system), as compared with 3,476,150 maunds (including 2,816,033 maunds issued under the credit system) in the previous quarter and 2,395,338 maunds (including 1,817,387 maunds issued under the credit system) in the corresponding quarter of the previous year. The net amount of duty levied was Rs. 24,72,946 (including Rs. 17,71.330 adjusted under the credit system), as against Rs. 33,64,657 (including Rs. 25,81,104 adjusted under the credit system) in the previous quarter, and Rs. 28,71,234 (including Rs. 21,82,127 adjusted under the credit system) in the corresponding quarter of the previous year.

3. The subjoined Table I shows in detail the importations into the Port of Calcutta and the total clearances of sea-imported salt during the quarter, compared with the figures of the corresponding quarters of the two previous years:—

Total	1,696,371	1.811,941	2.061.966	2,050,609	1,456,025	1,701,891*

* Inclusive of 1,506,424 maunds of salt issued under the credit system.

Compared with the corresponding quarter of the previous year and the same quarter of 1917-18, importations were less by 29·4 and 14·7 per cent., and clearances less by 17·0 and 6·07 per cent., respectively. As compared with the corresponding period of the previous year, the increased imports from the United Kingdom and Spain, and the decreased imports from Port Said, Aden and Massowah, are noticeable.

4. Table II shows the quantity of sea-imported salt remaining in the warehouses at the close of the quarter as compared with the preceding four quarters :—

5. The figures showing the despatches of salt from Calcutta by different routes during the quarter under report will be published as usual in the *Calcutta Gazette* by the Director of Statistics with the Government of India when they are available

6. The quantity of salt despatched during the quarter by the East Indian Railway to stations beyond Buxar was *nil*, as was in the previous quarter, as well as in the corresponding quarter of the previous year.

7. The quantity of saltpetre salt excised in the refineries of Bengal during the quarter was *nil*, as compared with *nil* in the previous quarter and 430 maunds in the first quarter of the previous year.

8. No information was available concerning the shipments of Liverpool salt during the quarter for the Port of Calcutta.

9. Table III shows the average wholesale prices* per 100 maunds of Liverpool and other descriptions of salt at the Port of Calcutta during each fortnight of the quarter :—

CONTENTS.

REPORT ON FAMINE IN THE DISTRICT OF BANKURA FOR THE WEEK ENDING THE 23RD AUGUST 1919.

THE rainfall during the week was general and sufficient. Transplantation has been almost completed. The distress is decreasing owing to hopeful agricultural prospects. Sixty-four relief works were open during the week and the number of persons relieved on them was 7,167. The total number of persons on gratuitous relief was 17,334, viz., 12,186 on cash doles in 128 unions, 3,683 on paddy-husking advances, 885 weavers and 580 better class poor. The grand total of persons relieved was 24,801. The increase in the number of persons relieved on works was due to the completion of field work, and the decrease in the number of persons relieved on cash doles was due to better agricultural prospects and harvesting of early *bhadoi* crops. The number of persons relieved on private works was 800. The charitable societies also relieved 925 persons on weekly rice doles and 1,000 on daily rice doles and cooked food. One case of rice looting is reported during the week. The public health on the whole is good. Sporadic cases of cholera, malaria and influenza are reported. Cloth is being distributed to destitutes. The price of common rice varied from 5¼ to 5¾ seers per rupee. Burma rice is being sold.

M. C MCALPIN,
Secy. to the Govt. of Bengal.

CALCUTTA, *the 28th August 1919.*

RESOLUTION ON THE REPORT ON THE OPERATIONS OF THE DEPARTMENT OF AGRICULTURE, BENGAL, FOR 1918-19.

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Agriculture Branch.

CALCUTTA, THE 2ND SEPTEMBER 1919.

RESOLUTION—No. 7274.

READ—

The Report on the Operations of the Department of Agriculture, Bengal, for the year 1918-19.

MR. S. MILLIGAN was in charge of the department throughout the year, but after its close was compelled to go on medical leave. Of the two Deputy Directors, Mr. K. McLean returned from military duty to the department early in February and Mr. F. Smith went on leave on account of ill-health at the end of January. In their absence Mr. Rajeswar Das Gupta continued to officiate as Deputy Director during the year, with such success that he has subsequently, with the sanction of the Secretary of State, been appointed permanently to the Indian Agricultural Service and confirmed in the third post of Deputy Director which has been created. The province is still without the services of its separate Chemical Expert, Mr. Annett, who was working in the United Provinces. Mr. Finlow, the Fibre Expert, therefore, performed the duties of Agricultural Chemist in addition to his own. Mr. Hector was Economic Botanist throughout the year. To each division a Superintendent, a member of the Provincial or Bengal Agricultural Service, was attached. The recruitment of district agricultural officers for each district in the Presidency was completed after the close of the year.

2. The number of students from Bengal at the inter-provincial agricultural college at Sabour, in the district of Bhagalpur, in the province of Bihar and Orissa, rose from 17 in the previous year to 32 in the year under review; of these, four held scholarships awarded by District Boards The advance in numbers is remarkable and is attributed to the stimulus afforded by the creation of a service of district agricultural officers in Bengal, which was at the time under recruitment. On the basis of a scheme formulated by Mr. E. Biss of the Education Department, the establishment of two agricultural vernacular schools, one at Dacca and the other at Chinsura, was sanctioned during the year, for the training of the sons of cultivators in improvements in purely practical agriculture. It is hoped that most of the boys who attend these schools will return to their homes to make practical use of what they have been taught; and there is no thought or design of providing them with employment in Government service subsequently. It is expected that the school at Dacca will open in next January. A prospectus is under preparation which will be obtainable from the Director of Agriculture. The result of this experiment will be awaited with much interest At the same time a scheme for the creation of an Agricultural Institute at Dacca, as foreshadowed by the Calcutta University Commission, is also under consideration.

3. The *indrasail* variety of transplanted *aman* paddy, or winter rice, which the Agricultural Department discovered by a process of selection, continues to be the best in point of view of yield; it is estimated that it yields three maunds per acre more grain than the average of the local varieties it displaces. Originally the distribution of the seed of this variety had been confined to the Dacca and Mymensingh districts; but in the year under

review it was extended over wider areas in Eastern and Northern Bengal, where the variety is reported to be generally suitable. Seventy-five tons of seed were distributed in 10-lbs. packets, and those cultivators, who are so fortunate as to possess a surplus of seed, are supplying their neighbours with seed. It is estimated that there will be 250,000 acres under this variety in the present season, 1919-20. Its success appears to be established. Experiments were made in the selection of the best deep-water winter varieties suitable to the low-lying areas in the east and south-east of the province. The *Kataktara* variety of *aus* paddy, or autumn rice, also discovered by a process of selection, was tested in nearly all the districts in which such rice is grown. It met with remarkable success and a large demand has arisen round centres where the seed has been distributed; for it is not only superior in yield but also in quality to the ordinary variety of autumn rice. Another variety of autumn rice, viz., the *Surjamukhi*, which appears to have nearly the same advantages as *Kataktara* together with superior advantages in the way of straw, is under experiment. A special effort is also being made to discover an early but heavy yielder for use in the high lands of such districts as Bankura, where the crop is precarious and frequently fails in a year of short rainfall. So far the results from the trials of the selected variety of *Kataktara* as a transplanted rice in that district are encouraging, whilst in the Botanical Section experiments are being made to obtain by a series of crosses a combination in one variety of the two qualities of earliness and high yield. Moreover, a survey of the varieties grown in the Presidency and Burdwan Divisions has been started at Chinsura, with the object of selecting the best early varieties suitable to the west of the province.

4. During the year the distribution of seed of the selected *Kakya Bombai* variety of *Capsularis* jute was extended to cultivators in Eastern and Northern Bengal outside the Dacca and Mymensingh districts to which the distribution had previously been confined. Fifty-five tons of seed were so distributed. Approximately 25 tons in 1918 against 4 tons in 1917 was also distributed in ¼ lb. packets for the multiplication of seed, but only 50 per cent. of the resulting crop was actually used for this purpose; the fibre of the remainder was sold. On account of its heavy yield not only the cultivators, but also the trade, appear to be well satisfied with it for ordinary purposes. It is estimated that it produces two maunds per acre more jute than the average local races, and that 100,000 acres have been planted with it in the present season, 1919-20. The demand for the seed is greater than the supply, with the result that in Faridpur cultivators have been forced to grow their own seed requirements, in this way fulfilling one of the aims of the Agricultural Department. Experiments continued to be made in the selection of the best variety of *Corchorus Olitorius*, which is more suitable to Western Bengal than *Capsularis*. Tests are being made of a promising new race (Chinsura green).

5. Investigations were continued into the "ufra" disease which attacks deep-water paddy. These confirm the general recommendations which have been made with regard to this pest, viz., the burning of the stubble of the previous crop and dealing with the low-lying area which remains wet throughout the year. But as the burning of stubble confers no benefit on the individual unless all his neighbours do it, the lines of attack developed by the department during the year were the conversion of low-lying areas into *boro* lands, and the encouragement of *rabi* cultivation and of the growth of early varieties of paddy which escape the disease.

An investigation into *Chlorosis*, a disease of the jute plant, has led to the tentative conclusion that immunity of the plants to the disease is hereditary in character.

Along with diseases may be mentioned that pest, the water-hyacinth, which is gaining ground in this Presidency with the rapidity of rabbits in Australia. The department has been spreading amongst the cultivators information of the uses which can be made of the weed as a fertilizer, as fuel or as fodder. An apparatus has also been devised for the extraction of potash salts on the spot, but it is expensive to work. Too much emphasis cannot, however, be laid on the fact that such measures for the utilization of the weed, where they can be taken without fear of the pest being exploited

or fostered for commercial gain, are only palliatives. Local bodies have therefore been advised to address themselves to the work of the complete extinction of the weed by uprooting and burning it, root and branch. In this herculean task the Governor in Council invites the co-operation of the whole population.

6. Amongst other activities of the Agricultural Department during the year under review may be mentioned the investigation of fertilizers suitable for jute; the chemical survey of the different soils in the province; the expansion of the new crop of groundnut in the Burdwan Division; the improvement of the tobacco crop; and the examination and selection of local and exotic varieties of sugarcane in respect of their suitability to Bengal conditions. Strides have been made in the work done at the Rangpur cattle farm, and it is now anticipated that the question whether the importation of outside blood is necessary or desirable for the improvement of breed will soon be answered. Until, however, this problem is solved, the Director of Agriculture rightly remarks that such operations should not be extended. During the year, owing to the marked rise in the price of cotton goods, public attention was attracted to the question of extending the cultivation of cotton in Bengal. A free distribution of the Dharwar variety was accordingly sanctioned for the April sowings, the result of which must be awaited; and Mr. N. Pillai, the Weaving Expert, was placed on special duty to investigate the requirements of the local weavers in respect of cotton and the number of *charkas* (spinning wheels) in the province. That conditions in Bengal are not generally favourable to any marked extension of cotton cultivation is now confirmed by the opinion expressed in the report of the Indian Cotton Committee. 1919, that exotic varieties of cotton are unsuited to the climatic and other conditions of the province, and that there seems no prospect of any appreciable extension of the area under the indigenous varieties. The recommendations of that Committee are under examination.

7. In pursuance of the policy of providing each district in Bengal with a farm, the establishment of three new farms was sanctioned in Mymensingh, Comilla and Bogra. It is anticipated that they will be ready for work in the forthcoming cold weather. The District Boards of Pabna and Bakarganj have also come forward with offers of co-operation in the establishment of farms in these two districts. Further, Sir Daniel Hamilton placed a farm at the disposal of the Agricultural Department at Gosaba in the 24-Parganas. The establishment of seed stores at each district headquarters in the province was sanctioned during the year.

8. An encouraging feature of the year is the growth of small non-official thana associations of practical cultivators as a link between the Agricultural Department and the cultivators in the districts of Birbhum and Faridpur. The attitude of Government towards these associations and the functions they are expected to perform in providing this link have been described in an important Resolution, No. 631T.R., published by this Government on the 7th June 1919. Since the close of the year a Board of the Agricultural Department, Bengal, has been established to advise on agricultural questions affecting the whole province. Its constitution is as follows:—

(1) The Director of Agriculture, Bengal, *ex officio* President;
(2) The Deputy Directors of Agriculture, Bengal;
(3) The Agricultural Experts in Bengal; and
(4) The Superintendent, Civil Veterinary Department, Bengal, so long as the Veterinary and Agricultural Departments are amalgamated.

The duties of the Board will be mainly advisory; they will advise Government on matters referred to them for opinion or on any other matter which the President may consider suitable for discussion. The President is empowered to convene committees to sit at any time during the year, to which visitors may be invited whose presence is necessary for the discussion of the particular matter in hand, such as, representatives of a trade concerned, and others.

There will be an annual meeting which will be held on such date and in such place as the President may decide. To it the Director of Agriculture is

empowered to invite other officials interested in agriculture, large landowners, representative agriculturists, representatives of the allied trades and others interested in rural development, selected in such a manner as to be representative of the agricultural interests of each district throughout the presidency.

9. Another remarkable feature of the year was the increase in the sale of the Government-examined seed of silkworms by 31 per cent. under the control of Babu A. C. Ghosh, coupled with the discovery that the area of land under mulberry cultivation had increased by 33 per cent. since the year 1913. These facts are both tokens of the growing popularity of the Government seed as well as of a stronger demand for Bengal silk. Cross-breeding experiments were continued both at Berhampore under Mr. P. C. Chaudhuri and in Calcutta under Miss Cleghorn. Certain results have been obtained, but it is not intended to distribute the new hybrid races until their hardiness and immunity to disease under local conditions is established.

10. From the above description of the work of the department during the year. it will appear that there is considerable justification for the Director's assertion that the past year may be said to have been one of all-round progress for the Agricultural Department. If it does not provide a sufficient answer to the critics of the department, who allege that its successes are either non-existent or not very conspicuous, the following quotation from the report may serve to bring home to them the fallacy of such an allegation :—

"The departmentally selected rice and jute at present occupy roughly 250,000 acres and 100,000 acres, respectively. Taking the average increased yields of the improved paddy and jute over local races which they have replaced, to be 3 maunds (240 lbs.) and 2 maunds (160 lbs.) per acre, respectively, we arrive at the conclusion that, in the present year, the Bengal cultivator will, in the aggregate, be better off, on this account alone, by about Rs. 40 lakhs (£250,000 sterling). This figure may be expected to increase rapidly, for practically the whole rice and jute crops of the province will probably be affected in quite a few years. In this case the net income of the cultivators of rice and jute in Bengal would be increased by as much as Rs. 12 crores (£7,500,000 sterling) per annum."

If the department does only this, it will have fully justified its existence, though there are still many other ways in which it can prove its usefulness. The Governor in Council has, therefore, much pleasure in acknowledging the services of Mr. Milligan, the permanent Director of Agriculture, of Mr. Finlow, the present officiating Director, and of those of the officers who have assisted them ; the support which has been given them by numerous private individuals, commercial firms and local bodies ; and the zeal with which Mr. G. S. Dutt, I.C.S., the Collector of Birbhum, has entered into the question of the development of agriculture in that district.

By order of the Governor in Council,

M. C. McALPIN,

Secy. to the Govt. of Bengal.

NOTIFICATION.

No. 7187B.G.—The 30th August 1919.—The report on the working of the Government Cinchona Plantations and Factory in Bengal for the year 1918-19 is published for general information.

M. C. McALPIN,
Secy. to the Govt. of Bengal.

FIFTY-SEVENTH ANNUAL REPORT OF THE GOVERNMENT CINCHONA PLANTATIONS AND FACTORY IN BENGAL FOR THE YEAR 1918-19.

1. **General.**—From the beginning of 1875-76, the year in which factory products began to be issued, to the end of 1918-19, a period of 44 years, 219,200 lbs. of Cinchona Febrifuge were issued. Up to the end of 1886-87 this drug was the only and up to the end of 1889-90 the main product of the factory, but from 1890-91 onwards its issue steadily declined until 1914-15 when the scarcity and high cost of quinine brought Cinchona Febrifuge again into medical fashion. During the 18 years 1901-02—1918-19 the total quantity issued was 79,390 lbs., of which 36,842 lbs., or over 46 per cent., were sold during the last four years. From the beginning of 1887-88, in which year quinine began to be issued, to the end of 1918-19, a period of 32 years, the total quantity of quinine issued was 577,490 lbs., 15 oz. Of this quantity 242,296 lbs., or almost 42 per cent. of the total, were issued during the last four years. These figures are eloquent of the strain thrown on the Department by the demands of the war years. The immediate brunt fell upon the quinine reserve which the Department was fortunately enabled to build up at very low cost and just in time, and which stood at over 163,000 lbs. when war broke out. The reserve, however, could not meet indefinitely such a drain, and as during the latter half of the war period it was impossible to purchase either bark or quinine to supplement it, or even to foretell when such could be purchased, recourse was perforce had during the last two years to the otherwise undesirable expedient of increasing the immediate plantation harvest by cutting out immature acreages. Thus, the average age of the Munsong acreage cut out in 1918-19 was 6·7 years with an average total yield per acre of about 2,000 lbs. against an yield of 3,260 lbs. per acre from Mungpoo, where the average age of the acreage cut out was 9 years. In the circumstances this sacrifice of bark increment paid well, for the price of such quinine as could be got in the market ranged from Rs. 28 to Rs. 60 or more per lb. as against Rs. 7, the cost of manufacture from plantation bark. Still, the fact has to be faced that 2,270 acres of the 2,600 now under Cinchona are under 7 years of age. To allow of these acreages gaining a normal amount of bark increment, only a normal amount of "thinnings" should be harvested for the next few years. It should be possible to arrange for this, as the demand for quinine should now sink to a more reasonable level, and there is likely to be available from outside sources bark to be purchased by the Government of India, which bark with the harvest normal to the ages of the acreages of the plantations should suffice to keep the factory output up to a normal demand. As the partial sacrifice of bark increment was not in itself sufficient to counteract the heavy drain on the reserve, Government, as soon as export of quinine was resumed from Java, purchased in 1918. 49,000 lbs. of quinine at a cost of practically Rs. 13 lakhs. Although the purchase of this quinine has no direct bearing on the work of the Department, which has not even handled the quinine, for accounts purposes its cost and the revenue from its sale are most conveniently considered as coming within the Department's scope. All the Cinchona on the plantation, except 48 acres, has been planted since 1909-10. The total expenditure on the entire Department for the last ten years, exclusive of the Rs. 13 lakhs, is Rs. 27,30,806, and the total revenue, exclusive of the Prisons Department's share, is Rs. 71,79,916. The surplus, Rs. 44,49,110, is equal to a return of 28 per cent. per annum on each year's total expenditure during the period from the year of expenditure to the end of the period. In addition, the value of block and stock, exclusive of the 49,000 lbs. of quinine added to the latter, at the end of 1918-19 is over Rs. 20 lakhs in excess of the value of block and stock at the beginning of

1909-10. The debiting of Rs. 13 lakhs has the immediate effect of reducing the annual percentage figure to 18 per cent., but of course the value of stock is also increased by about Rs. 10 lakhs, not Rs. 13 lakhs, as the price of quinine has gone down since the purchase of the 49,000 lbs. As the stock is disposed of the percentage return will mount up again. The total value of block and stock at present is about Rs. 40 lakhs.

Had there been a sufficient acreage under Cinchona in India to produce the extra 49,000 lbs. of quinine that had to be purchased, the quinine would have cost only Rs. 3,43,000 instead of Rs. 13 lakhs. This is a practical argument in favour of India endeavouring to produce all the quinine it requires, and it is one that is likely during the next decade to present further opportunities of being appreciated, though it is to be hoped not in so pronounced a fashion as on this occasion.

2. **Extensions, acreages and crops.**—(*a*) *Mungpoo.*—Rainfall was 136·29 inches against an average of 123·56. Violent hailstorms on several occasions played havoc in the Cinchona nurseries with the result that there was a shortage of seedlings, which prevented the full programme of planting being carried through. Reversion to close planting—4 feet by 4 feet—also curtailed the superficial acreage planted. Cinchona extensions in all were 132 acres, consisting of 122 of *C. Ledgeriana*—100 on Mungpoo and 22 on Sittong divisions respectively,—and 10 of *C. Ledgeriana* × *C. succirubra* on Sittong. Nearly 56,700 trees, equivalent to 61 acres, of Cinchona of various ages, but of an average age of 9 years, were cut out, yielding 197,929 lbs. of dry bark, an average of 3·4 lbs. per tree or 3,260 lbs. per acre. Of the total bark harvest, 3,593 lbs. were *C. succirubra*, 35,949 lbs. *C. Ledgeriana* × *C. succirubra* and 158,387 lbs. *C. Ledgeriana*. The average quinine percentage of the Ledger bark was 5·11—the highest percentage yet recorded—of the hybrid bark 4·26, and of the mixed barks 4·9. At the end of March 1919 there were 525 acres under a full complement of Cinchona. During the year 202 acres were reafforested, bringing the total area now planted up with fuel and timber trees to 3,040 acres. Over 1,060 tons of wood fuel of value Rs. 1,740 and over 3,000 cubic feet of sawn timber of value Rs. 872 were supplied free to the Factory. Two *Sirocco* driers were purchased which have proved most useful in hastening the drying of bark during the rains.

(*b*) *Munsong.*—Rainfall was 103·18 inches against an average of 96·10. As in Mungpoo, hailstorms did considerable damage and a descent of frost killed about 30,000 seedlings. Extensions were 330 acres, consisting of 258 *C. Ledgeriana* (74 on Munsong, 44 on Burmiak and 140 on Sangser divisions, respectively), 42 of *C. Ledgeriana* × *C. succirubra* on Munsong division and 30 of *C. Ledgeriana* × *C. officinalis* on Burmiak. About 334,000 trees, equivalent to 311 acres, of various ages, but averaging 6·7 years, were cut out, yielding 624,850 lbs. of dry bark or an average of about 2 lbs. per tree and 2,000 lbs. per acre. Of the total harvest 541,650 lbs. were *C. Ledgeriana*, 35,680 lbs. *C. Ledgeriana* × *C. succirubra*, 38,880 *C. officinalis*, 8,320 *C. succirubra*, and 320 (*C. Ledgeriana* × *C. officinalis*). The average quinine percentage of the Ledger bark was 4·87, of the Hybrid (*C. Ledger* × *succirubra*) 3·66 and of the *C. officinalis*, 3·93. The average of the mixed barks was 4·8. At the end of March 1919, there were 2,075 acres under a full complement of Cinchona. During the year 62 acres of old Cinchona land were reafforested, bringing the total reafforested area on Munsong up to 366 acres.

(*c*) *Plantations as a whole.*—The total area under a full complement of Cinchona is 2,600 acres, of which 2,270 are under 7 years of age. Details are given in Appendix A.* The approximate number of Cinchona trees is 3,700,000, of which about 910,000 are on Mungpoo and 2,790,000 on Munsong. The total bark harvest was 822,779 lbs.

3. **Factory work.**—186,500 lbs. of Mungpoo, 564,414 lbs. of Munsong, and 15,249 lbs. of South Indian, in all 766,163 lbs. were worked up. The average quinine percentages of the various barks were Mungpoo 4·9, Munsong 4·8, South Indian 3·12, so that the total amount of quinine sulphate theoretically available in the total quantity of bark used was 36,127 lbs. The actual quantity of quinine sulphate made was 32,640¼ lbs. This, with 1,251 lbs. in the Cinchona Febrifuge and other quinine salts made, is equivalent to an extraction efficiency of 93·8 per cent. In addition to the 32,640·25 lbs. of

* Not printed.

Quinine Sulphate, 103 lbs. of other Quinine salts, 11·25 lbs. of Cinchonidine Sulphate, 46·5 lbs. of Quinoidine and 11,439·75 lbs. of Cinchona Febrifuge were manufactured, or a total of 44,240·75 lbs. of Cinchona products. The factory also turned out 1,633 lbs. of quinine sulphate from bark purchased in Java by the Government of India. No account is taken of this in the Provincial stock, as such quinine is being kept aside as part of the Government of India reserve. The cost of extraction, however, at Rs. 2·6 per lb. of quinine extracted has been met from the Provincial allotment, and this cost remains for adjustment with the Government of India hereafter.

4. **Cost and value of plantation bark.**—The 197,929 lbs. of bark harvested from Mungpoo at 3·6 annas per lb. cost Rs. 44,534. The unit rate for bark during 1918-19 being 2 annas and the average quinine percentage of Mungpoo bark being 4·9, the market value of the bark was 9·8 annas per lb. or a total of Rs. 1,21,232, or Rs. 76,698 *plus* freight and carriage charges, more than it actually cost. The 624,850 lbs. of Munsong bark at 2·7 annas per lb. cost Rs. 1,05,443, whereas its market value at 2 annas per unit and an average percentage of 4·8 was 9·6 annas per lb. or a total of Rs. 3,74,910 or Rs. 2,69,467 *plus* freight and carriage charges more than its actual cost. The total cost of the total harvest was Rs. 1,49,977, while the actual market value was Rs. 4,96,142. In other words, purchase of the same quantity of bark in the market would have cost Government Rs. 3,46,165 *plus* freight and carriage charges more than it actually did cost.

5. **Cost and value of quinine produced**—(*a*) **Cost in the bark.**—The 750,914 lbs. of plantation bark used in the factory cost—at 3·6 annas per lb. for Mungpoo and 2·7 for Munsong—Rs. 1,37,197 and yielded 32,194¼ lbs. of quinine. The cost of quinine in the plantation bark before extraction was, therefore, Rs. 4·25 per lb. The 15,249 lbs. of South Indian bark, purchased last year, cost Rs. 6,700 and yielded 446 lbs. of quinine, so the cost of quinine per lb. in South Indian purchased bark before extraction was Rs. 15 per lb.

(*b*) **Cost of extraction, packing and delivery to railway.**—The factory expenditure, exclusive of bark and quinine purchase, but *plus* depreciation, share of general charges, and other charges and *minus* the cost of manufacturing Cinchona products other than quinine, was Rs. 90,462. The total quantity of quinine, including the quinine from the Java bark, manufactured, was 34,273 lbs. The cost of extraction per lb. of quinine produced from all barks was, therefore, Rs. 2·6.

(*c*) **Total cost per lb.**—For plantation bark this was Rs. 6·85 per lb. and for South Indian purchased bark Rs. 17·6.

(*d*) **Value.**—At Rs. 20 per lb.—about the lowest rate at which quinine could be purchased landed in India,—the total value of the 32,640¼ lbs. of quinine produced for the Government of Bengal was Rs. 6,52,805 which is Rs. 4,24,036 more than it actually cost Government to produce it.

6. **Sales and selling rates.**—Total issues were 67,331 lbs. 1 oz. of Cinchona products and 4,204 lbs. of bark. Of the total, 50,236 lbs. were of quinine sulphate, of which 12,773 lbs. 14 oz. were sold or distributed in tablet form as "treatments". This is a considerable drop from the quantities sold for "treatments" during 1914-16. Quinine in tablet form was sold at the rate of Rs. 43-12 per lb. Quinine in powder form was sold at rates varying from Rs. 26 to Rs. 28 per lb. according to quantities. Rates for other products were Cinchona Febrifuge Rs. 5 to Rs. 6; Cinchonine and Cinchonidine Rs. 11 to Rs. 12; Quinoidine and Residual alkaloids Rs. 4 to Rs. 5.

7. **Expenditure and receipts.**—The total direct expenditure on the Department was Rs. 2,88,751-12-1 In addition to this Rs. 8,89,486-9 has so far been debited against the Department on account of the purchase by the Government of Bengal of 49,000 lbs. of quinine from Java to replenish the Provincial quinine reserve. This brings the total expenditure up to Rs. 11,78,238-5-1. The gross receipts were Rs. 15,11,724-10-10, of which Rs. 7,70,475 were credit and Rs. 7,41,249-10-10 cash. Of the latter Rs. 1,65,180-2 are claimed by the Prisons Department to cover the cost of converting 12,773 lbs. 14 oz. of purified quinine into tablet form and for packing and distributing the tablets. The net revenue to be accredited to the Cinchona Department is, therefore, Rs. 13,46,544-8-10 and the net surplus for the year Rs. 1,68,306-3-9. This is a small money surplus compared with

that of last year, but much less quinine has been sold—50,236 lbs. as against 98,145 lbs.—and in addition nearly Rs. 9 lakhs have gone in the purchase of quinine to bring up the reserve.

8. **Quinine reserve and stock account.**—The Provincial quinine reserve has been increased by 31,404½ lbs. and at the end of the year was 94,653 lbs. The value of stock of all sorts on the 31st March 1919 was Rs. 20,58,715, of which Rs. 18,93,060 is represented by quinine. Factory products and bark have been valued at lowest wholesale market rates, other things at cost price.

9. **Block account.**—This is shown in Appendix* F. The Cinchona trees are valued at Rs. 15,01,218, the timber trees at Rs. 2,61,738, buildings at Rs. 1,30,012 and machinery at Rs. 76,693. Total value is Rs. 19,69,661.

10 **Profit and Loss valuation.**—The change since the end of last financial year in valuation of block and stock, expenditure—except capital expenditure—and receipts also being taken into computation, shows a profit balance of Rs. 5,51,909.

11. **Land rent.**—Rupees 4,826-2 were paid into the Darjeeling Treasury on this account.

12. **Staff.**—Lieut.-Colonel A. T. Gage, I.M.S., was in administrative charge throughout the year. Mr. G. E. Shaw, B.SC., F.I.C., F.C.S., Government Quinologist and Mr. P. T. Russell, Manager of Mangpoo, were on deputation—the former for one month from the 24th March 1919, the latter for four months from the 1st January 1919—under the Director of the Botanical Survey of India in connection with the scheme for starting Cinchona plantations and a quinine factory in the Tavoy district in Burma. Mr. T. H. Child. Assistant Quinologist, on return from active military service, resigned his post on the 6th March 1919. All the officers of the Factory and Plantations and the clerical staff performed their duties with their wonted efficiency.

ADDENDUM.

Medicinal plants other than Cinchona.

Ipecacuanha.—By specially protecting the nurseries all the plants survived the cold weather. About 15,000 cuttings have been struck and the stock of plants now stands at 70,000. The older plants are now seeding freely. This should hasten the time of production of root for manufacture, as there should now be less need to utilize roots for propagation.

Digitalis.—There are now about 4 acres under *Digitalis*. The plants are flourishing and by June 1920 should produce about 4,000 lbs. of dried leaf. The *Sirocco* driers have proved a great help in dealing with the harvest of this crop. During the year 80 lbs. of dried leaf were supplied to Medica Depôts.

Chenopodium.—About 15 acres have been sown broadcast with *C. ambrosioides* and *C. anthelminticum*. but so far this method of cultivation is not so promising as transplanting from seed beds. The yield of oil, about 1¾ lbs. per acre, is very poor, and it scarcely pays to cultivate it. Until definite medical opinion in favour of the use of Chenopodium oil in the treatment of hookworm disease is forthcoming, it would not be advisable to extend cultivation.

Belladonna.—This has proved a troublesome plant to grow at Mungpoo, the seedlings transplanting badly. So far one acre has been planted which is expected to yield about 300 lbs. of dried leaf the first year after planting.

Lycopodium.—This occurs naturally in fair abundance on Mungpoo plantation, and is more than enough to supply all the Medical Stores requirements so far indicated. Twenty lbs. of Lycopodium spores were supplied to the Madras Medical Stores and 142 lbs. to a private firm.

Other medicinal plants.—Seeds of other medicinal plants have been sent to Mungpoo, but it is too early yet to report on them.

A. T. GAGE, LT.-COL., I.M.S.,

Superintendent, Royal Botanic Garden, Calcutta, and of Cinchona Cultivation in Bengal.

Calcutta, *the 1st September 1919.*

DEPARTMENT OF STATISTICS, INDIA.

CALCUTTA TRADE FLUCTUATIONS.

THE following tables are intended to show the trade by all routes, *i.e.*, by rail, river, canal, road, and sea, of the Calcutta block* in certain selected articles during the months of April to June, 1919, as compared with the corresponding period of 1918 and 1917. The statistics have been compiled from returns furnished by the Collector of Customs, Calcutta, Railway Audit Offices, Steamer Companies, the Commissioners for the Port of Calcutta, the Collectors of the 24-Parganas and Howrah, and the Assistant Engineer, Calcutta Canals.

General Summary.

Imports.—The imports of rice, including paddy†, into Calcutta* by rail, river, canal, road, and sea (coastwise) during the months of April to June, 1919, amounted to 6,212,000 maunds, as against 3,290,000 maunds in the corresponding period of the preceding year,—an increase of 89 per cent. There was an increase (39 per cent) in the imports of coal and coke (26,002,000 maunds as against 18,713,000 maunds last year). The value of the imports by rail, river, road, and sea (coastwise) of Indian cotton piecegoods showed an increase of 95 per cent, the total value amounting to Rs. 2,09,76,000 as against Rs. 1,07,66,000 in 1918. The quantity of indigo imported during the months of April to June, 1919, decreased by 3,527 maunds to 398 maunds. The imports of raw jute amounted to 651,000 bales as against 975,000 bales,—a decrease of 33 per cent. The importations of gunny bags also showed a decrease of 17 per cent (85 million bags as against 102 millions in the preceding year). The total imports of oilseeds (linseed, and rape and mustard seed) increased by 62 per cent from 1,615,000 maunds to 2,615,000 maunds. The imports of tea decreased by 11 per cent from 511,000 maunds to 456,000 maunds

Exports.—The exports of cotton piecegoods, foreign, from Calcutta* by all routes during the months of April to June, 1919, increased by 12 per cent (Rs. 7,32,50,000 as against Rs. 6,52,68,000 last year). The exports of gunny bags (including the exports by sea to foreign countries) decreased from 299 million bags to 267 million bags, but the shipments of gunny bags to other Indian ports increased from 9 millions to 11 millions in number in the period under review. The quantity of kerosene oil despatched from Calcutta and Budge-Budge by internal routes and by sea (coastwise) increased from 1,193,000 maunds to 1,277,000 maunds, or by 7 per cent.

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore Docks.
† One maund of paddy is equivalent to 25 seers of rice.

REPORT ON FAMINE IN THE DISTRICT OF BANKURA FOR THE WEEK ENDING 30TH AUGUST 1919.

THE rainfall during the week was general and sufficient. Transplantation has been completed. The prospects of the autumn and winter paddy crops are favourable. Distress is decreasing. Seventy-one relief works were open during the week. The number of persons relieved on works was 8,998. The number of persons in receipt of gratuitous relief was 15,752, viz., 10,604 on cash doles in 125 unions, 3,683 on paddy-husking advances, 885 weavers and 580 better class poor. The grand total of persons relieved was 24,750. The increase in the number of persons on relief works was due to the completion of field operations, and the decrease in the numbers in receipt of cash doles was due to better agricultural prospects. The number of persons relieved on private works was 655. The charitable societies also relieved 627 persons on weekly rice doles and 900 on daily rice doles and by cooked food. During the week three grain-looting cases were reported. Public health is generally good. The outbreak of malaria in certain localities is reported. Cloth is being distributed to destitutes. The relief measures are adequate. The price of common rice varies from 5 to 5¾ seers in the rupee. Burma rice is being sold.

RESOLUTION ON THE REPORT ON THE POLICE ADMINISTRATION IN THE BENGAL PRESIDENCY FOR THE YEAR 1918.

GOVERNMENT OF BENGAL.

POLITICAL DEPARTMENT.

Police Branch.

CALCUTTA, THE 3RD SEPTEMBER 1919.

RESOLUTION—No. 3306P.J.

READ—

The Report on Police Administration in the Bengal Presidency for the year 1918.

Read also—

The Report on Police Administration in the Bengal Presidency for the year 1917 and the Resolution of Government thereon.

MR. C. W. C. PLOWDEN, C.I.E., held the post of Inspector-General of Police throughout the year, except for a period of three weeks, when he was on privilege leave, and Mr. T. C. Simpson acted for him in addition to his own duties as Assistant Inspector-General.

2. The Military Police Battalion under Major Macpherson fully maintained its reputation for discipline and efficiency, in spite of many demands on its services for unaccustomed duties which interfered with its regular training. During the year sanction was received to the addition of a company to the battalion, and recruitment is now going on. Since the close of the year, the General Officer Commanding the Presidency Brigade has inspected the battalion, and remarked that the standard of drill and training is very satisfactory, considering that the battalion has, since the outbreak of the war, been without its full complement of military officers. It is hoped that this defect will soon be removed.

3. The superior cadre of the service was increased during the year by the addition of an appointment of Additional Superintendent for the Faridpur district. Four temporary appointments of deputy superintendents were also made permanent.

The strength of the subordinate police force was increased by about 200 men, mainly in connection with the establishment of new investigating centres. The special armed force was increased in Chittagong, Dacca and Jalpaiguri, and since the close of the year sanction has been given to an increase in the emergency force in Noakhali.

Service in the armed branch continues to be unpopular. The Inspector-General of Police thinks that before long the question of increasing the pay of the branch will have to be considered, as the extra rupee allowed to the armed police does not compensate the men for the loss of the easier conditions and cheaper living in the mufassal enjoyed by the unarmed branch.

4. The number of recruits enlisted during the year was 2,911, of whom 1,847 or 63 per cent. were Bengalis, a larger proportion than in any previous year. The improvement in local recruiting is very satisfactory, and would be more rapid but for the difficulty that a large proportion of the candidates for enlistment fail to come up to the required standard of height and chest measurement, though the latter has been reduced, in the case of Bengalis, to 30 inches. Steps are being taken to recruit men of the Bengali Regiment who desire to join the police. The difficulty of securing upcountry recruits is however increasing. The men who formerly enlisted now prefer employment in the mills and collieries, and though a special recruiting party was deputed to the United Provinces only 445 recruits were obtained. At the close of the year, there were over 500

vacancies among constables, 134 of which were in the district of the 24-Parganas, where, as also in Howrah and Hooghly, it is difficult to induce local men to enlist. The probationary sub-inspectors appointed during the year included 40 graduates, and a few direct appointments were made in the rank of head constables, mostly from among candidates who had failed to secure sub-inspectorships. Sanction was given to a scheme for the direct appointment of graduates in law to the post of court inspector up to a limit of 10 per cent. of the annual vacancies.

5. The figures under the various heads of casualties rose from 1,999 to 2,898. The number of resignations rose from 666 in 1917 to 1,215 in the year under review. The Inspector-General attributes this large increase to various causes, not the least important of which is the refusal of leave on account of the inadequacy of the leave reserve. An increase in the scale of the ordinary reserve of head constables and constables recently sanctioned by the Secretary of State will improve the position in this respect.

The year was particularly unhealthy on account of the wide outbreak of influenza all over the country. An increase in mortality was therefore inevitable, while admissions into hospital rose by 1,440. Improvement in the housing of the police in the mufassal is urgently called for, but progress in this respect has been much hampered during the war owing to lack of funds.

6. There was a further increase in the number of officers and men who were rewarded either in money or with good service marks, and the amount of money disbursed in this way exceeded that spent last year by more than Rs. 13,000. The proportion of officers and men judicially punished for all offences remained stationary at 1·3 per cent. of the force. Of the 450 criminal cases against the police which were disposed of during the year, only 57 ended in conviction. Five police officers were accused of torture, but it is satisfactory that none of these charges were proved, while, with the exception of two sub-inspectors convicted of extortion and one constable convicted of bribery, the majority of the cases in which convictions were obtained were petty offences committed by constables. Of 30 civil suits instituted against the police, 17 were dismissed and 13 were pending at the close of the year.

7. During the year, the river police fleet was strengthened by the addition of five steam launches, two floating thanas, one *pansway* boat, four *ghasi* and forty-one *dinghi* boats. Twelve more launches are still required to complete the number sanctioned. The river police patrols have been able to effect a marked decrease in river crime in several districts. A notorious river dacoit, who was arrested during the year, admitted that, owing to the effective patrolling of the larger rivers, he and his fellow criminals had shifted the scene of their operations to the *khals* and smaller rivers. As usual, a feature of the work of the river police was the rescue of boats and crews in stormy weather. Altogether the officers and men of the river police rescued 78 persons from drowning, in many cases at great personal risk.

8. A revised curriculum of training for probationary sub-inspectors was introduced at the Sardah Training College at the beginning of the year, the main object being to give more time for practical work. The institution has grown considerably since it was first established, and a proposal for the appointment of an Assistant Principal is now under the consideration of Government.

9. The reports on the working of the village police are on the whole satisfactory, and the Inspector-General has furnished interesting details of several plucky acts of chaukidars in arresting criminals. The dafadari system, inaugurated in the Madaripur subdivision of the Faridpur district in 1914 as an experiment, has achieved a considerable measure of success. In Dacca, the panchayats continued to co-operate with the police in successful preventive work, but elsewhere, though on the whole the presidents of panchayats and the circle officers are willing to give the police every assistance, there is room for more regular and systematic co-operation between these three authorities. The instructions issued by the District Magistrate of Dacca have brought about a great improvement in this respect in the

Dacca district, and similar action might well be taken elsewhere. In spite of the remarks made on this subject in previous years, there are still indications that, in some districts, insufficient liberality is shown in rewarding chaukidars for good work. The Inspector-General of Police suggests that this may be due to the fact that Superintendents of Police are not kept fully informed of the state of the reward fund and of the amount available for distribution, but this difficulty can easily be removed by arrangement between the District Magistrate and the Superintendent, and cannot be accepted as an excuse for unsatisfactory chaukidari administration.

10. The amount spent on the police during the year 1918-19 was Rs. 1,05,83,092, as against Rs. 99,22,652 in the previous year, the increase being due mainly to additions to the force. A sum of Rs. 12 lakhs was spent on police buildings. The whole of the special grant given by the Government of India for non-recurring expenditure in connection with the reorganization of the police in the area which now forms the Presidency of Bengal has been spent, and any further expenditure on police buildings will have to be met from provincial revenues. No final estimate of the total cost of putting the police buildings of the province on a satisfactory footing has been drawn up, but the estimated cost of the works administratively approved for execution when funds are available amounts to over Rs. 80 lakhs.

11. There was a small decrease in the total volume of cognizable crime, and under most of the important heads, except robbery and dacoity. Including 12 unreported cases of the previous year and 82 *hât*-looting cases, the figure under dacoity rose from 437 in 1917 to 638, though burglaries decreased by 1,052 cases. The year was one of considerable economic stress, and this factor, together with the general unrest caused by the war, is largely responsible for the increase. While the restoration of peace, the conviction of some gangs and the vigorous preventive measures which have been taken will, it is hoped, effect an improvement, the restoration of normal conditions cannot be expected until the economic situation improves.

12. The results of the cases tried by the Courts compare favourably with those of other provinces in India and afford a satisfactory indication of the care with which cases are investigated. During the year 1,570 cases were found maliciously false by Magistrates, and prosecutions were undertaken in 448 cases, convictions being obtained in 163 cases. The results show an improvement over those of previous year and in some districts were particularly satisfactory. Elsewhere the matter requires closer attention at the hands both of trying Magistrates and of inspecting officers.

It is satisfactory to find that Magistrates are exercising greater discretion in sending petty cases to the police for enquiry, but in some districts there is still room for improvement in this respect. His Excellency in Council regrets to find further deterioration in the prompt disposal of cases by Magistrates. Attention was called to this matter last year, but little improvement can be expected until Magistrates realise that it is their duty to show greater firmness in refusing unnecessary adjournments.

13. There was a further decrease in revolutionary crime during the year, the number of dacoities being only three as compared with nine in 1917 and twenty-four in 1916. For the first time since 1907, no member of the public lost his life at the hands of the revolutionary party. The Governor in Council has, however, to deplore the loss of three brave police officers who were killed while attempting to arrest anarchists. A number of prominent revolutionaries were arrested and some significant seizures of arms and other implements of revolutionary crime were made. The party which seeks to attain its ends by violent crime is still alive, but the record of the year is a hopeful augury of the final success of the officers of the Intelligence Branch in their struggle with revolutionary conspiracy.

14. The Criminal Investigation Department was again largely occupied with measures for the repression of dacoity, and after protracted enquiry succeeded in bringing to justice many organised gangs in Bakarganj, Khulna, Midnapore, Hooghly, Howrah and other districts of the Presidency. Great credit is due to the officers of the Criminal Investigation Department for their successful prosecution of the Darjeeling gang case, which was

[illegible] the assistance of [illegible] had for some time been [illegible]. The department also secured the conviction of [illegible] for [illegible] fraudulent civil suits The training school which [illegible] Howrah in 1917 for the purpose of training officers in modern methods of detection has continued to do useful work, and good reports are being received of the officers who have completed the course. Some changes are being made in the curriculum as a consequence of the experience gained, the main object being to make the course of study more practical.

Ten gangs were declared under the Criminal Tribes Act during the year. The total number of gangs of habitual criminals which have been brought under control by the application of the provisions of the Act is now 58, and the total number of persons registered under the Act is 4,116.

15. The record of the year's work may be regarded as satisfactory. The force continued to be hampered by the absence of many officers of the Imperial service on military duty, and though the causes of unrest persisted. the situation has always been well in hand. The discipline of the force has been good and there have been few charges of serious misconduct against officers above the rank of constable. His Excellency in Council has read with pleasure the list of officers of all ranks who have been commended by the Inspector-General. The special acknowledgments of Government are due to Mr. Plowden, who has recently retired after 35 years' service in the Bengal Police. During this period he has seen the introduction of many important improvements and reforms for which he himself has been in no small measure responsible, and the Department has lost in him an officer of wide experience and much ability.

ORDER.—Ordered that copies of the Resolution be forwarded to the Inspector-General of Police, the Commissioner of Police, Calcutta, and all Commissioners of Divisions, for information

Ordered also that the Resolution be published in the *Calcutta Gazette*

By order of the Governor in Council.

J. H. KERR,

Chief Secy. to the Govt of Bengal.

REPORT ON THE WORKING OF THE LICENSED WAREHOUSE AND FIRE BRIGADE ACT FOR THE YEAR ENDING 31ST MARCH 1919.

NOTIFICATION.

No. 3412M.—The 2nd September 1919.—The following is published for general information under section 41 of the Licensed Warehouse and Fire Brigade Act, 1893 (Bengal Act I of 1893).

S. W. GOODE,
Offg. Secy. to the Govt. of Bengal.

No. $\frac{F.B. 49-19}{1030}$, dated Calcutta, the 15th August 1919,

From—R. CLARKE, ESQ., C.I.E., Commissioner of Police, Calcutta,
To—The Secy. to the Govt. of Bengal, Municipal Dept.

IN accordance with section 41, sub-section (2) of the Licensed Warehouse and Fire Brigade Act (I of 1893), I have the honour to submit herewith the report of the Chief Officer on the working of the Fire Brigade and Ambulance Department for the year ending the 31st March 1919.

No. $\frac{F.B. 49-19}{888}$, dated Calcutta, the 15th July 1919.

From—B. A. WESTBROOK, ESQ., Chief Officer. Fire Brigade, Calcutta,
To—The Secy. to the Govt. of Bengal, Municipal Department.
(Through R. Clarke, Esq., C.I.E., Commissioner of Police, Calcutta.)

I HAVE the honour to submit the following report on the working of the Calcutta Fire Brigade for the financial year ending 31st March 1919.

On my return from military service on the 2nd day of May 1918, I resumed charge of the Fire Brigade. During my absence station officer Jarrett efficiently carried out these duties.

2. **Financial Statement.**—The statement of the receipts and expenditure and payments made by the municipalities within the jurisdiction of the Fire Brigade Act, I of 1893, is given in Appendix I.

3. **Fires, etc.**—The total number of fires, or supposed fires, dealt with by the Fire Brigade during the year under review is 540, being an increase of 113 as compared with the previous year, and resulting in—

Fires	...	421 (331 in 1917-18).
False alarms	...	113 (88 in 1917-18).
Calls for special service	...	12 (8 in 1917-18).

It is unsatisfactory to note that no less than 83 of the above false alarms were assumed to have been given wilfully. In seven instances the offenders were arrested by the police, but I regret to say that the light sentences imposed have not had a deterrent effect. However, the Fire Alarm system has proved to be of benefit, and undoubtedly many serious fires have been averted owing to the rapid means by which the Brigade can now be communicated with.

3. Twenty-four fires occurred in premises licensed under the Licensed Warehouse and Fire Brigade Act, I of 1893, as compared with 15 in the previous year. The nature of the trades requiring licences under this Act are enumerated in Appendix XVII—

On one	day 9	fires or supposed fires occurred		9
On one	day 8	ditto	ditto	8
On two	days 7	ditto	ditto	14
On one	day 6	ditto	ditto	6
On six	days 5	ditto	ditto	30
On twenty	days 4	ditto	ditto	80
On thirty-five	days 3	ditto	ditto	105
On eighty-four	days 2	ditto	ditto	168
On one hundred and twenty	days 1	ditto	ditto	120
			Total ...	540

Summaries are given in the Appendix showing—

The district in which fires or supposed fires occurred (Appendix III).
The number of fires on every day and month throughout the year (Appendix IV),
Daily and hourly summary of fires or supposed fires (Appendix V).

The actual number of calls received during the year is 825 (588 in 1917-18), which figure included several instances where more than one call was received for the same fire. The means by which these calls were transmitted to the Brigade are given in Appendix II.

4. **Fire Loss.**—The damage caused by fire and water during the year is Rs. 15,50,2?4 (Rs. 7,82,835 in 1917-18), being an increase of Rs. 5,76,605 over the average for the past eight years. The increase of fire loss is mainly due to several serious fires in the jute presses in the Chitpur area during the latter part of the year, but I am glad to be able to report that the average damage per fire during the current year is Rs. 2,771 as compared with Rs. 4.727 for the past eight years. In practically every instance of serious fires there was delay in calling the Fire Brigade.

Summaries are given in Appendix showing—

Damage caused by fire, etc., in various districts (Appendix VI).
Classification of fires and calls (Appendix VII).
Means by which fires were extinguished (Appendix VIII).
Causes of fires and buildings affected (Appendix XV).
Comparative statement for the past ten years (Appendix XVIII).

5. **Fire Reports.**—Short reports of fires (Rs. 1.000 damage and over), are given in Appendix IX.

6. **Appliances.**—Appendix X shows the present distribution of the principal appliances in use by the Brigade, and Appendix XI gives the number of times each appliance has been turned out in response to fire calls, with monthly figures.

It is estimated that motor appliances travelled 5,343½ miles and horse-drawn appliances 302 miles during the year in responding to and returning from calls.

Two more motor fire engines are now on order, but delivery has not been effected owing to war. It is, however, anticipated that these machines will be delivered shortly.

Throughout the year the appliances have been maintained in good working order by the Fire Brigade staff, notwithstanding the difficulties experienced in obtaining spare parts and shortage of material.

7. **Fire Stations.**—Appendix XII gives the number of times each station has been turned out in response to fire calls, together with monthly figures.

I regret to say that the headquarters of the Fire Brigade are still situated in the premises temporarily hired from the Samavaya Corporation, Limited. These premises are not satisfactory and involve a large rental. Various sites have been selected for the permanent Fire Brigade headquarters, but unfortunately these sites have been required for other purposes. However, a sum of Rs. 30,000 has been allocated to the cost of building for new headquarters, and it is hoped that suitable site will soon be found. At present it is anticipated that, the site now occupied by the Corporation Gowkhana, District No. III (Lower Circular Road), will be utilised for this purpose.

In 191? the District Fire Brigade station in Halliday Street for the protection of the Barabazar area had to be vacated owing to the Calcutta Improvement Trust requiring the land for road widening. Premises were temporarily hired at Entally for the men and machinery formerly at this Fire station. Unfortunately this temporary station is at a considerable distance from the area which it protects, but I am glad to say that a suitable site has been found in Halliday Street, and plans are now being prepared for the re-erection of a District Fire station adequate for the work which it will be called upon to do. In the forthcoming budget application has been made for a sum to cover the cost of the building, and I anticipate that building this District Fire

station will be commenced at a very early date. The Barabazar area comprises exceptional fire risks, and owing to the very congested state of the streets with slow moving traffic, considerable time is lost in arriving at a fire in this area from the present stations.

Plans are prepared for accommodation of additional appliances and men at the District Fire station, Chitpur. It is hoped that this work will shortly be taken in hand as this District Fire station protects the industrial area of Chitpur and Cossipur, comprising numerous jute presses, etc. Undoubtedly when this station is more adequately equipped considerable saving can be effected in the serious fires which constantly occur in this area. From Appendix VI it will be seen that the majority of the fire loss has occurred in the Chitpur area.

The District Fire station at Howrah remains the same, and I regret to say that it is situated in an exceptionally unhealthy position. I trust that arrangements will be made for it to be re-built on a more central and healthy site.

Negotiations are now in progress with the Commissioners for the Port of Calcutta to erect a District station at the Kidderpore Docks. This station will primarily protect the docks, but will also respond to the calls in the Kidderpore, Watgunge and Garden Reach areas, also to other districts when required. It is suggested that this station shall be equipped by men of the Calcutta Fire Brigade, which will obviate the necessity for the Commissioners of the Port of Calcutta maintaining a fire staff of their own.

When this station is erected it is proposed to vacate the existing Fire Stations at Garden Reach and Watgunge.

For the protection of the districts of Sova Bazar, Darmahata, etc., it is hoped that arrangements will be made to provide a Fire station in this area which comprises very severe fire risks.

A Fire station in this area as proposed will be of great value as it will work in conjunction with the District Fire station at Chitpur and undoubtedly will considerably improve the efficiency of the work of the Fire Brigade, especially in the northern end of the town.

8. **Staff.**—The total strength of the Fire Brigade is 221, and notwithstanding the large increase of work the Fire Brigade is called upon to do, the number of the fire-fighting staff remains practically as it was seven years ago.

The general conduct and discipline has been good. A large number of changes have necessarily taken place owing to men proceeding on active service.

During the past few years the Brigade has been very short-handed, and the strain on the men at times has been considerable. It is now hoped that, on demobilisation, a suitable class of men will again be enlisted in the Fire Brigade.

Further it is hoped that as new Fire stations are erected the strength of the Fire Brigade will be adequately increased. The existing establishment is insufficient for the work, and makes little provision for leave and sickness.

A revised scale of pay is now before Government. Unfortunately the pay has not increased in ratio to the cost of living, and an enhancement of salaries will be much appreciated by all ranks. The present scale compares unfavourably with that offered by private concerns and accounts for a large number of changes of personnel in the Brigade.

The following is the present scale of pay up to the rank of station officer :—

	Rs.	
Station officers	250—15—325	per month.
Ditto	200—10—250	ditto.
Engineers	170—10—200	ditto.

(One engineer receiving a personal allowance of Rs. 50 per month for being in charge of workshops.)

					Rs.	
Firemen	...	...	...		125—5—150	per month.
Tindals	...	...	...	(4)	35	per month.
Do	...	...	...	(5)	30	ditto.
Do	...	...	...	(6)	25	ditto.
Khalasies	...	...	...	(25)	20	ditto.
Do.	...	...	...	(100)	18	ditto.
Do.	...	...	...	(20)	16	ditto.

Under Government order No. 638 T.M., dated 27th August 1918, a storekeeper has been sanctioned and has been entertained from the 1st November 1918. The pay of the syces has been increased to Rs. 12 under Government order No. 2385 M., dated 23rd September 1918.

9. **Fatalities and Accidents.**—Short details of fires and calls involving loss of life and accidents are given in Appendix XIV.

I am glad to be able to report that the members of the Calcutta Fire Brigade have been remarkably free from serious accidents, especially when considering the dangerous nature of the work involved at fires in jute presses, warehouses, etc., where, owing to expansion of jute when wet and buildings of inferior construction, walls so rapidly collapse, often with very little warning.

The most serious accident to a member of the Fire Brigade occurred on March 9th at the Canal Jute Press, Chitpur, when engineer Tucker had the misfortune to fall through a hole in the roof. Engineer Tucker had been engaged in demolishing dangerous walls, and in stepping backwards on to the roof he fell down about 22 feet. He was fortunate in receiving injuries to his right arm only. The position of Engineer Tucker was for a time extremely dangerous as the walls surrounding him were almost on the point of falling. Engineer Tucker was quickly conveyed to a safe position and a very few minutes after this the walls collapsed.

The total number of fatalities during the year are 10 as compared with 7 in the previous year. Of these 6 are cases of suicide by burning.

First aid has been rendered in numerous cases by the Fire Brigade with the materials carried on the fire appliances.

10. **Horses.**—No change has been made in the horses. Sixteen are in commission, but on arrival of additional motor fire appliances it is hoped to cut down this number. But for the difficulty in obtaining motor fire appliances due to the war the motorisation of the Brigade would probably have been effected before this.

11. **Water-supply.**—For the purpose of reporting on the water-supply the area protected by the Fire Brigade must be divided into four districts, viz., the city of Calcutta, Chitpur, Howrah and Garden Reach and Maniktala.

The water for fire-extinguishing is supplied throughout the city of Calcutta by means of mains and hydrants on the unfiltered water system. In cases of necessity arrangements are made to give connection to a small number of the filtered water mains.

In several instances the water-supply in Calcutta has been found inadequate and hydrants have been found out of order. However, the Water department is making endeavours to improve the supply, but much remains to be done. Unfortunately in Calcutta the waste of unfiltered water is excessive, principally through hydrants being opened by unauthorised persons and taps left running. If stricter supervision could be exercised over these points improvement may be effected. In cases where it has been found that the mains are too small estimates have been put up to the Corporation for increasing the size of the mains, but owing to the shortage of pipes little progress has been possible in this direction.

Another difficulty in connection with the unfiltered water-supply is the large amount of shells, stones, etc., which have accumulated in the mains. When there is any extra flow, such as occurs at a fire, these foreign substances very frequently choke the hydrants in use, and consequently during the progress of a fire sometimes it is necessary to remove a fire engine to a fresh hydrant, which of course entails much delay.

So far as Chitpur is concerned a really dangerous state of affairs exists and the time is rapidly approaching when the Fire Brigade will be powerless to deal with fires in this district, as no mains are provided for fire extinguishing, and the ponds, which have up to the present been relied upon for providing water for fire extinguishing, are rapidly being filled up on sanitary grounds.

The Chitpur district comprises an exceedingly important industrial area, and it is hoped that early arrangements will be made to provide an adequate water-supply.

Now that hostilities have ceased and it is possible to provide a new pumping plant for the Mullick Ghat pumping station (Calcutta), the suggestion is made that the existing pumping machinery at Mulllick Ghat should be reinstated at the north end of Calcutta and mains laid throughout Chitpur area so that the benefit of this machinery can be extended to the industrial area in the Cossipur-Chitpur municipality. The supply of water will also be available for sanitation and road-watering.

The same remarks apply to Howrah. Undoubtedly serious fires in either of the above districts must result as a consequence of the utterly inadequate water-supply.

Owing to the lack of water in certain parts of Howrah the Fire Brigade is unable to cope with fires such as may occur and extreme difficulty will be experienced in preventing such fires from unduly spreading, especially as the existing fire-float belonging to the Port Commissioners cannot approach near to the shore owing to its deep draught. I understand, however, that a scheme for installing an unfiltered water-supply throughout Howrah is now under consideration.

Garden Reach and Maniktala, although not so congested as the above districts, have no system of water-supply and again in these areas tanks are continuously being filled up.

At present the floating fire-engine belonging to the Commissioners of the Port of Calcutta is utilised at practically every fire within reasonable reach of the river and where mains are not provided.

In many cases in order to converge the necessary number of streams of water at fires as many as one to two hundred lengths of hose, each of 75 feet, have had to be used. It will be realised that tackling of fire under this condition takes an excessive amount of time and a large percentage of the efficiency of the streams of water is lost owing to friction of hose.

Owing to the districts which are so inadequately provided with water the pumping plant and hose of the Fire Brigade will have to be materially increased in the near future. In many instances it will be necessary to utilise fire-engines in relays to obtain the requisite water pressure at a fire, and as has been before pointed out, the conditions are becoming considerably worse as ponds are filled up.

The provision of fire mains, especially in industrial areas, requires urgent consideration.

The fire-float still remains under the control of the Port Commissioners, but it is used by the Fire Brigade on all occasions when required for extinguishing fires on, or near the banks of, the river. The question of transfer of the control of the fire-float to the Fire Brigade is now before Government, and it is hoped that this question will be settled shortly, as efficient co-operation in working is not obtained owing to dual authority and training and insufficient crew to man the fire appliances of the fire-float.

It is hoped that arrangements will be made to expedite the delivery of the fire-float now on order by the Port Commissioners as increasing reliance has to be placed on floating pumps to supply water for land fire-engines at fires in the vicinity of the river; in fact in many cases now it is practically the only means of water-supply.

For several years past it has been pointed out that the existing fire-float is inadequate. It is very old, slow steaming, deep draught, insufficient pumping capacity, and frequently out of repair.

I have to thank the officers of the Water Works department of the Calcutta Corporation for their endeavours to improve the water-supply and for their attention to the various complaints which have been made.

12. **Street Fire Alarms, Telephones and Electrical communications.**—

Appendix II shows the means by which fire calls have been transmitted to the Fire Brigade.

Whilst it is satisfactory to note that many serious fires have been averted owing to the facilities installed for calling the Fire Brigade quickly, there have also been several cases where fire alarms have not been operated as quickly as they ought to have been. notably at the fire which occurred at the Theatre Royal. and various fires at Chitpur. However. the public no doubt are increasingly appreciating the Fire Alarm system, and the following figures show that considerable benefit has been derived therefrom.

In 224 cases calls were received by one or more fire alarms only. and in 57 cases calls were received first by fire alarms and followed by other means of calling the Fire Brigade.

In 182 cases calls were received by one or more public telephones only, and in 31 cases calls were received first by public telephone, and followed by other means of calling the Fire Brigade.

In 22 cases calls were received from firemen on "look-out" duty only. and in five cases calls were received first from firemen on "look-out" duty and followed by other means of calling the Fire Brigade.

In 17 cases calls were received by messengers only, and in two cases calls were received first by messengers and followed by other means of calling the Fire Brigade.

Street fire alarms were actually used to call the Fire Brigade on 315 occasions, either as the primary or subsequent means as above. This is about 59 per cent. of the total number of calls.

Arrangements are being made for all places of public amusement, etc., to be in direct telephonic communication with the Fire Brigade, and by this means it is hoped that in all cases of theatre-fires very early information will be received by the Fire Brigade.

My thanks are due to the Bengal Telephone Company for their efficiency in keeping the Fire Alarm system and telephones in good working order, and for their continuous interest in all matters appertaining to the Fire Brigade work.

Appendix XVI gives the position of street fire alarms in commission. There are now 125 in use.

13. **Inspection Department, Theatres and places of public amusements.**—Much work has been done in endeavouring to safeguard the public in places of public amusement, but I regret to state that owing to the inadequate penalty clause contained in the bye-laws, satisfactory progress has not resulted. However, this question is now before Government, and it is hoped to get the matter on a satisfactory basis before long.

In connection with the Licensed Warehouse and Fire Brigade Act (I of 1893), during the year under review 3,935 inspections have been made (exclusive of theatres and places of public amusement).

Three hundred and sixty-four applications for licenses and complaints have been received and disposed of.

One hundred and twenty-seven prosecutions were instituted under section 14 of Act I of 1893, which resulted in 115 persons being fined, two persons being warned, four cases being withdrawn or filed, and six cases pending, the accused persons being absent.

Two licenses were refused as the sites were not considered suitable and in conformity with the requirements from the Fire Brigade point of view.

14. **General.**—The year under review has been an exceedingly busy one, and owing to the shortage of men a very large amount of additional work has fallen upon the senior members of the Brigade. Great credit is due to these officers as by carrying out such extra work the Fire Brigade has been enabled to spare a large percentage of men for service on the various fronts.

Now that hostilities have ceased it is hoped that the full complement of European officers and firemen will soon be obtained.

On the occasion of the riots which commenced on the 9th September 1918 the Fire Brigade was continuously on duty for a very large number of hours —no less than 17 calls being received and dealt with during the above period.

As will be seen from Appendix IX, giving short reports of the most serious fires, the month of March was notable for a large number of serious jute and other fires. It is very unsatisfactory to note that in many of these cases there was great delay in calling the Fire Brigade, often the first information of a fire being obtained by a fireman on "look-out" duty who saw volumes of smoke rising into the air. In the case of jute fires it is impossible to do efficient work unless the Fire Brigade is called immediately as fires of such material spread with exceptional rapidity. It is satisfactory however, to note that in every case of jute fires the fires have been confined to the godowns in which they originated.

15. **Jurisdiction.**—The Calcutta Fire Brigade protects the municipalities of Calcutta, Cossipur-Chitpur, Howrah, Maniktala and Garden Reach, and may attend fires outside the boundaries of these municipalities (but not exceeding a radius of six miles from the Central Fire Station), provided that appliances can be spared and on payment of a prescribed fee. Appendix XIX gives the Government order relating to this and the form which should be signed prior to the Fire Brigade leaving the jurisdiction of the above municipalities.

The actual area protected by the Calcutta Fire Brigade is just over 113 square miles, and the population included in the same is about 1½ millions.

16. **Map.**—For economical purposes the map usually inserted in this report, showing the situation of fire stations, fire alarms, etc., and where fires have occurred is omitted, but it is hoped to resume this next year.

17. **Ambulance Service.**—The motor ambulance service continues to do an immense amount of valuable work, no less than 8,792 calls having been received during the year under review as compared with 3,613 calls in the previous year. The number of miles travelled by motor ambulances during the year is 43,039 as compared with 18,849½ during the previous year.

Since the inauguration of the ambulance service 11,804 calls have been received and the machines have travelled 75,489 miles.

On 5th September 1918 a Hupmobile motor ambulance was purchased and two drivers and four attendants employed. This machine deals exclusively with infectious cases and has already responded to 675 calls and travelled 1,247 miles. These figures are not included in the figures in the preceding paragraph, which refer only to accidents and cases of illness.

On the occasion of the riots on the 9th September 1918 the ambulance service was extremely busy and received no less than 176 calls during the period referred to. A considerable amount of work was also carried out on the occasion of the outbreak of cholera which took place on the occasion of the return of the pilgrims from the Saugor Mela.

Unfortunately the use of the motor is considerably abused. It was originally intended that motor ambulances should be available for all cases of accidents and serious illnesses necessitating urgent removal to hospital, but owing to the fact that the ambulance is now so frequently called for petty cases of illness, not really necessitating the use of ambulance, it is anticipated that an order will have to be issued prohibiting ambulances responding to calls for cases of illness unless they are requisitioned by a medical man, nurse or responsible person.

Owing to somany unnecessary calls it has been found that frequently all the motor ambulances have been engaged on such work and have therefore not been available for urgent cases, such as accidents. etc. If it is required to continue to respond to all calls for cases of illness as at present, the only alternative is to considerably increase the number of appliances and staff, the present machines being totally inadequate to cope with the work. There are now four motor ambulances in commission, one of which is now used for infectious cases only, and the staff comprises six drivers and 12 attendants.

The infectious ambulance has been much in demand and will shortly have to be augmented by another machine and crew, as, owing to the large number of calls for this machine, considerable delay often occurs in moving infectious cases of illness to hospital.

Appendix XXII gives the scale of charges for the use of the motor ambulances, and Appendix XXI gives the number of calls received every day and month throughout the year.

The Ambulance department is financially maintained by Government and the Corporation of Calcutta, the former paying one-third and the latter two-thirds of the cost of up-keep. Appendix XX gives a statement of receipts and expenditure incurred by the motor ambulance service.

N. B.—Some of the appendices referred to in the above report are not reprinted in the Gazette.

APPENDIX I.

Statement showing receipts and expenditure of the Fire Brigade for 1918-19.

The year opened with a balance of Rs. 96,516-8-1 and the receipts amounted to Rs. 2,59,620-12-6 and the total expenditure to Rs. 2,68,837-10-5 leaving a balance of Rs. 87,299-10-2 at the close of the year.

RECEIPTS.

The receipts show an increase of Rs. 2,813-12-6 over the estimate. The credits on account of hire of engines, etc., in connection with calls outside the Brigade jurisdiction amounted to Rs. 2,648-12. The fees under the Petroleum Act and Fireworks show an increase of Rs. 825 and Rs. 30, respectively, over the estimate.

EXPENDITURE.

Under head "Establishment" there was a decrease of Rs. 3,382-7-4 due to the non-debits of the Chief Officer's pay for nearly two months owing to his being on deputation to Mesopotamia and to the leaves and vacancies in the grades of the European firemen and khalasis.

The total expenditure under head "Contingencies" amounted to Rs. 1,54,127-13-6 against a budget grant of Rs. 2,25,987, showing a decrease of Rs. 71,859-2-6. The savings include Rs. 41,738 provided in the budget for the purchase of (*i*) a combined appliance including fire escape, first-aid cylinders and pumps, (*ii*) a motor fire-engine with Rees' Rotarbo pump and Rs. 30,000 for the construction of the head-quarters station which remained unexpended at the close of the year.

Under head "Other charges" there was an increase of Rs. 272-4-3 due to the increased expenditure on water pressure.

Abstract of Receipts and Disbursements of the Fire Brigade Fund for the year end 31st March 1919.

APPENDIX IX.

Short reports of fires of Rs. 1,000 damage and upwards.

Date.	Time of call.	Address.	Trade.	Extinguished by—	Remarks.
1918.					
3rd April ...	11-18 A.M.	Bengal Hydraulic Jute Press.	Jute Warehouse.	Three Motor Fire Engines.	A brick built double-storied warehouse utilised for storing and assorting jute. Building damaged by fire. Contents comprising pucca bales of jute severely damaged by fire and water
4th " ...	9-50 A.M.	Calcutta Hydraulic Jute Press.	Ditto ...	Sprinklers ...	A large two-storied brick built warehouse containing baled and loose jute. Building slightly damaged and contents severely damaged by fire and water.
9th " ...	3-39 A.M.	38-39-46, Gorachand Road.	Dwelling house	Two Motor Fire Engines.	A number of large *golpatta* huts 28 carts of straw and some personal property severely damaged by fire and water.
10th " ...	2-1 P.M.	Bengalee Bazar	Ditto, etc.	Two Motor Fire Engines and one Steam Fire Engine.	A large number of *golpatta* huts used as dwelling houses and workshops, three carriages and personal property severely damaged by fire and water.
11th " ...	4-12 P.M.	Bengal Cotton Mill.	Cotton Warehouse.	Two Motor Fire Engines and private appliances	Quantity of cotton in bags and loose cotton waste in a corrugated iron shed.
12th " ...	10-36 P.M.	Belliaghatta Jute Mill.	Jute Mill ...	Ditto ...	A quantity of loose jute, hobbines and bails of twine in the preparing department. Building not damaged.
16th " ...	3-41 P.M.	Empire Theatre	Theatre ...	One Motor Fire Engine	About 125,000 feet of bioscope films, quantity of carbons, switches, etc., severely damaged by fire and water. Building slightly damaged.
14th May ...	10-31 A.M.	Chitpur Hydraulic Jute Press	Jute Press ...	Three Motor Fire Engines.	A brick built two-storied warehouse about 230′ × 80′ with wooden floors divided into several compartments used for assorting and storing loose baled jute. Contents of upper floor consisting of about 25,000 of loose jute and on the ground floor about 4,100 pucca bales of jute. Building severely damaged. Considerable portion of roof and walls collapsed and contents were severely damaged by fire and water. The first information the Fire Brigade received of the fire was from a man on look-out duty at a district station and considerable difficulty was experienced in obtaining sufficient water.
15th " ...	2-15 A.M.	143, Dharamtolla Street.	Shop and dwelling house.	One Motor Fire Engine.	A two-storied brick built building comprising general shop on ground floor and dwelling rooms above. Fire confined to ground floor. Building slightly damaged and contents consisting of typewriters, gramophone, etc., slightly damaged by fire and water.
16th " ...	7-15 A.M.	82, Serpentine Lane.	Shop ...	Hydrants ...	Contents of ground floor of two-storied brick built building consisting of cinematograph films, gramophones, furniture, etc., severely damaged by fire and water.
5th June ...	2-30 A.M.	37, Strand Road	Warehouse ...	One Motor Fire Engine and street hydrants.	A two-storied wooden and galvanised iron warehouse containing rice, grain, oilseed and oil, etc., Building severely damaged by fire and water. A galvanised iron warehouse about 75′ × 50′, containing tobacco, slightly damaged by fire and water. Difficulty with water-supply owing to obstructions in mains.

Date.	Time of call.	Address.	Trade.	Extinguished by—	Remarks.
1918. 9th May ...	10-15 A.M.	Barnagore North Mill.	Jute Mill ...	Two Motor Fire Engines, 1 Steam Fire Engine, Fire Float and private appliances.	A brick built godown about 250'×150', containing a large quantity of pucca bales of jute and gunnies. Contents severely damaged by fire and water. Building, roof and [illegible] partly collapsed. Adjoining warehouse divided into wall badly cracked and contents slightly damaged.
5th July ...	11-10 A. M.	SS. "Umkusi"	Ship ...	Fire Float and ship's hose.	Quantity of coal in bunkers.
17th " ...	4-43 P. M.	Sibpur Oil Mill ...	Oil Mill ...	One Motor Fire Engine and one Steam Fire Engine.	A corrugated iron shed about 200'×25' containing oil distilling plant and about 400 maunds of linseed oil. Building and contents severely damaged by fire and water.
24th " ...	5-50 P. M.	Central Hydraulic Jute Press.	Jute Press ...	Sprinklers ...	A quantity of loose jute and pucca bales damaged by fire and water.
7th August ...	2-15 A. M.	29, Benares Road, Howrah.	Oil Mill ...	One Steam Fire Engine.	A quantity of linseed oil and fitting of oil refinery in corrugated iron shed. Buildings and contents severely damaged by fire and water.
19th " ...	5-55 A. M.	SS. "Querimba"	Ship ...	Ship's appliances and first aid machines.	A quantity of mustard oil in tins in No. 4 hatch damaged by fire and water. Ship not damaged. Cause probably spontaneous combustion of gunny bags and saw dust used for dunnage and had been in contact with the oil.
28th ...	12-4 A. M.	159, Lindsay Mansions.	Cinematograph film store.	Hydrants ...	A quantity of bioscope films on the ground floor of a four-storied brick built building. Buildings not damaged.
9th September	5 P. M.	171, Harrison Road.	Chemists' shop	Ditto ...	Contents of chemist's shop considerably damaged by fire and water. Building not damaged. Causes believed to be incendiarism by rioters.
9th "	6-30 P. M.	4-1, Armenian Street	General Warehouse.	One Motor Fire Engine.	A quantity of cloth, blankets, carpets, etc. on the ground floor of a three-storied pucca building considerably damaged by fire and water. Building not damaged. Cause believed to be incendiarism by rioters.
9th "	7-50 P.M.	101, Armenian Street.	Rice Grain Warehouse.	Hydrants ..	A quantity of grain on the ground floor of a two-storied pucca building. Building slightly damaged and contents considerably damaged by fire and water. Cause believed to be incendiarism by rioters.
10th "	1-2 P.M.	36-5, Machuabazar Street.	Grain Warehouse.	Do ...	A quantity of grain and dynamo on the ground floor of a brick built building. Cause believed to be incendiarism by rioters.
17th October ...	3-5 P.M.	18, Convent Road	Chemical Factory.	Two Motor, Fire Engines.	A large hut used for the manufacture of chemicals, containing a large quantity of saltpetre and various chemicals damaged by fire and water. Considerable difficulty was experienced owing to the inadequate supply of water from mains.
23rd "	8-7 P.M.	Shellac Factory, Chitpur.	Shellac Factory.	Two Motor Fire Engines, one Steam Fire Engine and private fire appliances.	A galvanised iron building about 107'×70' divided by brick building walls rear portion of the upper floor, the whole containing stick lac and a small quantity of shellac severely damaged by fire and water. A brick built two-storied building connected to the above by wooden gangways containing machinery for cleaning shellac, etc., slightly damaged by fire and water. A brick-built office connected to the above slightly damaged by fire and water. The first information received by the Fire Brigade was from a man on look-out duty at a District Fire Station. Nearest available water-supply over 200 yards from fire.

Date.	Time of call.	Address.	Trade.	Extinguished by—	REMARKS.
1918. 25th October ...	7-19 P.M.	5, Umakanto Sen Lane, Chitpur.	Chemical Warehouse.	Private fire appliances.	A quantity of cotton and a dynamo in a single-storied pucca building used for repairing antiseptic pressings damaged by fire and water.
20th November	9-30 P.M.	Garia Road ...	Shops ...	One Motor Fire Engine.	A large *golpatta* thatched hut divided into two shops, containing spices, tar and pitch, severely damaged by fire and water.
27th "	2-29 A.M.	18, Ultadanga Road.	Rope Manufactory.	Three Motor Fire Engines and one Steam Fire Engine.	A galvanised iron shed about 508′ × 80′ containing coir and grass rope. Building and contents severely damaged by fire and water. Considerable difficulty owing to the inadequate water-supply in mains.
3rd December	12-26 P.M.	148-8, Sova Bazar Street.	Jute Warehouse.	Three Motor Fire Engines and Fire Float. Hydrants.	A two-storied brick built building divided into about six compartments used for storing jute. Fire confined to room of origination. Building slightly damaged and contents severely damaged by fire and water.
6th " ...	6-45 P.M.	18, Belliaghatta Road.	Carpenter and joiner shop.	One Motor fire Engine and one Steam Fire Engine.	A carpenter and joiner shop consisting of a two-storied corrugated iron building about 30′ × 80′ containing rattan cane, cotton, coir, etc., severely damaged by fire and water; building slightly damaged by fire.
9th " ...	10-30 A.M.	107, Wellesley Street.	Shops ...	One Motor Fire Engine and Hydrants.	A coach builder's shop constructed of tiled roof, durma mat walls, about 40′ × 150′ severely damaged by fire. Contents comprising various materials severely damaged by fire and water. Three grain shops constructed of tiled roof and durma mat walls. Building and contents consisting of grain damaged by fire and water. Six dwelling huts and one tea-shop slightly damaged by fire and water. Difficulty was experienced with the water-supply owing to hydrants being out of order.
23rd " ...	11-19 A.M.	133, Belliaghatta Road.	Dwelling huts	Three Motor Fire Engines one Steam Fire Engine and Hydrants.	A quantity of huts divided into shops and dwellings covering an area of about 280′ × 200′ severely damaged by fire and water. Very late call for Fire Brigade and considerable difficulty in checking fire owing to inadequate water supply.
25th " ...	1-44 P.M. ...	S. S. "Chosen Maru"	Ship ...	Two Motor Fire Engines' one Steam Fire Engine, Fire Float and mains	About 2,000 bales of jute stored in Nos. 3 and 4 holds severely damaged by fire and water. Ship slightly damaged.
31st " ...	6-41 P.M. ...	Shapur Bustee ...	Shops, stores, etc.	One Motor Fire Engine.	About six large *golpatta* huts and quantity of store, chaff cutters severely damaged by fire and water. No water could be obtained from the mains, therefore the Fire Engine had to be worked from a pond at a considerable distance from the fire.
1919. 2nd January ...	4-43 A.M. ...	Theatre Royal ...	Theatre ...	Three Motor Fire Engines and hydrants.	The building constructed partially of timber and corrugated iron roof—brick work up to first floor, brick proscenium wall and brick walls for stage completely gutted. Grand Hotel adjoining two sides slightly damaged by fire and water. Three-storied brick built building used as warehouse for ammunition, etc., on ground floor and two upper floors used as residential quarters slightly damaged by fire and water and verandahs burnt away. The fire was practically confined to the building in which it originated. The first information the Fire Brigade received of the fire was from the look-out man on duty at Fire Brigade headquarters who saw flames coming through the roof. A fire alarm is situated within 50 yards of the fire, but was not operated until some minutes after the alarm had been given by the look-out man.

Date.	Time of call.	Address.	Trade.	Extinguished by—	REMARKS.
1919.					
9th January	3-58 A.M.	224, Cornwallis Street.	Stable and store room.	Two Motor Fire Engines.	Stabling and store room in the ground floor of pucca building severely damaged by fire and water. Two cows, one calf and one [illegible] suffocated.
15th "	8-10 P.M.	Strand Bank Jute Press	Jute Press ...	Three Motor Fire Engines, two Steam Fire Engines, and one Valliant Fire Float.	A single-storied brick built warehouse about 400′×300′ divided into two compartments and containing bales of jute and hemp. Building severely damaged, walls including dividing walls, partially collapsed and roof partially collapsed. Contents severely damaged by fire and water. First call of the fire was received from the look-out man at the District Fire Station. Water supply was very inadequate and tank in the compound was emptied by a Motor Fire Engine.
18th "	7-12 P.M.	Cargo boat on river Hooghly	Boat ...	Fire Float ...	A country boat laden with jute on river Hooghly near Ramkristopur Ghat damaged by fire.
4th February	4-38 A.M.	7, Nawab Abdul Latif Lane	Shops and dwelling rooms.	One Motor Fire Engine.	A large single-storied kutcha erection of timber and durma matting divided into four shops and 16 dwelling rooms severely damaged by fire and water. A late call was received by the Fire Brigade.
5th "	6-34 A.M.	20, Sura 1st Lane, Maniktala	Drying shop ...	Ditto ...	A brick-built drying room with timber and stone roof damaged by fire and water. Contents consisting of wooden fittings and blue stones severely damaged by fire and water.
9th "	5-36 P.M.	151, Dharamtolla Street	Garage ...	Ditto ...	A single-storied brick built shop containing motor accessories, comprising petrol, oil, tyres, vulcanising machine, etc. Building slightly damaged by fire and contents severely damaged by fire and water.

APPENDIX XXII.

Corporation of Calcutta.

Motor Ambulance Service.

Rules.

1. The use of the motor ambulances is allowed free of charge in Calcutta and its immediate surroundings in the following cases :—

(*i*) In all accident cases, and in all labour cases where the parties are poor.

(*ii*) In the case of patients suffering from non-infectious diseases who are intended to be treated in hospitals in general indoor wards without payment.

(*iii*) In the case of patients suffering from non-infectious diseases who may belong to His Majesty's naval or land forces.

(*iv*) In the case of members of the Indian Defence Force whose injuries or sickness may have been caused in the discharge of their military duties.

2. Fees will be charged for the use of the motor ambulances in the following cases at the rates noted against each —

A. In the case of Calcutta residents :—

(*i*) Where a paying patient is conveyed from his home to a hospital *or vice versâ* —

	Rs.
(*a*) For patients treated in the three Nursing Homes, *viz.*, the Bengal Nursing Home in Bow Bazar and the two Nursing Homes in Middleton Row and Wood Street, or in the Woodburn Block of the Presidency General Hospital, Turret rooms of the Eden Hospital, larger five-rupee cabins or purdah cottages of the Dufferin Hospital, or in any other hospital or place of treatment on payment of a daily charge of Rs. 5 and above	5
(*b*) For patients treated in other paying wards of hospitals or other places of treatment on payment of a daily fee of less than Rs. 5 ...	2
(*ii*) In other than hospital cases, *i.e.*, where the ambulance is engaged to convey a patient to a railway station, steamer or elsewhere (but not to a hospital) and *vice versâ*, the fee will ordinarily be ... (but the Chief Officer, Fire Brigade, has the discretion to reduce it, if he thinks proper).	5

B. In the case of patients (suffering from non-infectious diseases) outside Calcutta :— Same rates as in A above, *plus* 8 annas per mile for the distance covered by the ambulance outside the municipal limits both ways.

3. In all cases in which fees are payable, the amount due must be prepaid. The drivers are supplied with a book of vouchers and will give a printed receipt in return for the proper fee.

4. In all accident cases in Calcutta or its surroundings, motor ambulanses will turn out on the requisition of any person if there are reasonable grounds to consider the call a *boná fide* one.

Requisitions (which may be verbal or written) for ambulance for conveying patients should be made by a doctor or nurse or other responsible person.

5. The Chief Officer, Fire Brigade, has the option of refusing to send the ambulances (*a*) outside the municipal limits, (*b*) in cases within the municipal limits in which he has reason to doubt the *boná fides* of the parties (if other than doctors or nurses) requisitioning.

No. S. 2321, dated Calcutta, the 14th August 1919.

From—The Hon'ble MR. J. DONALD, I.C.S., C.I.E., Chairman of the Corporation of Calcutta,

To—The Secretary to the Government of Bengal, Municipal Dept.

I HAVE the honour to submit the following report, under section 41 of Act I (B.C.) of 1893. for the year 1918-19.

During the year under report, the fees under sections 10 and 24 were levied at 10 per cent. on the annual valuation of warehouses, as in the preceding year.

A statement showing the receipts and disbursements of the Licensed Warehouse Fund and a list of jute and other licensed warehouses for the year 1918-19 in a consecutive form are appended.

Licensed Warehouse (Fire Brigade) Fund.

No. 133M., dated Calcutta, the 28th July 1919.

From—The Hon'ble MR. J. LANG, I.C.S., Commr. of the Presy. Divn.

To—The Secy. to the Govt. of Bengal, Municipal Department.

I HAVE the honour to submit, herewith. copies of the report on the working of the Licensed Jute Warehouse and Fire-Brigade Act, I (B.C.) of 1893, for the year ending the 31st March 1919, in Cossipore-Chitpur, Maniktala and Garden Reach Municipalities.

No. 899, dated Tala, the 13th June 1919.

From—BABU HEM CHANDRA DE, M.A., Chairman, Cossipore-Chitpur Municipality,

To—The Magistrate of the 24-Parganas, Alipore.

WITH reference to your letter No. M—327-1-19, dated the 6th May 1919, I have the honour to submit the following report on the working of the Jute Warehouse and Fire Brigade Act within the municipality during the year 1918-19, together with the statements of receipts and disbursements and of the licensed warehouses, in the forms prescribed by Government.

2. The rate of the licence-fee levied on the warehouses in the year of report was 7½ per cent. on the annual valuations of warehouses, as was done in the previous year.

3. The total receipts from the fees and the rates specified in statement I amounted to Rs. 27,422-10. The demand of the Commissioner of Police for the year on account of contribution towards the cost of maintenance of the Metropolitan Fire Brigade payable by this municipality being Rs. 40,652, the Municipal Commissioners had to pay Rs. 13,229-6 from their general fund.

4. No rates were levied under section 25 *(i) (a)*, *(b)* and *(c)* of the Licensed Warehouse and Fire Brigade Act during the year of report.

5. A sum of Rs. 58 was received from the Police Magistrate, Sealdah, during the year of report, as fine imposed on persons using warehouses without licences.

6. The warehouses licensed during the year of report, are shown in the statement put up herewith.

STATEMENT I.

Statement of Receipts and Disbursements.

Opening Balance on 1st April 1918—Nil. The Debit Balance of Rs. 13,229-6 was met from the general fund.

Maniktala Municipality.

No. 821, dated Narkeldanga, the 22nd May 1919.

From—BABU UPENDRA CHANDRA BANERJEE, M.A., B.L., Chairman, Maniktala Municipality,

To—The Magistrate of the 24-Parganas, Alipore.

WITH reference to your letter No. M.327-1-19, dated the 6th May 1919, I have the honour to submit the Annual Report for the year 1918-19 on the working of the Jute Warehouses and Fire Brigade Act during the said year.

(1) The share of expenditure allotted to this municipality by the Commissioner of Police was Rs. 5,082, which was discharged in two instalments.

(2) The revenue during the year of report amounted to Rs. 3,814-14-6.

(3) Licence fees were levied on jute warehouses at the rate of 4 per cent. and 8 per cent. on the annual value of the holdings and at 10 per cent. on trades of other descriptions.

(4) The jute godowns and firewood, hay and straw depôts are mostly situated near the Circular Canal, which bounds the municipality on all sides. The Surah jute mill and the jute pressing mill of Messrs. Landale and Clarke are the two mills situated within this municipality.

(5) The following statements in the prescribed forms are annexed hereto:—

(a) Statement showing the receipts and disbursements for the year 1918-19.

(b) A statement showing the number and locality of jute warehouses.

No. 117G.M., dated the 2nd June 1919.

From—J. A. MURRAY, ESQ., Chairman, Garden Reach Municipality,
To—The Magistrate of the 24-Parganas, Alipore.

WITH reference to your letter No. M.-327-1-19, dated the 6th May 1919, I have the honour to report as follows on the working of the Licensed Jute Warehouses and Fire Brigade Act in this municipality for the year 1918-19 and to submit statements I and II in the prescribed form.

2. During the year under report the total income from jute warehouse fees and from rates under section 25(*b*) of the Fire Brigade Act, as shown in statement I, was Rs. 3,755-2 against Rs. 3,905-14-6 in the previous year. The amount of contribution paid to the Fire Brigade Fund was Rs. 7,622 against Rs. 6,317 in 1917-18.

In levying the jute warehouse fees the limitations prescribed by the provisos under section 10 of the Fire Brigade Act were strictly followed.

3. The rates at which the fees were levied were 8 per cent. on the annual value of all large warehouses, 10 per cent. on the annual value of wood and straw depôts and ½ per cent. on the annual value of all bustee lands with huts, if any, on them. A list of licensed warehouses within this municipality during the year under review is given in statement II.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 4th September 1919.

Summary.—During the week light to moderate rain was general throughout the province. More rain is urgently wanted, especially in some of the northern and eastern districts, for transplanting of winter paddy and steeping and washing of jute. The harvesting of jute is progressing slowly for want of sufficient water for steeping, but that of autumn paddy is going on as usual. The weeding of winter paddy continues. The condition and prospects of standing crops are generally satisfactory. Damage to jute by insects continues to be reported from 24-Parganas and Nadia. The average price of common rice for the province has risen by about 4·24 per cent. as compared with that of the previous week. The daily average number of persons engaged in test works in the Brahmanbaria subdivision, during the week was 32.

* New gauge fixed at Rajmahal from 1st June 1910 in place of the gauge at Sahebganj. The zero of gauge at Rajmahal 50·46 ft. above [illegible].S.-L. from 10th February 1916 to 15th June 1918. From the 16th June 1918 to 6th April 1919 April 1919 it is 56·319 ft. above M. S. L.

† To compare the reduced levels shown in these monthly printed statements before and after the 1st June 1903, 5·78 ft. October 1909).

(*a*) A new gauge fixed at Monghyr on 16th July 1914.

(*b*) From the 1st November 1915 the zero of gauge was 2·43 ft. above M.S.-L. Previous to that the zero was at M.S.-L zero is 1·509 ft above M.-S.L.

(*c*) From the 25th January 1916 to 4th April 1919 the zero of gauge at Berhampore was 30·99 ft. above M.S.-L. From

(*d*) From the 25th October 1916 a temporary wooden gauge with its zero at 49·00 ft. above M.S.-L. was erected at 3rd June 1919. From 4th June 1919, the zero is 1·51 ft. above M.S.-L.

(*e*) Gauge shifted from Sabik Goalundo to Fakiranad from 30th June 1919.

The 9th September 1919.

REPORT OF THE COMMITTEE ON THE HOOGHLY RIVER AND ITS HEAD WATERS.

GOVERNMENT OF BENGAL.

IRRIGATION DEPARTMENT.

CALCUTTA, THE 9TH SEPTEMBER 1919.

RESOLUTION—No. 4133I.

READ—

(1) Report of the Committee on the Hooghly River and its head waters.
(2) Note on the geological aspect of the changes that have taken place in the rivers of Bengal, by Messrs. Hayden and Pascoe.
(3) Report on the physical and hydraulic characteristics of the rivers of the delta, by Mr. H. G. Reaks.
(4) Report of the special Sub-Committee regarding the scientific and hydrographical data and practical measures required for gauging the condition of the Nadia rivers and protecting them from deterioration.
(5) Note on deltaic rivers, by Mr. C. Addams-Williams, C.I.E.

IN pursuance of the Bengal Government Resolution No. 373T.-I., dated the 9th October 1916, a press *communiqué* was issued on the 17th February 1917, notifying for general information that the Governor in Council has been pleased to appoint a Committee, of which the constitution is given below, to advise Government on the steps which should be taken to carry out systematic observations of the changes in the Nadia rivers, and also, if possible, to improve their condition as navigable channels and as feeders of the Lower Hooghly.

President.

The Hon'ble Mr. C. J. Stevenson-Moore, C.V.O., I.C.S., Member, Board of Revenue, Bengal.

Members.

(1) The Vice-Chairman, Port Commissioners, Calcutta, Mr. S. C. Williams.
(2) The Deputy Conservator, Port of Calcutta, Commander E. A. Constable, R. N. (retired).
(3) Mr. C. Addams-Williams, C.I.E., Superintending Engineer, Bengal.
(4) Major F. C. Hirst, I.A., Director of Surveys, Bengal.
(5) An officer of the Survey of India, nominated by the Government of India.
Lt. Col. C. H. D. Ryder, C.I.E., D.S.O., R. E., Superintendent, Map Publication.
(6) An officer of the Geological Survey, to be nominated by the Government of India.
Mr. H. H. Hayden, C.I.E., Director, Geological Survey of India.
(7) Mr. J. Campbell, of Messrs. Mackinnon, Mackenzie & Co., representative of the Bengal Chamber of Commerce.
(8) Mr. James E. Roy, of Messrs. Macneill & Company, representative of the joint steamer companies (I. G. N. & Ry. Co., & R. S. N. Co. Ld.)
(9) Mr. A. R. Murray, of Messrs. Thomas Duff & Co. Ltd., representative of the Jute Mills Association.
(10) The Hon'ble Maharaja Sir Manindra Chandra Nandi, K.C.I.E., of Cossimbazar.
(11) The Hon'ble Raja Hrisikesh Laha, C.I.E.

The report of the Committee is now before Government.

2. The Governor in Council desires to accord his appreciation of the careful and detailed manner in which the gentlemen forming the Committee have carried out investigations and drawn up their report on the Hooghly river and its headwaters; and to thank them for their labours and for the compilation of a most interesting and valuable record.

ORDER.—Ordered that a copy of this Resolution be published in the *Calcutta Gazette* and that a copy thereof, with copies of the report and maps, be submitted to the Government of India, and supplied to Departments of Government and to public bodies interested in the question.

By order of the Governor in Council,

F. A. A. COWLEY,

Secy. to the Govt. of Bengal.

Printed at the Printing Office, and published by the Book Depôt of the Bengal Secretariat, Writers' Buildings, in the City of Calcutta, on the 10th September 1919.

LIBERALITY OF BABU MUKHRAM KANURIA OF CALCUTTA.

No. 2761 Marine, dated Calcutta, the 1st September 1919.

From—THE HON'BLE MR. F. A. A. COWLEY, Secretary to the Govt. of Bengal, Marine Department,

To—BABU MUKHRAM KANURIA, of the firm of Messrs. Luchminarain Bunsidhar.

I AM directed to convey to you the thanks of the Governor in Council for your liberality and public spirit in having made a gift of Rs. 1 lakh, for the construction of a Dharamsala building near Chandpal Ghât, for the accommodation of third class passengers by the Burma steamers.

REPORT ON FAMINE IN [illegible] FOR THE WEEK [illegible]

DURING the week the [illegible] The agricultural prospects are favourable. [illegible] were open, the number of persons employed [illegible] The total number of persons on gratuitous relief was [illegible] persons on cash doles in 125 unions, 3,683 on paddy-husking [illegible] and 580 better class poor. The grand total of persons relieved was [illegible]. The decrease in the number of persons relieved on cash doles was due to the improvement in the situation. The number of persons relieved on private works was 750. The charitable societies also relieved 684 persons by weekly doles and 900 persons by daily rice doles and cooked food. Two cases of theft of rice and one of grain-looting were reported during the week. Public health is generally good. Outbreak of malaria is reported from certain localities. Cloth is being distributed to destitutes. The relief measures are adequate. The price of common rice varies from 4½ to 5½ seers in the rupee. The rise in the price of rice is reported to be due to heavy rain and difficulty of transport by road. Burma rice is being supplied for sale.

M. C. McALPIN,
Secy. to the Govt. of Bengal.

DARJEELING, *the 11th September 1919.*

RESOLUTION ON THE ADMINISTRATION OF THE CHITTAGONG HILL TRACTS.

GOVERNMENT OF BENGAL.

POLITICAL DEPARTMENT.

Political Branch.

DARJEELING, THE 12TH SEPTEMBER 1919.

RESOLUTION—No. 2476P.D.

READ—

The Report on the Administration of the Chittagong Hill Tracts.

During the last two years, the question of the administration of the Chittagong Hill Tracts has engaged the attention of the Government of Bengal. The substitution of territorial for tribal administration, the extension of settled cultivation among the hillmen and the general advance of civilisation have raised new problems and have rendered necessary some development of the administrative system.

2. A full report on the whole question has been submitted by Mr. F. D. Ascoli, I.C.S., who has deputed to the Hill Tracts in 1918 to make a thorough examination of the existing revenue arrangements and the system of land settlements, and to submit proposals for a reformed system making adequate provision for securing the rights of the cultivators, the headmen and the village community. It is neither possible nor desirable to pass orders immediately on Mr. Ascoli's detailed proposals. They must await further investigation by the new revenue agency which it is clearly necessary to set up. His Excellency the Governor has, however, recently visited Rangamáti and has discussed the whole problem with the local officers and the Chiefs, and it is desirable to set forth the general lines of the policy which Government have decided to adopt.

3. The first and most important question is the regulation of plough cultivation which has extended greatly during the past fifty years. In 1868, there was only one small plough lease in existence. At present, according to the returns, which are admittedly imperfect, there are 16,463 plough holdings, covering an area of 42,667 acres and paying a revenue of over Rs. 75,000. These figures show conclusively that the hillman is capable of settled cultivation and that provision must be made for such cultivation as a permanent feature of the administration. It is, however, unsatisfactory to find that one-eighth of the area under plough cultivation is held by the Chiefs and that subletting has been sanctioned in more than one-tenth of the area, while the area actually sublet is very much greater. The policy of Government to settle lands direct with hillmen cultivators has therefore been to a large extent frustrated. Under existing arrangements, the sub-lessees have no rights of any kind in the land; such rights as exist are getting into the hands of the wrong people, and it is necessary to take steps for the protection of the actual cultivators. Unless a proper tenancy system is introduced, the district will find itself saddled with the worst of all agricultural systems, where the land is held by middlemen tenants cultivating through raiyats who are little better than labourers.

4. The provisions regarding transfers and subletting in the existing rules are as follows:—

"All lands held for plough cultivation on lease from Government under whatever rules they have been or may be granted, are subject to the condition that they cannot be sublet or transferred, except on hereditary succession or with the consent of the Commissioner. No partitions can be made without the consent of the Commissioner. For a tenant temporarily to make over his holding to another person in the case of illness, incapacity, minority, absence on a journey or in the like exigency, is not to sublet; but in no such case can the tenant recover from his substitute or trustee a higher rent than he has himself to pay."

This rule, if properly worked, ought to suffice to prevent undesirable subletting and transfers; but in the absence of any clearly defined policy, and in part owing to the multiplicity of authorities empowered to grant leases, it has not been properly worked. It would, in fact, appear that in order to encourage the spread of plough cultivation, leases have been granted under which the lessees have been deliberately allowed to take up more land than they could cultivate themselves, with the intention that they should establish tenants upon it. The Governor in Council is convinced that this policy is mistaken. Plough cultivation is probably extending as rapidly as desirable, and in any case it is better that its extension should be temporarily checked rather than that it should be stimulated by the adoption of unsound methods. It has accordingly, been decided that the settlement of lands shall be regulated in future by the following principles :—

(1) Leases will be sanctioned by the Deputy Commissioner and by no other authority. No lessee shall be permitted to hold more than 25 acres in all, and leases will be granted only to hillmen, provided that non-hillmen of the cultivating classes actually resident in a village at present may be given a lease in that village up to the maximum of 25 acres.

(2) No subletting shall be allowed, except with the sanction of the Deputy Commissioner which shall only be given to meet cases of temporary incapacity, such as minority, illness or temporary absence.

(3) The rent of sub-tenants duly authorised by the Deputy Commissioner shall not exceed by more than 50 per cent. the rent paid by their landlords to Government for the area sublet.

(4) So-called labourers who are remunerated by a share of the produce will be treated as sub-tenants, and, if they are recognised by the Deputy Commissioner, their rents will be regulated by rule (3) above.

(5) Transfers will be absolutely prohibited, except that the Deputy Commissioner will be authorised to sanction usufructuary mortgages for a period not exceeding seven years, and providing for the extinction of the whole debt, including principal and interest, within that period, subject to the condition that the mortgage will not in any event be extended beyond that period. Unauthorised transfers will in no circumstances be recognised unless the transferee has obtained a prescriptive right by twelve years' possession, the burden of proving which will lie on him.

(6) In all cases of unauthorised sub-leases or transfers, the Deputy Commissioner will be empowered to resume the land and to resettle it with the transferor or lessor, or with the transferee or sublessee, or with another hillman raiyat of the village, according to circumstances.

5. The question of the application of these rules to pre-existing leases will require further examination. In a few of the older leases, subletting seems to have been recognised or at any rate not definitely forbidden, and the indiscriminate resumption of lands might lead to hardship. At the same time, leases of lands in the Hill Tracts have always been given for the purpose of bringing land under cultivation, and no rents are paid on lands under the present system until they are brought under cultivation. An essential preliminary to the effective introduction of the new rules will be a detailed survey and record-of-rights, which will bring to light the lands held under existing leases, and the question of their treatment can be considered further when the facts are known in fuller detail. If it is decided to allow subletting in such cases, it will be necessary to secure to the sub-tenants full rights of occupancy and protection against rackrenting.

6. It has further been represented that a holding of 25 acres is insufficient for the maintenance of a headman, and that in their case the area should be increased to 50 acres, with permission to sublet at least a portion of the

holding. The Governor in Council will be willing to consider this matter further in connection with the revision of the lists of headmen, a matter which is discussed below. If subletting by headmen is allowed, full provision will have to be made for the protection of their sub-tenants.

7. As already stated, a survey and the preparation of a detailed record-of-rights form an essential preliminary to the introduction of the policy of settling land direct with the actual cultivators, who are to be given rights of occupancy, but no right to transfer or sublet without special sanction and for special reasons. Arrangements for carrying out these operations will be made in due course. It is proposed to entrust them to the ordinary district staff, but an agency for the inspection and co-ordination of the work in different areas will be provided, if necessary. Eventually the terms and conditions under which the land is held will be embodied in the record-of-rights, and it will be possible to dispense with lease forms. Meanwhile leases will continue to be issued in simple *amalnama* forms, providing for an initial rent-free period with subsequent decennial settlements of rent. The question whether there should be an intermediate period before full occupancy rights are granted, in order to ensure land being brought under cultivation, will be examined later. A further matter for investigation during the preparation of the record-of-rights will be the accumulation of arrears of rent and the measures to be taken to put the annual revenue demand on a proper footing.

8. The completion of the record-of-rights will render possible the introduction of certain reforms in the system of assessment and collection of land revenue, but it is unnecessary to discuss these in detail at present. Special measures will be necessary to train the headmen in the new system, and this will be one of the most important duties of the new staff. It has been suggested that the revenue demand might be paid direct to the Deputy Commissioner instead of through the Chiefs as at present, and no legal objections could be raised to such a course which would have certain practical advantages. It has always been held that the property in the land in the Hill Tracts belongs to Government, and that Government recognises in the Chiefs only a delegated power to collect the revenue on its behalf. That delegation could be withdrawn at any time, if developments of the revenue system rendered such a course advisable. In view, however, of the functions which the Chiefs have hitherto carried out in this respect, the Governor in Council is unwilling to deprive them of all connection with the revenue administration in the future. They have given an assurance of loyal co-operation in any reforms which it may be necessary to introduce, and so long as they fulfil their functions to the satisfaction of Government they will be allowed to continue to act as the agents of Government in the collection of the plough rents.

9. In the matter of the *jum* tax, it is not proposed to make any important alterations in the present system. The tax was settled in 1915 for a period of ten years, and it is said that the assessment is on the whole equitable. Mr. Ascoli's proposals for a revision of the incidence of the tax and of the list of exempted persons may therefore stand over till the next settlement. The reforms which he suggests in regard to the accounts and receipt forms and the adoption of kist days should, however, be given effect to at once.

10. Along with the *jum* tax are levied certain unauthorised *abwab* and *nazars*, some by the headmen and some by the Chiefs. It has been proposed that these should be definitely declared illegal and forbidden, but further enquiry is necessary before final orders can be passed. The Commissioner has been asked to submit a report on the subject.

11. No important changes are contemplated in the administration, apart from the revenue system. The Chiefs have asked for enhanced criminal powers, but it is impossible to grant these in the present state of their courts, and until inspection has shown a marked improvement in efficiency. It has, however, been decided to raise the limit of their jurisdiction in the matter of offences against property to cases where the value of the property does not exceed Rs. 50. The present irregular investigation of police cases by

the Chiefs must cease and cognisable crime must be reserved for the regular police force.

12. One question of fundamental importance in connection with the administration of the Hill Tracts is the appointment of village headmen. Under the existing rules, the headmen are appointed by the Superintendent after consultation with the Chiefs and the villagers, and a headman may be dismissed by the Superintendent for misconduct or incompetence. The appointment is not hereditary, but a son when competent may be appointed to succeed his father. This system should, in theory, give the Superintendent ample power to secure the appointment of competent headmen; but, in practice, the results are far from satisfactory. The office of headman in many villages is held by minors and absentees, while in some villages the Chiefs themselves exercise the powers of headman through paid subordinates. These arrangements cannot be allowed to continue. The appointment of competent resident headmen is essential for the working of any system of administration in an area like the Hill Tracts, and the reformed revenue system which it is proposed to introduce will be unworkable without it. Steps must, therefore, be taken to appoint competent resident headmen in all villages where the existing headmen are minors or absentees, or otherwise incapable of performing their duties. The Chiefs will no longer act as headmen, except in the villages in which they themselves reside. They have represented that they should receive compensation for the loss of their income as headmen in other villages, and their claim will be considered on receipt of further particulars, which they have been called upon to furnish. In the case of those minor headmen whose appointment has been recognised by the Superintendent, temporary arrangements may be made for carrying on the duties of headmen, until the minors become capable of taking up their posts. Subject to this exception, the list of headmen must be thoroughly revised on local enquiry, and the District Officer must satisfy himself that only men who are thoroughly competent to perform their duties and enjoy the confidence of the people are allowed to retain their posts. Consultation with the villagers regarding the selection of headmen is essential and should not be allowed to degenerate into a mere formality.

13. In regard to the official administration of the district, it is proposed to substitute a member of the Indian Civil Service as Deputy Commissioner for the existing Superintendent, and to divide the district into three subdivisions corresponding with the Chiefs' circles, each in charge of a Subdivisional Officer, who will be directly responsible to the Deputy Commissioner for the administration of his subdivision. These changes will be introduced about the beginning of the next financial year. The new Deputy Commissioner will in the first place proceed to make himself acquainted with the district and its inhabitants and will arrange to start an experimental survey and record-of-rights in selected typical areas during the cold weather of 1920-21. In the course of these operations, which will be supervised by the Director of Land Records, it should be possible to devise a suitable procedure and rules, and to draw up a programme for the extension of the operations throughout the district.

14. Meanwhile the Commissioner should examine the rules and orders at present in force and report what changes are necessary in order to enable the first steps in administrative reform to be taken by the introduction of the new revenue agency. The Chiefs strongly deprecate the issue of an entirely new set of rules immediately, and urge with some reason that the people will find it easier to grasp the new system if amendments are made and new rules inserted gradually as necessity arises. The Governor in Council fully sympathises with this point of view. It has always been a tradition with the officers responsible for the administration of the Hill Tracts that they should carry the Chiefs and people with them as far as possible, and this tradition must be maintained. Many of the unsatisfactory features which have been discovered in the administration are due rather to failure to apply existing rules than to defects in the rules themselves, and a violent breach with the past is both unnecessary and undesirable. In enforcing the policy now formulated by Government the object of the local officers should be quietly and

tactfully to repair existing defects and to secure the co-operation of the Chiefs and the people in all the measures undertaken for this purpose.

The main objects of that policy are accepted by all. They may be described briefly as the settlement of land direct with hillmen cultivators, and the preparation of a record-of-rights for their protection; and in the administrative sphere, the gradual and tactful enforcement of the principle that in every mauza there shall be a resident headman capable of performing the duties imposed upon him, and that the Chiefs should be given every opportunity of co-operating loyally in the reformed revenue administration. In course of time, extensive changes in the rules will no doubt be found necessary, but it is not desirable to frame hard-and-fast rules until the Deputy Commissioner has had opportunities of studying the problem in detail and of making experiments in regard to the measures required to give effect to the policy of Government. For the present, therefore, no alterations should be made in the existing rules beyond those which are necessary in order to enable the new revenue administration to be set up.

15. Not the least valuable portion of Mr. Ascoli's report is that which deals with the economic condition of the district, and it is from no want of appreciation of the importance of this question that the Governor in Council has refrained from discussing it in this Resolution. The transition from nomadic to settled cultivation is bound to create troubles and difficulties, calling for constant care and watchfulness, and it will be an important part of the duties of the new administrative agency to do all that can be done to assist the people at this juncture. Further investigation of the problem is necessary before any definite action can be taken, but the Governor in Council, as a preliminary measure, has arranged for the establishment of an agricultural farm at Rangamati and the appointment of a district agricultural officer whose duty it will be to make a thorough study of the agricultural conditions of the district, with special reference to the improvement of existing methods of cultivation, whether by *jum* or by plough.

ORDER.—Ordered that this Resolution be published in the *Calcutta Gazette* and that it be forwarded to the Commissioner of the Chittagong Division, for information and necessary action.

Ordered also that copies of the Resolution be forwarded to the Revenue and Appointment Departments, for information and necessary action.

By order of the Governor in Council,

J. H. KERR,

Chief Secy. to the Govt. of Bengal.

DEPARTMENT OF AGRICULTURE, BENGAL.

Preliminary Forecast of the *Bhadoi* crops of Bengal, 1919-20.

[*Note*,—On an average of the five years ending 1917-18 the area under autumn rice in Bengal has represented some 6·5 per cent. of the total area under rice in British India.]

Character of the season.—The weather at sowing time and subsequently was generally favourable in West Bengal but in North and East Bengal a prolonged drought in the early part of the season retarded sowings to some extent, and in one or two cases damaged the crops after germination. The latter part of the season has been generally good and the season, as a whole, may be regarded as having been fairly favourable and better than last year. Some damage by flood and insect has been reported from the Presidency Division, Pabna, Malda, Faridpur and Bakarganj.

Acreage.—The total area sown this year with the different *bhadoi* crops is reported to be 5,991,900 acres against 5,937,200 acres and 5,933,300 acres, respectively, in the corresponding and final forecasts of last year. Of this, the area under autumn rice is estimated at 5,123,300 acres against 5,046,300 acres and 5,066,600 acres in the corresponding and final forecasts of last year.

Outturn.—According to the District Officers' estimates, the outturn of the different *bhadoi* crops for the Province works out to 84 per cent. of the normal against 81 and 77 per cent. reported, respectively, in the corresponding and final forecasts of last year. Autumn rice, the most important of the *bhadoi* crops, shows an outturn of 86 per cent. for the Province against 81 and 77 per cent. reported, respectively, in the corresponding and final forecasts of last year.

ROBERT S. FINLOW,

Offg. Director of Agriculture, Bengal.

DACCA,

The 11th September 1919.

APPENDIX.

Preliminary Forecast of the *Bhadoi* Crops of Bengal, 1919-20.

District.	Names of crops.	Estimated normal area under each crop.	Estimated area under each crop.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the sowing of each crop was begun this year, and whether that date was early, normal or late.	Remarks by District Officers.
			Last year.	This year.	Last year.	This year.		
		Acres.	Acres.	Acres.				
24-PARGANAS.	*Bhadoi* paddy (autumn rice).	73,400	62,900	62,300	75	83	Middle of April to June. Early.	The decrease in area is due to unfavourable weather at sowing time. Damage to some extent was caused at certain places by heavy rainfall and insects. Hence the outturn is below the normal.
	Indian-corn (maize) ...	...	100	100	67	67		
	Other *bhadoi* cereals ... / Other *bhadoi* pulses ...	3,600	2,400	1,700	67	50		
	Bhadoi fruits and vegetables, including root-crops.	1,300	3,800	3,000	58	75		
	Other *bhadoi* food-crops.	5,600	2,200	2,100	92	75		
	Bhadoi fodder crops other than jowar, bajra, marua and maize.	...	200	200	83	50		
	Bhadoi non-food crops other than fodder and fibres.	100	1,200	1,100	75	67		
	Total ...	84,000	72,800	70,500	74	81		
NADIA.	*Bhadoi* paddy (autumn rice).	491,100	472,800	457,800	83	100	April and May. Normal.	The decrease in area is due to a portion of paddy lands set apart for jute cultivation and to paucity of labour after the influenza epidemic. The weather has been favourable on the whole. Damage to some extent was done by excessive rainfall.
	Mandua, marua or ragi	100	...	300	...	67		
	Indian-corn (maize) ...	800	...	100	...	67		
	Other *bhadoi* cereals ... / Other *bhadoi* pulses ...	8,000	5,700	5,300	67	67		
	Indigo	1,000	5,000	7,800	67	67		
	Bhadoi fruits and vegetables, including root-crops.	6,400	2,100	2,400	58	58		
	Other *bhadoi* food-crops	5,800	1,900	2,100	50	67		
	Bhadoi fodder crops other than jowar, bajra, marua and maize.	1,800	3,000	3,100	58	67		
	Mulberry	(50)	...	...	...	...		
	Bhadoi fibres other than jute.	...	...	200	...	67		
	Bhadoi non-food crops other than fodder and fibres.	8,900	15,700	15,700	67	67		
	Total ...	523,900	506,200	494,800	82	97		
MURSHIDABAD.	*Bhadoi* paddy (autumn rice).	229,700	177,900	190,400	75	92	April to June. Normal but a little late in Lalbagh subdivision.	The increase in area principally under "*bhadoi* paddy," is due to failure of winter paddy in many places last year. The weather was not favourable at sowing time owing to want of rain but has subsequently been favourable. The damage caused by flood in Jangipur and Lalbagh subdivisions is about 17 per cent. A normal crop was expected but for the damage caused by flood in some parts.
	Jowar	100	100	......	100	......		
	Bajra	500	300	200	83	52		
	Mandua, marua or ragi	500	500	1,000	75	42		
	Indian-corn (maize) ...	1,000	1,000	1,200	83	83		
	Other *bhadoi* cereals ...	3,500	4,000	2,600	67	75		
	Other *bhadoi* pulses ...	2,000	1,100	1,100	67	67		
	Indigo	......	5,100	3,900	75	75		
	Bhadoi fruits and vegetables, including root-crops.	2,000	1,700	2,000	58	83		
	Other *bhadoi* food-crops	5,000	2,800	2,500	75	75		
	Bhadoi fodder crops other than jowar, bajra, marua and maize.	2,500	2,200	2,000	67	75		
	Bhadoi fibres other than jute.	400	400	600	67	83		
	Mulberry	4,000	3,200	4,800	67	75		
	Bhadoi non-food crops other than fodder and fibres.	20,000	4,800	3,900	75	67		
	Total ...	271,200	205,100	216,100	75	90		

District.	Names of crops.	Estimated normal area under each crop.	Estimated area under each crop.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the sowing of each crop was begun this year, and whether that date was early, normal or late.	Remarks by District Officers.
			Last year.	This year.	Last year.	This year.		
		Acres.	Acres.	Acres.				
JESSORE.	*Bhadoi* paddy (autumn rice).	407,300	365,000	366,400	75	83	April and May; generally late.	The weather was unfavourable at sowing time in some parts of the district. Subsequently it has been favourable excepting in the Narail subdivision, where the crop has been damaged by flood and insects. No damage is reported from other parts of the district.
	Other *bhadoi* cereals ... Other *bhadoi* pulses ...	12,200	9,100	9,900	58	75		
	Other *bhadoi* food-crops.	12,200	8,600	8,300	60	75		
	Bhadoi fodder crops other than jowar, bajra, marua and maize.	1,200	700	500	50	67		
	Bhadoi non-food crops other than fodder and fibres.	12,100	1,000	1,100	60	83		
	Total ...	445,000	384,400	386,200	74	83		
KHULNA.	*Bhadoi* paddy (autumn rice).	17,800	20,200	23,300	100	100	April; normal ...	The increase in area under "*bhadoi* paddy" is due to high price of rice this year.
	Other *bhadoi* cereals ...	200	100	100	85	92	Middle of May; normal.	The weather was favourable since sowing time, but heavy rain and flood during the latter part of July have caused some damage to the crops. Hence the outturn has fallen below the normal.
	Other *bhadoi* pulses ...	600	400	400	85	83		
	Bhadoi fruits and vegetables, including root-crops.	14,800	13,000	12,900	85	75		
	Bhadoi non-food crops other than fodder and fibres.	300	100	100	92	100	May; normal.	
	Total ...	33,700	33,800	36,800	94	91		
BURDWAN.	*Bhadoi* paddy (autumn rice).	140,000	110,700	121,300	83	100	Middle of May to middle of June; normal.	The increase in area as compared with last year is due to timely rainfall. The weather has been favourable.
	Mandua, marua or ragi	...	(50)	(50)	83	83		
	Indian-corn (maize) ...	2,000	1,000	1,200	67	100	Beginning of July.	
	Other *bhadoi* cereals ...	1,000	600	600	92	83		
	Other *bhadoi* pulses ...	1,200	1,000	1,000	83	83		
	Bhadoi fruits and vegetables, including root-crops.	3,000	2,600	2,700	75	92		
	Other *bhadoi* food-crops	1,700	1,100	1,000	92	83		
	Bhadoi fodder-crops other than jowar, bajra, marua and maize.	200	200	200	100	83		
	Bhadoi fibres other than jute.	6,000	4,500	4,300	92	92		
	Mulberry	100	...	...	...	...		
	Bhadoi non-food crops other than fodder and fibres.	4,000	2,100	2,000	83	83		
	Total ...	160,200	123,800	134,300	83	100		
BIRBHUM.	*Bhadoi* paddy (autumn rice).	144,100	133,100	133,100	83	92	July; normal ...	The weather has been fair.
	Indian corn (maize) ...	1,900	1,900	1,900	75	92		
	Other *bhadoi* cereals ...	1,400	1,200	1,200	67	100		
	Bhadoi fruits and vegetables, including root-crops.	10,000	10,000	10,000	67	83		
	Mulberry	1,000	(35)	100	67	83		
	Bhadoi non-food crops other than fodder and fibres.	2,800	2,800	2,800	100	100		
	Total ...	161,200	149,000	149,100	83	92		

District.	Names of crops.	Estimated normal area under each crop.	Estimated area under each crop.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the sowing of each crop was begun this year and whether that date was early normal or late.	Remarks by District Officers.
			Last year.	This year.	Last year.	This year.		
		Acres.	Acres.	Acres.				
BANKURA.	*Bhadoi* paddy (autumn rice).	21,900	5,500	6,000	99	108	Middle of May. Normal.	
	Bajra	600	700	700	83	108	Middle of June. Normal.	
	Mandua, marua or ragi	1,100	800	900	83	108		The weather has been favourable, the rainfall being seasonable and abundant.
	Indian corn (maize) ...	8,400	3,200	4,000	83	108		
	Other *bhadoi* cereals ...	2,000	1,500	1 500	83	108		
	Other *bhadoi* pulses ...	2.0[illegible]	1,500	1,500	83	108		
	Bhadoi fruits and vegetables, including root-crops.	2,000	1,500	1,500	88	1[illegible]0	June. Normal.	
	Other *bhadoi* food-crops	3,700	4,400	4,000	67	100		
	Bhadoi fibres other than jute.	800	700	1,000	63	108		
	Bhadoi non-food crops other than fodder and fibres.	1,200	1,800	1,800	75	100		
	Total ...	43,900	21,600	22,000	91	105		
MIDNAPORE.	*Bhadoi* paddy (autumn rice).	265,400	1[illegible]2,700	210,700				
	Jowar	800	...	500				
	Bajra	1,200	1,400	500				
	Indian corn (maize) ...	8,000	6,000*	5,000				
	Indigo	100	...	...				
	Other *bhadoi* cereals ...	10,100	5,400	10,500				
	Other *bhadoi* pulses ...	20,300	8,200	5,400				
	Bhadoi fruits and vegetables, including root-crops.	28,000	4,400	7,800	86	90	April and May. Normal.	The increase in area is due to favourable weather condition at sowing time. Cultivators were also anxious to compensate themselves for failure of the last winter rice crop. Heavy rainfall in August did damage to some extent. Owing to submersion of the crops in certain areas the outturn is expected to be below the normal. The figures for normal areas have been revised on the basis of settlement records.
	Other *bhadoi* food-crops.	7,4[illegible]0	5,300	5,600				
	Bhadoi fodder crops other than jowar, bajra, marua and maize.	500	600	9[illegible]0				
	Bhadoi fibres other than jute.	1,[illegible]00	1,300	1,600				
	Mulberry	10,200	100	100				
	Bhadoi non-food crops other than fodder and fibres.	400	4,300	2,800				
	Total ...	360,500	137,700	251,400	85	90		
HOOGHLY.	*Bhadoi* paddy (autumn rice).	45,500	29,800	[illegible]7,100	76	90		The decrease in area under "*bhadoi* paddy," "*bhadoi* fruits and vegetables etc." and "other *bhadoi* food crops" was due to want of rain at sowing time. The weather was not favourable at sowing time but subsequently it has been favourable. The outturn is expected to fall below the normal owing to want of rain at sowing time. There has been a slight damage to Sadar subdivision on account of drought.
	Indian corn (maize) ...	200	100	100	100	80		
	Other *bhadoi* cereals ...	6[illegible]0	400	400	48	100		
	Other *bhadoi* pulses ...		100	200	66	100		
	Bhadoi fruits and vegetables, including root-crops.	4,100	3,800	3,600	65	90	In Arambagh 1st week of July; late. Elsewhere from the middle of May to June. Normal.	
	Other *bhadoi* food-crops	1,700	600	[illegible]00	72	100		
	Bhadoi fodder crops other than jowar, bajra, marua and maize.	[illegible]00	100	100	30	100		
	Bhadoi fibres other than jute.	100	100	100	84	100		
	Mulberry	100	...	...	...	...		
	Bhadoi non-food crops other than fodder and fibres.	500	...	...	...	...		
	Total ...	51,900	35,000	31,700	75	91

	Other *bhadoi* food-crops	2,700	1,400	1,200	58	58		
	Bhadoi fodder crops other than jowar, bajra, marua and maize.	1,500	400	500	58	67		
	Total ...	41,500	15,800	18,300	57	85		
RAJSHAHI.	*Bhadoi* paddy (autumn rice.)	300,000	285,000	297,400	51	90	Middle of August to middle of September. Normal.	The increase in area under "*bhadoi* paddy" is due to more extensive cultivation to g[et] a rice crop early after last year's loss. Owing to insufficient rain the weather w[as] not favourable at sowing time but it h[as] subsequently been favourable. The outturn is below the normal owing t[o] want of rain at sowing time.
	Jowar	100	200	200	47	60		
	Mandua, marua or ragi	200	200	200	50	50		
	Indian-corn (maize) ...	1,100	1,300	1,300	61	56

† Revised.

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR AUGUST 1919.

I. **Character of the Season.**—During the month the rainfall was above the average in 14 districts and elsewhere below normal. The fall was in marked defect in the districts of Jalpaiguri, Darjeeling, Rangpur, Mymensingh and in the Cooch Behar State. The usual rainfall statement is appended.

II. **Progress of the Agricultural Operations.**— The rainfall in the last week facilitated the transplanting of winter paddy and steeping of jute in North and East Bengal where the operations were being hampered partly owing to want of sufficient rainfall and partly to lowness of river flood. A good deal of transplanting, however, remains to be done in Mymensingh where with low river and short rainfall the cultivators found it difficult to reap the jute in time to transplant rice Transplanting was almost completed in West Bengal where prospects have been reported to be hopeful. Weeding of winter rice commenced Autumn paddy was being reaped and a satisfactory outturn was reported

III **State of Standing Crops.**—The condition of winter rice, sugarcane and other standing crops was satisfactory on the whole, but more rain was needed in Mymensingh to facilitate transplanting of winter rice.

IV **Prospects and Probable Outturn.**—Autumn paddy yielded a satisfactory outturn The present outlook of winter paddy is reported to be generally promising in West Bengal, but lack of rainfall is affecting some districts in East and North Bengal

V. **Damage to Standing Crops.**—Some damage to jute by insect pests continued to be reported from places in West Bengal.

VI **Condition of Agricultural Stock.**—The condition of live-stock was reported as fair Cattle-disease was reported from places in the districts of Murshidabad, Burdwan Midnapore, Rangpur and Cooch Behar State

VII **Failure of Pasturage and Fodder.**—The supply of fodder was sufficient throughout the province except in the low-lying tracts of Faridpur, Bogra and Pabna

VIII **Price of Food-grains.**—During the second fortnight of the month under review the price of common rice for the province rose in 18 districts and fell in 6, and remained stationary in the rest. It varied from 3 seers and 12 chitaks per rupee in Dacca, Faridpur and Hooghly to 7 seers in the Chittagong Hill Tracts

IX **Condition of Agricultural People.**—Distress continued to prevail in the Brahmanbaria subdivision of Tippera. Relief measures continued.

R. S. FINLOW.

Offg. Director of Agriculture, Bengal

DACCA, *the 13th September 1919*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 11th September 1913.

Summary.—During the week the rainfall was generally heavy in the Chittagong Division and in Dinajpur, Jalpaiguri and Darjeeling. Elsewhere the fall was generally light to moderate. More rain is needed in places of Rajshahi, Rangpur and Tippera for the growth of winter paddy and for the steeping of jute. Transplanting of winter paddy is approaching completion; weeding continues. Cutting, steeping and washing of jute are proceeding, but the progress is slow in many places owing to lack of steeping water. Harvesting of autumn rice is still going on in the western districts. Damage to jute by insects continues to be reported from places in the 24-Parganas. The condition and prospects of standing crops are generally satisfactory. The average price of common rice for the province has risen by about 1·35 per cent. as compared with that of the previous week.

	Sirajganj ..	7·62	3¾	(n)	

(n) Not reported

Serial No.	Districts and subdivisions.	Rainfall.	Price of common rice, in seers, per rupee. This week.	Previous week.	Character of the weather, condition of crops, etc.
1	2	3	4	5	6
		Inches			
19	MALDA ..	5·98	4	4	Weather seasonable. Transplanting of winter rice continues. Prospects of jute are fair. No damage to crop is reported. Harvesting continues. Fodder and water are sufficient. Cattle-disease is reported from Bholahat and Shibganj thanas.
20	COOCH BEHAR	9·06	7¼	7¼	Weather rainy and cloudy. Transplantation of *haimanti* paddy seedlings is going on briskly. Harvesting of *bitri* paddy is nearly finished. Prospects and condition of standing crops are favourable. Fodder is sufficient.
21	DACCA ...	4·39	4	3¾	Weather seasonable. The heavy downpour of rain during the week enabled the last of the plots to be transplanted with *roa* paddy which is progressing briskly. Standing crops are thriving under favourable weather condition. Prospects of *aman* paddy are good and a fair outturn is expected. No cattle-disease is reported. Fodder is sufficient.
	Manikganj ...	4·94	4	3½	
	Narayanganj	3·99	4	3½	
	Munshiganj*	3·23	4	3¾	
22	MYMENSINGH	0·67	3⅝	3⅝	Weather seasonable. More rain is wanted. Harvesting of *aus* paddy is nearly finished. Harvesting and steeping of jute are going on. Prospects of standing crops are fair. Fodder is sufficient. Cattle-disease is reported from places.
	Jamalpur ...	2·13	3½	3½	
	Tangail ...	6·55	3⅜	(*n*)	
	Netrakona ...	5·79	4	3⅜	
	Kishorganj...	6·12	3⅕	3½	
23	FARIDPUR ...	2·69	3¾	3¾	Weather is favourable to the standing crops. Prospects of *aman* paddy are promising. Harvesting of jute still continues. Fodder is available. Stock of rice is insufficient in Gopalganj.
	Goalundo ...	3·21	4$\frac{3}{16}$	4½	
	Madaripur ...	4·16	4	3¾	
	Gopalganj† ...	5·94	3¾	3¾	
24	BAKARGANJ (BARISAL).	3·98	{ 3⅞, 5‡, 6§ }	3¾	Prospects of jute are fair; weather is favourable. No damage done to the crop. Harvesting is almost finished. Prospects of other crops are fair.
	Pirojpur ...	4·17	3¾	3½	
	Patuakhali...	5·56	{ 4, 4¾‡ }	3½, 4½‡	
	Dakshin Shabazpur (Bhola).	5·68	{ 3¾, 4⅞‡ }	3¾, 4¼‡	

* Munshiganj being very near to Dacca and Narayanganj, its rainfall statistics are not quoted. To give information regarding the northern part of the district rainfall figures for Kapasia thana are reported here.

† The rainfall at Haridaspur, which is very near to Gopalganj, is shown here.

(*n*) Not reported. | ‡ *Aus* rice. | § Rangoon rice.

Serial No.	Districts and subdivisions.	Rainfall.	Price of common rice, in seers, per rupee. This week.	Price of common rice, in seers, per rupee. Previous week.	Character of the weather, condition of crops, etc.
1	2	3	4	5	6
		Inches			
25	CHITTAGONG	11·96	$4\frac{1}{2}$	$4\frac{1}{2}$	Prospects of standing crops are good. Transplanting of *aman* paddy is going on. Harvesting of *aus* paddy is still in progress. *Panga* salt is selling at 9 seers per rupee both at Sadar and Cox's Bazar. Fodder is sufficient.
	Cox's Bazar	11·17	$4\frac{1}{2}$	$4\frac{1}{2}$	
26	TIPPERA (COMILLA).	7·97	$4\frac{7}{16}$	$4\frac{1}{4}$	The prospects of *aus* paddy are fair and those of *aman* paddy are hopeful; more rain is wanted in the Brahmanbaria subdivision. Prospects of jute are good. The price of rice still rules high. Harvesting of *aus* paddy and transplanting of *aman* paddy are going on.
	Brahmanbaria.	4·12	$4\frac{4}{19}$	4	
	Chandpur ...	3·66	5	$4\frac{1}{2}$	
27	NOAKHALI ...	9·07	$3\frac{7}{16}$	$3\frac{7}{8}$	Weather seasonable. Prospects of standing crops are good. Transplantation of *aman* paddy and harvesting of jute continue. Fodder is sufficient.
	Feni ...	12·52	$4\frac{7}{8}$	$3\frac{13}{16}$ $4\frac{9}{16}$*	
28	CHITTAGONG HILL TRACTS.	8·98	$4\frac{1}{2}$ 6†	$4\frac{1}{2}$ 7†	Sowing of paddy on high land continues. Reaping of *jhum* paddy has commenced. Fodder is sufficient.

* *Aus* rice. | † Local rice.

R. S. FINLOW,
Offg. Director of Agriculture, Bengal.

REPORT ON FAMINE IN THE DISTRICT OF BANKURA FOR THE WEEK ENDING 13TH SEPTEMBER 1919.

THE rainfall during the week was general and sufficient. The agricultural prospects are favourable. Seventy-seven relief works were open during the week. The number of persons relieved on works was 11,355. The number of persons in receipt of gratuitous relief was 13,870, viz., 8,722 on cash doles in 122 unions, 3,683 on paddy-husking advances, 885 weavers and 580 better class poor. The grand total of persons relieved was 25,225. The increase in the number of persons on relief works was due to the completion of field operations, and the decrease in the numbers in receipt of cash doles was due to improvement in the situation. The number of persons relieved on private works was 680. The charitable societies also relieved 805 persons by weekly doles and 900 persons by daily doles and cooked food. During the week three cases of theft of food-grain were reported. Public health is generally good. The outbreak of malaria and cholera is reported from certain localities. The relief measures are adequate The price of common rice varies from 4⅞ to 5¼ seers in the rupee. Burma rice is being sold.

M. C. McALPIN,
Secy. to the Govt. of Bengal.

DARJEELING, *the 18th September 1919.*

FINAL FORECAST OF THE JUTE CROP, 1919.

Consolidated statement for Bengal, Bihar and Orissa, and Assam.

Area.—The estimated area for the three Provinces is 2,821,575 acres, an increase of 321,193 acres on last year's figures.

Yield.—It is estimated that the crop will yield 8,486,234 bales of jute, an increase of 1,467,146 bales on last year's returns.

Remarks.—Last year's estimates for Bihar and Orissa and Assam have been revised by the respective local Departments.

The consolidated figures are as follows:—

Province.	Area in acres.			Yield in bales.		
	1918.	1919.	Difference.	1918.	1919.	Difference.
Bengal (including Cooch Behar).	2,249,026	2,498,145	+249,1[illegible]	6,392,137*	7,637,630	+1,245,493
Bihar and Orissa ...	149,256*	203,430	+ 54,174	398,742*†	554,070†	+155,328
Assam	102,100*	120,000	+ 17,[illegible]00	228,209*	294,534	+66,325
Total ...	2,500,382	2,821,575	+ 321,193	7,019,088	8,486,234	+1,467,146

* Revised. † Including Nepal.

The Departmental Final Forecasts for each of the three Provinces are appended.

* Revised

DEPARTMENT OF AGRICULTURE, BENGAL.

Final Forecast of the Jute Crop of Bengal for 1919.

(Note.—On an average of the five years ending 1917-18 the area under Jute to which this forecast relates represents 87·6 per cent. of the total area under jute in British India.)

Season.—As stated in the preliminary forecast, the weather was, on account of drought in March, unfavourable for the sowing of the low land crop, in late February and early March. Only about 30 per cent. of the low land crop was sown at the normal time, and even this was so severely affected by the drought, that premature flowering took place on a wide scale. In East and North Bengal a very large area was sown, in low lands as well as high lands, in the favourable weather in the latter part of April; and the late sown low land crop, in particular, was benefited, by the comparatively scanty rainfall and the slow rise of the rivers in East Bengal in May. In West Bengal a good deal of jute was sown on somewhat heavy rain at the beginning of May; but insufficient rain afterwards hindered further sowings until the end of May and, in some places, till the beginning of June. Subsequently, with the exception of parts of West Bengal, where the rainfall has been rather too heavy, the season has been generally excellent for the jute crop, which made great progress in consequence. There has been a certain amount of damage by insects; but nothing serious anywhere.

Condition of the crop.—In the early part of the season, the jute crop was curiously uneven in appearance; but latterly the unusually favourable weather has, as already remarked, produced about an average crop out of what might easily, under other circumstances, have been a failure. These same conditions are, now however, adversely influencing the harvesting of the crop. A larger proportion than usual is, on account of low rivers and insufficient rain, still standing in some tracts, and it may even prove difficult to extract the fibre from a part of this.

Acreage.—The area under jute is returned at 2,498,145* acres, an increase of 249,119 acres on last year's final figures. The increase is ascribed chiefly to the high prices realized for last year's crop.

Outturn.—As in previous years, the percentage figures are calculated on the basis of Divisional normals, which remain as follows :—Dacca and Chittagong 3·7 each, Rajshahi 3·5, Presidency and Burdwan 3·2 bales per acre

The total outturn of the Bengal crop is returned at 7,637,630 bales of 400 lbs. against 6,392,137* bales in last year's forecast, an increase of 1,245,493 bales.

R. S. FINLOW,

Offg. Director of Agriculture, Bengal.

CALCUTTA,

The 19th September 1919.

APPENDIX I.

Final Forecast of the Jute Crop of Bengal, 1919.

District.	Estimated area under jute. Last year.	Estimated area under jute. This year.	Estimated outturn as a percentage of the normal yield per unit of area. Last year.	Estimated outturn as a percentage of the normal yield per unit of area. This year.	Estimated total yield. Last year.	Estimated total yield. This year.	Date by which harvesting generally commenced, and whether that date was early, normal or late.	Remarks by District Officers.
1	2	3	4	5	6	7	8	9
	Acres	Acres.			Bales	Bales		
24-Parganas	44,425	63,309	73	83	108,777	16[illegible] 512	Middle of August Normal.	The increase in area is due to expectation of a good jute market. The increase in the percentage as well as the total outturn is due to a very good crop in the Basirhat subdivision, the largest jute-growing area of the district.
Nadia	50 2[illegible]3	67 105	61	71	98,132	154,834	End of July. Normal	Increase of area as compared with last year's estimate is due to high price of jute obtained last year
Murshidabad	12,189	20 826	57	94	32,233	62,[illegible]5	Middle of August. Normal.	The weather conditions have been fairly favourable The increase in area as compared with last year's estimate is due to expectation of a good jute market.
Jessore	52,034	84,637	73	88	121,551	230,644	August. Normal	The increase in the estimated area as compared with the preliminary forecast is due to Bangaon figures having been revised after the submission of the preliminary forecast.
Khulna	22 [illegible]05	21,668	96	90	70 057	62,659	August Normal	Decrease in area is due to unfavourable weather at sowing tim[e]
Burdwan	5,605	6,030	80·6	89	14,456	16 904	End of August Normal	Favourable weather conditions during the sowing time and anticipated good market account for the increase in area this year The outturn falls below the normal on account of excessive rainfall from the end of July to end of August and insect pest in the Kalna subdivision
Midnapore	10,55[illegible]	11,9[illegible]	80 93	81 25	27,33[illegible]	31 074	End of August Normal	Favourable weather conditions at sowing time account for the increased area Subsequent heavy rains badly affected the crop and lowered the outturn.
Hooghly	27 23[illegible]	30,862	87 8	93 73	76,520	92,[illegible]8	Last week of August Normal	The favourable weather conditions and the anticipated high price of jute account for the increase of area
Howrah	7,266	9 820	64 99	66 81	19,761	27 384	Last week of August. Normal.	Slight decrease in area as compared with the area shown in the preliminary forecast is due to failure of some late sown crops. Favourable weather at sowing time accounts for the increase in area as compared with last year Subsequent drought followed by [illegible] rains adversely affected the crop and lowered the outturn.
Rajshahi	74,800	73,597	80	98	208 040	2[illegible]7,038	Middle of July. Normal.	
Dinajpur	60,000	60,978	85·7	91·7	179,970	19[illegible],[illegible]23	Beginning of August Normal.	Increase in area is due to good market and favourable weather during sowing time. Inadequate rainfall after sowing caused the outturn to fall below the normal.
Jalpaiguri	45,890	4[illegible],306	80	101	128,492	174 2[illegible]6	Middle of August. Normal.	The crop is very good this year
Darjeeling	2,000	2,215	75	103	5,250	8,000	This week of August. Normal	The weather condition has been on the whole favourable The crop is better than last year.
Rangpur	200,178	207,664	7[illegible]	10[illegible]	546 472	7[illegible]1,0[illegible]	August Normal	Up to the end of July the season was generally favourable. The rainfall in August was seriously below the normal and steeping was retarded for want of water There has been a certain amount of rain in September which has improved the situation

DISTRICT.	ESTIMATED AREA UNDER JUTE.		ESTIMATED OUTTURN AS A PERCENTAGE OF THE NORMAL YIELD PER UNIT OF AREA.		ESTIMATED TOTAL YIELD.		Date by which harvesting generally commenced, and whether that date was early, normal or late.	REMARKS BY DISTRICT OFFICERS.
	Last year.	This year.	Last year.	This year.	Last year.	This year.		
1	2	3	4	5	6	7	8	9
	Acres.	Acres.			Bales.	Bales.		
Bogra ...	66,438	69,945	75	80	174,400	195,846	Middle of July. Normal	The weather was unfavourable at sowing time and for some time after, which affected the growth of the crop. The weather, however, subsequently became favourable.
Pabna ...	105,102	103,010	81·4	88	299,435	317,370	Middle of July. Normal	Some damage was done by insects in the early stages, but weather being favourable a better crop than last year is expected.
Malda ...	29,000	26,600	80	66	81,200	61,180	Middle of August. Late.	The area has been increased by 200 acres over the preliminary forecast after checking. The decrease, as compared with last year, is due to unfavourable weather at sowing time.
Dacca ...	292,452	243,517	79·7	65	862,734	879,677	End of June. Early	The weather was unfavourable at the beginning, but subsequently it became favourable and helped the growth of the crop.
Mymensingh ...	577,922	628,944	81	87	1,733,766	2,021,450	End of July. Normal	The crop was good, but the cultivators have been experiencing much difficulty in steeping jute for want of sufficient water.
Faridpur ...	218,100	238,400	81	84	656,620	801,040	End of July. A little late.	The outturn falling below the normal is due to late sowing and subsequent drought.
Bakarganj ...	50,227	56,633	88	77	164,320	161,476	July. Early	The reasons for the fall in outturn are :—(1) Late sowing for want of timely rainfall. (2) A long spell of dry weather in May retarding growth of the crop. (3) Early harvesting of the crop due to a good market.
Chittagong ...	200	200	81	81	600	600	First week of September.	
Tippera ...	227,521	266,641	77·8	80	656,208	782,126	Normal at Chandpur, late in Sadar and Brahmanbaria.	The increase in area is attributed to high price of jute prevailing last year. The weather was unfavourable at the time of sowing. Lack of rainfall at the outset also impeded the growth of the crop. The showers of June, however, improved its condition. The weather since then has been satisfactory.
Noakhali ...	37,500	54,500	70	65	97,500	130,800	Beginning of July. Early.	The increase in area sown is based upon enquiries made since the submission of the preliminary forecast. There was deficient rainfall in April and May and excessive rainfall in June and July. Much immature jute was cut on account of high prices obtained by raiyats in July and August. This also caused a falling off in the outturn.
Total for Bengal.	2,219,212	2,458,955	......	......	[illegible]	7,567,832	......	
Add for Cooch Behar.	29,814	39,190	47	51	43,308*		July to middle of August. Normal	The weather was favourable at the time of sowing and weeding. There has been a lack of sufficient water for steeping owing to drought early in August, which prevented harvesting in good time. There was, however, good rainfall in the latter part of August and beginning of September in some parts of the State, which facilitated cutting and steeping.

NOTE.—The figures given above are the averages for all the rain registering stations in each district.

DEPARTMENT OF AGRICULTURE, BIHAR AND ORISSA.

Final Forecast of the Jute Crop of Bihar and Orissa, 1919.

(Note.—On an average of the five years ending 1918-19, the area under jute to which the Bihar and Orissa forecast relates, represents about 9·1 per cent. of the total area under jute in British India.)

Acreage.—The final district returns of the seven jute-growing districts of the province show an area under jute of 203,430 acres or in round numbers 203,400 acres, as compared with 202,800 acres reported in the preliminary forecast, 1919, and 149,300 acres, the revised figure for last year. The increase in area is due to better prices obtained last year as also to prospect of better prices this year.

Weather conditions.—In March and April the rainfall was below the normal in all jute districts except Cuttack and Balasore, where it was above the normal in the latter month. In May the rainfall was below the normal everywhere except Balasore, where it was above the normal. In June the rainfall was above the normal in all jute districts except Champaran and Muzaffarpur, where it was slightly below the normal. In July, the rainfall was above the normal in Muzaffarpur, Bhagalpur, Purnea and the Santal Parganas and below the normal in the remaining three districts. In August it was above the normal in the Santal Parganas, Cuttack and Balasore, but below the normal in Purnea, Bhagalpur and especially in Champaran and Muzaffarpur. Difficulty is experienced in parts of Purnea for steeping the crop for want of sufficient rainfall. Damage has been done by recent floods in Cuttack.

Outturn.—In the important districts of Purnea and Cuttack the outturn of the crop has been reported at 83 and 59 per cent. of the normal, respectively. Champaran, Muzaffarpur and Balasore report an yield of 95, 92 and 90 per cent., respectively. The Santal Parganas anticipates a normal crop, while Bhagalpur reports 77 per cent. only.

On the basis of the area and percentage outturn reported by the District Officers and taking three bales as the normal outturn per acre, the total gross outturn of the crop for the province this year comes to 495,859 bales or in round numbers 495,900 bales against 335,300 bales, the revised figure for last year.

The average import of raw jute into this province from Nepal during the last three years was equivalent to 58,211 bales. This figure added to the figure for the province arrived at gives a total for Bihar and Orissa of 554,070 bales or in round numbers 554,100 bales.

A. C. DOBBS,

Offg. Director of Agriculture,
Bihar and Orissa.

RANCHI,

The 10th September 1919.

APPENDIX I.

Final Forecast of the Jute Crop of Bihar and Orissa for 1919

Division	District	Total area of the district	Estimated total area under cultivation	Estimated normal area under jute (This figure has been arrived at by taking the average of 10 years immediately preceding the year to which this forecast relates)	Estimated area under jute: Last year (1918)	Estimated area under jute: This year (1919)	Estimated outturn as a percentage of a normal yield per unit of area: Last year (1918)	Estimated outturn as a percentage of a normal yield per unit of area: This year (1919)	Estimated total yield: Last year (1918)	Estimated total yield: This year (1919)	Date by which harvesting generally commenced, and whether that date was early, normal or late	Remarks by District Officers
1	2	3	4	5	6	7	8	9	10	11	12	13
		Acres	Acres	Acres	Acres	Acres			Bales	Bales		
Tirhut	Champaran	2 259 440	1,439,200	1,900	2,4[illegible]	2 400	100	95	7 2[illegible]	[illegible], 40	Between August and September Normal	Rainfall has not been favourable for the crop. The present condition of the crop is fair. This year's outturn is expected to be a little less than that of last year for want of sufficient rains. The date of harvesting was normal.
	Muzaffarpur ...	1 942,324	1,627,000	1 700	1,[illegible]00	2 2[illegible]0	100	93	5 400	[illegible] 0 2	August Normal	The date of harvesting was normal.
Bhagalpur	Bhagalpur .	[b] 2 661,020	1,684 100	1 257 (a)	[illegible]58 (b)	1 15[illegible]	100	77	2 5[illegible]8 (a)	2 [illegible]	August Normal	In the first forecast the estimated area under jute last year was shown as 1,257 acres. This figure included 107 acres under "Kudrum," which has now been deducted. The figure, 1,150 acres, shown in column 6, represents area under jute proper.
	Purnea	3 196 153	1,694 400	219 [illegible]	122 300	175 [illegible]00	75	[illegible]3	[illegible]74 500	435 750	July Normal ..	Deficient rain in May caused the crop on some fields to dry up. During June and July the rainfall was good, but very deficient in August. Hence though the crop is good difficulty is experienced in some areas over obtaining sufficient water for "retting," which may affect the total outturn. Prospect of the crop is good at present. Increase in area is due to small stock remaining in the district and prospect of good prices.
	Santal Parganas	3 4[illegible] [illegible]	6[illegible] 2[illegible]	2 [illegible] 0	1 3[illegible]	1 [illegible]00	100	[illegible]	3 9 10	5 100		
Orissa	Cuttack	2 34[illegible] 30[illegible]	1 [illegible]33 [illegible]	1[illegible] 4 [illegible]	[illegible]	1[illegible] 500	65	[illegible]	36 [illegible]5	32 715	First week of August Normal.	The weather was all along favourable, but the recent and continuous flood and excessive rain damaged the crop in Jajpur Subdivision Hence the outturn is low
	Balasore	1 33[illegible] [illegible]1	932 2[illegible]0	2 9[illegible]	2 2[illegible]0	48[illegible]	[illegible]	[illegible]0	5,28	6,63[illegible]	Not yet begun	The weather conditions have been favourable. General prospect of the crop is good The increase in area and outturn is due to the favourable weather and rainfall in time.
	Total ...	17 1[illegible],365	1[illegible] 2[illegible] 600	46 [illegible]57 or in round numbers 246 100.	149 2[illegible] or in round numbers 149 3[illegible]	203 430 or in round numbers 203 400	75	81	335,313 or in round numbers 335,200	4[illegible]5 [illegible]9 or in round numbers 4[illegible]5 900.	.

* Figures relate to headquarters only.

DEPARTMENT OF LAND RECORDS AND AGRICULTURE, ASSAM.

Final Forecast of the Jute Crop of Assam, 1919.

(Note.—On the average of the five years ending 1917, the area under jute in Assam represents some 2·2 per cent. of the total area under jute in British India.)

1. **Season.**—The weather was not favourable for sowing, but the rain in June favoured growth as indicated in the preliminary forecast; since its issue the rain of July, though a little short, continued the good prospects of June, but there was a considerable deficiency in August, which adversely affected retting operations rather than outturn.

2. **Area.**—As in previous years the figures for the permanently settled areas of Sylhet and Goalpara have been compiled by the village *panchayats* and for other districts by the Land Records staff

The area under jute as reported by the Deputy Commissioners is 120,000 acres against the revised figure of 102,100 acres of last year and 115,300 acres shown in the preliminary forecast of this year The increase is mainly due to the better price obtained for the crop in last year; in Sylhet the want of early spring rain at the time for sowing broadcast rice was also responsible for the increase, as the rain in April was not too late for sowing jute; in the Brahmaputra Valley further immigration from Mymensingh helped to increase the area sown. Five districts have revised the areas reported in the preliminary forecast.

3 **Outturn.**—The outturn of jute per acre according to the Deputy Commissioners' estimates comes to 72 per cent of the normal against 68 (revised) of the preceding year Taking 3·3 bales (of 400 lbs) as the normal yield per acre for the province, the total outturn comes to 294,500 bales against 228,200 bales (revised) of last year or an increase of 27 per cent, but retting has been retarded by shortage of water.

J. McSWINEY,

Director of Land Records and Agriculture, Assam.

SHILLONG,

The 13th September 1919.

APPENDIX I.

Final Forecast of the Jute Crop of Assam, 19

District.	Estimated normal area under jute.	Estimated area under jute		Estimated outturn as a percentage of the normal yield per unit of area.		Estimated total yield.		Date by which the harvesting was commenced and whether that date was early, normal or late.	Remarks by Deputy Commissioner.
		Last year (actual).*	This year.	Last year.	This year.	Last year.*	This year.		
1	2	3	4	5	6	7	8	9	10
	Acres.	Acres.	Acres.			Bales.	Bales.		
Cachar	300	100	400	57	90	2?4	1 11?	August Normal ...	The increase in area is due to the high price of jute last year and that in outturn to more favourable weather.
Sylhet	16,000	13,600	26,100	56	68	25,157	5?,412	July Normal	The increase in area is due partly to better price and partly to inability to broadcast winter rice on account of drought in the early spring. The crops suffered to some extent from drought at the beginning.
Goalpara	12,400	50,[illegible]0	55,200	53	61	8?,015	110,[illegible]48	1st July Early .	The increase in area is due to the high price in last year. Weather at the beginning was unfavourably dry. The crop suffered to some extent in Goalpara subdivision from insect pests. On the whole the outturn is expected to be better than last year.
Kamrup .	8,100	13,1[illegible]	12,900	[illegible]	[illegible]	3?,731	40,441	25th July Early ..	The small decrease in area is due to alteration in the district boundary. The weather has been dry but the prospects of the crop are fair. Some damage has been done by insects. The outturn is expected to be better than last year.
Darrang .	7,000	?,40[illegible]	9,000	9[illegible]	[illegible]0	24,722	33,891	1st August Early .	The increase in area as compared with last year is due partly to immigration of jute cultivators and partly to high prices. The weather was not favourable owing to shortage of rain.
Nowgong	?,700	10,[illegible]00	11,70[illegible]	100	[illegible]0	3?,?34	31,749	1st July Early	The increase in area is due to the influx of Mymensingh settlers and good prices in last year. The outturn is below normal owing to want of rain. Some damage is reported to have been done by insects.
Sibsagar	300	400	40[illegible]	80	[illegible]5	1,10[illegible]	1,373	2nd week of August Normal.	The weather was not favourable at the beginning of the season but improved subsequently.
Lakhimpur	20[illegible]	200	100	9[illegible]	[illegible]5	165	360	5th September Normal .	The decrease in area is due to unfavourable weather at sowing time. It improved afterwards and the outturn is expected to be better than last year.
Garo Hills	4,10[illegible]	4,[illegible]00	[illegible],200	[illegible]5	100	14,[illegible]	[illegible],[illegible]60	1st August Normal	The decrease in area is due partly to the fact that some jute remained unsold last year. The weather has been favourable on the whole.
Total .	84,100	102,100	120,000	68*	[illegible]2	22?,209	294,534

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 18th September 1919.

Summary.—During the week the rainfall throughout the province was generally light to moderate. More rain is needed in places of Rangpur, Dacca and Mymensingh for the transplantation and growth of winter rice and steeping of jute. Harvesting of autumn paddy and transplanting of winter paddy are nearly over. Weeding of winter paddy is in progress. Cutting, steeping and washing of jute continue. Damage to jute by insect-pests continues to be reported from places in the 24-Parganas. Condition and prospects of standing crops are generally satisfactory. The average price of common rice for the province has fallen by 1·60 per cent. as compared with that of the previous week.

Serial No.	District and subdivision	Rainfall	Price of common rice, in seers, per rupee: This week	Price of common rice, in seers, per rupee: Previous week	Character of the weather, condition of crops, etc.

LIBERALITY OF HAJI FAZIR MUHAMED TALUQDAR, OF BALIAJURI.

No. 537T.—Edn., dated Darjeeling the 20th September 1919.

From—THE HON'BLE MR. S. W. GOODE, Offg. Secy. to the Govt. of Bengal, General Department,

To—The Commissioner of the Dacca Division.

WITH reference to your letter No. 3336J., dated the 18th July 1919, I am directed to request that you will be so good as to convey the thanks of Government to Hazi Fazir Muhamed Taluqdar, of Baliajuri, police-station Madarganj, in the district of Mymensingh, for his liberality and public spirit in making a donation of Rs. 20,000 for the construction and equipment of a High English School at Baliajuri, in the district of Mymensingh.

RESOLUTION ON THE ANNUAL REPORTS BY THE PORT OFFICERS, CALCUTTA AND CHITTAGONG.

GOVERNMENT OF BENGAL.

MARINE DEPARTMENT.

Marine Branch.

CALCUTTA, THE 29TH SEPTEMBER 1919.

RESOLUTION—No. 3097 Marine.

READ—

(1) The Annual Report by the Port Officer, Calcutta, on the working of his Department for the year 1918-19.

(2) The Annual Report by the Port Officer, Chittagong, on the working of his Department for the year 1918-19.

PORT OF CALCUTTA.

Bengal Pilot Service.—The total strength of the Bengal Pilot Service was 58 against the sanctioned number of 74, of whom 17 were on long leave and on deputation to military duty. There were two casualties in the service during the year: one Mate Pilot died and a Branch Pilot retired from the service.

The difficulty in the recruitment of Leadsmen Apprentices continued during the year; but the situation was carefully watched and all possible steps were taken in consultation with the various interests concerned and in frequent communication with the Government of India and the Secretary of State to secure as soon as possible a reasonable number of recruits for the service. The Secretary of State was able to send out six recruits just after the close of the year and the situation was improved considerably. Now that the war is over, no difficulty is apprehended in the future recruitment of suitable candidates. As mentioned in the review of the previous year's report a scheme for a system of guaranteed minimum remuneration for the Pilots was then under consideration with a view to compensate the Pilots for the decrease in their normal earnings owing to the war. This scheme was sanctioned by the Secretary of State with effect from the 1st April 1918 and is still in force. As the trade of the port improves it is likely that the normal earnings will gradually advance beyond the guaranteed minimum. To reimburse Government for the extra payment to be made to the Pilots under this scheme from the public funds, a 25 per cent. increase of the pilotage fees was sanctioned by Government as a temporary measure with effect from the 1st May 1918. The financial result of the imposition of this surcharge was carefully watched; and it was discontinued with effect from 1st December 1918. Steps were also taken to ensure that the members of the service deputed to Military Service occupied, on reversion to civil duty, the same place in the seniority list which they would have occupied had they not been so deputed, subject to the proviso that they successfully passed at a subsequent date the departmental examinations prescribed by the rules.

2. **Vessels piloted.**—The number of vessels piloted inwards was 950 with a gross tonnage of 3,717,543 and the same number outwards with a gross tonnage of 3,685,156 against 899 and 898 with a gross tonnage of 3,441,569 and 3,420,131, respectively, in the previous year. Vessels drawing over 21 feet piloted inwards and outwards were 296 and 608 against 299 and 544, respectively, in the preceding year.

As in the previous year only one inward-bound vessel was neaped for want of sufficient depth of water over the bars.

Seventeen vessels were detained at the Sandheads for want of Pilots against three and five in the two previous years.

3. **Pilotage receipts.**—The receipts from pilotage fees realised during the year amounted to Rs. 10,42,874 against Rs. 8,63,709 in the previous year. The improvement in receipts was partly due to vessels of larger tonnage visiting the port.

4. **Casualties to vessels.**—Twenty-seven cases of groundings occurred during the year against 12 in the previous year, resulting in the sinking of one steamer. Three of these cases were due to error of judgment and one to inattention on the part of the Pilots concerned. There was one case of collision in which a brig was damaged against two in the previous year. The pilot in charge is not held to blame.

5. **Courts of Enquiry.**—Two cases of casualties only were referred to Special Courts of Enquiry against three in the previous year.

6. **Examinations.**—Fifty-one candidates sat for the examinations for Colonial and Home Trade Certificates of Competency as Master, Mate or Engineer of sea-going vessels of whom 24 passed. Out of the total number of 555 candidates, 192 passed the examinations for certificates of competency as Master, Serang, Engineer and Engine-driver under the Inland Steam Vessels Act, I of 1917.

There were 14[illegible] candidates for certificates of competency as Second Class Master, Serang or Engine-driver of an inland steam vessel in Mesopotamian waters, of whom 98 passed.

7. Captain D. F. Vines, O.B.E., R.I.M., held the office of the Port Officer and Shipping Master throughout the year except for a period of about two months when he was on war leave. Commander G. H. S. LaTouche, O.B.E., R.I.M., and Mr. S. H. Reaks, M.B.E., held the office of Deputy Port Officer and Senior Deputy Shipping Master and Assistant Port Officer and Deputy Shipping Master, respectively, during the year.

The office of First Engineer and Shipwright Surveyor was held successively by Engineer Commander C. F. Laslett, M.B.E., R.I.M., and Engineer Commander C. T. Amor, R.I.M.

8. The Governor in Council takes this opportunity of recording his appreciation of the valuable services rendered by Captain Vines during this last year of the war which was one of particular difficulty.

PORT OF CHITTAGONG.

Arrivals and departures of vessels.—The total number of vessels that entered the port was 709, of which 142 were sea-going vessels, 462 inland steamers and 105 native sailing ships, with a total gross tonnage of 309,690 as against the total number of 600 vessels with a gross tonnage of 312,851 in the previous year. The total number of departures was 706, including 144 sea-going vessels, 460 inland steamers and 102 native craft, with a total gross tonnage of 311,288 as against the total number of 602 vessels with a gross tonnage of 313,068 in the previous year.

Casualties to vessels.—There were four casualties to vessels of which three resulted in the total loss of the vessels and one was a case of fire on board.

Examinations.—Candidates numbering 128 appeared for the examinations for certificates of competency as Master, Serang, Engineer or Engine-driver under the Inland Steam Vessels Act, I of 1917, of whom 64 passed.

Mr. McKenna, the Collector of Customs, Chittagong, was in charge of the Department throughout the year in addition to his own duties. The Port Officer has specially brought to notice the valuable services rendered by Engineer Lieutenant Commander G. Hull, R.I.M., Engineer and Shipwright Surveyor, and Messrs. Chudleigh and Lockhart, Harbour Masters, in connection with the fire that broke out on board the H. M. S. "Sphinx."

By order of the Governor in Council,

F. A. A. COWLEY,

Secy. to the Govt. of Bengal.

GRANT OF CONCESSIONS IN THE MATTER OF CIVIL APPOINTMENTS UNDER GOVERNMENT TO THOSE WHO HAVE RENDERED SERVICE IN CONNECTION WITH THE PROSECUTION OF THE WAR.

GOVERNMENT OF BENGAL.

POLITICAL DEPARTMENT.

Political Branch.

DARJEELING, THE 22ND SEPTEMBER, 1919.

RESOLUTION—No. 2706P.—D.

THE question of granting concessions in the matter of securing civil appointments under Government to those persons who have rendered service in connection with the prosecution of the war has been under the consideration of Government, and the Governor in Council is pleased to make the following announcements in addition to those already made in Government Resolution No. 2184P.-D., dated the 27th July 1918 :—

1. The following kinds of service shall be deemed to be service in the prosecution of the war—

(a) Service in the combatant ranks of the army.

(b) All other service involving subjection to military law under the Army Act, or the India Army Act, and service in the Indian Branch of the Indian Defence Force.

(c) Clerical and other service under military and munitions authorities (i) overseas and (ii) in India.

Preferential treatment shall be given to the various kinds of service in the order indicated above, and persons who have rendered active service shall be given preference over those who have not. In order to make good a claim to preferential treatment an applicant must satisfy the authority making the appointment that the service rendered was whole-time service and was also approved service

2 In pursuance of these decisions every person who has rendered service of the character described above shall be permitted to deduct from his age for the purpose of article 51, Civil Service Regulations, the period of such service rendered up to the date of his release from military or other duties, and, if invalided from such service, he shall be permitted to include for the purposes of deduction the period from the time when he was invalided up to the date on which the war may be declared to have ended under the provisions of the Termination of the Present War (Definition) Act, 1918, 8 and 9 George V, Chap. 59.

3. Notwithstanding any rules or executive orders prescribing educational, professional or technical qualifications, any person who has rendered service of the nature already described and has been prevented thereby from acquiring such qualifications may, at the discretion of the authority competent to make an appointment for which such qualifications are required, be admitted to such appointment, provided that the educational, professional and technical attainments which he possesses are deemed sufficient for the adequate performance of the duties of the appointment.

[illegible] The principles herein laid down are subject to the following general reservations, which officers making appointments will apply at their discretion:—

(a) The application of these principles must be consistent with the public interest.

(b) There must be no injustice to the claims of persons already in Government service who had no opportunity of rendering military service.

(c) No person may be appointed to a post the duties of which he is not competent to perform.

ORDER:—Ordered that a copy of the Resolution be published in the *Calcutta Gazette* and that copies be forwarded to the other departments of Government for information and for communication to the officers subordinate to them.

By order of the Governor in Council,

J. H. KERR,

Chief Secy. to the Govt. of Bengal.

REPORT ON FAMINE IN THE DISTRICT OF BANKURA FOR THE WEEK ENDING 20TH SEPTEMBER 1919.

THE rainfall during the week was sufficient. The agricultural prospects are favourable. Eighty-six relief works were open during the week. The number of persons relieved on works was 15,925. The number of persons in receipt of gratuitous relief was 12,012, viz., 6,864 on cash doles in 81 unions, 3,683 on paddy-husking advances, 885 weavers, and 580 better class poor. The grand total of persons relieved was 27,937. The increase in the number of persons on relief works was due to the completion of field operations, and the decrease in the numbers in receipt of cash doles was due to the closure of 41 centres. The number of persons relieved on private works was 510. The charitable societies also relieved 646 persons by weekly doles and 900 on daily doles and cooked food. During the week eight cases of theft of paddy were reported. Public health is generally good. Outbreak of malaria and cholera is reported from certain localities. Cloth is being distributed to destitutes. The relief measures are adequate. The price of common rice varies from 5 to 5$\frac{3}{16}$ seers in the rupee.

M. C. MCALPIN,

Secy. to the Govt. of Bengal.

DARJEELING,

The 25th September 1919.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 25th September 1919.

Summary.—A cyclone of unusual severity accompanied by heavy rain passed over the districts of the Dacca Division and Khulna on the 24th instant, causing immense damage to the standing crops and live-stock. The tracts actually affected and the extent of damage are not yet known. The rainfall was generally light to moderate in the rest of the province. Weeding of winter paddy, cutting and steeping of jute are approaching completion. The average price of common rice for the province has fallen by about 1·77 per cent. as compared with that of the previous week. The total number of persons in receipt of gratuitous relief in Brahamanberia subdivision of Tippera district was 7,203. The conditions in Bankura are published separately.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee. This week.	Price of common rice, in seers, per rupee. Previous week.	Character of the weather, condition of crops, etc.

for *President, Advisory Food Committee.*

CALCUTTA, *the 27th September 1919.*

DEPARTMENT OF STATISTICS, INDIA.

CALCUTTA TRADE FLUCTUATIONS.

THE following tables are intended to show the trade by all routes, *i.e.*, by rail, river, canal, road, and sea, of the Calcutta block* in certain selected articles during the months of April to July, 1919, as compared with the corresponding period of 1918 and 1917. The statistics have been compiled from returns furnished by the Collector of Customs, Calcutta, Railway Audit Offices, Steamer Companies, the Commissioners for the Port of Calcutta, the Collectors of the 24-Parganas and Howrah, and the Assistant Engineer, Calcutta Canals.

General Summary.

Imports.—The imports of rice, including paddy†, into Calcutta by rail, river, canal, road, and sea (coastwise) during the months of April to July, 1919, amounted to 8,119,000 maunds, as against 4,160,000 maunds in the corresponding period of the preceding year,—an increase of 95 per cent. There was an increase (28 per cent) in the imports of coal and coke (33,381,000 maunds as against 26,132,000 maunds last year). The imports by rail, river, road, and sea (coastwise) of Indian cotton piecegoods showed an increase of 65 per cent, the total value amounting to Rs. 3,10,43,000 as against Rs. 1,87,78,000 in 1918. The quantity of indigo imported during the months of April to July, 1919, decreased from 4,082 maunds to 972 maunds. The imports of raw jute amounted to 868,000 bales as against 1,394,000 bales—a decrease of 38 per cent. The importations of gunny bags also showed a decrease of 12 per cent (128 million bags as against 145 millions in the preceding year). The total imports of oilseeds (linseed and rape and mustard seed) increased by 74 per cent from 2,139,000 maunds to 3,728,000 maunds. The imports of sugar decreased by 25 per cent from 268,000 maunds to 201,000 maunds and those of tea by 10 per cent from 806,000 maunds to 726,000 maunds

Exports.—The exports of cotton piecegoods, foreign, from Calcutta, by all routes during the months of April to July, 1919, increased by 1 per cent (Rs. 8,73,39,000 as against Rs. 8,65,68,000 last year). The exports of gunny bags (including the exports by sea to foreign countries) decreased from 423 million bags to 354 million bags, but the shipments of gunny bags to other Indian ports increased from 9 millions to 14 millions in number in the period under review. The quantity of kerosene oil despatched from Calcutta and Budge-Budge by internal routes and by sea (coastwise) increased from 1,650.000 maunds to 1,873,000 maunds, or by 14 per cent.

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore Docks.

† One maund of paddy is equivalent to 25 seers of rice.

TABLE 4

Trade of Calcutta in certain selected articles in the four months, April to July, 1919, compared with the corresponding months of 1918.

REPORT ON FAMINE IN THE DISTRICT OF BANKURA FOR THE WEEK ENDING 27th SEPTEMBER 1919.

THE rainfall during the week was insufficient. The agricultural prospects are favourable. Eighty-eight relief works were open during the week. The number of persons relieved on works was 18,067. The number of persons in receipt of gratuitous relief of all kinds was 7,852, viz., 2,807 on cash doles in 18 unions, 3,683 on paddy husking advances, 782 weavers and 580 better class poor. The grand total of persons relieved was 25,919. The increase in the number of persons on relief works was due to the completion of field operations, and the decrease in the numbers in receipt of cash doles was due to the closure of gratuitous relief in 63 unions. The number of persons relieved on private works was 725. The charitable societies also relieved 400 persons by weekly doles and 900 persons by daily doles and cooked food. During the week eight cases of theft of paddy and rice were reported. Public health is on the whole good. The outbreak of malaria and influenza is reported from certain localities. Cloth is being distributed to destitutes. The relief measures are adequate. The price of common rice varies from $5\frac{1}{4}$ to $5\frac{3}{4}$ seers in the rupee.

M. C. MCALPIN,
Secy. to the Govt. of Bengal.

DARJEELING, *the 2nd October 1919.*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 2nd October 1919.

Summary.—The rainfall during the week was light in the western districts and generally moderate elsewhere. More rain is needed on high lands in West Bengal. Good rainfall in the Eastern Bengal districts during the latter part of September facilitated transplanting of winter rice and steeping of jute. The damage done by the cyclone to standing crops is probably not so great as was originally anticipated. Weeding of winter paddy and steeping and washing of jute are nearing completion. Preparatory tillage for the next spring crops and their sowings have commenced in some districts. The average price of common rice for the Province has slightly risen as compared with that of the previous week. The total number of persons receiving gratuitous relief in Brahmanbaria subdivision of Tippera District was 6,155. The conditions in Bankura are published separately.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee. This week.	Price of common rice, in seers, per rupee. Previous week.	Character of the weather, condition of crops, etc.

REPORT ON FAMINE IN THE DISTRICT OF BANKURA FOR THE WEEK ENDING 4th OCTOBER 1919.

THE rainfall during the week was insufficient. The agricultural prospects are favourable. Eighty-nine relief works were open during the week. The number of persons relieved on works was 15,047. The distribution of gratuitous relief in the shape of cash doles has been closed in all unions. The number of persons in receipt of special relief was 4,818, viz., 3,683 on paddy husking advances, 635 weavers and 500 better class poor. The grand total of persons relieved was 19,865. The decrease in the number of persons on relief works was due to the harvesting of *aus* paddy. The number of persons relieved on private works was 200. The charitable societies also relieved 700 persons by daily doles. During the week seven cases of theft of paddy were reported. Public health is on the whole good. The outbreak of malaria is reported from certain localities. Cloth is being distributed to destitutes. The relief measures are adequate. The price of common rice varies from 5¼ to 5¾ seers in the rupee. Burma rice is being sold.

M. C. MCALPIN,
Secy. to the Govt. of Bengal.

DARJEELING, *the 10th October 1919.*

APPOINTMENT OF A COMMITTEE TO ENQUIRE INTO THE ENHANCEMENT OF LAND VALUES AND THE RISE IN RENTS IN CALCUTTA.

GOVERNMENT OF BENGAL.

MUNICIPAL DEPARTMENT.

Municipal Branch.

CALCUTTA, THE 30TH SEPTEMBER, 1919.

RESOLUTION—No. 3554M.

AT the meeting of the Bengal Legislative Council held on the 3rd September 1919, the Hon'ble Mr. W. H. Phelps moved that the Governor in Council be recommended to appoint a Commission to enquire "into the causes of the excessive land values and high rents in Calcutta, and, if possible, to suggest remedies". The resolution was accepted by Government and duly carried. The Governor in Council has accordingly directed that a Committee representative of the various interests involved, should be appointed to enquire into the remarkable enhancement in land values and house rents, which has recently occurred in Calcutta.

He desires that the causes of this enhancement may be investigated and its extent and degree defined; that the charge of "profiteering" made against landlords should be examined, and that, if in the opinion of the Committee it is desirable and practicable to control or limit the rise in rents, definite proposals in this behalf may be submitted for the consideration of Government at an early date.

The Governor in Council is pleased to appoint the following gentlemen to form the Committee, namely :—

1. The Hon'ble MR. W. E. CRUM, O.B.E., *Chairman.*
2. The Hon'ble MR. F. C. FRENCH, C.S.I., I.C.S.
3. The Hon'ble RAJA RESHI KESH LAW, C.I.E.
4. The Hon'ble MR. ABDUR RAHIM.
5. REV. A. GILLE, S.J.
6. The Hon'ble MR. W. H. PHELPS.
7. A. DEBOIS SHROSBREE, ESQ.
8. RAI P. N. MUKHARJI BAHADUR.
9. BABU RAMDEO CHOKANI.
10. J. H. RUNDLETT, ESQ.
11. A. D. PICKFORD, ESQ.
12. R. C. BONNERJEE, ESQ., *Bar.-at-Law.*
13. The Hon'ble Mr. H. P. DUVAL, I.C.S.
14. J. A. WOODHEAD, ESQ., I.C.S., *Secretary.*

By order of the Governor in Council,

S. W. GOODE,

Offg. Secy. to the Govt. of Bengal.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE COMMISSIONERS FOR THE PORT OF CHITTAGONG FOR THE YEAR 1918-19.

GOVERNMENT OF BENGAL.

MARINE DEPARTMENT.

CALCUTTA, THE 14TH OCTOBER 1919.

RESOLUTION—No. 3162Marine.

READ—

The Administration Report of the Commissioners for the Port of Chittagong for the year 1918-19.

Income.—The ordinary receipts of the Port Fund during the year under review amounted to Rs. 2,28,310 (exclusive of the Government grant of Rs. 1,50,000 for the improvement of the Port) as against Rs. 1,75,561 of the preceding year. A further grant of Rs. 1,00,000 was made by this Government from Provincial revenues for the revetment work at Patenga, and a sum of Rs. 20,208 was received as an annual assignment from the Burma Coast Light Dues Fund. The total receipts of the Port Fund amounted to Rs. 4,98,518 as against Rs. 3,45,769. The increase was mainly due to the payment of arrears of contribution from the Pilotage Fund for the previous year, the lease of the residences of the Port Officer and second Harbour Master, Chittagong, to private persons, the imposition of a surcharge of 100 per cent. from the 1st March 1918 on mooring and unmooring fees, the raising of the river dues from 4 annas to Re. 1 per ton from 1st December 1918, and an improvement in the jute export trade.

2. **Expenditure.**—The ordinary expenditure of the Port Fund for the year amounted to Rs. 4,60,263, as against the actuals of Rs. 3,40,945 of the previous year. The increase in expenditure was mainly due to payment of Rs. 99,326 on account of acquisition of land for revetment work.

The net working result is a credit balance of Rs. 38,255. But for the Government subsidy of Rs. 2,50,000 the year would have closed with a deficit of Rs. 2,11,745.

Assets and Liabilities.—The value of the Port Commissioners' properties as estimated on the 31st March 1919 stands at Rs. 36,26,522 and the liabilities at Rs. 70,454 (exclusive of Rs. 4,96,914, being the outstanding balance of loans from Government for revetment work).

Dredging Report.—The dredger "Karnafuli I" underwent frequent repairs during the year under review. She worked at the Inner and Outer bars and the double moorings for 112 days only, dredging 45,00,000 cubic feet.

Outer Bar.—An average depth of 8 feet 8 inches was maintained throughout the year. The dredger was employed for 37½ days on this bar.

Inner Bar.—An average depth of 8 feet 10 inches was maintained during the year. The dredger was at work for 83½ days on this bar.

River Survey.—The annual surveys were carried out for the navigable portion of the Karnafuli from two miles above the Sadarghat jetty to the mouth of the river.

A marine survey of the river from the mouth of the Karnafuli was practically completed under the direction of the Port Officer during the fair season, and plotted to the scale of 400 feet to an inch.

Revetment.—The revetment in the river bank stood well during the year, a slight reinforcement of additional stone being necessary on the slopes.

Light-houses.—The Kutubdia and Norman's Point Light-houses, towers and lanterns were in good order.

The Kutubdia Light-house revetment work was inspected during the year and found to be in a satisfactory state.

Light-vessels.—The light-vessel "Sarsuti" underwent her annual repairs in the port of Chittagong. The total cost of maintaining the vessel amounted to Rs. 15,237.

Shipping.—The total number of ocean-going vessels, inland steamers, and sailing vessels entering the port was 709 as against 600 during the previous year. The Port Officer submitted to Government his report of enquiry into two cases of shipping casualties upon which Government decided that no further enquiry was necessary.

Detention of vessels.—Two inward-bound vessels were detained owing to insufficient depth of water over the bars. The period of detention was five days in one case and three days in the other case.

Trade.—The total value of foreign and coasting sea-borne trade has considerably increased and amounted to Rs. 771·76 lakhs as against Rs. 661·86 lakhs during the preceding year.

Sanitation.—The general health of the port was good.

Development and future administration of the Port.—During the year under review Sir George Buchanan presented to the Government of India, Railway Department (Railway Board), his valuable report on the development of the port: the report dealt with the question both from an administrative and technical point of view. The Government of India forwarded to this Government a copy of the report and particularly asked for the opinion of this Government on two points,—one administrative and one financial. The Chittagong Chamber of Commerce and the Port Commissioners were consulted and the opinion of this Government was communicated to the Railway Board. This Government agreed that the Assam-Bengal Railway should be more strongly represented on the Port Trust Board, Chittagong, in view of the preponderating interest of that railway in the development of the port. The estimates framed by Sir George Buchanan for important engineering works, at an estimated cost of Rs. 44 lakhs in addition to the provision of one or two dredgers, were accepted. An examination of the financial condition of the Port Trust proved conclusively that without material financial assistance the engineering works proposed in Sir George Buchanan's report could not be constructed. As the revetment at Gupta Point was of immediate urgency for the prevention of further deterioration at the Inner bar, the port was helped during the year under review from Provincial revenues by the grant of Rs. 1 lakh in addition to the annual grant of Rs. 1½ lakhs. The Government of India were also asked for a grant of not less than Rs. 4 lakhs a year, for the years 1919-20 and 1920-21, and eventually the Imperial Government agreed to provide Rs. 4 lakhs during 1919-20 for urgent revetment work. Subsequently to the close of the year under review, the Government of India suggested to this Government the advisability of placing under the direct control of the Assam-Bengal Railway the port of Chittagong as being in fact the terminal port of that railway. This Government after some negotiation accepted the proposal of the Government of India; and the necessary legislation to give effect to this decision is now under consideration in the Government of India.

General.—The duties of the Port Officer were carried out by the Collector of Customs conjointly with the senior Harbour Master, as no officer of the R. I. M. was available for the post.

Mr. K. C. De, Commissioner of the Chittagong Division, was Chairman of the Commissioners during the year except from the 9th July to the 20th October, when Mr. Clayton acted in his place.

By order of the Governor in Council,

F. A. A. COWLEY,

Secy. to the Govt. of Bengal.

DEPARTMENT OF AGRICULTURE, BENGAL.

Second Forecast of the Cotton Crops of Bengal, 1919-20.

Note.—On an average of the five years ending 1917-18, the area under the Cotton Crops in Bengal has represented some 0·2 per cent. of the total area under cotton in India.)

There are two crops—early and late. The "early" crop is chiefly grown in the Chittagong Hill Tracts and in the State of Hill Tippera, and to a small extent in other districts. The "late" crop is grown in Bankura and Midnapore.

Character of the season.—At sowing time, the weather was generally unfavourable owing to insufficient rain. Subsequent rainfall, which was generally moderate up till the end of June, greatly improved the prospects. In the following two months, heavy rain in the Chittagong Hill Tracts affected the crop. The present prospects are reported to be fair, on the whole.

Area sown.—The area sown with early cotton is reported to be 69,280 acres this year, against 71,367 acres reported in the corresponding forecast of last year.

Of the late crop, 758 acres are reported to have been sown up to date, against 700 acres in the corresponding forecast of last year.

ROBERT S. FINLOW,

Offg. Director of Agriculture, Bengal.

DACCA,

The 6th October 1919.

DEPARTMENT OF AGRICULTURE, BENGAL.

Second Forecast of the Sugarcane Crop of Bengal, 1919-20.

(Note.—On an average of the five years ending 1917-18, the area under Sugarcane in Bengal has represented some 8·8 per cent. of the total area under Sugarcane in British India.)

Character of the season.—Insufficient rainfall at the outset was somewhat unfavourable to the planting of the crop and retarded germination in places. Good rain, since then, generally greatly benefited the growth of the plants. In parts of Nadia, Jessore, Burdwan, Pabna, Faridpur and Noakhali, however, the crop suffered somewhat through excessive rainfall in July and August. The present prospects are generally reported to be promising.

Acreage.—The area planted with sugarcane for the province this year is reported to be 218,600 acres against 219,300 and 218,900 acres reported respectively in the corresponding and final forecasts of last year.

Outturn.—According to the estimates of the district officers the provincial outturn works out to 88 per cent. of the normal as against 81 and 77 per cent. reported respectively in the second and final forecasts of last year.

ROBERT S FINLOW,
Offg Director of Agriculture, Bengal.

DACCA :
The 9th October 1919.

APPENDIX.

Second Forecast of the Sugarcane Crop of Bengal, 1919-20.

District.	Estimated normal area under sugarcane.	Estimated area under sugarcane.		Taking 100 to represent the normal, what would be the average outturn per acre cropped.		Date by which the planting of setts generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
		Last year.	This year.	Last year.	This year.		
	Acres.	Acres.	Acres.				
24-Parganas	8,000*	4,100	4,300	87	100	April. Normal ...	The increase in area is due to the high price of sugar. The weather has been favourable.
Nadia	7,900	5,500	6,100	67	67	January to February. Normal.	The increase in area is due to high price of sugar. The weather was favourable at planting time, but subsequent heavy rains have damaged the crop to a certain extent in the Ranaghat and Chuadanga subdivisions. The effects of the weather have not been favourable in all the subdivisions.
Murshidabad ...	[illegible]	3,100	2,800	68	75	December to April ...	The decrease in area was due to want of rain during the planting time. The weather was not favourable at the beginning owing to want of rain which has affected the growth of the crop a little, but the conditions have improved later on.
Jessore	3,900	[illegible]	3,100	5	75	February and March. Normal.	The increase in area was due to high price of sugar. The weather was favourable at planting time, but subsequent drought retarded their growth. In some places, the heavy rains of July and August damaged the plants to some extent.
Khulna ...	1,500	1,100	1,100	77	67	February. Normal ..	The weather was seasonable; its effects have been favourable to the growth of the crops.
Burdwan	25,800	19,000	18,100	75	83	April to May. Normal.	The weather was not favourable at the beginning but subsequently it has become favourable except in places where the growth of the crop has been affected by heavy rainfall.
Birbhum ..	9,000	11,000	11,000	75	100	May. Normal ...	The weather has been favourable.
Bankura	15,000	11,500	10,500	75	117	Middle of May. Late	The planting was delayed owing to want of rainfall at the beginning. The weather has since been good.
Midnapore	6,600*	3,000	4,200	80	100	March and April Normal.	The increase in area was due to favourable conditions at sowing time and to high price of *gur*. The weather has been favourable.
Hooghly	7,200	5,000	4,900	87	94	March. Normal ...	The weather was not very favourable at planting time, but has since been favourable.
Howrah ...	8,500	[illegible]	5,200	71	92	January. Normal ...	The weather has been favourable and its effects have been good on the growth of the crop.
Rajshahi	18,000	[illegible]	13,300	70	75	End of January. Normal.	The weather has been favourable and its effects have been good on the growth of the crop.
Dinajpur	25,000	30,500	[illegible]	78	89	January to March. Normal.	The increase in area is due to high price of sugar. The weather has been fair and its effects on the growth of the crop have been good.
Jalpaiguri	5,000*	4,000	3,700	80	85	December. Normal ...	The decrease in area was due to want of rain at planting time. The weather has not been favourable.
Darjeeling	200*	200*	200†	46	67	By the end of February	The weather and its effects on the growth of the crop have been fair.
Rangpur	20,500	11,000	12,600	10	100	Latter part of February. Normal.	The weather was not favourable at first but has been favourable later on. The effects of the weather on the growth of the crop have been good on the whole.
Bogra...	5,000*	3,700	4,200	67	88	March and April. Normal.	At the beginning the weather was not favourable, but subsequently it has been favourable to the growth of the crop.
Pabna	10,000	9,700	4,700	65	55	Middle of April. Normal.	The decrease in area is due to want of rain at planting time. The weather was not favourable for cultivation and subsequent want of timely rainfall retarded the growth of the crop. The present condition of the crop is also not good owing to excessive rain.
Malda	300	300†	300†	100	100	Ditto ..	The weather was dry at planting time, but it has been favourable. A normal outturn is expected.
Dacca	21,100	23,900	23,700	74	81	February to April Late.	Seasonable rain at sowing time and subsequently frequent showers have done much good to the crop.
Mymensingh ...	11,100	10,300	10,300	80	70	Jamalpur, Late. Elsewhere normal.	The weather has not been favourable. The growth of the crop has been stunted to a considerable extent for want of timely rain.
Faridpur	7,100	7,400	7,400	87	87	End of February. Normal.	The weather was favourable at planting time, but subsequently the growth has been affected by heavy rainfall.

* Revised. † Conventional area revised.

District.	Estimated normal area under sugarcane.	Estimated area under sugarcane.		Taking 100 to represent the normal, what would be the average outturn per acre cropped.		Date by which the planting of setts generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
		Last year.	This year.	Last year.	This year.		
	Acres.	Acres.	Acres.				
Bakarganj	11,000	20,000	22,000	80	108	January and February. Normal.	The weather was favourable at sowing time, but became a little unfavourable afterwards. The flood in the first part of August has done slight damage to the crop. The present condition, however, is good.
Chittagong	6,400	5,490	6,000	95	100	Middle of March Normal.	The rainfall at planting time was deficient, but subsequent conditions have on the whole been favourable to the growth of the crop.
Tippera	8,000	6,100	6,000	79	67	March. Normal ...	The weather was dry at planting time, but it is good now. The effects of the weather on the growth of the crop have been fair.
Noakhali	800	800(a)	800(a)	90	65	First week of April. Normal	The weather has been favourable. Owing to heavy rainfall in June, July and August the growth of the plant in the Sadar subdivision has been stunted to a considerable extent.
Chittagong Hill Tracts.	1,000	1,000	1,000	63	60	Middle of April to middle of May.	The weather has not been favourable. Insufficient rainfall is retarding the growth of the crop.
Total of Bengal	247,500*	219,000*	218,600	77	88		

(a) Conventional area. * Revised.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 9th October 1919.

Summary.—Light to moderate rain generally fell during the week. Transplanting of winter rice is practically over. More rain is needed for the growth of the crop, especially in the western districts. Steeping and washing of jute are still going on. Preparation of lands for the next spring crops and their sowings continue. The condition and prospects of the standing crops are on the whole favourable. The average price of common rice for the province has fallen by about 0·45 per cent. as compared with that of the previous week. The conditions in Bankura are published separately :—

Serial No.	District and subdivision.	Rainfall	Price of common rice, in seers, per rupee: This week	Price of common rice, in seers, per rupee: Previous week	Character of the weather, condition of crops, etc.

REPORT ON FAMINE IN THE DISTRICT OF BANKURA FOR THE WEEK ENDING 11th OCTOBER 1919.

THE rainfall during the week was insufficient, but agricultural prospects are favourable. Seventy-three relief works were open during the week. The number of persons relieved on works was 13,265 The number of persons in receipt of special relief was 4,245, viz., 3,683 on paddy-husking advances, 555 weavers and 7 better class poor. Ordinary gratuitous relief had been closed in the previous week. The grand total of persons relieved was 17,510. The decrease in the number of persons on relief works was due to the closure of works in two thanas. The number of persons relieved on private works was 500. The charitable societies also relieved 700 persons by daily doles. During the week seven cases of theft of paddy were reported. Public health is generally good. The outbreak of malaria is reported from certain localities. Cloth is being distributed to the destitutes. The relief measures are adequate. The price of common rice varies from 5¼ to 5[illegible] seers in the rupee. Burma rice is being sold.

Secy. to the Govt. of Bengal.

CALCUTTA, *the 16th October 1919.*

REPORT ON THE ADMINISTRATION OF THE EXCISE DEPARTMENT IN BENGAL DURING THE YEAR 1918-19.

NOTIFICATION.

No. 344T.-S.R.—The 9th October 1919.—The following extracts from the Report of the Commissioner of Excise and Salt on the administration of the Excise Department in Bengal during the year 1918-19 are published for general information.

C. F. PAYNE,
Secy. to the Govt. of Bengal.

No. 4500E., dated Calcutta, the 24th September 1919.

From—S. C. MUKERJEE, Esq., I.C.S., Commissioner of Excise and Salt, Bengal,

To—The Secretary to the Government of Bengal, Financial Department.

I HAVE the honour to submit the following report on the administration of the Excise Department in the Presidency of Bengal for the year 1918-19.

Mr. A. N. Moberly, I.C.S., was in charge of the department till the 7th November 1918, when I relieved him.

* * * * * * *

4. **Administrative changes and reforms.**— * * *

(4) Under Government Notification No. 1968 S.R., dated the 22nd July 1918, the opening hours of premises for the retail vend of foreign liquor for consumption therein has been fixed at 11 A.M.

(5) Under Government Notification No. 2172 S.R., dated the 12th August 1918, the limit of retail sale of foreign liquor (except beer and denatured spirit) has been fixed at 23 reputed quart bottles or 47 reputed pint bottles, and that of beer at 4 Imperial gallons or 24 reputed quart bottles or 48 reputed pint bottles.

* * * * * * *

(7) Under Government Notifications Nos. 2447 S.R., 2449 S.R., and 2450 S.R. dated the 30th August 1918, the system of levying a tax on each *tari*-producing tree has been introduced in the Sadar and Serampur sub-divisions of the Hooghly district and the whole of the Howrah district (with the exception of areas included in the Calcutta district).

(8) Under Government Notifications Nos. 133 T.-S.R., dated the 23rd September 1918, and 285 S.R., dated the 29th January 1919, the duty on country spirit for different strengths was enhanced in the districts of Hooghly, Howrah, 24-Parganas and Calcutta.

* * * * * * *

(10) Under Government Notification No. 3585 S.R., dated the 21st December 1918, female Excise preventive officers were experimentally appointed under the Excise Intelligence Bureau to deal with smuggling by rail.

(11) Under Government Notification No. 70 S.R., dated the 7th January 1919, the rate of duty on country spirit was increased in the district of Jalpaiguri.

* * * * * * *

(15) Under Government Notification No. 926 S. R., dated the 26th March 1919, the retail prices of country spirit were increased throughout the Presidency.

5. **Temperance teaching in Schools.**—The following has been communicated to me in compliance with Government Memorandum No. 1850 R.S., dated the 24th September 1915, for incorporation in this report :—

Lessons on temperance are incorporated in books on hygiene recommended for use in middle and upper primary stages of English and vernacular schools. The revised curriculum for primary schools provides for the teaching of temperance in Classes IV and V, and is now under the consideration of Government.

6. **Temperance movements.**—Outside Calcutta there was no evidence of any temperance movement during the year, except that the movement at Teknaaf, in the district of Chittagong, which was noticed about three years ago, continued and the Collector reports that in consequence opium was consumed with moderation in the locality. The organisation in Calcutta continued to show much activity and is well conducted. Apart from its work in Calcutta itself, it organised lectures at Dacca and Mymensingh in connection with the Social Service League. It cannot be too strongly emphasised that the Excise Department is ready to co-operate with any reasonable temperance movement. There are some questions, such as the separation of premises for "off" and "on" sales of country liquor, further curtailment of the hours of sale, closing of shops on days of festivals in which people drink to excess, removal of shops from the main roads, restriction in the supply of country liquor, and the provision of counter-attractions to grog shops, in which opinions differ. When these questions have been fully and carefully discussed, the Department will be ready to consider any reasonable and practicable proposals.

7. **Excise Advisory Committees.**—Excise Advisory Committees were convened for all the municipalities outside the Calcutta district and for all rural areas. All their recommendations were carefully considered and effect was given to them in almost all cases. One foreign liquor shop, seven country spirit shops, three *tari* shops, two *pachwai* shops, nine *ganja* shops, one *charas* shop and four opium shops were abolished, and the sites of twenty-two country spirit shops, nine *tari* shops, fifteen *pachwai* shops, ten *ganja* shops, one *bhang* shop and six opium shops were changed in accordance with their advice. The sites would have been changed in other cases also, if suitable places could have been procured to which the shops could be removed. In some cases the objection was met by the erection of screens or walls. On the whole these Advisory Committees served a very useful purpose and they are gradually taking more and more interest in their work.

8. **Licensing Boards.**—The Licensing Boards held 23 meetings as compared with 17 in 1917-18 and 12 in 1916-17 :—

The action taken is summarized in the following statement

Class of license.	Action taken.	Calcutta.	Cossipore-Chitpore.	Manicktola.	Garden Reach.	Howrah.	Bally.	Total.

The Calcutta Licensing Board considered a proposal made by the Lord Bishop of Calcutta to the effect that the closing hour of all bars in hotels, restaurants and places of amusements should be fixed at 10 P.M. instead of at 11 P.M. The question was eventually referred to Government and it was ordered that bars and foreign liquor "on" shops should not be opened before 11 A.M. instead of at sunrise, while the closing hours remained the same viz., 11 P.M. and 9 P.M., respectively.

As stated in last year's report, the experiment of a "dry" educational area in Calcutta was taken up during the year and has been continued since. Sanitary improvements to the shops were also continued during the year, in accordance with the suggestions of the Health Officer of the Calcutta Corporation.

9. **Total Revenue and Charges.**— * * * * * * The Excise Revenue and Charges of the Presidency for the last five years are shown below :—

Period.	Revenue.	Charges.	Net revenue.	Percentage of charges.
	Rs.	Rs.	Rs.	
1914-15	1,53,59,916	7,42,121	1,46,17,795	4·83
1915-16	1,51,30,570	8,26,217	1,43,04,353	5·46
1916-17	1,41,07,668	9,65,974	1,34,41,694	6·70
1917-18	1,56,25,391	10,32,941	1,45,92,450	6·61
1918-19	1,76,38,246	10,57,674	1,65,80,572	5·99
Difference of the past two years.	+20,12,855	+24,733	+19,88,122	−·62

11. **Actual receipts.**—Deducting the advance collections (Rs. 7,52,816) for 1919-20 and adding the revenue (Rs. 7,68,944) which was collected in advance in 1917-18, the actual receipts on account of 1918-19 were Rs. 1,76,54,374 against Rs. 1,58,27,704 (after similar adjustment) of the preceding year, showing an increase of Rs. 18,26,670 or 11·54 per cent.

12. **Excise Charges.**— * * * The total expenditure of the Excise and Salt Department excluding refunds, shows an increase of Rs. 59,656 as compared with 1917-18. The principal increases occurred under the heads of "Salaries and Establishment" (Rs. 48,380) and "Allowances" (Rs. 24,583). The increases under the heads were due to the entertainment in 1918-19 of the full sanctioned number in the cadre of Inspectors and Sub-Inspectors.

13. **Revenue under different heads.**— * * * * Revenue increased under all the main heads except "Receipts from commercial spirits including medicated wines," which decreased by Rs. 14,897. Country spirit gave the largest increase of revenue (Rs. 13,43,506); receipts under "Wines and Spirits" (foreign liquors, other than beer, medicated wines and commercial spirits) came next with an increase of Rs. 1,96,887 followed by

opium (Rs. 1,92,382), *pachwai* (Rs. 1,81,442), total receipts from hemp drugs (Rs. 91,395) and *tari* (Rs. 21,966).

14. **Demand and Collection.**— * * * Of the gross demand of Rs. 1,76,62,837 a sum of Rs. 1,76,38,246 or 99·86 per cent. was realized. Rupees 10,725 was remitted as irrecoverable. Taking the population of the Presidency of Bengal, according to the census of 1911 to be 45,329,247, the incidence of Excise revenue (exclusive of revenue derived from issues of excisable articles to other provinces, Native States and foreign countries) was 6 annas 2 pies against 5 annas 5 pies in the previous year.

15. **Result of settlements for the current year up to 31st May 1919.**— * * * * * * The settlements for the current year show a net increase of Rs. 8,53,669.

The results under the different heads are as follows :—

					Rs.
Country spirit	...	...	...	+	1,34,182
Foreign liquor	...	...	...	+	11,841
Fermented *tari*	...	...	...	−	17,606
Pachwai retail	...	...	...	−	91,149
Hemp drugs	...	...	...	+	4,25,729
Opium	...	...	...	+	3,90,672

License fees for country spirit increased in fifteen districts and decreased in the remaining twelve districts. The largest increase occurred in Hooghly (Rs. 1,34,808). This increase and the increase in the 24-Parganas (Rs. 45,678) are due to the fixing of fees on the basis of the increased consumption in the year under report. In Mymensingh the increase (Rs. 24,216) is due to the settlement of shops at higher fees under the auction system. Calcutta shows a heavy decrease of Rs. 69,520 owing to the abolition of 15 shops. The increase under foreign liquor is not very heavy and does not call for any remarks. The decrease under fermented *tari* is mainly due to the introduction of the tree-tax system from October 1918 in the Hooghly and the Howrah districts. The greater part of the decrease under *pachwai* is shared by Burdwan (Rs. 51,792), Birbhum (Rs. 21,804) and Bankura (Rs. 16,785) amounting to Rs. 90,381, due mainly to settlement at reduced fees owing to high prices of rice and other food-stuffs. The increases under opium and hemp drugs are large and represent a recovery from the previous year's decreases, which were brought about by an enhancement in the treasury price of opium and high wholesale prices of *ganja* prevailing in 1917-18. The increases are largest in Hooghly (Rs. 5,32.260), Calcutta (Rs. 1,18.175) and Mymensingh (Rs. 77,964) and also exceed Rs. 20,000, in Burdwan (Rs. 39,924) and Nadia (Rs. 29,688). The increases in Hooghly and in Calcutta are due to the basing of the fees on the year's consumption which was larger in case of *ganja* under the fixed-fee system. In the case of Mymensingh the increase is due to the settlement of shops at enhanced license fees. The only heavy decrease occurred in Howrah (Rs. 66,509) where the fees were based on the reduced consumption of the year. The figures for the "fixed-fee" districts can only be regarded as an estimate, as the license fees in these districts for the current year will depend on the current year's consumption.

SECTION II—Country Liquor.

* *

Country spirit.

17. **System.**—The system of contract supply was the only system in force in this Presidency during the year under report.

18. **Country Spirit licenses.**—The number of licenses for the sale of country spirit was 1,148 as compared with 1,162 in 1917-18, a decrease of 14. One new shop was opened with the approval of the Advisory Committee in a village in Birbhum to meet ascertained local demand which was being met

illicitly. In the district of Midnapore two shops were closed for want of adequate bids. Under the orders of the Licensing Board two shops within the Calcutta Municipality and one in the Howrah Municipality were abolished. Five shops in Jessore and one each in Mymensingh and Noakhali were closed, as the sales were insufficient. One shop was also closed in Jalpaiguri as being unnecessary, while two shops in the district of Darjeeling were closed as no one was willing to take them on account of their isolated sites and fear of lawlessness.

19. **The fixed fee system in Calcutta.**—During the year two advances in the retail prices of country spirit were made in Calcutta, one from the 1st October 1918, and the other from the 1st February 1919. The last increase in prices was substantial and was as follows :—

25° U. P. from Rs. 12-5-6 to Rs. 13-14-0.
40 U. P. from Rs. 9-12-6 to Rs. 11-1-6.
70° U. P. from Rs. 4-12-6 to Rs. 5-7-0.

It will be observed that the new system was originally introduced with Rs. 11-4 as price per gallon of 25° U. P. and nearly the same price, viz., Rs. 11-1-6 is now being enforced for liquor of 40° U.P. which is considerably weaker. This increase in the prices of the different strengths has arrested the tendency to a rise in consumption. It may be mentioned here that the duty on the imperial gallon of the higher strength in Calcutta and the suburbs is proportionately higher than the tariff rate of duty on foreign liquor.

20. **The fixed fee system in other districts.**—The fixed fee system was in force in the districts of Howrah and 24-Parganas and in the Sadar and Serampore subdivisions of Hooghly, as in the previous year. The system has been introduced from the 1st April 1919 in the district of Midnapore under Government Order No. 215S.R., dated the 20th January 1919. The introduction of the system was followed by a considerable increase in consumption, due to reasons similar to those for Calcutta and discussed in last year's report. The more flagrant forms of dilution and other malpractices are of rare occurrence now. Two forward steps were taken, as in Calcutta, to push up duty and prices and the results have proved satisfactory.

21. **Consumption.**—The total consumption of country spirit in the Presidency amounted to 796,972 proof gallons as compared with 700,586 proof gallons in the preceding year, an increase of 96,386 proof gallons.

Consumption increased in 19 districts and decreased in 8. In 4 of the former and three of the latter the fluctuation was less than 5 per cent. The further increase in Calcutta in the year under report only represents the natural tendency of the consumption to go up, now that the prices are fixed and the malpractices by the vendors have been brought under control. Outside Calcutta, the increase in consumption was considerable in Dacca (9,325 proof gallons or 66·3 per cent.), due partly to sale at reduced prices owing to competition among vendors and partly to closer supervision over the shops, in the 24-Parganas, Howrah and Hooghly (29,299 proof gallons or 60·2 per cent., 6,730 proof gallons or 53·4 per cent. and 10,007 proof gallons or 38·4 per cent., respectively), due as noted above to the check of dilution, short measures and other malpractices on the part of the vendors, as a result of the introduction of the fixed-fee system of settlement, which has brought about a considerable improvement in the personnel of the vendors, in Murshidabad (2,449 proof gallons or 27·2 per cent.), in Nadia (943 proof gallons or 17·1 per cent) due in both the districts to better control over vendors, and in Burdwan (5,503 proof gallons or 12·2 per cent.), where the increase is said to be due to the larger employment of labourers in the colliery areas of the Asansol subdivision. The increase in the other districts does not call for any special remarks. It may be mentioned here that the high prices of foreign liquor and the gradual effect of the increased staff and efficiency of the Department in checking illicit distillation have also contributed to a part of the increase in consumption in many districts.

The only districts in which the decrease exceeded 10 per cent. were Noakhali (145 gallons or 17·3 per cent.) and Rajshahi (1,512 gallons or 15·05 per cent.). In both these districts the decrease is attributed to the high price of food-stuffs and other necessaries of life.

* * * * * * * *

23. **Total revenue from country spirit.**—The total revenue—license and distillery fees and duty—from country spirit was Rs. 78,42,678 against Rs. 64,99,172, an increase of Rs. 13,43,506. The revenue derived from duty and distillery fees increased by Rs. 11,59,157 and that from license-fees by Rs. 1,84,349.

24. **Convictions for drunkenness and action taken against licensees for permitting it.**— * * * * * * * * * * * * * * In Calcutta 8,609 persons were convicted of drunkenness as compared with 9,213 in the previous year, but it is impossible to say what proportions of these cases were due to country spirit, *tari* and foreign liquor, respectively. Two cases have been reported—one from each of the districts of Calcutta and Dinajpur—in which vendors of country spirit permitted drunkenness and disorderly conduct on or near the licensed premises. Both the cases were dealt with under section 65 of the Excise Act.

25. **Distilleries and Warehouses.**—There was no change in the number of contract distillers. The contract with the Bengal Distilleries Company at Konnagar, which was an annual one, expired on the 31st March 1919 and has not been renewed and Messrs. Haji Ismail Sait and Sons, Contractors of the Russa Distillery, have been granted the exclusive privilege of supply by wholesale of country spirit at the rate of Rs. 1-6 per L. P. gallon to the areas previously supplied from the distillery at Konnagar for a period of two years from the 1st April 1919. The warehouses at Tamluk, Ghatal and Uluberia were abolished during the year and in their place a new one has been opened at Kolaghat.

On several occasions the supplies from distilleries to the bonded warehouses fell short of the prescribed minimum, and in some cases the position threatened to be serious. There was, however, no actual difficulty in supplying the retail vendors and no shop had to remain closed for want of supply.

* * * * * * *

27. **Introduction of the Tree-tax System in Hooghly and Howrah.**—Since October 1918 the tree-tax system has been introduced in the Sadar and Serampore subdivisions of the Hooghly district and the whole of the Howrah district (with the exception of areas included in the Calcutta district) by Notification No. 2447 S.R., dated the 30th August 1918. The system consists of the levy of a tax on each tree tapped for the production of fermented *tari* in addition to a vend license fee for each shop which is settled by auction. The tree-tapping licenses are issued on the application of (1) licensed retail vendors, (2) of tappers and (3) of tree owners (for not more than five trees in any period of twelve months ending the 30th September) and no *tari* is drawn from any tree until the latter has been properly marked. The *tari* year begins on the 1st October, the 1st April being obviously unsuitable. falling as it does in the middle of the *tari* season, and it ends on the 30th September following. The tax has been fixed at Rs. 2 for each date and palmyra tree tapped. In the beginning the system met with considerable opposition from the retail vendors, but ultimately the opposition died out and the shops were settled without much difficulty owing to the tact of the local officers.

The total number of tree-tapping licenses issued were :

(1) Number of tapping licenses issued on application of vendors	1,057
(2) Number of tapping licenses issued to tappers on their own application	
(3) Number of tapping licenses issued to tree owners for domestic consumption	891

The total revenue from *tari* in the two districts shows a small decrease of Rs. 4,348. It is at present difficult to gauge accurately the financial results of the system, but the revenue realized during the second half of the year under report, when the system came into force, shows a considerable increase as compared with the corresponding period of the previous year, thereby indicating that the system will prove a financial success, besides introducing some control over the price of fermented *tari*. One special feature of this year's administration appears to be that not a single complaint of *tari*-drunkenness has been received from the *bhadralog* class of the rural areas against several such complaints of last and the previous years. This is due to a large extent to the introduction of the tree-tax system, under which unrestricted tapping and drinking of *tari* have been brought under control. Some improvements in the rules for the working of the system are at present under consideration.

28. **Statistics.**—The total number of licenses issued for the sale of fermented and fresh *tari* increased from 2,319 to 2,401 and the total receipts from Rs. 4,94,172 to Rs. 5,16,138.

29. **Fermented tari.**—The number of fermented *tari* licenses decreased from 630 to 628. The chief reduction was effected in Hooghly where 8 shops were abolished. The bulk of the fermented *tari* revenue is derived from the Burdwan and Presidency Divisions and the district of Malda, which contributed Rs. 4,82,573 out of a total revenue under this head of Rs. 5,10,485. This amount includes Rs. 27,569 and Rs. 18,912 as license fees and Rs. 16,491 and Rs. 22,800 on account of tree-tax for the districts of Hooghly and Howrah, respectively. License fees, including the tree-tax fees, increased by Rs. 21,597 as compared with the previous year. The increase was most marked in the 24-Parganas (Rs. 21,464), Midnapore (Rs. 5,911), Burdwan (Rs. 2,627), and Dacca (Rs. 1,272), whilst there were decreases of Rs. 3,545 in Hooghly, Rs. 2,452 in Rajshahi, Rs. 1,872 in Calcutta and Rs. 1,235 in Malda.

Pachwai.

31. **Licenses.**—The total number of licenses issued for retail sale, home brewing (annual) and manufacture on special occasions was 31,896 as compared with 34,787 in 1917-18 :—

	1917-18.	1918-19.
Retail sale	1,313	1,214
Home-brewing (annual)	33,040	30,316
Manufacture on special occasions ...	434	366

The number of retail licenses decreased in Midnapore (6), Burdwan (5), Birbhum (2) and Darjeeling (1). The decrease in Midnapore was due to the shops remaining unsettled. In Burdwan it was due to the abolition of shops in thinly populated areas where the demand is small. Elsewhere the decrease was also due to abolition. From the beginning of the year the shop system, which did not prove a success, was abolished in the district of 24-Parganas and the system of home-brewing licenses was re-introduced under Government Order No. 690S.R., dated the 8th March 1918. The shops merely covered a combination of 5 or 6 families which joined together to take out license in the name of their headman in whose house *pachwai* was manufactured, after which each family removed the outturn of *pachwai* made from the quantity of rice supplied by it. There was continued default in the payment of license-fees. Moreover, the local conditions in the Sunderbans were such that it was practically impossible to provide enough shops to suffice for the different localities which are not easily accessible. Retail shops for *pachwai* are not liked as a rule, as curiously there are sub-castes amongst the aboriginal tribes and one sub-caste will not take the *pachwai* manufactured by another. Rupee 1-8 for each household was realised from the 1st April to the 31st December 1918 and from the 1st January 1919 home-brewing licenses were issued at the rate of Rs. 2 for each household. The total number of home-brewing licenses issued in the 24-Parganas was 3,386. There

was an increase of 590 licenses in Mymensingh and a decrease of 2,538 in Dinajpur, 2,034 in Malda, 573 in Jalpaiguri, 410 in Rajshahi, 394 in Pabna, 341 in Rangpur, 261 in Dacca, 103 in Darjeeling, 38 in Tippera and 18 in Bogra.

The continuous decrease in Dinajpur was due to the migration of Santals on account of flood, drought and high prices of food stuffs. Elsewhere also the decrease was due to the bad economic condition of the aboriginal tribes.

32. **Revenue.**—The revenue from retail license fees increased from Rs. 7,91,521 to Rs 9,75,731. The increase was considerable in Burdwan (Rs. 1,73,822), Bankura (Rs. 10,819), Birbhum (Rs. 2,454) and Hooghly (Rs. 2,302) and was due to higher fees obtained at auction and in Bankura to a more accurate valuation of the shops. The large increase in Burdwan is stated to be due to bumper crops. The chief decreases occurred in Murshidabad (Rs. 2,376) and 24-Parganas (Rs. 1,979). The revenue from home-brewing licenses decreased from Rs. 52,531 to Rs. 49,763.

SECTION III.—Foreign Liquor.

34. **Clearances of foreign liquor from the Custom Houses, Calcutta and Chittagong.**—The following statistics showing clearances on payment of duty both direct and from bond from Custom Houses are quoted from statements furnished by the Collectors of Customs, Calcutta and Chittagong :—

	1917-18.		1918-19.	
	Calcutta.	Chittagong.	Calcutta.	Chittagong.
	Gallons.	Gallons.	Gallons.	Gallons.
Ale, beer and porter ...	503,851	2,129	621,272	1,099
Cider and other fermented liquors.	1,780		1,244	
Spirits and liqueurs.				
Brandy	55,687	301	50,569	32
Whisky	188,880	1,937	171,681	1,420
Other sorts of spirits and liqueurs.	268,569	1	376,097	
Wines	60,487	109	59,240	362
	575,971		659,404	

The Collector of Customs, Calcutta, explains the statistics for the Port of Calcutta in 1918-19 as follows :—

"*Ale, Beer and Porter.*—Imports of beer from the United Kingdom have again declined in volume owing to restricted brewing under the orders of the Ministry of Food; and Dutch beer has almost dropped out, doubtless for similar reasons. Arrivals from Japan have on the other hand increased by 63 per cent. in spite of advanced prices, and that country supplied two-thirds of the total imports. Good quality beers were imported from America and Australia in increased quantities.

"*Spirits.*—Supplies of *brandy* from the United Kingdom and France were more freely obtainable, the latter country sending 82 per cent. of the whole. Importers of *whisky* have been reluctant to lay in fresh stocks at the greatly enhanced prices prevailing; and in fact clearances for consumption declined by 17,000 gallons, whereas imports declined by 10,000 gallons only * * * * * * * * Imports of

gin recovered to a normal level owing to the removal of restrictions in England and to the arrival of some supplies from the United States of America. Heavy shipments of *Java rum* (commonly called arrack) were made after the settlement of the difficulties which for a time prevented Dutch shipping from visiting British ports and the total imports were 341,861 liquid gallons, of which almost exactly half was methylated with the prescribed denaturants before being cleared through the Customs.

"*Wines.*—The increase is practically confined to Spanish wines, supplies from other established markets having actually undergone a further decline, especially *port* from the United Kingdom and *vermouth* from France. Besides breaking all records in the quantity of *sherry*, *madeira* and *marsala* supplied (6,064 gallons direct in addition to 3,927 gallons from the United Kingdom and elsewhere), Spain has sent surprisingly large quantities of "substitute" *ports* and *vermouth* (1,350 gallons and 9,697 gallons, respectively); these wines were, however, decidedly inferior in quality."

The Customs Department have kindly furnished the following statistics of imports and issues on payment of duty of potable foreign spirits at the Calcutta Custom House

Years.	Imported (L. P. gallons).				Issued on payment of duty (L. P. gallons).			
	Brandy, whisky, rum and gin.	Java arrack.	White and rectified spirits.	Total.	Brandy, whisky, rum and gin.	Java arrack.	White and rectified spirits.	Total.
1916-17	283,646	57,896	3,764	345,306	230,779	40,338	2,684	273,801
1917-18	275,983	9,454	...	285,437	246,949	10,408	151	257,508
1918-19	384,376	138,833	...	523,209	251,391	3,484	210	255,085

Wines and Spirits (other than Medicated Wines and Commercial Spirits) and Beer.

36. **Licenses and Revenue.**—The total number of licenses issued for wholesale and retail vend was 602 against 569 in the previous year. There were decreases under heads "off" (3), hotel (2), restaurant (1), late-closing (11), steamer (1) and dâk bungalow (1); and increases under heads wholesale (5), bar (1), temporary bar (42), canteen (3) and railway refreshment room (1). The increase in wholesale licenses occurred in Calcutta and that in temporary bar licenses in Burdwan, Calcutta and Darjeeling. No late-closing license was issued in Calcutta during the year under report.

The total receipts from license fees amounted to Rs. 2,95,665 against Rs. 2,98,725 in the preceding year. The decrease was due to decreased consumption of foreign liquor, which affected the settlement of the foreign liquor shops. The receipts from duty on potable foreign liquor manufactured in India were Rs. 7,97,000 against Rs. 5,97,053 in the preceding year. The increase was due to the fact that the high price of the foreign liquor imported from outside caused a decrease in its consumption and a consequent increase in the consumption of the Indian-made foreign liquor which paid duty under head "Excise." The question of labelling of bottles containing local blends of whisky, etc., came under examination and orders were passed to the effect that all labels should conform strictly to the provisions contained in the Merchandise Marks Manual. For the first time in Bengal, a Firm took out a license for the manufacture of wine from raisins and for the distillation of spirit from the lees thereof. A quantity of 1,027·8 gallons of wines thus made was issued on payment of duty.

37. **Rum manufactured in India.**—The following quantities of rum manufactured in India were issued during the year from distilleries and excise warehouses in Bengal :—

Place of manufacture.		On payment of duty.	Duty free.
		L. P. gallons.	L. P. gallons.
Konnagar	...	245	...
Russa	...	18,840	...
Asansol	...	24247	...
Shahjehanpur	...	13,985	468
Anwarganj	...	1,445	...

The above figures include 50 proof gallons of Asansol rum and 300 proof gallons of Shahjehanpur rum issued at a reduced rate of duty of Rs. 7 and Rs. 5, respectively, per proof gallon, to the Lakhimpur Battalion. Duty-free issues were made to the Mayo, Campbell and Medical College Hospitals, Calcutta, to the Central Lunatic Asylum, Berhampore, and to the Political Officer, North-Eastern Frontier. The issues of rum increased by nearly 36 per cent. as compared with the preceding year.

In addition to the issues of rum, 2,405 proof gallons of plain spirits manufactured by the Russa Distillery, 4,556 proof gallons manufactured by the Asansol Distillery and 4,110 proof gallons manufactured by Dr. K. C. Bose's Distillery at Bahir Mirzapore Road, Calcutta, were issued to holders of compounding licenses who manufactured local blends of brandy, whisky and rum. A quantity of 1,027 gallons of brandy and whisky received in bond from Anwarganj was issued from the Calcutta Excise warehouse and 3,330 gallons of brandy and whisky were issued from the Russa Distillery.

38. **Sale of spirits at strengths below the prescribed minimum.**—No case of this nature came to notice during the year under report.

39. **Locally manufactured beer.**—The number of breweries licensed was two as in the previous year, but only the brewery at Senada manufactured beer during the year. The brewery at St. Mary's Seminary at Kurseong, which used to brew beer for the inmates of the Seminary, was not worked, though a license was taken by the Curator of the Seminary.

Duty was charged on 65,670 gallons against 59,123 gallons in the preceding year. The continued increase was due to the higher price of the imported article. Receipts from license fees and duty amounted to Rs. 18,634 against Rs. 16,793 in the previous year.

Medicated Wines and Rectified Spirits.

40. **Licenses and Revenue.**—The number of licenses for the retail sale of medicated wines and rectified spirits was 124 and 26, respectively, as compared with 117 and 24 in 1917-18. The revenue from license fees was Rs. 7,700 against Rs. 7,000 in the previous year.

41. **Manufacture and issue of rectified spirits.**—Rectified spirits were manufactured in the distilleries at Asansol, Konnagar, Russa and Bahir-Mirzapore Road, Calcutta.

The following quantities of rectified spirits were issued during the year for medicinal, industrial and scientific purposes from distilleries and excise warehouses in Bengal :—

Place of manufacture.		On payment of duty.	Duty free.	For manufacture of tinctures and absolute alcohol in bonded laboratories.
		L. P. gallons.	L. P. gallons.	L. P. gallons.
Asansol ...	...	6,699	28,101	17,025
Konnagar ...	...	2,368	16	1,409
Russa ...	...	2,405	2,273	6,503
Anwarganj ...	...	285	....	...
Bahir-Mirzapore Road ...		5,122		4,750

Asansol spirit was issued duty-free to the Rifle Factory, Ishapore, the Gun and Shell Factory, Cossipore, the Ammunition Factory, Dum-Dum, the Ordnance Department, Fort William, the Medical Store-keeper to Government, Calcutta, the Zoological Survey of India, the Botanical Survey of India, the Chemical Examiner for Customs and Excise, Calcutta, and the Mathematical Instrument Office, Calcutta; Konnagar spirit to the Agricultural Chemist, Pusa; and Russa spirit to the Munitions Board and the Fibre Expert, Dacca. Duty-free issues were also made through Messrs. Smith Stanistreet & Co., Messrs. B. K. Paul & Co. and Dr. K. C. Bose from the warehouses attached to their bonded laboratories, to charitable dispensaries in Bengal, Bihar and Orissa and Assam.

42. **Manufacture of tinctures, etc., in bonded laboratories.**—Four bonded laboratories manufactured tinctures, etc., during the year under report, as in the previous year. Duty was paid on 12,632 proof gallons of spirit contained in tinctures and medicinal preparations issued from these laboratories, whilst medicinal preparations containing 7,162 proof gallons of spirits were issued duty free to charitable dispensaries in the various provinces.

* * * * * * *

SECTION IV.—Hemp Drugs.

Ganja.

48. **Retail Licenses.**—The total number of licenses issued in the Presidency for the retail sale of *ganja* was 1,265 as compared with 1,267 in 1917-18.

* * * * * * *

49. **Consumption of ganja.**—The total quantity of *ganja* consumed in the Presidency amounted to 1,975 maunds 38 seers as compared with 1,908 maunds 20 seers in 1917-18, an increase of 67 maunds 18 seers. Consumption increased in 16 districts including all the districts (except the 24-Parganas) of the Presidency and Chittagong Divisions and decreased in eleven. The increase exceeded 10 per cent. in Tippera (18¾ maunds or 29·21), Murshidabad (7½ maunds or 24·83), Nadia (8 maunds or 22·76), Calcutta (45½ maunds or 18·68), Chittagong (4½ maunds or 11·99); it exceeded 3 maunds in Dacca (5 maunds 13 seers), Midnapore (4 maunds 28 seers) and Bakarganj (3 maunds 4 seers). The increase is generally due to the fall in the retail price in consequence of the wholesale price having been fixed at Rs. 3 per seer in the Presidency. The increase in Calcutta merely represents a recovery from the drop in the previous year, which was due to the retail prices having been fixed at a much higher rate than in former years, and shews that consumers have adjusted themselves to the higher price. The Collector of Tippera reports that marked fluctuation in the sales occurred in a few shops in the Brahmanberia subdivision, which was due to the reduction in the cost price of *ganja* and also to the check imposed against the introduction of the drug from Sylhet and Hill Tippera by the special Railway Excise Staff and by a special preventive party located on the border.

The decrease exceeded 10 per cent. only in Dinajpur (14¾ maunds or 18·48) and it exceeded 3 maunds in Burdwan (5 maunds 1 seer), and Rangpur (5 maunds 36 seers). The fall in consumption in Burdwan was mainly due to a considerable increase in the retail price following on the increased fees obtained at the settlement and that in Dinajpur and Rangpur to the continuance of unfavourable economic conditions.

50. **Total Revenue.**—The total receipts for the year amounted to Rs. 34,79,285 against Rs. 34,18,874 in 1917-18, the net increase being Rs. 60,411.

51. **Incidence of Taxation.**—The incidence of license fees per seer of *ganja* consumed was Rs. 23·3 and that of duty Rs. 20. The total taxation was Rs. 43·3 per seer as in the previous year.

* * * * * * *

54. **Cultivation and outturn of Ganja at Naugaon in Rajshahi.**—The price of the 1918 crop was fixed at Rs. 300 per maund until the 31st March 1918, and it was reduced to Rs. 135 from the 1st April for the wholesale dealers of other Provinces and Rs. 120 for the retail vendors in Bengal. The fact that all the *ganja* produced would be purchased and paid for in April, and the prospect of a further bonus in December, drew a larger number of applications than even in the preceding year, when, as stated in last year's report, the number went up considerably owing to the smallness of the 1917 crop and consequent high prices. This illustrates the popularity of the new system under which the *Ganja* Cultivators' Co-operative Society has been established. Three thousand nine-hundred and ninety-six applications were received for an area of 7,223 bighas against 3,444 applications for an area of 5,541 bighas in the previous year. Two thousand four hundred and thirty-five licenses covering an area of 2,999 bighas 14 cottahs and 9 chataks were granted as compared with 3,008 licenses covering an area of 3,099 bighas 17 cottahs and 2 chataks in 1917-18. The area actually cultivated with *ganja* was 3,047 bighas 6 cottahs and 5 chataks against 3,082 bighas 9 cottahs and 10 chataks in the preceding year. The area under cultivation was sufficiently tested and as a result a very large number of cases of excess cultivation was detected. The prospects of the crop were not favourable from the beginning. There was an unprecedented flood at the end of August which swept over the whole of the *ganja* mahal and destroyed *ganja* seedlings and in consequence a low outturn was apprehended. A further area of 250 bighas was sanctioned for cultivation. The cultivators took utmost care to make good the loss. Fresh nurseries were prepared as soon as the flood receded. The crop of many plots was considerably damaged by caterpillar. Red spider pest also damaged the crop to some extent. The outturn, however, eventually proved to be better than what had been anticipated, being 2 maunds 11 seers and 11 chataks per bigha. This shows that under the new system the cultivators will take much more trouble, as they are assured of the sale of the whole crop and cannot, on the other hand, speculate on high prices by the smallness of the outturn. The total quantity of *ganja* stored in the public golas amounted to 6,988 maunds 6 seers 2 chataks as compared with 8,132 maunds 24 seers and 14 chataks in the preceding season.

55. **Manufacture and Storage.**-

The cost of cultivation and manufacture is reported to have been Rs. 47 per maund as compared with Rs. 43 in 1917-18. The prolonged drought which necessitated the irrigation of *ganja* lands for about four times against two in normal years and also the additional expense of retransplantation caused by the flood rendered the cost of production higher than in the previous year.

57. **Receipts, Issues and Balances at the Public Golas, and Wholesale Prices at Naugaon.**— * * * * * *

* * The total exports from Naugaon during the year amounted to 5,665 maunds 10 seers 2 chataks against 5,140 maunds 2 chataks in the preceding year.

Bhang.

59. **Licenses and Revenue.**—The number of retail licenses in the year under report was 239 against 220 in 1917-18. Three shops were opened in each of the districts of Bankura, Dacca, Jalpaiguri and Rangpur, two in each of the districts of Jessore, Khulna and Pabna, one each in Birbhum, Midnapore and Faridpur, all with the approval of the Advisory Committees to meet ascertained local demand. Two shops were abolished in Burdwan—one at Sadar and the other at Asansol,—one in each place being quite sufficient to meet the requirements. The total number of druggists' permits issued was 297 as compared with 261 in the preceding year. There were noticeable increases in the Presidency (20), Dacca (13) and Chittagong (5) Divisions. The total revenue from license fees and duty amounted to Rs. 1,43,476 as compared with Rs. 1,24,496 in 1917-18.

60. **Consumption.**—The total consumption within the Presidency amounted to 641 maunds 18 seers against 605 maunds 4 seers in the previous year. The increase exceeded 5 maunds in Calcutta (21 maunds) and Hooghly (6 maunds). The increase in both the districts was due to better management of shops under the fixed fee system. The decrease in consumption again exceeded 5 maunds in two districts—Burdwan and 24-Parganas (7½ maunds each). In the former district, the retail prices were higher than in the preceding year, while in the latter, the special causes which led to a considerable increase in 1917-18 no longer existed in the year under report.

Three maunds of duty-paid *bhang* were exported from Hooghly to French Chandernagore. Calcutta supplied 30 seers of the drug to Sylhet, duty having been paid there. There were some difficulties about the supply of *bhang* to district warehouses from Naugoan, as the Naugoan *Ganja* Cultivators' Co-operative Society could not get sufficient stock from Bhagalpore in time, owing to difficulty in the booking of *bhang* parcels by the railway.

Charas.

61. **Licenses and Revenue.**—Thirty retail licenses were in force during the year, as in 1917-18. Three wholesale licenses were current against four in the previous year. The wholesale dealer of 24-Parganas surrendered his license during the year under report. The total receipts amounted to Rs. 69,715 as compared with Rs. 52,668 in 1917-18, an increase of Rs. 17,047. The revenue from license fees increased by Rs. 9,050 and that from duty by Rs. 7,997.

62. **Imports and Consumption.**—The total quantity of *charas* imported into Bengal was 26 maunds 2 seers against 20 maunds in the preceding year. The wholesale dealers imported the drug direct from the Punjab and supplied the retail vendors throughout the Presidency.

The total issues to retail shops in Bengal amounted to 21 maunds 1 seer as compared with 19 maunds 34* seers in 1917-18. There was a noticeable increase of 4 maunds 19 seers in Calcutta which is reported to have been due to better management of shops under the fixed fee system. Nineteen seers of *charas* were exported to Bihar and Orissa and one seer to French Chandernagore.

SECTION V.—Opium.

63. **Restricted supply of opium.**—The system under which the issue of Excise opium to retail shops is restricted to the estimated local demand continued in Midnapore, Hooghly, Howrah, the 24-Parganas, Calcutta, Khulna, Bakarganj, Chittagong, Noakhali, Tippera and Jalpaiguri and in a few shops in Burdwan, Nadia, Jessore and Darjeeling. It was extended to the whole of the Faridpur district, to the opium shop at Bhairab in Mymensingh, to eight shops in Murshidabad and to four shops in Rajshahi with effect from September 1918. It was withdrawn from Dinajpur as the consumption of opium had fallen considerably and the shops were not suspected to deal illicitly, and also from Malda.

64. **Licenses for retail sale.**—The total number of licenses issued for the retail sale of Excise opium was 820 as compared with 819 in 1917-18. Two shops were abolished in Burdwan and one in Mymensingh as being superfluous, and one in the district of Calcutta which fell within the educational area, under the orders of the Licensing Board. The number of shops increased by two in Bankura and by one in each of the districts of the 24-Parganas, Dacca and Bakarganj. All the new shops were found necessary to meet the local demand which could not be met by the other nearest shops and this measure had the approval of the Advisory Committees concerned.

* Revised figures.

65. **Permits and Licenses under the Opium and Morphia Rules.**—The number of permits and licenses was 747, as compared with 400 in 1917-18. The number includes 32 licenses to manufacturing chemists, 276 to dispensing chemists, 72 licenses to kabirajes and hakims and 23 permits to permit holders (total 403 for intoxicating drugs) and 35 licenses to dealers, 249 to chemists, 19 to persons approved under rules 21(1) and 21(2) of the Morphia Rules and 41 to persons authorised under rule 22 of the same rules (total 344 for morphia drugs). Only one license was issued for the sale of poppy heads, as in the preceding year.

66. **Consumption.**—The total quantity of Excise opium consumed within the Presidency was 1,027 maunds 16 seers as compared with 1,074 maunds 12 seers in the previous year, a decrease of 46 maunds 36 seers.

Consumption decreased in 23 districts and increased in 4. The increase was fairly large in Murshidabad (74 seers or 6·4 per cent.) and in Dacca (69 seers or 6·6 per cent.). In the former district, there was some suspicion of smuggling from the shops, but no action could be taken in the absence of definite proof. No special reason has been ascribed for the increase in Dacca. The largest proportionate decreases occurred in Rajshahi (141 seers or 23·2 per cent.), Bogra (78 seers or 21·7 per cent.) and Rangpur (252 seers or 20·9 per cent.), all in the same Division. The decrease in Rajshahi and Bogra is due to the higher selling price of the drug following on the enhanced treasury price, and also to the bad economic condition of the people after the abnormal floods. In Rangpur it is stated that, besides the above reasons, a more effective control over some suspected shops led to the decrease. The decreases exceeded 10 per cent. in Faridpur (104 seers or 19·3 per cent.), Dinajpur (112 seers or 14·2 per cent.), Bakarganj (127 seers or 13·3 per cent.), Jalpaiguri (48 seers or 12·5 per cent.), Birbhum (109 seers or 11·8 per cent.), and Chittagong (98 seers or 10·7 per cent.), and by more than 100 seers in Burdwan (254 seers) and Calcutta (211 seers). The enhancement of the treasury price brought about an increase in the retail prices in almost all the districts, which had the effect of reducing consumption generally. In Calcutta, the retail sale was restricted to one-fourth of a tola from the 1st April 1918, except to *bonâ fide* consumers, with a view to preventing collection of opium from different shops on behalf of the Chinese smugglers, and this measure was to a certain extent responsible for the decreased consumption.

67. **Total receipts.**—The total receipts amounted to Rs. 31,37,329 as compared with Rs. 29,44 947 in 1917-18, an increase of Rs. 1,92,382 or 6·5 per cent., which occurred mostly under the head of duty.

68. **Madak and Chandu.**—The habit of opium smoking exists in most districts, but is usually confined to the towns. It prevails to a comparatively greater extent in Burdwan, Birbhum, Bankura, Midnapore, Hooghly, Murshidabad and Malda. As reported previously, it is very common in the south-western part of the Midnapore district adjoining Balasore and Mayurbhanj. The Collector of Malda states that the rules which allow smoking in company afford a loop-hole to the den keepers to carry on their illicit trade, and that *madak* cases are difficult to detect owing to want of reliable purchasers who can also be trusted by the den-keepers. The opium smoking habit is, however, on the wane in Nadia and the *chandu* dens which previously existed in the town of Dacca have almost disappeared.

69. **Morphia and opium pills.**—The use of morphia as a substitute for opium was in vogue to some extent in Hooghly but the habit did not appear to be spreading.

No sale of opium pills was brought to light during the year. It is reported that a kabiraj in the jurisdiction of Kedgree police-station, in Midnapore, was curing people of the opium habit by administering some drug which is supposed to be an admixture of opium. In spite of every effort no sample could be secured, as he administered it personally. He subsequently went away to the Sunderbans and his whereabouts are being traced.

SECTION VI.—Cocaine.

* * * * * * *

72. **Licenses and Revenue.**—Two hundred and fifty-two licenses were issued during the year to chemists and druggists for the sale of cocaine, as compared with 227 in 1917-18. Forty-two permits for the possession of cocaine were issued free to managers of hospitals or dispensaries not under Government supervision, viz., twenty licenses for tea gardens in Jalpaiguri, five for charitable dispensaries in Midnapore, four in the 24-Parganas, three in each of the districts of Nadia and Tippera, two in Murshidabad and one each in Burdwan, Calcutta, Khulna, Faridpur and Noakhali. Eighteen permits were issued to qualified medical practitioners and dentists in Calcutta, twelve in Burdwan, three in Chittagong, two in each of the districts of the 24-Parganas and Faridpur and one in Howrah for possession and use of the drug in the course of their practice. The total revenue from license fees amounted to Rs. 267 during the year as compared with Rs. 231 in 1917-18.

73. **Preventive operations and illicit transactions.**—The illicit trade in cocaine seems to have declined to some extent for want of supplies from Germany and Austria, though, as noted in the last year's report, cocaine of Japanese origin has appeared in the market, and there are indications to show that opium is exchanged for cocaine by smugglers. The abuse of cocaine continues in the Calcutta district and in the neighbouring parts of the 24-Parganas district, in the town of Burdwan and in the Serampore subdivision of the Hooghly district. The Collector of Dacca reports that the habit of taking cocaine which was prevalent among some low-class Mahomedans and women in Dacca has greatly decreased. The number of persons convicted of illicit possession, sale or smuggling of cocaine fell from 191 to 183. In Calcutta the number was 161 as compared with 162 in 1917-18. No case deserving of special mention in this chapter was brought to light in the year under review ; this was no doubt due to the scarcity of the drug.

The total quantity of cocaine seized in Bengal during the year was 23 lbs. and ½ ounce, as compared with 39 lbs. 7 ounces 388 grains in 1917-18. Only 24 ounces 341 grains were seized outside the Calcutta district and of this quantity more than 24 ounces were seized in Burdwan. In Calcutta 136 ounces were seized by Excise Officers, 201 ounces by Customs officers and 7½ ounces by Police officers.

* * * * * * *

SECTION VII—Offences against the Excise and Opium Laws.

* * * * * * *

75. **Prosecutions and convictions.**— * * * *

The total number of persons arrested during the year was 6,637 as compared with 6,353 in the previous year. Of these 5,965 were convicted during the year against 5,691 in 1917-18. The number of arrests increased in 16 districts out of 27 and was due to the progressively improved working of the re-organized department ; it was also partly due to the working of the Special Preventive staff. The increase was most marked in the 24-Parganas (186), Burdwan (132), Howrah (83), Dinajpur (78), Murshidabad (67), Hooghly (66), Midnapore (61) and Faridpur (50). The decrease was largest in Bankura (162), Birbhum (134), Jalpaiguri (114), Nadia (101) and Chittagong (82). The decrease in Bankura is said to be due to the fact that the partial failure of the *mahua* crop and the high price of rice reduced the illicit manufacture of country spirit and *pachwai*, respectively. In Birbhum it is said that the deterrent punishments in the previous year had some effect, but it is doubtful how far this is a complete explanation. The decrease in Jalpaiguri has been explained elsewhere. In the other two districts no sufficient explanation has been given.

78. **Classification of offences.**—Five hundred and forty persons were arrested for illicit distillation and 116 for possession and sale of illicit country spirit as compared with 793 and 182, respectively, in the preceding year. The chief increases under these two heads taken together occurred in the 24-Parganas (43), Calcutta (1[illegible]) and Mymensingh (12), and the chief decreases in Midnapore (207), Bankura (68), Burdwan (22), Chittagong (20) and Hooghly (15). In a case in the 24-Parganas, the offender used to distil country spirit for sale as the kabiraji medicine *Mrita Sanjibani Sudha* or *Sura*. Another person was similarly prosecuted and convicted in Pabna for illicit possession and sale of distilled *Sanjibani Sudha*. The detection of some important cases of illicit distillation in 1917-18 in the suburbs of Calcutta and in the industrial areas in the Serampore subdivision of the Hooghly district and the Barrackpore subdivision of the 24-Parganas district, had a deterrent effect in these areas during the year under report. A case of illicit distillation was sent up wrongly by the President-Panchayat of a Chowkidari Union in Khulna district without consulting the Excise or Police authorities, and ended in acquittal; in consequence, an order has been passed to the effect that he will not be re-appointed as President-Panchayat on the next occasion. In the same district a case of abstraction of O. P. spirit from a cask lying in the railway godown was detected and two persons in railway employ were prosecuted.

In the Mymensingh district several batches of illicit distillation cases were sent up, the offenders belonging to the hill tribes. The implements used were of a primitive nature; the liquor was manufactured not only for domestic consumption but also for sale. Illicit distillation as well as possession and sale of illicit country spirit continued to be as prevalent as ever in the Bakarganj district. The offenders are chiefly low-class Hindus, who are supported by local petty *talukdars* having a pecuniary interest in the illicit traffic. It is difficult to suppress this form of crime without co-operation from the public. In the Sunderbans area of that district the Mughs generally distil liquor from the juice of *gol* trees which are very common there. Informers are not available, as there is great combination amongst the Mughs. The Collector reports that they are a desperate class of people, and go about armed with a sharp edged weapon called a *seni*. Some special preventive measures appear to be necessary to put down illicit distillation in this district, and this matter will receive my attention when I go there. In the Jalpaiguri district almost all the cases were detected in the tea gardens, the offenders being Paharias and Bhutias. Similarly, in Darjeeling, the offenders belonged to the Kami class (blacksmiths) and were coolies in the tea gardens.

The large decrease in this form of crime in the Midnapore district was due to the partial failure of the *mahua* crop, as has already been explained in the case of Bankura district. The number of persons arrested for unlicensed sale of duty-paid country spirit increased from 120 to 181; the greater part of the increase occurred in Calcutta, where 141 persons were sent up against 100 in the preceding year. The accused in most of the cases were prostitutes. The number of persons arrested for illicit possession of duty-paid country spirit increased by 14; there was a decrease in the previous year which has been made up to some extent.

Prosecutions under the head "Illicit import, export or transport of country liquor" fell from 214 to 163. The decrease in Jalpaiguri (70) was very large and was due to the removal of the Bhutan outstills away from the common boundary.

There were 22 arrests for illicit sale of foreign liquor as compared with 34 in 1917-18. In Chittagong two dealers in miscellaneous articles were convicted for sale without license of *Manola*, a medicated wine. In Pabna a registered medical practitioner was convicted for illicit sale of rectified spirit from his dispensary; taking advantage of his position he used to sell it to people for consumption, after dilution, in lieu of country spirit.

In a fair in the district of Bogra, a stall-keeper was found selling some bottles of "Wine vinegar" which was suspected to have intoxicating properties. A bottle was sent to the Chemical Examiner for analysis and he found that the sample had an alcoholic strength of 27·9 per cent. proof (72·1 U. P.).

The accused was sent up for trial, but the defence was that he had bought the bottles as "Wine vinegar" and sold them in the same condition. He was acquitted as the trying Magistrate held that "a man should not be punished for sale of articles containing alcohol which he innocently purchased as vinegar and sold it as such." It is necessary for the Excise officers to be on the look out for these so-called bottles of "Wine vinegar" and tackle the original manufacturer.

The number of arrests in *tari* cases increased by 382. The chief increases occurred in the 24-Parganas (260), Murshidabad (50), Hooghly (26), Burdwan (21) and Howrah (15). These offences are very common and the increase in the arrests has no special significance.

The arrests under the head "Illicit manufacture, possession or sale of *pachwai*" increased by 35. The largest increases were 250 in Midnapore and 96 in Burdwan, whilst there were considerable decreases in Birbhum (99), Bankura (83), the 24-Parganas (78), Calcutta (45) and Darjeeling (30). The increase in Midnapore is ascribed to the activity shown by the District Preventive staff.

Seven persons were arrested for illicit cultivation of poppy against four in the preceding year. A respectable person of Salboni in the Midnapore district was prosecuted and convicted for cultivating a poppy plant from which opium was extracted.

Taking the figures under the two heads "Illicit Opium" and "Treasury Opium" together, the number of arrests increased from 483 to 629, or by 146 persons. The arrests increased by 98 in Calcutta. 40 in Midnapore, 24 in Hooghly and 22 in Howrah, whilst there were marked decrease in Chittagong (30) and Jalpaiguri (12). The total quantity of opium seized in Bengal amounted to 72 maunds 21 seers of which 51 maunds were seized in Calcutta alone. Twenty maunds 39 seers were seized by the Special staff at different railway stations. The Customs Officers made 92 seizures amounting in all to 17 maunds 21 seers. Twenty-nine maunds and thirty-five seers were seized by the Excise Officers in Calcutta as compared with 37 maunds 10 seers in the preceding year, 1 maund 26 seers, 1 maund 5 seers and 32 seers were seized by the Calcutta Police, Howrah Railway Police and Sealdah Railway Police, respectively. Some very important arrests were made, especially by the Calcutta staff, but as details have already been given in the Excise Supplement to the *Criminal Intelligence Gazette*, it is unnecessary to reproduce them here. Mention may, however, be made of one or two cases which are of special interest and new in the history of opium smuggling. They will show how the smugglers in Calcutta are now trying to get their stuff by rail to Calcutta with the help of European and Eurasian carriers. One F. W. Sharpe was arrested with a maund of opium at the Howrah railway station when getting into a taxi from a train. The Excise Sub-Inspector, who detected the case, displayed much detective ability, patience and tact in arresting the offender. The accused was armed with a 7-chambered revolver, fully loaded and the Sub-Inspector and other arresting officers ran great personal risk. Mr. H. Rance, the Deputy Superintendent at the railway station, rendered this Department very valuable help in this case. The accused was sentenced to undergo six months' rigorous imprisonment with a fine of Rs. 300, in default a further period of rigorous imprisonment for 3 months. In another case one G. Fitzgerald was arrested with 20 seers of opium at the Chandernagar railway station. He was living in one of the principal hotels in French Chandernagar, carrying on this business for some time. He was sentenced to four months' rigorous imprisonment. A third case of very great importance deserves to be mentioned here. The Superintendent of Excise, Preventive Branch, Calcutta, with two of his Inspectors, went to Motihari in the Province of Bihar and Orissa and under the Collector's orders arrested one Lalu Pandit, a Nepali subject, and his confederate, Ali Reza, while they were trying to sell one maund of opium to one of the Inspectors of Excise, who had posed as a bogus *mahajan*. Lalu Pandit is a notorious opium smuggler living just on the borders of Nepal, who used to send Nepal opium in large quantities to the smugglers in Calcutta, Bombay and the United Provinces. It was reported that this case

was his 14th transaction of its kind. Both the accused were sentenced to undergo rigorous imprisonment for one year and to a fine of Rs. 200, in default 6 months' further rigorous imprisonment. The Sessions Judge of Muzaffarpur, however, reduced the sentence to three months' rigorous imprisonment each. The Calcutta smugglers, finding that great vigilance is being kept at Howrah and other terminal stations, now bring their opium in parcels booked to some way-side station below Burdwan and thence by taxi to Calcutta or they get it by boat by the Bhagirathi or Hooghly river. Some women have also been arrested while carrying opium for the smugglers, and it is believed that they will be employed in larger numbers in future. Several ingenious methods of bringing opium were discovered last year, *e.g.*, opium in eggs-shells, opium in figs, opium in clubs, opium in legs of *charpoys*, etc.

One special feature of the year in connection with the seizure of opium in railway parcels by the Calcutta and the special staffs was that while in previous year no trace of the culprits could be found in the majority of the cases, the consignees or their agents were arrested in most of the cases and successfully prosecuted in the year under report.

Two hundred and thirty-two persons were arrested for illicit possession or sale of *madak* and *chandu* against 259 in 1917-18.

The arrests for illicit cultivation or collection of *ganja* or *bhang* increased by 33, of which Bakarganj alone was responsible for 23. In Dacca, specially in the Manikganj subdivision, there is much spontaneous growth of *bhang* and it is not possible to exterminate it. It was suspected that people sometimes used this wild *bhang* secretly as an intoxicant. Two hundred and seventy-five persons were arrested for unlicensed sale of hemp drugs against 278 in 1917-18. There was no marked fluctuation in any district except Calcutta, which showed a decrease of 33 persons. There were 261 arrests under the head, "Illicit possession of *ganja*," against 228 in the preceding year. The increases were 19 in Hooghly and 15 in Rajshahi, while Chittagong showed a decrease of 17 persons. There were 13 prosecutions under the head "Illicit possession of *charas*" against *nil* in the previous year. The arrests chiefly occurred in Calcutta (8) and Burdwan (3). The arrests for unlawful import, export and transport of hemp drugs fell from 155 to 146 or by 9 persons. The decreases chiefly occurred in Jalpaiguri (34), Birbhum (19) and Midnapore (16), whilst Dinajpur showed an increase of 35. The arrests under the head "Illicit sale or possession of Cocaine" decreased by 5 persons. The most important case and very interesting from its nature was the one detected by the Calcutta Excise staff in which a bench clerk of the Presidency Magistrate's Court was sent up for selling cocaine which had formed the subject matter of trial in previous cases and which had remained in the custody of the Court after the disposal of the cases before being made over to the Collector of Excise. On receipt of definite information that the accused was in the habit of disposing of cocaine and opium in this way the Excise staff went to the court premises and found the accused ready to deliver cocaine to a purchaser. He was sentenced to 4 months' rigorous imprisonment and a fine of Rs. 500.

* * * * * * *

DEPARTMENT OF AGRICULTURE, BENGAL.

First Forecast of the winter rice crop of Bengal for 1919-20.

(Note.—On an average of the 5 years ending 1917-18 the area under winter rice in Bengal represents some 19·1 per cent of the total area under rice in British India.)

Two crops, agriculturally distinct, are returned in the Winter Rice Forecasts, one the broadcasted deep water rice found mostly in Eastern Bengal and sown from the beginning of March onwards, the other and more important crop being transplanted from seed-beds in July and August. Early rainfall (but not floods) suits the sowing of the broadcast crop and of seed-beds for the transplanted varieties. Good general rainfall in July and August permits of a large area of the transplanted crop being planted, while plentiful showers in October secure a full crop in those districts where the soil is, on account of its high situation or of its comparative porosity, not ideally suitable for paddy cultivation. Both crops are harvested about the same time, the main crop being generally cut in December.

Character of the season.—The weather was, on account of drought, unfavourable for the sowing of low land broadcast *aman* rice in February and March. In consequence a good deal of the low land crop was sown late, on showers in the beginning of April. This portion of the crop was considerably benefited by the comparatively scanty rain and slow rise of the rivers in May and June, and its condition may now be said to be good.

Regarding transplanted *aman*, in the Burdwan Division the season has so far been uniformly favourable for the crop, which promises very well in consequence. In the Presidency Division conditions were not quite so good. In North and East Bengal the short rainfall in July and August retarded transplanting very considerably. Late in August, however, and also in September, there has been good rainfall throughout North and East Bengal, with the result that the area now under transplanted rice probably approaches the normal.

The cyclone which passed over East Bengal on September 24th, 1919, did comparatively little damage to the rice crop, excepting in the case of deep water paddy growing in water where a strong current was running. In these circumstances portions of the crop were uprooted and carried away, but the loss is not serious. The heavy rain which accompanied the cyclone has done great good to the transplanted paddy.

Acreage.—According to the figures returned by district officers the total area under the winter rice crop is 15,379,400 acres, as compared with 15,945,800 and 15,895,800 in the corresponding and final forecasts last year. The decrease is to be attributed chiefly to the want of timely rainfall. It is necessary to remark, however, that, in several districts, transplanting extended considerably beyond the date on which the returns were sent in. Some district officers have already, on this account, increased their estimates, and others may find it necessary to do so.

Outturn.—From the summary of the district returns appended it will be seen that Bankura anticipates 158 per cent outturn, a super-abundant crop; while Rangpur reports 62 per cent, the lowest outturn. Four districts expect a normal crop; fourteen districts from 93 to 80 per cent; and the rest return between 79 and 66 per cent of the normal.

On the basis of the above figures the provincial crop expectations are 89 per cent of the normal, against 90 and 72 per cent in the corresponding and final forecasts of the last year.

ROBERT S. FINLOW,
Offg. Director of Agriculture, Bengal.

DACCA,
The 13th October 1919.

APPENDIX I.

First Forecast of the Winter Rice Crop of Bengal, 1919-20.

DISTRICT.	Estimated normal area under winter rice.	Estimated area under winter rice.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the sowing of broadcasted winter rice commenced this year, and whether that date was early, normal or late.	Date by which the transplanting of winter rice commenced this year, and whether that date was early, normal or late.	Remarks by District Officers.
		Last year (1918-19).	This year (1919-20).	Last year.	This year.			
	Acres.*	Acres.	Acres.					
24-Parganas ...	1,041,500	893,200	825,100	83	92	May; normal	July; normal	The decrease in area is due to want of rain in due time in some parts and excessive rain in other parts of the district. In Diamond Harbour subdivision weather has not been favourable and paddy in low lands was submerged. In Basirhat subdivision weather was favourable at the sowing time but proved unfavourable later on owing to incessant rainfall, and in both these subdivisions a little damage has been done to the crop owing to excessive rain and the outturn is expected to fall below the normal. The increase in the revised normal area under winter rice is due to the fact that considerable tracts in the Sundarbans have been brought under cultivation.
Nadia	136,800	125,600	130,100	58	83	April; normal	July; normal	The increase in area is due to favourable weather at the sowing time. Some damage was done by flood in certain quarters. The yield will probably be below normal on account of want of timely rainfall.
Murshidabad	345,600	326,300	308,700	58	83	June to July; normal but late in Kandi.	End of July; generally late.	The decrease in area is due to want of rain at the beginning which retarded the progress of transplantation, but the condition has improved now.
Jessore ...	568,100	462,500	465,500	67	80	April; normal	July; normal	The decrease in area is due to unfavourable weather at the sowing time. Drought in June and July has considerably damaged the broadcast crop. The weather at present is favourable. The outturn is expected to fall below the normal owing to flood in the Narail and Magura subdivisions as well as the want of rainfall in June and July.
Khulna ...	*828,200	734,100	703,900	85	92	Middle of June normal.	Middle of July; normal.	The decrease in area is due to untimely heavy rainfall and inundation of salt water. Some damage has been done to seedlings owing to heavy rain and rising of the river.
Burdwan ...	874,800	700,000	736,000	66	92	End of May to middle of June; late in places.	Middle of June to August; generally late.	The increase of area sown is due to timely rainfall in Asansol and in some parts of the Sadar subdivision. The weather has been favourable. The features of this year are, generally, somewhat insufficient rain for transplantation in June and July, and abundant rain in August and up to September 5th. The rainfall was unevenly distributed and consequently transplantation greatly delayed in some areas. All depends on the rainfall of the next 6 weeks, but the prospects on September 5th are of a normal crop for the whole district
Birbhum ...	604,600	601,500	601,500	67	92	May; normal	June; normal	The weather has been fair.
Bankura ...	510,600	520,000	525,000	62·5	158	Middle of June; normal.	Middle of July; normal.	Sufficient rainfall and reclamation of new lands caused the increase in area. The weather has all along been favourable and rainfall sufficient. A super-bumper crop is expected.
Midnapore ...	*1,537,100	1,648,000	1,493,800	60	100	May; normal	August; late	The decrease in area is due to shortage of seedlings and flood. Weather at the sowing time was favourable, but excessive rainfall and flood effected some damage later on in low lying lands.
Hooghly ...	276,700	196,800	206,400	73	85	In Serampur and Sadar subdivisions, May and June; normal. In Arambagh, beginning of July, late.	End of July; late.	The increase in area is due to good rainfall. Weather has been fair in Sadar subdivision, but want of rain delayed the transplantation. Weather has been favourable in Serampur, but unfavourable in Arambagh. The outturn is expected to fall below the normal owing to late transplantation.
Howrah ...	125,200	114,400	119,500	70	93	Middle of May; early.	Middle of July; normal.	The increase in area is due to high prices of paddy and timely rainfall. The weather has been favourable.
Rajshahi ...	697,000	620,000	656,200	53	90	April; normal.	Latter part of July; normal.	The increase is due to more extensive cultivation owing to the failure of last year's crop owing to flood. Rain was defective at the sowing time but the weather proved favourable at the time of transplantation. The estimated out-turn is expected to fall somewhat below the normal owing to insufficient rainfall at the sowing time.
Dinajpur ...	1,120,800	1,019,100	963,400	57·2	75	Middle of May; normal.	Middle of July; normal.	The decrease in area is due to insufficient rainfall. The weather has not been favourable. Some damage has been done by drought.

* Revised.

DISTRICT.	Estimated normal area under winter rice.	Estimated area under winter rice.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the sowing of broadcasted winter rice commenced this year, and whether that date was early, normal or late.	Date by which the transplanting of winter rice commenced this year, and whether that date was early, normal or late.	Remarks by District Officers.
		Last year (1918-19.)	This year (1919-20.)	Last year.	This year.			
	Acres.	Acres.	Acres.					
Jalpaiguri ...	551,300	497,400	400,000	85	80	...	June and July. Alipur, Kalakata, Mainaguri, normal. July and August Balk [illegible] and Bhalka, late	The decrease in area sown is due to scanty rainfall, but as there has been good rainfall recently the area will probably increase. The weather has been very unfavourable up to the beginning of September, but at present the prospects are much brighter. Transplanting was much delayed owing to drought. A normal outturn cannot be expected owing to late transplantation and want of moisture for paddy already transplanted.
Darjeeling	65,200	25,[illegible]	25,500	92	83	May, normal	July, normal	The decrease in area sown is due to want of timely rainfall. The weather has been fair. The want of sufficient rain in the Terai in August is expected to cause the outturn to fall below the normal.
Rangpur	822,700	674,000	552,000	59	62	May, normal	Beginning of July, late	The large decrease in area sown is due to exceedingly scanty rainfall. Large tracts have remained untransplanted and transplanted seedlings have suffered owing to scanty rains since July. The recent rain is likely to improve the situation.
Bogra	303,[illegible]00	450,000	115,000	44	75	May, late ..	End of July, late	The decrease in area sown is due to low flood and want of sufficient rainfall, there being much less transplantation than usual in the eastern parts of the district. The rainfall was late. The weather has, however, improved afterwards except in the eastern part of the district. The broadcast paddy has also been damaged to some extent for the above reason. The outturn is, therefore, expected to be below the normal.
Pabna	566,[illegible]0	520,000	342,500	50	79	End of March, normal	Beginning of August, normal	The decrease in area sown is due to want of rain at the sowing time, but subsequent rainfall improved the crop. The crop has been damaged to some extent by flood, but the flood water has subsided too suddenly. If it does not rain sufficiently now the outturn would be much below the normal.
Malda ...	326,200	220,[illegible]00	300,000	60	83	June, normal	July, late	The increase in area sown is due to favourable weather all through the district, except in a few places where crop suffered a little for want of rain in the month of August. But the condition has since then improved. Owing to want of timely rainfall in places the outturn is expected to be below the normal.
Dacca .	647,900	619,000	651,800	75	79	End of March to April, normal	July, normal	Increase due to late rains on account of which some lands which would have been sown with jute have been devoted to *aman* paddy. Weather has not been favourable on the whole. Insufficient rain affected the cultivation which retarded the growth of the crop. Unfavourable weather and lowness of water-level affected the outturn. Generally speaking the transplanted crop is better than the broadcast variety.
Mymensingh	1,126,700	969,700	969,700	75	66	First part of April, normal.	First part of July, normal	Weather has not been favourable. More rain was wanted during the sowing time. Roughly estimated about 20 per cent damage has been done to the crop by drought which has lowered the outturn of the crop below the normal.
Faridpur .	770,100	740,000	734,700	69	100	March and the beginning of April normal.		The decrease in area is due to increase in area under jute. The weather has been favourable to the growth of the crop.
Bakarganj	1,300,000	1,310,000	1,342,500	120	00	April and May, Normal	Mid of July, Normal	The increase in area sown is due to the reclamation of the Sundarbans and to the high price of rice. The weather was favourable at the sowing time, but flood in the first part of August last did some damage to the young seedlings and delayed the progress of transplanting operations.
Chittagong .	419,400	426,100	420,600	95	100	June and July, normal	July and August, normal	The increase in area sown is due to the extension of cultivation in consequence of rise in the price of rice. The weather has been favourable and a normal outturn is expected.
Tippera .	7[illegible]4,800	740,[illegible]00	786,000	60	83	April, normal	August, normal	This increase in area is due to the failure of last *aman* crop. The weather was dry at the sowing time but has improved later on and is now good. The outturn has fallen below the normal for want of rain. The condition of broadcast *aman* is good.
Noakhali .	610,000	600,000	600,000	85	76	April, normal	August, normal.	The weather was favourable at the sowing time but insufficient rainfall retarded the growth of the crop, which accounts for the low out-turn.
Chittagong Hill Tracts	47,500	41,600	43,000	100	67	Middle of July, normal.	1st part of August; normal	The increase in area is due to spread of plough cultivation among the hillmen. Weather has been fair. More rain is however wanted.

CALCUTTA, *the 20th October 1919.*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 18th October 1919.

Summary.—During the week the rainfall throughout the province was generally light. More rain is needed for the growth of winter paddy, especially in the West Bengal districts. Steeping and washing of jute are almost finished. Preparation of lands for the next spring crops and their sowings continue. The condition and prospects of standing crops are generally favourable. The average price of common rice for the province has fallen by about 0 53 per cent. as compared with that of the previous week. Five hundred and sixty persons have received gratuitous relief in the Brahmanbaria subdivision of the Tippera district The conditions in Bankura are published separately.

CONTENTS.

REPORT ON FAMINE IN THE DISTRICT OF BANKURA FOR THE WEEK ENDING 18TH OCTOBER 1919.

THE rainfall during the week was insufficient, but the agricultural prospects are favourable. Twenty-four relief works were open during the week. The number of persons relieved on works was 4,319. The number of persons in receipt of special relief was 4,254, viz., 3,683 on paddy-husking advances, 555 weavers and 16 better class poor. The distribution of gratuitous relief has been closed. The grand total of persons relieved was 8,573. The decrease in the number of persons relieved on works was due to the closure of forty-nine works during the week. The charitable societies relieved 700 persons by daily doles. During the week four cases of theft of paddy were reported. Public health is generally good. The outbreak of malaria and influenza is reported from certain localities. Cloth is being distributed to the destitutes. The relief measures are adequate. The price of common rice varies from 5¼ to 5⅝ seers in the rupee. Burma rice is being sold.

RESOLUTION ON THE SANITARY AND VACCINATION REPORTS, BENGAL.

GOVERNMENT OF BENGAL.

MUNICIPAL DEPARTMENT.

Sanitation Branch.

CALCUTTA, THE 27TH OCTOBER 1919.

RESOLUTION—No. 1029San.

READ—

The reports of the Sanitary Commissioner, the Sanitary Board and the Sanitary Engineer, Bengal, for the year 1918.

READ ALSO—

The annual statistical returns and short notes on vaccination in Bengal for the year 1918-19.

General results.—The outstanding feature of the year under review was the widespread mortality caused by the severe epidemic of influenza which swept in two distinct waves over the Presidency, and left behind a disastrous aftermath of minor ailments and impaired national vitality. Appearing first in a mild form in the summer months, it spread rapidly over the province, subsided and seemed to have disappeared, and then broke out again in an infinitely more virulent and dangerous form in the autumn. The mortality from influenza is estimated at 350,000 to 400,000 deaths.

2. **Birth-rate.**—The provincial birth-rate which rose from 31·89 per mille in 1916 to 35·91 in 1917 fell to 32·9 per mille in the year under review; the actual decrease in births, in which all districts except Bakarganj, Khulna, Tippera and Bankura shared, was 138,738. The decline was common to all the provinces of India except Assam, as will appear from the statement in the margin and is ascribed to the general unhealthiness of the year coupled with unsatisfactory economic conditions.

Province	Birth rate 1917	Birth rate 1918	Province	Birth rate 1917	Birth rate 1918
Bihar and Orissa	40 4	37 5	United Provinces	46 0	39 8
Bengal ..	35 9	32 9	Punjab ...	45 3	39 6
Central Provinces	48·1	43 2	Assam ..	31 3	34 9
Madras ...	32 3	28·8	North West Frontier Province	32 1	30 5
Burma ...	36 2	33 0			
Bombay ...	35·7	31·6			

3. **Death-rate.**—The provincial death-rate for 1918 was 38·1 per mille, as compared with 26·2 of the preceding year and 29·5 the average of the previous quinquennium, the actual mortality being 538,822 more than in 1917. In 1917, the highest death-rate occurred in the district of Darjeeling (38·6 per mille), but in the year under review Murshidabad returned the highest rate (58·3), while in four other districts (Nadia, Darjeeling, Burdwan and Jalpaiguri) the rate was over 50 per mille. Moreover, in every other district the mortality was greater than in the previous year. Among the towns of Bengal, Ramjibanpur in Midnapore returned the enormous rate of 69·1 per mille, while Kurseong and eight other towns earned the unenviable notoriety of a mortality of over 44 per mille. Though there was a slight rise in the mortality under practically every head, *e.g.*, cholera, small-pox, respiratory diseases, dysentery and diarrhœa, the enormously augmented death roll was due largely to malaria of a severe type, but more particulaly to the appalling ravages of influenza. The increase over the whole province, large as it is, nevertheless compares favourably with the increase in other provinces, as will be seen from the marginal statement.

Province	Death-rate 1917	Death-rate 1918	Province	Death-rate 1917.	Death-rate 1918
Bihar & Orissa	35·2	56 7	United Provinces	37·9	82 3
Bengal ...	26·2	38·1	Punjab ...	37 9	81·0
Central Provinces	36·0	102 6	Assam ...	27 0	46·1
Madras ...	26·2	43 0	North-West Frontier Province	29·9	70·3
Burma ...	25 3	39 5			
Bombay ...	40·7	88·0			

4. **Infant mortality.**—Compared with the previous year, infant mortality was higher everywhere, being over 20 per cent. of the births in 22 districts and below 20 in 5 districts, whereas in the previous year the higher rate was reached in only 13 districts and the lower rate returned from 14. The highest ratio (30·7) was returned by Burdwan, which was closely followed by Birbhum with 30·1, Nadia with 29·6 and Murshidabad with 28·3. Calcutta, which returned the highest ratio last year (23·92), comes next with 28·1. The problem is one of considerable complexity. In many places good cow's milk is not easily procurable, mothers themselves are ill-nourished and trained midwives are rare. Poverty and ignorance are responsible for a great deal of the enormous waste of infant life, and social and economic conditions hamper the introduction of remedial measures. A representative committee is now considering what steps should be taken to promote child welfare and reduce infantile mortality, and it is hoped that its deliberations will facilitate a solution of the problem.

5. **Vital statistics.**—The Sanitary Commissioner remarks that the generally lower birth-rate obtaining in towns when compared with the adjoining rural areas is largely due to defective registration. Although many municipalities have introduced a system of rewards to informers and are enforcing the penal clauses of the Compulsory Registration Act with greater strictness, the attention paid to registration of vital occurrences is still inadequate. Some improvement is, however, noticeable. The proportion of omissions brought to light as a result of the usual verification by inspectors and sub-inspectors was 2·9 per cent. of births as against 3·3 last year, and 2·2 of deaths as against 2·3. It is notorious that, owing to the ignorance of the reporting agency, confusion as to the causes of death occurs to a large extent, thus vitiating the statistics of a particular disease.

An improvement of the system of registration is a matter of considerable importance from the point of view of sanitary administration, and though various attempts have been made to ensure correct registration the result is far from satisfactory. Investigation has shown that in all probability the reported birth and death-rates are from 10 to 15 per mille below the actual figures. At present there are three agencies in Bengal for the registration of vital occurrences. Ordinarily in rural areas the chaukidar reports to the police, who compile the returns of births and deaths, though in certain areas this work has been transferred to the chaukidari panchayets. In municipalities however, Act IV of 1873 imposes an obligation upon parents or near relatives to register births and deaths. Some idea of the difficulty of improving the registration of vital occurrences may be gained from a history of the changes of agency tried in municipalities in the last 30 years. In 1886 the work of registration was transferred from the police to the municipal authorities. So far from any improvement being effected, it was found necessary in 1892 again to lay the responsibility upon the town police. The results were still unsatisfactory, and in 1913 it was decided that the work should be once more transferred to the municipal authorities. The solution of the difficulty is, in the opinion of the Sanitary Commissioner, a grave mistake. The local authorities have all assumed that this work should be made over to their health departments, and Dr. Bentley points out very forcibly that "departments whose efficiency can in the end be judged only by mortality statistics are virtually made the judges of their own work. This is to put a premium upon neglect and inaccuracy. As has already been pointed out, low death-rates can be obtained by neglect to record deaths or by manipulation of the returns far more easily than by efficient sanitary administration. And several instances have occurred recently in which municipalities have attempted to justify insanitation and neglect by pointing to their low or falling death-rates as proof of the excellence of their sanitary administration, when all the time the low figures were merely the result of omissions in their register of deaths. Unless steps are taken to put matters on a proper footing local authorities, who already keenly resent criticism and interference of any kind, will defend themselves in this way with increasing frequency in the future and public health will suffer as a result. It is only necessary to glance at the birth and death-rates of towns in Bengal that are published every year in the sanitary report of the province in order to realize

the hopeless inaccuracy of these figures, which, in the majority of cases, are probably less than half what they should be."

The whole question was considered at the last Commissioners' conference which recommended "that the recording of births and deaths should be retransferred from the municipalities to an agency controlled by Government, and that Act IV of 1873 should be extended gradually in selected rural areas." These recommendations are now under the consideration of Government.

6. **Cholera.**—The mortality from cholera, which was the lowest on record in 1917, again increased, the deaths during 1918 amounting to 82,379 as against 45,021 of the preceding year and an average of 82,932 during the previous quinquennium. No district was entirely free from its ravages and out of 490 registering circles only 6 towns and 9 rural areas escaped, against 10 and 7 in 1917. The incidence of the disease was highest in Noakhali where the death-rate rose from ·7 in 1917 to 5·0 during the year under review, while, as before, the lowest rate was recorded in Darjeeling. The banks of rivers, tanks, khals which are the principal sources of water-supply, both for drinking and domestic purposes, are always subject to gross fœcal pollution, and cholera consequently tends to become epidemic in a locality as soon as the infection has been introduced, unless steps are taken to stop the use of polluted water supplies. The Mines Board of Health at Asansol has proved conclusively that no very elaborate organization is required to control cholera. Early notification of its outbreak, the immediate investigation of the source of infection, and the draining or closing of a polluted water-supply require no very elaborate or costly organization, and the Governor in Council sees no reason why the creation of an adequate public health staff should not, within a very few years, render possible the complete control of cholera as a dangerous epidemic disease.

7. **Small-pox.**—The mortality, which amounted to 8,576, shows a slight increase over that of 1917, when 7,010 deaths were reported from this cause, but it was considerably below the average for the preceding quinquennium. The highest district death-rate was returned by Pabna, viz., 1·6 per mille.

8. **Vaccination.**—The number of operations performed was 1,784,817, of which 1,295,331 were primary and 489,486 re-vaccination cases, giving an increase of 170,216 in the total number of operations, but a decrease of 62,009 in primary operations as compared with last year. The increase in the total operations was due to the prevalence of small-pox in epidemic form in certain districts as well as to the introduction of free vaccination in Rangpur, Bogra and Bakarganj. The number of persons vaccinated was 1,773,715, or 167,096 more than in 1917-18. Free vaccination was in force in the districts of Jalpaiguri and 24-Parganas and was introduced in the Burdwan district at the cost of the district board with effect from the 12th December 1918.

9. **Plague.**—The total number of deaths was 28[illegible] As usual the disease was confined almost entirely to Calcutta (where 2[illegible] deaths occurred) and its suburbs. The Presidency remained entirely free of plague during September and November.

10 **Fever.**—The most lamentable feature of the sanitary history of the year was the appalling increase in the mortality from febrile diseases, due mainly to the epidemic of influenza. The total number of deaths amounted to 1,357,906 as compared with 882,768 in 1917 and 976,679, the quinquennial average. Of this total the Sanitary Commissioner calculates that 365,158 deaths must have been due to influenza. The first indication of this disease in Bengal was received in June and it was recognised almost simultaneously in Calcutta and in a number of other towns in the 24-Parganas. It spread rapidly along railway and steamer routes, employées on the docks, on the railways and in the postal services and traders being the earliest victims. Calcutta appears to have been the main disseminating centre and the extraordinary rapidity of its spread was undoubtedly due to the relatively excellent railway communications of the province. The first epidemic outbreak, lasting about six weeks, was marked by the absence of complications and the fact that it was chiefly confined to towns. The second epidemic outbreak occurred about the middle of September. It spread more slowly than the first, but was infinitely more serious, being characterized by the great frequency of dangerous respiratory and other complications, which

resulted in an appalling mortality. Towns and villages suffered alike, but on the whole the mortality was greater in rural than in urban areas. The Burdwan Division appears to have suffered most severely, the Chittagong Division coming next, followed by the Presidency Division. The Rajshahi Di[illegible]i, with the exception of Darjeeling and Jalpaiguri, and the Dacca Division appear to have escaped fairly lightly in comparison. The incidence of the disease also varied greatly among different classes of the population. In general, females suffered more severely than males, while children under ten and old people suffered less severely than young adults. Owing to the sudden onset and rapid spread of the epidemic, little could be done to check its ravages, and both the medical and the sanitary organizations were powerless to devise measures adequate to the occasion. Moreover, the lack of knowledge of any real specific against the disease rendered efficient general treatment impossible."

The increase in mortality figures under the head "fever" was shared by both urban and rural areas. In some parts of Nadia and Murshidabad, the mortality was over 77 per mille. Taken by districts, Murshidabad headed the list with a return of 48·9, followed by Nadia, Birbhum, Jalpaiguri, Burdwan, Darjeeling and Bankura, in all of which the mortality was over 40 per mille. In only three districts was the death-rate below 20 per mille. It is interesting to note that Calcutta returned the smallest rate from this cause, namely 6·7 per mille, although this was higher than the figures of the two previous years (3·3 and 3·2 per mille, respectively).

11. **Anti-malarial Measures.**—Deductions regarding the effects of the anti-malarial schemes are largely vitiated by the abnormal returns, for which the influenza epidemic was responsible. The Meenglas scheme provides for the subterranean drainage of a number of hill streams which were formerly the prolific breeding places of mosquitoes; the excessive rainfall of 1918 unfortunately did considerable damage to portions of the under-drains. The Sanitary Commissioner, however, reports that the observations on the number of mosquitoes caught in special traps in various areas show that there was a very decided diminution of these insects in the area of control, whereas there was an increase in their number in the untreated control area. The sickness rate from malaria in the sphere of operations is reported to have fallen from 260 per 1,000 in 1917 to 115 per 1,000 in 1918; but as a similar though not quite so great a reduction was noted among the people living outside the area, it is not safe to conclude that the improvement was due to the anti-malarial scheme. The Singaran scheme in Burdwan was only completed in the first week of September 1918, when the rainy season was nearly at an end, the delay being mainly due to the engineering difficulty occasioned by the lack of the necessary material owing to the war. It was possible, however, to gauge to some extent the effect of flushing the weir on two occasions in September, and the results were satisfactory. As in the case of Meenglas, observations on the "catch" of mosquitoes, both within the area of the scheme and in another control area outside, showed a distinct reduction in favour of the area operated upon, and a very interesting fact observed in this connection was the marked reduction in the "catch" of anopheles mosquitoes which followed each of the flushings of the river bed. Unfortunately the prevalence of influenza during the season vitiated any conclusion from sickness and mortality rates, and it will probably be necessary to wait for another two or three seasons before a definite judgment can be passed upon the scheme. The scheme for the flood and flush drainage of the urban area at Jangipur also did not give any conclusive results. The statements of the residents in the locality are, however, of some interest, and the Sanitary Commissioner quotes the opinion of a local resident that the health of the town during 1918 was good, when all the surrounding villages were subject to wide ravages of influenza and malaria. The scheme is now being extended. The works in connection with the Banka Valley scheme were only completed in time to allow of operations being commenced in August, and it is, therefore, not possible to express any opinion on the scheme at present, though it is said to have already proved its value from an agricultural standpoint.

It is encouraging to note that several localities have undertaken special measures for the prevention of malaria on lines laid down by the Sanitary

Commissioner. Excellent resul[illegible] malaria have been reported to have followed upon the construction of the drainage [illegible] at Tangail, which is based largely upon the "flood and flush" principles. Detailed malarial surveys were carried out in Jessore, Birnagar, a [illegible] of Howrah, a portion of South Suburban and North Barrackpore municipalities and in 266 villages. As a part of the campaign against malaria may be mentioned the three large sechemes of sanitary drainage, viz., the Arool Bheel, the Jabuna and the Nawi and Sunthi schemes, which have been undertaken with funds contributed by district boards and Government, and the Governor in Council takes this opportunity of expressing his appreciation of the co-operation he has received in this matter from the non-official chairmen of the district boards of the 24-Parganas and Jessore and from the district board of Nadia.

A considerable quantity of quinine was distributed during the year. Special grants for this purpose were made as in previous years to certain district boards and municipalities for the purchase of quinine for free distribution to the poorer classes through the agency of charitable dispensaries and peripatetic doctors. At Birnagar, a poor municipality, a special scheme of quinine treatment was carried out in the year, a sum of Rs. 2,000 having been placed at the disposal of the municipality for this purpose, and gratifying results are said to have been obtained.

Several causes conduced to a serious decrease in the amount of quinine issued by the Juvenile Jail. In the first place, the prohibition of export from Java led to a rise in the market price of quinine, and it was found that profiteers were purchasing Government quinine in large quantities with the object of reselling it at a large profit. It was, therefore decided to raise the retail price of the tubes of quinine tablets and to limit the amount sold to any single person. Again serious thefts and defalcations were discovered which in previous years had served to swell the yearly issues from the Juvenile Jail. A third serious cause of the falling off in the issue of Government quinine was the large trade in spurious quinine tablets. These tablets, while containing only about one-fifth of a grain of quinine, are so manufactured as to appear identical with the Government tablets which contain four grains of the drug. Investigation by the police brought to light the fact that numerous factories for the manufacture of these tablets had been established both in Calcutta and in various parts of the mufassal.

12. **Miscellaneous enquiries.**—In the resolution reviewing the report of 1917 attention was drawn to the fact that an examination of prisoners in fourteen jails of the Presidency showed a high degree of hookworm infestation in the districts concerned. Further enquiries have merely confirmed this view and revealed the fact that the disease is as widespread as it is unsuspected. In September 1918 His Excellency the Governor addressed a letter to the President of the Sanitary Board pointing out—

(1) that a very large percentage of the population of Bengal, which may be as much as 80, representing a total of approximately 36 million persons, is infected with hookworm;

(2) that even in cases of mild infection it is responsible for ill effects, such as lowered vitality, anæmia, inertia, etc.;

(3) that the disease can be cured cheaply and effectively; but that,

(4) it can be prevented (and consequently extirpated) only by ridding an infected soil of infection; and

(5) that this can be brought about only by means of a wide diffusion of knowledge as to the nature and causes of the disease, followed by a revolutionary change in the sanitary habits of the people.

Towards the end of the year a conference of representatives of district boards, of the tea, jute and coal industries and other interests was called together at Government House to devise measures against the disease, when His Excellency the Governor delivered an address, after which certain draft resolutions were adopted, recommending the appointment of three Deputy Sanitary Commissioners with the necessary staff for the introduction and supervision of hookworm operations in the coal area, tea gardens and the mills and works near Calcutta, and railways and certain rural areas. These recommendations have been given effect to in the current year.

The report of the committee appointed to consider the sanitary organization of the port of Calcutta, with special reference to the prevention of yellow fever, was received during the year, together with a draft bill. The bill has since been revised and submitted to the Government of India for sanction.

13. **Sanitary Board.**—The Sanitary Board continued its useful function of advising Government on sanitary projects of waterworks and drainage. The board held eight meetings during the year.

14. **Sanitary improvement.**—The total expenditure incurred on sanitary works executed during the financial year 1917-18 by Government, municipalities, district boards and private individuals is returned at Rs. 14,25,040, or nearly one lakh less than in the previous year. The decrease is due to the construction of fewer drains during the year. As usual sanitary works, such as the cleansing of jungles, filling up ditches, improving silted-up khals and local drainage, etc., were carried out in the villages through the agency of district and local boards and union committees. The Sanitary Commissioner observes that works of this kind, though often useful, are frequently ill-directed and cannot be compared to sound measures such as the reservation of tanks for drinking and bathing purposes, house to house vaccination, closure or disinfection of infected water-supplies, which have been adopted by the Asansol Mines Board of Health against the spread of infectious disease. The Governor in Council recognizes that the union committees have executed several minor works of sound utility, but it must at the same time be remembered that sanitation has long since become a science, and he is convinced that the funds now spent on sanitary works could, under expert guidance, be used to better advantage In his view, the root of the matter is organization, and while the introduction into the rural life of Bengal of a trained sanitary staff, which must be cheap and therefore of no very high calibre, and moreover with quite insufficient funds at its command, will not accomplish miracles and will be frequently attacked as an extravagant luxury, the Governor in Council is satisfied that it is this way that improvement lies, and that organization, even though at first it may seem costly and infructuous, will a decade hence have transformed the administration of public health in this Presidency. At the present time an increasing interest in sanitation is displayed on all sides. Lectures and demonstrations on sanitary subjects are well attended, some local improvement associations have been organised, and certain anti-malarial societies, which in the first place provide medical attendance for the members and secondly undertake local sanitary improvements, have been established and promise to do excellent work.

15. **Sanitary Engineering.**—The total capital expenditure on sanitary engineering works during the calendar year 1918 was Rs. 3,77,984 as against Rs. 3,32,108 in the previous year. The greater part of the expenditure was, as usual, devoted to water-supply.

The Uttarpara water-works were completed and little remains to be done to the new clear water reservoir at Mymensingh and the Satkhira waterworks. The progress of the Nator water-works was interfered with by early rains, but it is hoped that it will be opened in April next. The Rajbari water-works have been completed. The first portion of the extension schemes for Dacca and Mymensingh water-works was almost finished, but the lack of funds held up the execution of the Howrah water-works. Repairs to the existing filters and clear water reservoir at Berhampore were taken in hand, but had to be stopped during the rains. Detailed water-supply schemes were prepared for the towns of Midnapore and Pirojpur and sketch projects were prepared for ten other towns.

The construction of the Kurseong sewerage scheme was commenced and the works for the improvement of the channel from Bhagirathi to the Bistupur Bheel were completed. A few minor drainage works were completed at Howrah and elsewhere.

16. **Public Health organization.**—The Governor in Council, as already stated, is satisfied that the great need of the present moment is a better public health organization, and it was therefore decided that each district board should be required to appoint a qualified medical officer of health with effect from 1st April 1920. District boards were consulted throughout the

Presidency upon this question. There were differences of opinion, as was only to be expected on a large question of reorganisation such as this, but on the whole there was a gratifying volume of opinion in favour of the principle of creating a decentralized organisation under the district boards to deal with sanitary matters. Steps have been taken to train a sufficient number of qualified officers to fill these posts.

17. **Staff.**—Dr. C. A. Bentley was in charge of the office of the Sanitary Commissioner for the whole of the year under review and Mr. G. B. Williams held the post of Sanitary Engineer, except for the periods from the 2nd to the 29th of January and from the 2nd to the 23rd of December, during which he was absent on privilege leave. The Governor in Council desires to place on record the excellent work done by both these officers. His thanks are also due to the Sanitary Board and their President, the Hon'ble Mr. C. J. Stevenson-Moore, C.V.O., for their helpful advice and assistance in examining sanitary schemes and preparing programmes of sanitary work.

By order of the Governor in Council,

S. W. GOODE,

Offg. Secy. to the Govt. of Bengal.

RESOLUTION ON THE ANNUAL REPORT OF THE BENGAL SMOKE-NUISANCES COMMISSION FOR THE YEAR 1918-19.

GOVERNMENT OF BENGAL.

MARINE DEPARTMENT.

CALCUTTA, THE 28TH OCTOBER 1919.

RESOLUTION—No. 3312Marine.

READ—

The thirteenth annual report of the Smoke-Nuisances Commission relating to the year 1918-19.

1. During the year the Commission held twelve meetings for the transaction of their business.

2. The number of observations of smoke emission taken was 9.221 against 10,044 in the previous year. The number of factories visited for the purpose of inspection of power plant, instruction of firemen and testing of fuel appliances was 3,663 against 5,375 in 1917-18.

3. The average of the observed emission of objectionable smoke in terms of scale 6 was 1·27 minutes in the hour against 1·29 minutes in the previous year. The reduction may appear small in figures, but it shows a continuous improvement on the best results of previous years, although the continuance of war conditions made it incumbent on the Commission to exercise great forbearance in enforcing the provisions of the Bengal Smoke-Nuisances Act.

4. Plans for 47 installations were examined and approved, alterations being made where considered necessary. The remodelled plants were always found to be an improvement on the old ones and were appreciated by the owners.

5. The number of complaints received from the public was 48 against 53 in the previous year, and the number of reports made to owners of furnaces for departmental action was 954.

6. Statutory warnings were served and prosecutions undertaken in 25 and 18 cases, respectively, the corresponding figures for the previous year being 60 and 36. The number of prosecutions during the year is the lowest on record. This is very creditable to the Commission, and may be attributed at least in part, to the larger employment of trained firemen and the adoption of improved installations.

7. Notwithstanding war conditions and the difficulty of obtaining material, a fair number of electric motor and gas appliances was installed during the year with a resulting diminution in the amount of smoke emitted.

8. The work of the Commission since its inception in 1906 has been a record of steady and sustained progress. As the report states, the Commission is primarily advisory, not repressive ; it exists for the public good and the benefit of owners. That this policy is definitely pursued, is clear from the many appreciative acknowledgments received from owners and the general public. The thanks of the Governor in Council are due to the members of the Commission and also to Mr. Robson, the Chief Inspector, and to the other inspecting officers for the success which continues to attend their efforts.

ORDER—Ordered that a copy of the resolution be forwarded to the Government of India, Department of Commerce and Industry, the President of the Smoke Nuisances Commission, the Commissioners of the Presidency and Burdwan Divisions, the Commissioner of Police, Calcutta, the Chairman Corporation of Calcutta, the Vice-Chairman of the Commissioners for the Port of Calcutta, the Secretary, Bengal Chamber of Commerce, Master, Calcutta Trades Association. the Honorary Secretary, Bengal National Chamber of Commerce, the Chairman of the City Improvement Trust, Calcutta, and the Municipal Department of this Government.

Ordered also that the resolution be published in the *Calcutta Gazette*.

By order of the Governor in Council,

F. A. A. COWLEY,

Secy. to the Govt. of Bengal.

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR SEPTEMBER 1919.

I. **Character of the Season.**—During the month the rainfall was above normal in 16 districts, elsewhere it approached the average, excepting in the 24-Parganas, Hooghly, Howrah and Midnapore. The usual rainfall statement is appended.

II. **Progress of Agricultural Operations.**—Good rainfall, especially in the latter part of September, throughout North and East Bengal, facilitated the transplanting of winter paddy. The cyclone, which passed over the Dacca Division and Khulna district, did comparatively little damage to standing crops. In fact the heavy rain which accompanied the cyclone did great good on the whole to the transplanted paddy. Weeding of winter paddy and steeping and washing of jute were almost complete. Very little of the *aus* crop remained to be reaped. Preparatory tillage for the next spring crops and their sowings commenced in some districts.

III. **State of Standing Crops.**—On the whole the conditions of winter paddy, sugarcane and other standing crops were satisfactory.

IV. **Prospects and Outturn.**—The present outlook of winter paddy is reported to be generally promising, but rain was needed at the end of the month for the higher rice lands in the districts of Burdwan, Bankura and Birbhum.

V. **Damage to Standing Crops.**—The damage done by the cyclone to the standing crops was comparatively small excepting in the case of deep-water paddy growing in water where a strong current was running. Sugarcane has suffered, though not so severely as might be expected.

VI. **Condition of Agricultural Stock.**—The cyclone caused considerable loss of livestock, especially in Khulna and Faridpur. Cattle-disease was prevalent in places in the districts of Darjeeling, Jalpaiguri, Rangpur, Malda, Mymensingh, Midnapore, Nadia and Tippera.

VII. **Failure of Pasturage and Fodder.**—The supply of fodder was sufficient throughout the province.

VIII. **Price of Food-grains.**—During the second fortnight of the month under review, the price of common rice for the province rose in three districts, fell in 16 and remained stationary in the rest. It varied from 4 seers per rupee in Jalpaiguri, Darjeeling and Rangpur to 7 seers in the Chittagong Hill Tracts.

IX. **Condition of Agricultural People.**—Distress continued to prevail in the Brahmanbaria subdivision of Tippera district. Relief measures continued. The conditions in Bankura are published separately.

R. S. FINLOW,
Offg. Director of Agriculture, Bengal.

DACCA, *the 25th October 1919.*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 23rd October 1919.

Summary.—The week was rainless. Some rain now, especially in the western districts, would be highly beneficial to the winter paddy which is just coming into ears. Preparatory tillage for the spring crops continues. Harvesting of early winter paddy and sowing potatoes, oilseeds and pulses have commenced. The prospects of standing crops are generally satisfactory. The average price of common rice for the province has fallen by about 1·50 per cent. as compared with that of the previous week. One thousand two hundred and eighty persons received gratuitous relief in the Brahmanbaria subdivision of Tippera district. The conditions in Bankura are published separately.

RESOLUTION ON THE REPORT OF THE BOARD OF REVENUE ON THE LAND REVENUE ADMINISTRATION OF THE PRESIDENCY OF BENGAL FOR THE YEAR ENDING 31ST MARCH 1919.

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Land Revenue Branch.

DARJEELING, THE 27TH OCTOBER 1919.

RESOLUTION—No. 2379T.R.

READ—

The Report of the Board of Revenue on the Land Revenue Administration of the Presidency of Bengal for the year ending 31st March 1919.

THE Hon'ble Mr. C. J. Stevenson-Moore, C.V.O., was in charge of the office of the Member of the Board of Revenue throughout the year.

2. **General condition of the year.**—The year under report started not unfavourably. Though the prices of imported necessaries and of cloth were high, the prices of foodstuffs were low and stocks were large, due both to the bumper harvest of the previous year and to the lack of facilities for exports during the war. This, on the other hand, gave cause for complaint. Later on in the year the situation took a turn for the worse. The general causes of this were four-fold. The rise in prices in other countries owing to the war, a rise which had resulted from the reduction in the production of the necessaries of life in the combatant countries and from an inflation of currency, began at the close of the war to have a sympathetic effect on prices in India; the general failure of the monsoon throughout India led to actual famine in other provinces; the particular failure of the monsoon in Bengal produced a short crop of rice; and the outbreaks of influenza took a heavy toll of the people. In consequence of the first three causes, the prices of foodstuffs, including that of rice, rapidly rose. This rise was the more keenly felt by persons on small fixed incomes. Such prices did not, however, rise during the year—which ends on the 31st March—to the heights they subsequently attained in this province, or to those reached in other provinces, whilst they were prevented from rising to the heights obtaining in foreign countries by the restrictions placed on exports to those countries. Moreover, despite exports of rice to other provinces which were in worse straits than Bengal, there was no shortage of rice.

3. In particular areas the material condition of the people was also affected by certain visitations of nature. In the Rajshahi Division such a flood as had not occurred for half a century traversed the districts of Rajshahi, Dinajpur, Bogra and Pabna, causing much damage to crops, homesteads and cattle, particularly in the districts of Rajshahi and Bogra. Relief was, however, promptly rendered. A high and prolonged flood, followed by a long drought, in the subdivision of Brahmanbaria in the district of Tippera damaged the standing crops and delayed the transplantation of winter rice, with the result that relief measures had to be organised towards the end of the year. Floods in the districts of Dacca, Mymensingh and Faridpur affected the jute and rice crops, whilst the earthquake of the 8th July 1918 did a certain amount of damage in the eastern districts of the province. The failure of the crops in Bankura was so widespread that operations had to be started in that district for the relief of the distress which, subsequent to the year under report, developed into famine. Agriculturists' loans to the extent of 6½ lakhs were advanced during the year.

4. The end of the year under report, therefore, appears to have been unusually black, but it must be remembered that there were many districts which did not suffer from the peculiar visitations referred to in the last paragraph, and that persons engaged in trade and the cultivator with surplus stocks benefited by the rise in the price of foodstuffs. Moreover, it requires a minute examination of the report under review to discover the instances, which are few and far between, in which variations have occurred on account of the character of the year in the numerous statistics relating to the administration of land revenue, except in the areas officially declared to have been suffering from distress. The short collections of road and public works cesses in Jessore, Bogra, Bankura and Rajshahi are attributed to the bad agricultural conditions of these districts, but distress was officially declared in the latter three districts. The failure to attain the fixed percentage of the same collections in Tippera is ascribed in that district alone to the high price of the necessaries of life, an excuse which might have been put forward by every district in the presidency. On the other hand, in the Sundarbans in Bakarganj, although the rice crop was only 75 per cent. of the normal, the tenants in the Government estates paid cent. per cent. of the collections of rent, owing to the high prices they obtained for their rice. Further, during the year industries, with some exceptions, flourished. For instance, coal mines, jute mills and factories had an exceptionally busy year and gave employment to much labour; the local sugar industry in Jessore benefited by the restrictions on the supply of foreign sugar; in Dacca an attempt was made to revive the tanning industry; and ship-building continued in Chittagong.

5. **Land Revenue demand and collections.**—The current demand of the year amounted to Rs. 2,79,27,827, showing an increase of Rs. 70,927 over the previous year, due to new settlements and re-settlements and progressive increase of demands in temporarily-settled and Government estates. The collections amounted to Rs. 2,80,84,829, being 92·7 per cent. of the total and 100·5 per cent. of the current demand, against 91·9 and 97·9 per cent., respectively, in the previous year. The remission of revenue during the year amounted to Rs. 72,101. The total land revenue demand is slightly over one-fifth of the gross rental of the province.

6. **Road and Public Works cesses.**—The current demand on account of road and public works cesses showed an increase of Rs. 77,243, due to valuation and revaluation proceedings. The percentage of total collections on the current demand rose from 97·7 in 1917-18 to 9[illegible]·7. Twelve districts against seven in the previous year attained the standard of 100 per cent. on the current demand. Valuations or re-valuations, partial or complete, were made in 14 out of the 25 districts in which the Act is in force, and were completed in seven. Revaluations conducted by the Settlement Department were in progress in Rajshahi and Noakhali, and revaluations under the ordinary procedure were in progress in the districts of the 24-Parganas, Midnapore, Mymensingh and Bakarganj. It is remarkable that the increase in the current demand referred to above was mainly due to revaluation proceedings in the district of Rajshahi, conducted on the basis of the record-of-rights by the Settlement Department. That this resulted in the demand in that district being raised from Rs. 2,36,355 to Rs. 3,02,292 is entirely due to the accuracy of that basis.

7. **Revenue and Cess money-orders.**—As compared with the previous year there was a slight increase in the number of money-orders for the remittance of land revenue and cesses and in the amount covered by them, viz., 230,203 and Rs. 20,54,538, respectively, against 226,206 and Rs. 20,07,860 in 1917-18.

8. **Coercive measures.**—The number of estates which defaulted in the payment of land revenue and became liable to sale was 14,718, or 1,445 more than in the previous year. Only 1,319 estates against 1,0[illegible]9 estates in 1917-18 were actually sold. The percentage of sales to defaults is slightly more than in 1917-18, but practically the same as in 1915-16 and in 1916-17. The largest number of defaults were in the districts of Chittagong, Midnapore and Dacca and the sales were proportionately most numerous in the

24-Parganas, Jalpaiguri and Hooghly. The number of certificates filed, including those for cess, was 114,089 against 100,943 in the preceding year, and the number pending at the close of the year was 36,036 against 28,986 of 1917-18. In the majority of cases payments were made on the issue of notices or on attachment of property. Actual sale became necessary only in 4,723 cases, or 4·4 per cent. of 107,036 cases disposed of during the year.

9. **Government estates.**—The total number of estates under direct management, including those of private individuals managed by Government, was 2,387, with an annual demand of Rs. 43,87,096. Rupees 1,76,969 were spent on miscellaneous and sanitary improvements, Rs. 59,257 out of this amount being spent on drainage, embankment and irrigation. The expenditure on roads and communications was Rs. 3,18,756, of which Rs. 76,489 were given by Government and the balance was provided from District Board and other funds. There were 2,404 schools attended by 77,077 pupils in Government estates. The expenditure on education amounted to Rs. 81,451, of which Government contributed Rs. 50,993, the balance being met from local funds.

10. **Waste lands.**—The rules for the grant of waste land leases to large capitalists remained in abeyance in the 24-Parganas and Khulna portions of the Sundarbans. Raiyatwari settlements on the lines of the Bakarganj colonisation scheme were being made in certain Sundarbans lots in the 24-Parganas. The progress of reclamation in the Bakarganj portion of the Sundarbans was satisfactory.

11. **Drainage, Embankment and Irrigation.**—The work of draining the Mánikhali basin in the 24-Parganas at an estimated cost of Rs. 1,83,481 was undertaken during the year. Three anti-malarial projects, viz., the Nawi Sunthi project in the 24-Parganas, the Arul bhil project in Jessore and the Jabuna project in the 24-Parganas, Nadia and Jessore, were undertaken by the District Boards. A total contribution of Rs. 4,25,000 has been made by Government towards the cost of these projects. The Banka anti-malarial drainage project in the Burdwan Division and the work of silt clearance of Srichandra khal in the Presidency Division were completed. Two large projects for the improvement of the drainage of the Contai subdivision were sanctioned. A scheme for improving the Amta basin in the district of Howrah under the Sanitary Drainage Act at an estimated cost of 9 lakhs of rupees has been sanctioned. The Damodar reservoir enquiry survey is in progress under a special officer.

12. **Partitions.**—Forty-six cases were instituted during the year and 285 cases were pending at the end of the previous year. Of these 79 cases were disposed of and 252 remained pending.

13. **Working of the Bengal Tenancy Act.**—The Bengal Tenancy Act was amended during the year so as to make it illegal for a landlord to realise more road or public works cess from his tenants than is warranted by the Cess Act. The levy, however, of *abwabs* or illegal cesses by the landlords, and the failure to grant rent receipts still continues to prevail. There was an increase in the number of rent money-orders issued and in the amount covered by them. The percentage of money-orders refused by landlords to money-orders sent fell from 16·7 to 16·3. The Bill relating to the transferability of occupancy holdings generally, which was under consideration, has been dropped, as it does not appear that there is any real demand at present for such legislation.

14. The thanks of the Governor in Council are due to the Board for its efficient administration of the Land Revenue Department.

By order of the Governor in Council,

M. C. McALPIN,
Secy. to the Govt. of Bengal.

REPORT ON FAMINE IN THE DISTRICT OF BANKURA FOR THE WEEK ENDING 25TH OCTOBER 1919.

There was no rainfall during the week. The agricultural prospects are favourable, but paddy on high land has suffered for want of rain. The relief works were closed during the week as there is now practically no distress. The number of persons in receipt of special relief was 557, viz., 555 weavers and 2 better class poor. The charitable societies relieved 400 persons by daily doles. During the week three cases of theft of paddy were reported. Public health is on the whole good. Outbreak of malaria is reported. The price of common rice varies from 5 to 5⅝ seers in the rupee. Burma rice is being sold.

M. C. McALPIN,
Secy. to the Govt. of Bengal.

DARJEELING, *the 30th October 1919.*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 30th October 1919.

Summary.—The rainfall was generally light excepting in northern Bengal, where there was almost no rain during the week. More rain is needed for winter paddy, especially in certain western districts. Ploughing for and sowing of spring crops continue. Harvesting of the early variety of winter paddy is proceeding. Prospects of standing crops are generally satisfactory. The average price of common rice for the province has fallen by about 3·12 per cent. as compared with that of the previous week. One thousand nine hundred and fifty persons received gratuitous relief in the Brahmanbaria sub-division of Tippera district. The conditions in Bankura are published separately.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee. This week.	Price of common rice, in seers, per rupee. Previous week.	Character of the weather, condition of crops, etc.

J. C. ROY,
for Director of Agriculture, Bengal.

DACCA;
The 30th October 1919.

DEPARTMENT OF STATISTICS, INDIA.

CALCUTTA TRADE FLUCTUATIONS.

THE following tables are intended to show the trade by all routes, *i.e.*, by rail, river, canal, road, and sea, of the Calcutta block* in certain selected articles during the five months, April to August, 1919, as compared with the corresponding period of 1918 and 1917. The statistics have been compiled from returns furnished by the Collector of Customs, Calcutta, Railway Audit Offices, Steamer Companies, the Commissioners for the Port of Calcutta, the Collectors of the 24-Parganas and Howrah, and the Assistant Engineer, Calcutta Canals.

General Summary.

Imports.—The imports of rice, including paddy†, into Calcutta by rail, river, canal, road, and sea (coastwise) during the five months April to August, 1919, amounted to 9,510,000 maunds, as against 5,254,000 maunds in the corresponding period of the preceding year—an increase of 81 per cent. There was an increase (26 per cent) in the imports of coal and coke (41,791,000 maunds as against 33,271,000 maunds last year). The imports by rail, river, road, and sea (coastwise) of Indian cotton piecegoods showed an increase of 73 per cent, the total value amounting to Rs. 4,02,98,000 as against Rs. 2,32,57,000 in 1918. The quantity of indigo imported during the five months, April to August, 1919, decreased from 4,407 maunds to 1,431 maunds. The imports of raw jute amounted to 1,219,000 bales as against 1,965,000 bales—a decrease of 38 per cent. The importations of gunny bags also showed a decrease of 34 per cent (128 million bags as against 193 millions in the preceding year). The total imports of oilseeds (linseed and rape and mustard seed) increased by 62 per cent, from 2,692,000 maunds to 4,369,000 maunds. The imports of sugar decreased by 24 per cent, from 309,000 maunds to 235,000 maunds, and those of tea by 10 per cent, from 1,200,000 maunds to 1,084,000 maunds.

Exports.—The exports of cotton piecegoods, foreign, from Calcutta by all routes during the five months, April to August, 1919, decreased by 9 per cent (Rs. 9,76,87,000 as against Rs. 10,73,39,000 last year). The exports of gunny bags (including the exports by sea to foreign countries) decreased from 572 million bags to 439 million bags, and the shipments of gunny bags to other Indian ports decreased from 17 millions to 16 millions in number in the period under review. The quantity of kerosene oil despatched from Calcutta and Budge-Budge by internal routes and by sea (coastwise) increased from 2,179,000 maunds to 2,390,000 maunds, or by 10 per cent.

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore Docks.
† One maund of paddy is equivalent to 25 seers of rice.

TABLE I

Trade of Calcutta in certain selected articles in the five months, April to August, 1919, compared with the corresponding months of 1918.

FARIDPUR,
The 2nd November 1919.

R. K. GHOSE,
for *Subdivisional Officer, P. W. D., Faridpur.*

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 6th November 1919.

Summary.—The week was rainless. In West Bengal highland paddy is suffering owing to the continued want of rain. Harvesting of early winter paddy continues. Sowing of spring crops is proceeding, but in some western districts the progress is slow owing to insufficient moisture in the soil. The average price of common rice for the province has fallen by about 4·16 per cent. as compared with that of the previous week. The conditions in Bankura are published separately.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee. This week.	Price of common rice, in seers, per rupee. Previous week.	Character of the weather, condition of crops, etc.

RESOLUTION ON THE REPORT ON THE WORKING OF THE CO-OPERATIVE SOCIETIES IN BENGAL FOR THE YEAR ENDING THE 30TH JUNE 1919.

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Agricultural Branch.

CALCUTTA, THE 14TH NOVEMBER 1919.

RESOLUTION No. 8592.

READ—

The Report on the working of the Co-operative Societies in Bengal for the year ending the 30th June 1919.

1. One of the principal features of the previous year was the strain which had been put upon societies by the low price obtained by cultivators for their jute and rice; recoveries were seriously affected and societies showed caution in advancing loans. A sharp contrast is afforded by the report of the present year under review, when better prices were obtainable

for jute and the price of rice rose to unprecedented heights. Though the Registrar in his report makes certain reservations in drawing a deduction from these facts and points out that the bulk of the societies lie in jute areas, it is significant that the rise in the price of both the rice and jute produced by the members synchronised with an increase in the financial prosperity of the co-operative societies to which they belong.

2. During the year under report the increase in the number of societies was 615, in the number of members 16,021, and in the working capital Rs. 36,34,692, compared with 557 societies, 19,538 members and Rs. 41,68,578, the increase of the previous year. That there was no greater expansion is due to the care with which applications for societies have been scrutinised, a sound measure dictated by past experience of unsound societies formed in haste and in ignorance of the principles and duties of co-operation. With the increase in societies, the number of inspectors rose from 41 to 50 and honorary organisers from 45 to 48. The number of auditors rose from 14 to 28 and two divisional auditors were appointed in the year by Government. Audit is of the first importance; and it is satisfactory to learn that a proper detailed audit is now one of the chief features of the working of the department.

3. Repayments during the year were good; but, though there was a corresponding increase in advances, some caution was still exhibited in advancing loans. The central banks advanced Rs. 32½ lakhs and recovered Rs. 23 lakhs in 1918-19 against Rs. 18 lakhs and Rs. 10¾ lakhs, respectively, in 1917-18. Similarly, the agricultural societies advanced Rs. 28 lakhs and recovered Rs. 23½ lakhs in 1918-19, against Rs. 23¾ lakhs and Rs. 15¼ lakhs, respectively, in the previous year. Two other satisfactory features are that the amount of loans overdue to such societies was reduced by Rs. 6 lakhs and that their reserve funds were increased from Rs. 9¾ to Rs. 14½ lakhs.

4. The progress of the Bengal Provincial Co-operative Federation, Ld., which was opened in the previous year, surpassed expectation. By the 30th June 1919, 49 central banks and 8 other societies had joined it. The Federation received Rs. 10¾ lakhs of the idle funds of its members for investment and made repayments to the extent of Rs. 8 lakhs; and it saved one central bank from disaster during the year under review. Of the Rs. 13 lakhs of deposits taken our from central banks at a high rate of interest it repaid nearly Rs. 4 lakhs. The assertion of the Registrar that the Federation has already accomplished the purposes for which it was formed, viz., to keep money employed all the year round by the utilisation of the surplus funds of its members and to assist them in other ways as far as possible, appears therefore to be well founded.

5. The number of central banks increased from 52 to 58, their working capital from Rs. 67½ lakhs to Rs. 82½ lakhs, and their paid-up share capital from Rs. 10 lakhs to Rs. 11¾ lakhs. At present only 14 of these banks have appointed paid secretaries or assistant secretaries. The number of unions decreased from 13 to 12 in the year under review; but they are reported to be neither successful nor popular in Bengal.

6. Agricultural societies have increased in numbers from 2,067 at the end of 1915-16 to 2,857, 3,374 and 3,923 at the end of the years 1916-17, 1917-18 and of the year under review, respectively. Practically all the new societies formed during the year were of the type based on shares, a type re-introduced during the year. Many of the old societies have also now adopted bye-laws providing for shares. During the year the membership increased from 1,25,590 to 1,34,755, and the working capital from Rs. 80½ lakhs to Rs. 92¼ lakhs. Much good work was done by the department in the direction of the purification of societies. Large societies of which the membership was too large to admit of the members being thoroughly acquainted with one another were split up; but the most important work of this description was the nursing of bad societies in the attempt to improve them and the liquidation of incurably bad societies. No less than 81 societies were liquidated during the year, against 29 in the previous year; and, as a result of the facilities afforded by the Bengal Public Demands Recovery (Amendment) Act, 1918, realisations in societies under liquidation have been

more than three times as much as the total in all previous years. Most of the unsoundness in the bad societies is due to the dishonesty of office-bearers; but the hope may be confidently expressed that with the more stringent system of audit now in force, the prosecution of certain dishonest office-bearers and the awakening of the members of the societies to the fact of their unlimited liability, the day of dishonest office-bearers will be gone. It is gratifying to note that many instances of the excellent social, moral and economic efforts of the societies continue to be reported. In particular, it is significant of the ultimate practical effect of the existence of the societies that in the Gaibandha subdivision a group of societies maintain that they have not only reduced the rates of interest normally charged in the area for themselves, but for all other residents in it.

7. Considerable activity was displayed during the year in the development of agricultural non-credit and non-agricultural societies, of which the number increased from 17 and 203, respectively, in the previous year to 31 and 262 in the year under review. First and foremost may be mentioned the Naogaon Ganja Cultivators' Co-operative Society, Ld, which has successfully ousted the *ganja* brokers. During the year it realised a profit of Rs. 3 lakhs. Its activities are now being expanded in the direction of a purchase and sale society, cattle insurance, a demonstration farm, education. medicine, relief of distress and town improvement. In fact it is making a bid, justifiable both on the grounds of efficiency and financial stability, to monopolise the local self-government of the *ganja* mahals. Owing to the importance of its work Government has lent to the society the services of Khan Bahadur Ata-ur-Rahman, Deputy Collector, as its chief executive officer. Next in importance comes the development of the weaving industry, particularly in the district of Bankura. The number of weaving societies has increased from 65 to 100, 28 of which were added in Bankura; and towards the end of last year the organization of the Bankura Industrial Co-operative Union was effected. At the beginning of the year, however, the prospects of the union were blank owing to the fluctuations in the price of yarn and of piece-goods, but two good orders which were received about Christmas time were so well executed that they put the union on its feet. At the end of June 41 societies were affiliated to it. A credit of a lakh of rupees was given by the Federation and a guarantee against loss of a quarter of a lakh was given by Government to the union in order that it might give relief by employment to weavers during the famine in Bankura. The guarantee has not been drawn on. On the contrary a profit was made and 500 families of weavers were kept off the famine-relief works. The Governor in Council is indebted to the Revd. Mr. A. E. Brown and Professor Banerjee for the success of this scheme. Nevertheless there are still many obstacles to the development of these weaving societies in Bankura to be surmounted by co-operation. Amongst other societies may be mentioned the milk societies in the neighbourhood of Calcutta which are beginning to be reckoned with as of importance in connection with the supply of pure milk to Calcutta; the Sundarbans Supply and Sale Society at Khepupara which cleared a profit of Rs. 6,000 over its rice transactions; the Khelar Irrigation Society in Midnapore where the fields irrigated by the society yielded four or five times as much rice per bigha as the adjoining lands which were affected by drought; and the Central Co-operative Anti-malaria Society which was organised at the end of the year with the object of propagating the formation of primary anti-malaria societies in the mufassal and to assist them when formed. Several eminent medical men are associated with this society.

8. The Bengal Co-operative Organisation Society has attracted to itself representative men from the land-owning, mercantile and professional classes and has completed a year of useful propaganda. The circulation of the Bengal and Bihar and Orissa Co-operative Journal, which it took over, has increased, whilst its Bengali equivalent, the "Bhandar," is much appreciated by an increasing circle of readers. Three pamphlets were published by the society during the year and arrangements were made for a course of public lectures on co-operation. As a result of a University conference

held under its auspices a committee was appointed for propaganda in the University and colleges. The society also participated in the Dacca, Mymensingh, Howrah and Khulna exhibitions. The Governor in Council is glad to notice that so much useful work has been done by the society. At the Tenth Provincial Conference of co-operative societies, which was opened by His Excellency fifteen resolutions were passed and are now under consideration.

9. The Governor in Council congratulates Mr. Donovan on the energy and enthusiasm shown by himself and his officers in the promotion of the various aspects of the co-operative movement in Bengal. His thanks are due to Professors Coyajee and Mukharji for the services rendered by them in connection with the Co-operative Journal. His Excellency in Council also records his appreciation of the help afforded by the ever-increasing number of persons interested in the movement ; in particular, he is pleased to notice that several well-known zamindars are showing activity in their sympathy towards it.

By order of the Governor in Council.

M. C. McALPIN,
Secy. to the Govt. of Bengal.

RESOLUTION ON THE REPORT OF THE BOARD OF REVENUE ON THE ADMINISTRATION OF WARDS', ATTACHED AND TRUST ESTATES IN THE PRESIDENCY OF BENGAL FOR THE BENGALI YEAR 1325 (1918-19).

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Land Revenue Branch.

CALCUTTA, THE 14TH NOVEMBER 1919.

RESOLUTION—No. 8513.

READ—

The report of the Board of Revenue on the administration of Wards', Attached and Trust Estates in the Presidency of Bengal for the Bengali year 1325 (1918-19).

Number of estates under management.—Four new estates were brought under the Court of Wards and one estate was released free from debt during the year. As the Jessore portion of the Janbazar estate No. 1 is now treated as a separate estate, 69 estates were under the management of the Court of Wards at the close of the year, against 64 in the preceding year.

2. **Payment of revenue and cesses.**—The total amount of revenue and cesses due to Government, including arrears, was Rs. 14,69,169. Payments amounted to Rs. 13,65,169 or 92·9 per cent. as in the previous year. The heaviest balances were again due by the Tagore estate in Bakarganj.

3. **Rent and Cesses due to Superior Landlords.**—The percentage of payment of rent and cesses to superior landlords showed some decrease, being 82·5 per cent. of the amount due, against 84·8 per cent. in the previous year. The balance of Rs. 1,12,278 out of a total demand of Rs. 6,44,581 is due mainly to non-adjustment of accounts, accumulation of petty dues allowed by superior landlords, failure of co-sharers to pay their share of dues, and certain pending civil suits.

4. **Collection of rents and cesses.**—Despite the bad monsoon and poor rice harvest of the year under report, there was some improvement in the percentage of collection on current demand, which rose from 98·4 in the preceding year to 103·5. The standard of 100 per cent. was exceeded in 40 estates. The improvement in collection was mainly contributed by the Nawab family estate in Dacca and the estates in the Rajshahi Division. The collections in the Kasimbazar estate in the district of Tippera were, on the other hand, affected by the distress in the Brahmanbaria subdivision. Elsewhere the gloomy character of the last part of the year under review is reflected in the report in only one or two instances.

5. The outstanding balances due to all the estates aggregated over Rs. 67 lakhs, representing 147·2 per cent. on the current demand, against 141·5 per cent. in the previous year. The balances exceeded the current demand in all the divisions. In the report of the previous year the Board anticipated that some progress could be made in writing-off fictitious or irrecoverable items, which account for at least 30 per cent. of the balances; but it is now reported that the managers show a strong prejudice against applying for their remission. In the interests of good estate management it is obvious that such items should be written off, when such a course is admissible.

6. **Civil Suits.**—The number of civil suits and certificates filed during the year for the recovery of rent and cesses increased by 1,241 and 1,600 over those of the preceding year. Out of 5,389 civil suits for disposal, 4,352 were decided, but less than one-third of the decretal amount was realised. Of the total number of 35,641 certificates for disposal 21,640 were disposed of, and 57·1 per cent. of the total claim was realised against 63·6 per cent. in the previous year.

7. **Debts of estates.**—The total liabilities of the estates under the management of the Court of Wards stood at over Rs. 58 lakhs, against nearly Rs. 82 lakhs in the previous year. The decrease is due largely to the exclusion of the claims preferred by the proprietors of the Bhawal estate against one another, a considerable amount of which has proved to be fictitious. With a few exceptions all the estates in the Presidency are more or less heavily encumbered, though considerable reductions have already been effected by good management. The indebtedness of Wards' estates has been a special subject of scrutiny and examination by the Board during the year under report, and a regular and systematic scheme for the repayment of debts is in preparation. Two new appendices showing clearly the financial position of the different estates and the progress in the repayment of debts are a marked feature of the report.

8. **Cost of management and expenditure on improvements.**—There was a slight decrease in the percentage of cost of management on the current rent and cess demand of estates, viz., from 13·2 in the preceding year to 13·1. The standard of 10 per cent., now regarded as obsolete, was exceeded in all the divisions except the Presidency Division. The estates set a good example by the good work done on agricultural, sanitary and other improvements, and in education. The total expenditure on improvements, schools and dispensaries was Rs. 1,70,158, or 3·7 per cent. of the current demand. Agricultural demonstrations in Wards' estates are now conducted mostly under the supervision of officers of the Agricultural Department, with encouraging results.

9. **Education of wards.**—The progress made in the education of wards, which is one of the special cares of the Court, was generally good. It is satisfactory to note that two of the wards were sent to the annual survey and settlement training camp and that others are being trained in zamindari management, so as to make them fit for, and useful in, their future position in life as, it is to be hoped, resident proprietors.

10. The thanks of the Governor in Council are due to the Board of Revenue for its efficient administration of the estates under the Court of Wards. The good work of the managers mentioned in the report will be noted.

By order of the Governor in Council,

M. C. McALPIN,

Secy. to the Govt. of Bengal.

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR OCTOBER 1919.

I. **Character of the Season.**—During the month the rainfall was above the average in seven districts and elsewhere below the normal. The usual rainfall statement is appended.

II. **Progress of Agricultural Operations.**—Preparatory tillage for the spring crops, harvesting of early winter paddy and sowing of potatoes, oil-seeds, pulses continued. Steeping and washing of jute were completed.

III. **State of Standing Crops.**—The condition of winter paddy, sugarcane and other standing crops was generally reported to be satisfactory. More rain in the western districts would have benefitted the transplanted paddy on high lands which suffered to some extent owing to drought.

IV **Prospects and Probable Outturn.**—The rain in both Northern and Eastern Bengal greatly improved the prospects of winter paddy The prospects of sugarcane and other standing crops reported to be promising on the whole.

V. **Damage to Standing Crops.**—"Ufra" disease was reported to have caused some damage to standing crops in Noakhali Some damage to transplanted paddy was caused in *char lands* in Jamalpur subdivision of Mymensingh district owing to the rise of rivers

VI. **Condition of Agricultural Stock.**—The condition of livestock was reported to be fair. Cattle disease was, however, reported from places in the districts of Rangpur, Darjeeling, Malda, Dacca, Mymensingh and Tippera.

VII. **Failure of Pasturage and Fodder.**—The supply of fodder was sufficient throughout the province.

VIII. **Price of Food-Grains.**—During the month under review the price of common rice for the province rose in the district of Mymensingh, fell in eight districts and remained stationary elsewhere It varied from four seers a rupee in Darjeeling, Rangpur and Mymensingh to seven seers a rupee in the Chittagong Hill Tracts.

IX. **Condition of Agricultural People.**—Distress continued to prevail in the Brahmanbaria subdivision of Tippera district Relief measures continued.

R S FINLOW,
Offg Director of Agriculture, Bengal

DACCA :
The 15th November 1919.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 13th November 1919.

Summary.—The week was practically rainless. Harvesting of winter paddy continues. Sowing of potatoes, tobacco, wheat and oilseeds is progressing favourably. The prospects of standing crops are generally reported to be hopeful. The average price of common rice for the province has fallen by about 0·43 per cent. as compared with that of the previous week.

RESOLUTION ON THE ADMINISTRATION REPORT ON THE HOWRAH BRIDGE FOR THE YEAR 1918-19.

GOVERNMENT OF BENGAL.

MARINE DEPARTMENT.

CALCUTTA, THE 22ND NOVEMBER 1919.

RESOLUTION—No. 3632Marine.

READ—

The Administration Report on the Howrah Bridge for the year 1918-19.

THE year under review opened with a deficit balance of Rs. 4,02,944 on revenue account.

2. The income of the Bridge during the year amounted to Rs. 3,74,648 against Rs. 3,43,284 in the previous year. The total expenditure was Rs. 2,93,863, including Rs. 4,258 expended on renewals to the Bridge

structure and repairs to the ferry [illegible] year the total expenditure was [illegible] expenditure of Rs. 1,41,[illegible] [illegible] structure and repairs to the ferry landing stage at [illegible].

As in the previous year, the [illegible] was principally due to—

(1) the receipts from the East Indian Railway [illegible], which amounted to Rs. 2,86,276 against their guaranteed minimum of Rs. 2,00,000;

(2) the contribution of Rs. 26,000 made by the Bengal-Nagpur Railway in consideration of their passenger traffic over the Bridge; and

(3) the increased earnings of the two ferry steamers.

3 The renewals to the Bridge structure and repairs to the ferry landing stage at Howrah were completed during the year, the total sums spent on these works up to 31st March 1919 being Rs. 3,59,305.

The working result of the year was a surplus of Rs. 80,785 as compared with a deficit of Rs. 83,911 in the previous year, so that the closing deficit on revenue account on the 31st March 1919 stood at Rs. 3,22,159. It is anticipated that the present large debit balance will be gradually extinguished from future surpluses.

4. The number of vessels that passed through the Bridge during the year and the preceding four years is given below :—

	1918-19	1917-18	1916-17	1915-16	1914-15
Sea-going vessels	21	60	61	80	75
Inland steamers and flats	2,590	2,345	2,806	2,704	2,422
Steam-tugs and steam-launches ...	914	773	886	897	805
Port Commissioners' vessels ...	59	39	27	39	71
Government steamers and flats ...	8	7	9	9	...
Total ...	3,592	3,224	3,780	3,729	3,372

5. The total number of accidents during the year was 3[illegible] against 39 in the previous year. As the result of these one life and four boats were lost.

6. The Bridge was opened during the year on 303 occasions, viz., 51 times during the day and 252 times at night.

7. The report of Mr. Basil Mott on the type of the proposed new bridge to which reference was made in the resolution on the report for 1917-18, has been received; but as yet no final decision has been made as this Government is consulting further expert opinion on the subject.

By order of the Governor in Council,

F. A. A. COWLEY,

Secy. to the Govt. of Bengal.

[illegible] REPORTS ON WEATHER AND CROPS.

[illegible] November 1919.

Summary.—During the first part of the week light to moderate rain fell almost throughout the province. It has somewhat [illegible] the late transplanted paddy and has greatly facilitated the growth of vegetables and other spring crops. Harvesting of winter paddy and sowing of spring crops are proceeding. The average price of common rice for the province has risen by about 1·36 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice, in seers, per rupee. This week	Price of common rice, in seers, per rupee. Previous week.	Character of the weather, condition of crops, etc.

LIBERALITY OF BABU SAILAJA NATH RAI CHOWDHURY AND BROTHERS, ZAMINDARS OF SATKHIRA, IN THE DISTRICT OF KHULNA.

No 4032M., dated Calcutta, the 27th November 1919.

From—The Hon'ble Mr. L. S. S. O'MALLEY, C.I.E., I.C.S., Secretary to the Government of Bengal, Municipal Department.

To—The Commissioner of the Presidency Division.

WITH reference to your letter No. 81Mis.-G., dated the 16th October 1919, regarding the donation of Rs. 20,000 made by Babu Sailaja Nath Rai Chowdhury and brothers, zamindars of Satkhira, towards the Satkhira waterworks, I am directed to request that the thanks of Government may be communicated to them for their liberality and public spirit.

REPORT ON THE STATE OF THE SALT MARKET FOR THE SECOND QUARTER OF THE YEAR 1919-20.

GOVERNMENT OF BENGAL.

FINANCIAL DEPARTMENT.

Separate Revenue Branch (Salt).

No. 3300S.R.

Dated Calcutta, the 28th November 1919.

THE following report on the state of the salt market for the second quarter of the year 1919-20, comprising the months of July, August and September 1919, in the Presidency of Bengal, is published for general information.

2. The quantity of salt of every description cleared during the quarter amounted to 2,892,168 maunds (including 2,275,152 maunds issued under the credit system), as compared with 2,071,412 maunds (including 1,506,424 maunds issued under the credit system) in the previous quarter and 3,047,605 maunds (including 2,388,658 maunds issued under the credit system) in the corresponding quarter of the previous year. The net amount of duty levied was Rs. 39,68,466 (including Rs. 32,00,209 adjusted under the credit system), as against Rs. 24,72,946 (including Rs. 17,71,330 adjusted under the credit system) in the previous quarter, and Rs. 31,87,156 (including Rs. 23,82,659 adjusted under the credit system) in the corresponding quarter of the previous year.

3. The subjoined Table I shows in detail the importations into the Port of Calcutta and the total clearances of sea-imported salt during the quarter, compared with the figures of the corresponding quarters of the two previous years:—

Table

Total	1,690,311	1,616,961	2,556,721	2,657,[illegible]18	2,537,252	2,639,663*

* Inclusive of 2,275,152 maunds of salt issued under the credit system.

Compared with the corresponding quarter of the previous year and the same quarter of 1917-18, importations were less by ·8* and more by 50·1 per cent., respectively, and clearances were less by 4·4 and more by 57·1 per cent, respectively. As compared with the corresponding period of the previous year, the increased imports from the United Kingdom and Spain, and decreased imports from Port Said, Aden and Massowah, are noticeable. There were no imports during the quarter from Madras and Bombay.

4. Table II shows the quantity of sea-imported salt remaining in the warehouses at the close of the quarter as compared with the preceding four quarters:—

Table II.

5. The figures showing the despatches of salt from Calcutta by different routes during the quarter under report will be published as usual in the *Calcutta Gazette* by the Director of Statistics with the Government of India when they are available.

6. The quantity of salt despatched during the quarter by the East Indian Railway to stations beyond Buxar was *nil* as in the previous quarter, and in the corresponding quarter of the previous year.

7. The quantity of saltpetre salt excised in the refineries of Bengal during the quarter amounted to *nil*, as compared with *nil* in the previous quarter and 138 maunds in the corresponding quarter of the previous year.

8. No information was available concerning the shipments of Liverpool salt during the quarter for the Port of Calcutta.

9. Table III shows the average wholesale prices per 100 maunds of salt at the Port of Calcutta during each fortnight of the quarter:—

As compared with the corresponding quarter of the previous year, the quantities admitted into bond and cleared from bond and shipboard were less by 55·4 and 9·6 per cent., respectively.

By order of the Governor in Council,

A. MARR,
Secretary to the Govt. of Bengal.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 27th November 1919.

Summary.—The week was practically rainless. Reaping of winter paddy and sowing of spring crops continue. Vegetables and other standing crops are doing well. The average price of common rice for the province has fallen by about 3·36 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	Price of common rice in seers per rupee. This week.	Price of common rice in seers per rupee. Previous week.	Character of the weather, condition of crops, etc.

N.B.—This is an abstract of prices of the following markets :—

Wholesale.—Chetla Hât, Ramkrishnapur Hât, Sealdah Fish and Milk Markets, Posta Bazar.
Retail.—Sir Stuart Hogg Market, Orphanganj Market, Sobha Bazar, Nutan Bazar, Raja Babu's Bazar, Bow Bazar, Jogu Babu's Bazar, Taltolla Bazar.

S. N. GHOSH,
for *President, Advisory Food Committee.*

CALCUTTA, *the 1st December 1919.*

DEPARTMENT OF STATISTICS, INDIA.

CALCUTTA TRADE FLUCTUATIONS.

THE following tables are intended to show the trade by all routes, *i.e.*, by rail, river, canal, road, and sea, of the Calcutta block* in certain selected articles during the six months, April to September, 1919, as compared with the corresponding period of 1918 and 1917. The statistics have been compiled from returns furnished by the Collector of Customs, Calcutta, Railway Audit Offices, Steamer Companies, the Commissioners for the Port of Calcutta, the Collectors of the 24-Parganas and Howrah, and the Assistant Engineer, Calcutta Canals.

General Summary.

Imports.—The imports of rice, including paddy†, into Calcutta* by rail, river, canal, road, and sea (coastwise) during the six months, April to September, 1919, amounted to 12,009,000 maunds, as against 6,410,000 maunds in the corresponding period of the preceding year—an increase of 87 per cent. There was an increase (15 per cent) in the imports of coal and coke (47,191,000 maunds as against 41,057,000 maunds last year). The imports by rail, river, road, and sea (coastwise) of Indian cotton piecegoods showed an increase of 78 per cent, the total value amounting to Rs. 4,81,49,000 as against Rs. 2,70,97,000 in 1918. The quantity of indigo imported during the six months, April to September, 1919, decreased from 4,579 maunds to 2,179 maunds. The imports of raw jute amounted to 1,798,000 bales as against 2,357,000 bales—a decrease of 24 per cent. The importations of gunny bags also showed a decrease of 30 per cent (169 million bags as against 243 millions in the preceding year). The total imports of oilseeds (linseed and rape and mustard seed) increased by 33 per cent, from 3,427,000 maunds to 4,557,000 maunds. The imports of sugar decreased by 19 per cent, from 349,000 maunds to 282,000 maunds, and those of tea by 17 per cent, from 1,564,000 maunds to 1,300,000 maunds

Exports.—The exports of cotton piecegoods, foreign, from Calcutta by all routes during the six months, April to September, 1919, decreased by 5 per cent (Rs. 11,87,05,000 as against Rs. 12,50,51,000 last year). The exports of gunny bags (including the exports by sea to foreign countries) decreased from 686 million bags to 537 million bags, and the shipments of gunny bags to other Indian ports decreased from 21 millions to 19 millions in number in the period under review. The quantity of kerosene oil despatched from Calcutta and Budge-Budge by internal routes and by sea (coastwise) increased from 2,473,000 maunds to 2,817,000 maunds, or by 14 per cent.

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore Docks.

† One maund of paddy is equivalent to 25 seers of rice.

TABLE I

Trade of Calcutta in certain selected articles in the six months, April to September, 1919, compared with the corresponding months of 1918.

LIBERALITY OF RAJA RAO JOGENDRA NARAYAN ROY BAHADUR OF LALGOLA, IN THE DISTRICT OF MURSHIDABAD.

No. 2028, dated Calcutta, the 9th December 1919.

From—The Hon'ble MR. L. S. S. O'MALLEY, C.I.E., I.C.S., Secretary to the Government of Bengal, General Department.

To—The Commissioner of the Presidency Division.

IN continuation of this department endorsement No. 1832, dated the 22nd November 1919, I am directed to request that you will be so good as to convey the thanks of Government to Raja Rao Jogendra Narayan Roy Bahadur of Lalgola, in the district of Murshidabad, for his liberality and public spirit in making an endowment consisting of certain properties and Government securities in Government promissory notes and War Loan bonds to the face value of Rs. 48,100, to be called the Rao Mahesh Narayan Roy Fund for the maintenance of the Mahesh Narayan Academy at Lalgola, and for the foundation of scholarships for students from the said school passing the Matriculation Examination of the Calcutta University in the first division, but not obtaining Government scholarships.

RESOLUTION ON THE REPORTS ON INLAND EMIGRATION UNDER THE ASSAM LABOUR AND EMIGRATION ACT, 1901, FOR THE YEAR ENDING THE 30TH JUNE 1919.

GOVERNMENT OF BENGAL.

COMMERCE DEPARTMENT.

Emigration Branch.

CALCUTTA, THE 8TH DECEMBER 1919.

RESOLUTION—No. 4612Emi.

READ—

The Reports on Inland Emigration under the Assam Labour and Emigration Act, 1901 (VI of 1901), for the year ending the 30th June 1919, submitted by the Superintendent of Emigration, Calcutta, and the District and Assistant Superintendents of Emigration.

1. The only administrative change of importance introduced during the year under review was the discontinuance of the submission to District Magistrates of a monthly list of emigrants engaged by garden sardars. The large and unprecedented increase in the number of emigrants despatched to the labour districts was the most marked feature of the year.

2. One thousand five hundred and twenty-two garden-sardars (including 353 sardarnis) were employed during the year in this Presidency as against 640 (including 190 sardarnis) in the year 1917-18. All of them worked under the control of duly licensed local agents. The number of local agents' licenses issued during the year was 6, or one less than in the previous year.

3. Recruiting operations were conducted in the districts of Burdwan, Midnapore, Bankura and Birbhum, where 2,364 emigrants were recruited during 1918-19 as against 508 in the preceding year. The largest number of emigrants went from the districts of Midnapore, Bankura and Burdwan, viz., 1,458, 701 and 146, respectively. No criminal case connected with emigration was reported during the year 1918-19.

4. The total number of emigrants from Bengal and other provinces who embarked during the year at Goalundo was 119,883 as compared with 9,808 in the previous year, the increase being attributed partly to the improved and more elaborate recruiting organisation made by the tea industry and partly to the scarcity and high prices of food-stuffs in the recruiting districts. The poor health and lowered physical condition of the emigrants and the abnormally large numbers in which they were proceeding to the labour districts resulted in a serious outbreak of cholera and influenza among them. The rush of emigrants to the port of embarkation was unprecedented during the months of January and February 1919, when the number of admissions to the Goalundo charitable hospital was highest, the number of sick emigrants seeking admission rising to 268 on the 13th February 1919. This hospital which had only 23 beds was suddenly called upon to accommodate on an average 175 patients daily. The dislocation of steamer traffic and railway arrangements aggravated the situation, the available space in the rest-houses at Goalundo being quite insufficient to accommodate the large number of emigrants detained there on account of want of space in the steamers. The difficulty was, however, overcome with the assistance of the steamer companies, the Assam Labour Board and the Surgeon-General with the Government of Bengal, by the provision of temporary extra accommodation for about 250 patients and by the engagement of additional temporary hospital staff. Steps were taken at the same time to prevent as far as possible the importation of cholera cases from affected areas in the recruiting districts and to maintain the rest-houses at the several halting places in this Presidency in good sanitary condition. These measures, together with the introduction

of anti-cholera inoculation at all local agencies, restored the situation at Goalundo to a normal condition by the end of February 1919. The question of more efficient control over the sanitary arrangements for emigrants in transit, and the establishment of an emigration hospital at Goalundo, were discussed at a conference held in the office of the Assam Labour Board on the 1st August 1919. Remedial measures are now under the consideration of the Board in consultation with the local Governments concerned.

5. Three hundred and sixty deaths were reported to have occurred among emigrants at Asansol, Kharagpur or Naihati on their way to Goalundo, and there were 545 deaths among 120,483 emigrants arriving at the latter station. There was no death during the steamer journey among the 40,887 emigrants who embarked for Cachar and Sylhet, but of 78,996 emigrants who embarked for Assam 332 died during the voyage.

6. Five emigrants who refused to embark were released under the orders of the Subdivisional officer, Goalundo, 13 were rejected as physically unfit for labour on tea estates, and two emigrants were repatriated from the labour districts through Goalundo.

7. In connection with the transport of labour to Assam receipts rose from Rs. 1,566 in the preceding year to Rs. 1,840, while the expenditure fell from Rs. 18,847 to Rs. 14,482.

8. The Governor in Council desires to thank the several officers of this Government, the Assam Labour Board and the steamer companies, who rendered valuable assistance in combating the outbreaks of cholera and influenza among the emigrants at Goalundo. The thanks of Government are also due to the Superintendent of Emigration, Calcutta, for his report and to the local officers for their assistance in the administration of the Act.

By order of the Governor in Council,

A. MARR,

Secy. to the Govt. of Bengal.

RESOLUTION ON THE ADMINISTRATION REPORT OF THE COMMISSIONERS FOR THE PORT OF CALCUTTA FOR THE YEAR 1918-19.

GOVERNMENT OF BENGAL.

MARINE DEPARTMENT.

CALCUTTA, THE 9TH DECEMBER 1919

RESOLUTION—No. 3820Marine.

READ—

The Administration Report of the Commissioners for the Port of Calcutta for the year 1918-19.

General features of the Administration.—The great war, of course, as in the preceding four years, overshadowed all the activities of the Port Trust. The Armistice was signed seven months after the commencement of the financial year under review ; but, as was to be expected, the cessation of hostilities did not immediately bring about any marked improvement in the conditions. The following figures illustrate the position :—

	1913-14.	1914-15.	1915-16.	1916-17.	1917-18.	1918-19.
	Tons.	Tons.	Tons.	Tons.	Tons.	Tons.
I.—Net tonnage of the port	4,256,987	3,714,344	2,967,798	2,804,680	2,094,011	2,292,462
II.—Jetties, Imports ...	1,186,797	917,978	788,431	686,010	633,693	574,833
III.—Docks, Imports ...	613,876	700,133	570,997	444,210	363,383	482,403
IV.— " General Exports ...	1,231,589	920,659	1,054,985	1,185,159	995,112	1,097,562
V.—Docks, Coal Exports	3,017,180	2,633,805	1,610,645	1,994,528	1,0?4,993	1,333,285

Income.—The total income during the year amounted to Rs. 1,90,58,513 against the revised estimate of Rs. 1,86,33,432 and the actuals of Rs. 1,58,39,175 for the preceding year.

Under the following heads the receipts fell appreciably below the revised estimate for the year :—

	Actual.	Revised estimate	Decrease
	Rs.	Rs.	Rs.
Jetties	26,84,199	27,62,550	78,351
Tea Warehouse ...	3,16,305	3,32,300	15,995
Petroleum Wharf ...	4,01,770	4,12,670	10,900

This decrease was more than counterbalanced by increases under other heads, the principal of which are the following :—

	Actual.	Revised estimate.	Increase.
	Rs.	Rs.	Rs.
Rentable lands and buildings ...	8,84,119	8,67,050	17,069
Railway ...	16,86,772	16,02,900	83,872
Port ...	4,48,344	4,32,500	15,844
Special war surcharge ...	52,06,535	50,00,000	2,06,535

Expenditure.—The expenditure on Revenue Account amounted to Rs. 1,84,14,423 against Rs. 1,56,29,349 in the previous year and an estimate of Rs. 1,81,76,980 for the year under review.

The chief items of expenditure, which appreciably exceeded the budget estimate were under the following heads :—

	Actuals.	Estimate.	Increase.
	Rs.	Rs.	Rs.
Control ...	10,92,744	10,42,925	49,819
Jetties	9,67,201	9,39,548	27,653
Inland Vessels Wharves ...	2,09,266	1,69,592	39,674
Port	7,11,731	6,84,408	27,323
Port Approaches	10,00,535	9,14,952	85,583
Wet Docks	30,22,432	29,04,570	1,17,862
Ferry Service	3,68,616	3,45,226	23,390

Jetties.—The tonnage handled at the jetties amounted to 574,833 against 633,693 for the year 1917-18, and the total earnings of traffic at the jetties were Rs. 23,91,512 against Rs. 13,52,222 for the preceding year. Although there was a decrease of 58,860 tons in the weight of imports, there was an increase of Rs. 10,39,290 in revenue, Rs. 8,61,564 of which was due to heavy receipts from wharf rent, chiefly on iron, which, owing to market conditions, the importers allowed to lie on the jetty premises. The other items which contributed to the increased revenue were medicines, oilman's stores, sugar, hardware, machinery, rice and miscellaneous articles. On the other hand, the decreased earnings under glassware, cement, piece-goods, tea shooks and unclassified case goods showed a falling off in imports.

Docks.—During the year 790 vessels entered the docks as against 840 vessels in the previous year. Of these the number under the head "Hired transports and Royal Indian Marine vessels" was one against 88 in the previous year. The total imports and exports traffic including coal in tons at the docks were 482,403 and 2,430,817, respectively, against 363,383 and 2,010,105 in the preceding year. The increase of tonnage of imports over that of the preceding year was owing to heavier importations of sugar, rice and wheat, while to the increase in exports coal contributed 318,292 tons and wheat, seeds, rice, jute and manganese ore made up the balance.

Petroleum Wharf, Budge-Budge.—The total number of vessels that were berthed at the Petroleum wharf in 1918-19 was 114 against 106 in the preceding year; but there was a decrease in the number of vessels bringing kerosine oil, the actual figure being 65 in 1918-19 against 76 in 1917-18. The total revenue of the depôt was Rs. 4 lakhs as against Rs. 3·93 lakhs for the preceding year, representing only a nominal increase of Rs. 8,629.

The installation for the storage of petrol in bulk was completed early in June 1918.

Tea warehouse.—The volume of tea traffic dealt with at the warehouse was some 8·6 per cent. less than in the preceding year. The receipts amounted to Rs. 3,16,305 against Rs. 4,59,796 in the previous year.

Ferry service.—Thirteen vessels, including two Howrah Bridge ferry steamers, were at work during the year. The total number of passengers carried in the ferry steamers increased with a corresponding increase in the earnings.

Rates and charges.—During the year the following were the more important changes in rates and charges made by the Commissioners :—

(1) the introduction of an all-round rate of one-half pies per gallon as wharfage on petrol in bulk and in cases imported at Budge-Budge instead of 2 annas per ton of 20 drums ;

(2) the introduction of a terminal charge of 12 annas per ton on goods received at or despatched from the docks and jetties other than ocean-borne traffic ; and

(3) the imposition, as a temporary measure, to expedite deliveries, of a penal rate of rent on iron landed at the jetties.

Navigable channels.—During the year the dredger "Balari" worked on the Eastern Gut bar, while the dredger "Sandpiper" was mainly engaged on the Moyapur Bar. The improvement effected in the river channels by dredging was generally maintained, and there was a steady increase in the number of deep draft vessels leaving the Port and a reduction in instances in which vessels were neaped.

Night navigation.—The restriction of navigation by night of inward bound vessels between Mud Point and Saugor was removed. This step was of great importance to the shipping as it completed the arrangement for both inward and outward navigation by night between Mud Point and Sandheads.

Channel buoys and lights.—During the year all buoys, including gas buoys and moorings, were examined and repaired when necessary.

The working of the automatic lighted semaphore at Phuldobi gave satisfaction. The semaphore is worked by an instrument which indicates automatically the rise of tide at night ; and the inventor of the apparatus, Mr. H. G. Reaks, River Surveyor, received from the Commissioners a bonus of Rs. 15,000 for its use by them.

Capital works.—The chief capital works that were in progress during the year were :—

(*a*) the river-side berths at Garden Reach ;

(*b*) the reclamation work of diversion roads in connection with the new Dock scheme ; and

(*c*) the remodelling scheme at Budge-Budge, including bulk petrol depôt.

Capital account.—The capital account closed with a credit balance of Rs. 49·43 lakhs against Rs. 43·82 lakhs for the preceding year. The total liabilities of the Trust on Capital Account at the close of the year amounted to Rs. 10,27,80,448, while the total assets were Rs. 14,66,53,794.

In addition to these assets, the Commissioners have at their disposal three other funds accumulated out of revenue which constitute an important asset of the Trust. These are the Revenue Reserve Fund, the Vessels' Replacement Fund and the Fire Insurance Fund. The total amount at credit of these funds on the 31st March 1919 was Rs. 71·39 lakhs.

The total expenditure on capital works was estimated at Rs. 11·86 lakhs.

General.—During the year [illegible] general meetings of the Commissioners and 16 Committee meetings were held. Mr. S. C. Williams was Vice-Chairman to the Commissioners from 1st April 1918 to 19th February 1919, when he proceeded on combined leave for nine months. Mr. J. T. McCloughin, Traffic Manager, officiated as Vice-Chairman for the remaining period of the year.

The Governor in Council desires to express his regret at the death of Mr. John Scott, who for over nine years held the post of Chief Engineer of the Trust and to thank the Commissioners, the Chairman, Mr. Stevenson-Moore, C.V.O., I.C.S., and the Vice-Chairman Mr. S. C. Williams for their successful administration of the Trust.

By order of the Governor in Council,

RESOLUTION ON THE ANNUAL IRRIGATION REVENUE REPORT FOR THE YEAR 1918-19.

GOVERNMENT OF BENGAL.

IRRIGATION DEPARTMENT.

CALCUTTA, THE 11TH DECEMBER 1919.

RESOLUTION—No. 5889I.

READ—

The Annual Irrigation Revenue Report for the year 1918 19.

The Major Irrigation Works in Bengal are the Midnapore and Hijli Tidal Canals. The works are in operation. The **Minor Works** for navigation are the Calcutta and Eastern Canals, the Madaripur Bil Route, a portion of the Orissa Coast Canal, the Nadia Rivers and the Gaighatta and Baxi khal. The only irrigation work of this class is the Eden Canal. Training works on the rivers Ganges, Bhagirathi, Dhaleswari and Buriganga and anti-malarial drainage works carried out by this department at the cost of Government are classed under this head.

2. The capital outlay on the Major Works to the end of March 1919 amounted to Rs. 1,11,14,189. The works [illegible] for this outlay comprise two weirs across the Cossye River at Midnapore [illegible] Panchkura and 98·75 miles of main and branch canals, of which [illegible] miles provide for both irrigation and navigation and 29 miles for navigation only; there are in addition 254·5 miles of distributaries. The Terapakia Pass khal, Palaboni khal and the khal leading to the Gewankhali Lock entrance, of which the aggregate length is 20·75 miles, are also maintained for navigation and included as part of the Hijli Tidal Canal. During the year under review no addition was made to the length of the canals or distributaries.

3. The total receipts from the Major Works amounted to Rs. 3,04,605 and the working expenses to Rs. 2,42,463, the result being a net revenue of Rs. 62,142 against Rs. 97,363 in the preceding year. This result is chiefly due to the increase in working expenses of the Hijli Tidal Canal consequent on the silt clearance of Range I, for which purpose the canal had to be closed to traffic for about a month and a half. The general revenues of these canals, which depend considerably upon receipts from navigation, have suffered of late years from railway competition. During the year under review there was, however, some increase in navigation receipts due to the diversion, as in the previous year, of traffic from the railway to the canals owing to restriction on rail-borne goods traffic due to causes arising out of the war.

4. The area irrigated during the year was 80,749 acres as compared with 87,507 acres in 1917-18, and an average of 85,661 acres for the triennium ending March 1918. The decrease was due to seasonable and well distributed rainfall at the commencement of the kharif season.

5. The capital outlay on canals classed as **Minor Works and Navigation** was Rs. 4,02,781 during the year and Rs. 1,41,45,885 to end of the year. The receipts for the year amounted to Rs. 8,87,323 and the working expenses to Rs. 5,72,777.

The financial results of the year and the capital expenditure to date are exhibited in the following statement :—

	Capital expenditure, direct and indirect.		Receipts of the year *less* refunds.	Expenditure of the year *less* refunds.	Net revenue of the year.	Net revenue of the previous year.
	Of the year.	To end of the year.				
Minor Works and Navigation.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Calcutta and Eastern Canals ...	64,884	97,33,054	4,75,974	3,81,911	94,063	—93,839
Madaripur Bil Route ...	3,37,897	43,59,793	3,50,251	80,367	2,69,884	2,63,058

Nadia Rivers ...	...	...	19,950	48,074	—28,124	—82,510
Gaighatta and Baxi Khal ...	...	...	1,450	459	991	2,387
Eden Canal ...	...	...	22,600	52,101	—29,501	9,557
Grand Trunk Canal ...	...	53,038	...	...	...	...
Total ...	4,02,781	1,41,45,885	8,87,323	5,72,578	3,14,745	81,534

6. **The Calcutta and Eastern Canals** form a series of navigable channels mostly natural but partly artificial, by which communication is maintained between Calcutta and Eastern Bengal. The receipts from navigation tolls amounted to Rs. 4,53,867 as compared with Rs. 3,46,216 in the preceding year. The capital outlay incurred during the year was expended principally, as in the three previous years, on the improvement of the Gabkhan-Bharani khal from Chowkighatta to Jhalakati, which was completed during the year at a total cost of Rs. 7,36,535 for works only. This channel which has been improved in order to avoid the tortuous and dangerous route *viâ* the Angeria khal, will now form a link in the main route for steamers between Khulna and Barisal. Capital expenditure was also incurred during the year on the excavation of the Kankrabunia khal in the western Sundarbans, which, when

completed, will serve as an alternative to the Doagra Channel which is rapidly dying.

7. The capital expenditure during the year on the **Madaripur Bil Route,** which connects the Madhumati and Kumar rivers in the district of Faridpur, was incurred chiefly on (1) the improvement of the Lower Kumar river, including easing bends therein, and (2) the construction of an embankment with sluices along the south bank of the channel. The completion report of the project received the approval of the Secretary of State in June 1919. The construction estimate has been closed with effect from the 31st March 1917. These works paid a return of 6·9 per cent. in 1916-17, 6·5 per cent. in 1917-18, and 6·2 per cent. in 1918-19. No less than 5,880 steamers and flats made use of this route during the year under review transporting 424 lakhs of maunds of cargo.

8. **The Orissa Coast Canal** in conjunction with the Hijli Tidal Canal affords communication between Bengal and Orissa, and previous to the opening of the Bengal-Nagpur Railway was the only inland route by which supplies of food could be conveyed into Orissa in time of famine. This canal, which is intended for navigation only, now lies partly (*i.e.*, for a length of 45 miles) in this presidency and partly in the province of Bihar and Orissa. The receipts and working expenses (direct and indirect) for the portion within Bengal were, respectively, Rs. 17,098 and Rs. 9,666 as against Rs. 14,587 and Rs. 31,706 in the year 1917-18. The increased receipts were due to the diversion of railway traffic to the canal. The decrease in working expenses was due to the fact that no extensive repairs to the locks, etc., were necessary during the year

9. The work in the **Nadia Rivers** consists in the training of the river channels by bandals with the two-fold object of maintaining by the scouring of shoals a sufficient depth of water for boat traffic and at the same time improving the sanitation of the country. The former object is only partially attained, but the work done is of use in the interests of sanitation. The committee appointed in February 1917 to consider the report on the Nadia Rivers submitted by Major F. C. Hirst, I.A., Director of Surveys, Bengal, and to advise Government upon the steps to be taken to carry out systematic observations of the changes in the Nadia Rivers, and also, if possible, to improve their condition as navigable channels and as feeders for the Lower Hooghly, have since submitted their report; and it is now before Government. The receipts and working expenses of the Nadia Rivers were Rs. 19,950 and Rs. 48,074, respectively, as against Rs. 16,667 and Rs. 99,187 in the preceding year. Though there has been a slight increase in receipts during the year, it is not likely that, with the growth of railway lines on either bank of the Bhagirathi, and the continued inefficiency of these rivers for the purpose of navigation, in addition to reduction in the rates of tollage from 1906, this system will ever pay its working expenses.

10. **The Gaighatta and Baxi Khal** is a short channel connecting the rivers Damodar and Rupnarain. A sum of Rs. 459 was spent during the year on the upkeep of the khal. The collection of tolls on boat traffic was leased out for two years from 1st April 1917 to 31st March 1919 at a rental of Rs. 3,400 per annum. Owing to restricted boat navigation during the year on account of the silted up condition of the channel, a remission of rent had to be granted to the lessee, and the rent realised amounted to Rs. 1,450 only.

11. **The Eden Canal** was originally constructed for sanitary reasons, but it is now used to some extent for irrigation. It was worked during the year at a loss of Rs. 29,501. against a profit of Rs. 9,557 in the preceding year. This was due to a decrease in the area irrigated during the year, and to an increase in the cost of maintaining the canal including the cost of new works taken up and completed.

12. The work in connection with **the Improvement of the Bidyadhari River** by creating a spill reservoir for the flood tide was in progress during the year. The operations already undertaken have proved satisfactory; and it is expected that the continuation and extension of the operations will

effect further improvement by which the life of the river will probably be prolonged for a number of years.

13. Surveys were continued during the year in connection with projects for mitigating the effects of the Damodar floods, and the following works besides those dealt with in the last year's resolution were started with that object in view :—

(*a*) the improvement of the Hoorhoora khal,

(*b*) the improvement of the Uchchi Nala as a drainage outfall,

(*c*) the raising of the embankments on the south of the Ajai River, and

(*d*) the raising of the Damodar left embankment.

Investigations were carried out in connection with storage reservoirs in the basin of the Damodar and Barakar Rivers. Surveys were also carried out in connection with the proposed Damodar canal project.

14. (*i*) **Training works** were, as usual, carried out in the Dhaleswari and Buriganga rivers to facilitate navigation and to improve the water-supply of the town of Dacca. Dredging operations were also carried out on the off-take (from the Jamuna) of the Dhaleswari River. These dredging operations were started on the 8th November 1918, but had to be stopped on the 28th December 1918 owing to the possibility that the dredger " Foyers " might be shut in by the falling river. These operations were successful to a certain extent, the result being an increased flow of water in the Dhaleswari river throughout the cold and hot weather seasons.

Spurs were also erected in the Buriganga with the object of deflecting the current to the right bank of the river and inducing a greater flow through the Ati khal. The results proved satisfactory.

(*ii*) Training works were carried out also during the year through the agency of the India General Navigation and Railway Company, Ltd., on the river Ganges between Rajmahal and Goalundo.

(*iii*) To improve navigation as well as the sanitary conditions and water-supply of the town of Rampur Boalia, training works were carried out on the inner channel of the river Ganges.

(*iv*) At the mouth of the Bhagirathi River, at its off-take from the Ganges, no dredging operations were done during the year owing to adverse circumstances ; endeavours were made to improve the channel by means of bandalling only, so as to improve sanitary conditions by an increased flow in the river. The operations were not su ccessful.

15. **General.**—The most important problems with which the Irrigation Branch of the Public Works Department in Bengal have to deal are not connected with irrigation properly so called, but are mainly of a sanitary character, or are in connection with navigation or works of protection against floods. The work of the branch may be divided into (*a*) irrigation ; (*b*) flood disposal and regulation, both tidal and non-tidal ; (*c*) river training, both tidal and non-tidal ; (*d*) drainage, both tidal and non-tidal ; (*e*) anti-malarial drainage ; and (*f*) navigation, open and closed canals for boats and inland steamers. The problems to be faced are of a very far-reaching character and affect practically the whole of Bengal, which is below the high flood-level of the network of rivers which intersect it. These rivers spill over their banks when in flood and irrigate large areas of rice, and deposit the suspended silt on the land, which acts both as a fertilizer and in building up the land itself. The problem which then arises is to regulate the water on the land, and to provide for its final drainage after the crop has matured ; and the whole question is therefore one of irrigation combined with agricultural and sanitary drainage As such rivers are apt to change their course, the natural channels become blocked both from natural and artificial causes, the areas submerged by flood become stagnant bils, and the whole country suffers from lack of proper irrigation and drainage. It is this side of the problem which requires special study and special engineering treatment for proper development. The solution of those problems depends to a very great extent on the

observations of land levels and the collection of accurate hydraulic data over very large areas.

The surveys started in October 1917 in connection with the conservancy of the rivers Dhaleswari and Buriganga were continued during the year, and the Executive Engineer placed on special duty for the purpose continued his investigations throughout the year. He has submitted certain projects which are now under consideration.

Investigations in connection with anti-malarial works into the drainage conditions over large areas in the districts of Jessore, Nadia, Khulna, Midnapore and the 24-Parganas were continued and valuable information obtained.

16. The Irrigation Department during the year was in charge of Mr. F. A. A. Cowley. The thanks of Government are due to him for the efficient conduct of the affairs of the department during the year and to Mr. Addams-Williams, C.I.E., Superintending Engineer on special duty, for his zeal and energy in the conduct of the enquiries into the drainage conditions in this presidency. The good work of other officers has also been noted by Government.

ORDER.—Ordered that a copy of this resolution be published in the *Calcutta Gazette* and that a copy thereof and of its accompaniments be submitted to the Government of India in the Public Works Department and circulated to other Governments and to all departments and officers of this Government as usual.

By order of the Governor in Council,

F. A. A. COWLEY,

Secy. to the Govt. of Bengal.

* New gauge fixed at Rajmahal from 1st June 1910 in place of the gauge at Sahebganj. The zero of gauge at Rajmahal 56·46 ft. above M.S.-L. from 10th February 1916 to 15th June 1918. From the 16th June 1918 to 6th April 1919 April 1919 it is 56·919 ft. above M.S.-L.

† To compare the reduced levels shown in these monthly printed statements before and after the 1st June 1903, 5·78 ft. October 1909).

(*a*) A new gauge fixed at Monghyr on 16th July 1914.

(*b*) From the 1st November 1915 the zero of gauge was 2·43 ft. above M.S.-L. Previous to that the zero was at M.S.-L. zero is 1·509 ft above M.-S.L

(*c*) From the 25th January 1916 to 4th April 1919 the zero of gauge at Berhampore was 30·99 ft. above M.S.-L. From

(*d*) From the 26th October 1916 a temporary wooden gauge with its zero at 19·00 ft. above M.S.-L. was erected at 3rd June 1919. From 4th June 1919 the zero is 1·51 ft. above M.S.-L.

(*e*) Gauge shifted from Sabik Goalundo to Fakirabad from 30th June 1919.

The 12th December 1919.

RESOLUTION ON THE ANNUAL PROGRESS REPORT ON THE FOREST ADMINISTRATION IN THE PRESIDENCY OF BENGAL FOR THE YEAR ENDING THE 30TH JUNE 1919.

GOVERNMENT OF BENGAL.

REVENUE DEPARTMENT.

Forests Branch.

CALCUTTA, THE 19TH DECEMBER 1919.

RESOLUTION—No. 9655For.

READ—

The Annual Progress Report on the Forest Administration in the Presidency of Bengal for the year ending the 30th June 1919.

READ ALSO—

The corresponding report of the previous year and the Government Resolution thereon.

SIR HENRY FARRINGTON was in charge of the Bengal Forest circle throughout the year. He was on tour for 289 days and inspected all the

divisions and divisional offices except Darjeeling, which was inspected after the close of the year. During the year Messrs. L. E. S. Teague, Deputy Conservator of Forests, and J. M. Cowan, Assistant Conservator of Forests, were released from military duty, but Mr. A. R. Nicholson, Deputy Conservator of Forests, remained on that duty throughout the year.

2. **Changes in area and administration.**—The only real change made in the area under the different classes of forests during the year was due to the notification of several areas aggregating 4 square miles in the Darjeeling, Jalpaiguri and Buxa divisions as reserved forest. The total area of all classes of forests, however, decreased by one square mile to 10,701 square miles owing to the recalculation of the areas of the Sitapahar reserve and of the Lebong Cantonment protected forests.

3. **Reservation and demarcation.**—Apart from the four square miles mentioned in the previous paragraph no progress has been made in the final notification of the proposed Ramshai, Khairbari and Torsa reserves owing to lack of funds. Repairs to 1,323 miles of boundary were carried out against 1,260 in the previous year. There still remain 124 miles of boundary to be demarcated, of which 90 form the provincial boundary between Bengal in the Chittagong Hill Tracts and Burma. It is important that this work should be completed as soon as possible.

4. **Working-plans.**—The revised working scheme for the Kurseong division for the year 1919-26 was sanctioned early in the year. The revised working-plans for the Jalpaiguri and Buxa divisions were completed. During the year the compilation of working-plans for the forests in the Chittagong and Chittagong Hill Tracts divisions was commenced. Plans now exist or are under compilation for all areas for which they are required except for 64 square miles.

5. **Communications and buildings.**—One mile of cart road and seven miles of bridle-path were constructed during the year. It is satisfactory to learn that 12 miles of inspection foot-paths were also constructed in the Kasalong and Sitapahar ranges in the Chittagong Hill Tracts division and that they will be useful to the public. The total expenditure on communications amounted to Rs. 18,757 against Rs. 15,904 in the previous year. The total expenditure on buildings was Rs. 33,550 against Rs. 25,311 in 1917-18.

6. **Protection.**—The number of forest offences reported during the year was 3,694 as compared with 2,780 in the previous year. The increase is mainly attributed to increased vigilance by the subordinate staff owing to the grant of adequate rewards to them for the detection of offences, partly to the prolonged drought in the hot weather of 1919 leading to scarcity of fodder and consequently to unauthorised grazing, partly to the large influx of tea garden coolies ignorant of forest rules into the Buxa and Jalpaiguri divisions, and partly to the greater expense of living. In 93 per cent. of cases taken into the court convictions were secured.

The area in which special measures for fire protection were in force increased from 367,854 to 396,606 acres, but the area burnt over amounted to 24,876 against 7,566 acres in the previous year. This heavy increase is mainly due to two large fires in the Haldibari and North Borojhar ranges, and is attributed to the unusually dry character of the hot weather. Measures are under consideration for fire protection in the Chittagong and the Chittagong Hill Tracts divisions.

There has been no change in the area open to grazing, which covers 4,747 square miles. The number of cattle impounded during the year was 7,021 against 4,720 in the preceding year. This increase is again attributed to the prolonged drought in the hot weather and the consequent scarcity of fodder.

No definite conclusions can yet be drawn from the observations which are being conducted on the *sal* fungus. Extensive defoliation was caused by the *sal* defoliator in the Buxa division.

Damage to plantations by elephant, bison, pig and deer is being reduced to a minimum by the use of wire-fencing.

7. **Exploitation.**—No change was introduced into the system of disposing of minor produce. There was a large increase in the outturn of bamboos and of thatching materials, but a fall occurred in the revenues derived from grazing and from royalties for the lease of elephant mahals. Only 34 elephants were caught by licensees, of which 7 died. The amount of timber cut or collected by Government agency rose from 353,508 cubic feet in the preceding year to 644,887 in the year under review. This remarkable increase was mainly due to the supply of timber to the Munitions Board; but there are indications, for example the economical working of the Murti Saw Mill, that a more extensive use of the departmental agency for extraction would lead to larger revenues.

8. Industrial investigation and commercial activity were two noteworthy features of the year under review. Mr. H. S. Gibson, Deputy Conservator of Forests, was placed on special duty under the Director of Industries to enquire into the industrial possibilities of the forests of Bengal. On return from leave Mr. J. C. Carroll, Deputy Conservator of Forests, was deputed as Forest Utilisation Officer to carry out further investigations; and Mr. J. A. Pilgrim, L.T.C., was deputed in the month of June last to investigate tannin materials in the Sundarbans. A lease of 120 square miles in the Buxa forests was given to Messrs. Davenport & Co. for the extraction of all trees other than *sal* by duly controlled fellings for the manufacture of tea chests and three-ply wood. Arrangements were under discussion for the grant of a lease of an area in the Kasalong reserve in the Chittagong Hill Tracts to Messrs. Andrew Yule & Co., for the extraction of bamboos for the manufacture of paper pulp. An application by the Acme Tea Chest Company for the grant of a lease to extract timber for three-ply tea chests in some of the reserved forests in Chittagong also came under the consideration of Government. No applications were, however, received from Indian capitalists.

9. It is satisfactory to learn that the number of persons reported as killed by tigers was only 5 as against 14 in the previous year and 51, the average of the last five years. Thirty-five tigers including three cubs and a large proportion of females were killed as against 46 in the preceding year.

10. **Financial results.**—The results of the year's working were eminently satisfactory. The total revenue increased from Rs. 15,01,670 to Rs. 19,55,394, by over 4½ lakhs, due mainly to departmental working in connection with the production of munitions. At the same time the expenditure increased by only a little over half a lakh from Rs. 7,71,124 to Rs. 8,33,634. The surplus amounted, therefore, to Rs. 11,21,760 against Rs. 7,30,546 in the previous year.

11. **Quinquennial review.**—The Government of India in their circular No. 1F.-31-1, dated the 17th January 1912, desired that the orders of Local Governments on the Forest Reports for the years in which a quinquennial review was issued should be accompanied by a brief review of the events and changes of the preceding five years so as to indicate the direction in which the provincial forest policy is tending. This review is due this year. An account of the main features of forest working during the quinquennium will, therefore, be found in chapter VII of the report of the Conservator. Except towards its termination the period has not been marked by any important development. This is due to the fact that it roughly corresponded with the duration of the war when industrial development, except that due to the war, was dormant, expenditure was reduced to a minimum, and new schemes were kept in abeyance. The average annual total receipts during the last five years have been Rs. 14,53,023 as compared with Rs. 14,63,702 during the period from 1909-10 to 1913-14, and the average annual surplus fell from Rs. 8,17,159 to Rs. 7,53,671. An increase of revenue is, however, now expected under the agreements made or under consideration for the working of different forests by commercial agency as well as by a more extended use of the departmental working which led to such a large increase of revenue in the last year of the quinquennium. There has been little

change in the areas under the different classes of forests. Working-plans still cover nearly half the forest area, but working-plans for 1,625 more square miles are under preparation and the revision of others was undertaken. The feature of a revised scheme sanctioned for the Kurseong Forest division was the substitution of artificial for natural production of *sal*. Progress was made in the demarcation of boundaries. One hundred and seventy-five miles were artificially demarcated in the quinquennial period, but 124 miles still remain to be completed mainly in the Chittagong Hill Tracts division. Though there has been a reduction in the area under systematic fire protection during the period from 1,038 to 614 square miles, the forests have been successfully protected from fire. There has been no change in the average area of all classes of forests open to grazing ; and protective measures to prevent the most destructive forms of grazing were continued in the Darjeeling, Kalimpong, Jalpaiguri, Buxa and Chittagong divisions. The average annual amount spent on roads, bridges, buildings and other works decreased from Rs. 87,853 during the previous quinquennium to Rs. 70,406 owing to enforced economies. During the period a reorganisation of the Imperial and Provincial staff providing an increased number of appointments was sanctioned ; and subsequent to the close of the year the pay and prospects of the Imperial staff have been substantially increased as a result of a consideration of the proposals of the Public Services Commission.

12. The thanks of the Governor in Council are due to Sir Henry Farrington for his careful and efficient administration of the department during the year and for that part of the quinquennium, from the 7th January 1916, during which he held charge of the Bengal circle. His Excellency in Council notices with pleasure the Conservator's appreciation of the good work done by officers of the department during the year.

ORDER.—Ordered that this resolution be published in the gazette and that a copy, with a copy of the report, be submitted to the Government of India.

By order of the Governor in Council,

M. C. McALPIN,

DEPARTMENT OF AGRICULTURE, BENGAL.

Final Forecast of the *Bhadoi* Crops of Bengal, 1919-20.

(NOTE.—On an average of the five years ending 1917-18, the area under autumn rice in Bengal has represented some 6·8 per cent. of the total area under rice in British India.)

Character of the season.—As stated in the preliminary forecast the weather conditions in the beginning of the season were generally favourable in West Bengal, but less favourable in North and East Bengal, owing to insufficient rainfall. Consequently sowings, which commenced at the usual time in West Bengal, finished somewhat late in North and East Bengal. Good rainfall in June favoured the growth of the crops. Heavy rainfall in July and in the early part of August caused damage in the districts of the Presidency Division, Hooghly, Bogra, Pabna, Malda, Faridpur and Bakarganj. Some injury by insects is also reported from the 24-Parganas, Jessore and Jalpaiguri. On the whole, however, the season was much better than last year.

Acreage.—The total area sown this year with the different *bhadoi* crops dealt with in the forecast is estimated at 5,827,800 acres against 5,933,300 acres reported in the corresponding forecast of last year. Of this, the area under autumn rice is returned at 4,961,600 acres against 5,066,600 acres of last year.

Outturn.- According to the estimates of the district officers, the total outturn of the different *bhadoi* crops works out to 85 per cent. of the normal as against 77 per cent. reported in the corresponding forecast of last year, and that of autumn rice only to 87 per cent. against 77 per cent. of last year.

Autumn rice.—Accepting 87 per cent. as the outurn of autumn rice this year, the gross outturn of the crop for the province, on the basis of a normal yield of 10½ maunds of clean grain per acre, is estimated at 33,299,400 cwts. against 30,095,600 cwts. reported in the corresponding forecast of last year.

R. S. FINLOW,
Offg. Director of Agriculture, Bengal.

DACCA,
The 12th December 1919.

APPENDIX I.

Final Forecast of the *Bhadoi* Crops of Bengal, 1919-20.

District.	Names of crops.	Estimated normal area under each crop.	Estimated area under each crop.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the harvesting of each crop was begun this year, and whether that date was early, normal or late.	Remarks by District Officers.

JESSORE.	*Bhadoi* paddy (autumn rice).	407,300	365,000	342,400	75	83	August. Normal ...	The decrease in area this year is due to jute being sown in lands which were sown with paddy last year. The weather was favourable since the submission of the preliminary forecast. The outturn is below the normal on account of the damage caused by flood and cyclone.
	Other *bhadoi* cereals ... } Other *bhadoi* pulses ... }	12,200	9,100	10,800	56	75	September. Normal.	
	Other *bhadoi* food-crops.	12,200	8,600	7,200	69	67		
	Bhadoi fodder crops other than jowar, bajra, marua and maize.	1,200	700	2,100	56	67		
	Bhadoi non-food crops other than fodder and fibres.	12,100	1,000	500	60	100		
	Total ...	445,000	384,400	363,000	74	83		
KHULNA.	*Bhadoi* paddy (autumn rice).	17,800	20,200	22,900	100	83	Middle of September. Normal.	The increase in area as compared with last year is due to the fact that the high price of rice this year induced the cultivators to cultivate more lands with *bhadoi* paddy. The weather was favourable at sowing time but heavy rain and floods in the latter part of July caused damage to the crops. Hence the outturn is below the normal.
	Other *bhadoi* cereals ...	200	100	100	85	83		
	Other *bhadoi* pulses ...	600	400	400	85	83

DEPARTMENT OF AGRICULTURE, BENGAL.

Third Forecast of the Cotton Crops of Bengal, 1919-20.

(NOTE.—On an average of the five years ending 1917-18, the area under the cotton crops in Bengal has represented some 0·3 per cent. of the total area under cotton in India.)

THE "early" crop is chiefly grown in the Chittagong Hill Tracts and in the State of Hill Tippera and to a small extent in other districts. The "late" crop is grown mainly in Bankura and Midnapore.

Character of the season.—As reported in the second forecast, the weather was generally favourable excepting in the Chittagong Hill Tracts, where heavy rain in July and August affected the crop. Subsequently the weather proved somewhat favourable to both the crops generally, but rainfall in the middle of November caused considerable damage in the Chittagong Hill Tracts and thus reduced the outturn appreciably. The prospects of late crop, so far as reported to be fair.

Area sown.—The total area sown with the early crop is reported to be 66,697 acres and that with the late crop 2,161 acres this year, against 70,786 and 2,203 acres, respectively, in the corresponding and final forecasts of last year.

Outturn.—The estimated outturn of the early crop is reported to be 19,539 bales this year against 25,272 and 30,908 bales, respectively, in the corresponding and final forecasts of last year. The outturn of the late crop is returned at 1,000 bales against 919 and 737 bales, respectively, in the corresponding and final forecasts of last year.

R. S. FINLOW,

Offg. Director of Agriculture, Bengal.

DACCA,

The 11th December 1919.

(b) For Nadia, Murshidabad, Jessore, Khulna, Burdwan, Birbhum, Hooghly, Bogra, Malda, Tippera and Noakhali.

* Conventional area. † Revised estimate.

(1) The weather has been favourable and the general condition of the crops is good. The date of harvesting of the early crop was normal.
(2) The condition of the crops has not been good owing to excessive rain.
(3) The weather has been fair and the condition of the crop is good.
(4) The weather and general condition of the crop has been fair, but the recent rain has done considerable damage to the crop. The date of harvesting is normal.
(5) Though somewhat unfavourable at the outset, the weather has been favourable to the crop subsequently and the general condition is fair. The date of harvesting is normal.
(6) In Noakhali and in places of Burdwan, the weather has not been favourable. Elsewhere it has been favourable and the present condition of the crops is fair. In Khulna, the plants have all been destroyed by the cyclone in September.

DEPARTMENT OF AGRICULTURE, BENGAL.

Second Forecast of the Winter Rice Crop of Bengal, 1919-20.

(NOTE.—On an average of the five years ending 1917-18 the area under winter rice in Bengal represents some 19·1 per cent. of the total area under rice in British India.)

Character of the season.—As reported in the first forecast, the weather has been favourable throughout for the broadcast *aman* rice crops. In West Bengal it was also exceptionally good for transplanted *aman* rice in the period July-September. Insufficient rain in October, however, affected the yield of crops on high lands to a slight extent. In East and North Bengal the conditions were not good for transplanted rice in July and August owing to deficient rainfall during this period. At one time matters looked somewhat serious, and large areas were transplanted at a later date than is usual. In September, however, the rainfall was generally in excess and the heavy rain brought by the cyclone in East Bengal did great good to late transplanted rice. On the whole, it may be said that the broadcast *aman* rice is very good and that the transplanted rice crop is satisfactory.

Acreage.—According to district officers' estimates the total area under winter rice amounts to 15,551,400 acres as against 15,379,400 acres in the first forecast of this year and 15,962,100 acres in the corresponding forecast of last year. The increase of 172,000 acres over the first forecast was due to good rainfall in September.

Outturn.—From the district returns appended it wil be seen, that Bankura, Malda and Bakarganj report more than a normal crop and seventeen districts report a crop between 80 and 92 per cent. The outturns for the remaining seven districts are as follows :—

Burdwan, Hooghly, Rangpur and Noakhali (75 per cent. each), Nadia and Murshidabad (67 per cent. each), and the Chittagong Hill Tracts (50 per cent).

As compared with the first forecast the crop has improved in ten districts, deteriorated in eleven and remained stationary in the rest.

On the basis of the above figures the provincial outturn is estimated at 89 per cent. of the normal against 77 per cent. in the corresponding forecast of last year.

I consider 90 per cent. a fair estimate, and accepting this figure the gross outturn for the province, on the basis of a normal yield of 12½ maunds of clean grain per acre, is estimated at 128,537,100 cwts. against 112,874,900 cwts. returned in the corresponding forecast of last year.

R. S. FINLOW,
Offg. Director of Agriculture, Bengal.

DACCA,
The 13th December 1919.

APPENDIX I.

Second Forecast of the Winter Rice Crop of Bengal, 1919-20.

District.	Estimated normal area under winter rice.	Estimated area under winter rice.		Estimated outturn as a percentage of the normal yield per unit of area.		The date by which the harvesting generally commenced this year, and whether that date was early, normal or late.	Remarks by District Officers.
		Last year. (1918-19).	This year. (1919-20).	Last year.	This year.		
	Acres.	Acres.	Acres.				
24-Parganas ...	1,041,500	893,200	825,100	83	92	November. Normal.	Excessive rain since the submission of the first forecast has caused a little damage to crops on low lands in the Diamond Harbour subdivision and unusual heavy rainfall in the Bashirhat subdivision damaged to some extent the plants in the Sundarban tracts owing to breaches in the embankments. Hence the outturn is expected to fall below normal.
Nadia ...	136,800	125,600	130,100	58	67	Not yet commenced	The increase in area sown is due to the favourable weather at the sowing time. The outturn is expected to be much below the normal owing to want of rain since the submission of the first forecast.
Murshidabad	345,600	326,300	318,700	58	67	Ditto ...	The increase in area sown as compared with the first forecast is due to subsequent transplantation. Crop suffered for want of sufficient rainfall. About 25 per cent. of the crop has been damaged owing to drought and flood in Jangipur subdivision. The outturn is expected to fall below the normal on account of drought at the flowering time.
Jessore ...	568,100	462,500	455,500	67	80	Beginning of November. Normal.	The decrease in area sown as compared with that of the last area is due to the corresponding increase of jute area and also owing to innundation at the time of sowing and transplantation. Insect-pests have affected the crops in Bongong and Magura subdivisions. The outturn is expected to be below normal owing to the damage caused by flood and insect-pests.
Khulna ...	*826,200	734,100	703,700	85	92	Ditto ...	The outturn is expected to fall below normal owing to the damage caused by the cyclone.
Burdwan ...	874,800	700,000	736,000	66	75	Not yet commenced	The weather since the submission of the first forecast has not been favourable except at Asansol. Insufficient rainfall in the latter part of September and in October has considerably reduced the outturn of the late transplanted crop. The rainfall in November is likely to do much more harm than good and the outturn is expected to fall much below the normal.
Birbhum ...	604,600	601,500	601,500	67	92	Ditto ...	The weather has been good and a fairly good outturn is expected.
Bankura ...	510,600	52[illegible],000	525,000	62·5	125	Second week of November. Normal.	Insufficient rainfall in the latter part of September and in October affected the crop on high lands in parts of the district. Since the submission of the first forecast about 33 per cent. of crop has been affected by drought and insufficient rainfall.
Midnapore ...	*1,537,100	1,648,000	1,493,800	60	83	First week of December. Normal.	Want of rainfall has adversely affected the growth of crops.
Hooghly ...	276,700	196,800	206,400	73	73	Not yet commenced	The weather has not been favourable since the submission of the first forecast. Insufficient rainfall has affected the crops seriously. The outturn is expected to fall much below the normal owing to long continued drought.
Howrah ...	125,200	114,400	119,500	70	90	Ditto ...	The weather has not been favourable since the submission of the first forecast. Want of rain in the latter part of the season retarded growth of the crops.
Rajshahi ...	697,000	620,000	656,300	53	90	Ditto ...	The outturn is anticipated to fall below normal owing to insufficient rainfall at the sowing time.
Dinajpur ...	1,120,300	1,019,100	1,029,000	57·8	83	Ditto ...	The [illegible] in area sown is due to sufficient rainfall since [illegible] submission of the first forecast. Owing to the weather [illegible] favourable at the beginning, the outturn is [illegible] to fall below the normal.
Jalpaiguri ...	551,300	497,400	417,500	85	80	Ditto ...	The outturn is expected to fall below the normal owing to unfavourable weather and want of sufficient rainfall at the time of sowing.
Darjeeling ...	65,200	35,900	35,500	92	93	First week of November. Normal.	Effects of weather on the growth of crop have been fairly good on the whole.
Rangpur ...	832,300	674,000	600,000	59	75	Not yet commenced	The outturn is expected to be much below normal owing to drought in August.
Bogra ...	303,000	450,000	[illegible]7,000	44	85	End of November. Normal.	The weather was favourable up to the third week of October, but continued absence of rain since then has done injury to the late transplanted paddy. On account of low flood paddy on high lands in the eastern part of the district was damaged. Hence the outturn falls below the normal.
Pabna ...	566,000	520,000	382,500	80	92	First week of November. Normal.	The present prospect is promising.
Malda ...	326,300	290,000	308,000	60	117	Latter part of November. Normal.	The weather has been favourable on the whole, though in some places crop suffered a little for want of rain in the latter part of October. More than normal outturn is expected.

* Revised.

District	Estimated normal area under winter rice.	Estimated area under winter rice.		Estimated outturn as a percentage of the normal yield per unit of area.		The date by which the harvesting generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
		Last year (1918-19).	This year (1919-20).	Last year.	This year.		
	Acres	Acres	Acres.				
Dacca ..	647,900	649 000	655,200	75	85	Beginning of November Normal	The weather was quite seasonable and a very good crop was expected until 24th September when a severe cyclone swept over the district Since then the weather has been favourable The cyclone made considerable damage; the outturn is therefore estimated to fall below the normal.
Mymensingh .	1 126,700	969,700	969,700	75	92	Not yet commenced	The weather was generally favourable The outturn is below the normal owing to cyclone and want of rain in some parts of the district, specially at the sowing time
Faridpur .	770,100	740,000	734,700	69	84	End of October Normal	The weather has been fairly favourable Some damage was done by cyclone which accounts for the estimated outturn to fall below the normal
Bakarganj .	1 200 000	1,340,000	1,342,500	120	117	November Normal	The weather has been favourable and the outturn is expected to be above normal
Chittagong	418 400	426,100	420,600	95	83	November and December Normal	Insufficient rainfall in the month of October and cloudy weather without rain for some days in November is likely to reduce the outturn
Tippera	724 800	780,600	806,500	60	92	November Normal	Increase in area is due to favourable weather Slight damage was, however, done to the crop by the cyclone of September
Noakhali .	610 000	600,000	600,000	85	75	Early in November Normal	Insufficient rainfall in October has been harmful to the crop in the Sadar subdivision Some damage was caused by *ufra* disease In Feni subdivision the rainfall in October has done good
Chittagong Hill Tracts	47,500	41 600	46,000	100	50	Not yet commenced	The outturn is expected to fall much below the normal for want of sufficient rainfall
Total Bengal	16,843 900	15,895,800	15,551,400	72	89

DEPARTMENT OF AGRICULTURE, BENGAL.

First Forecast of the Spring Oilseed Crops of Bengal, 1919-20.

(Note.—On an average of the five years ending 1917-18, the area under linseed in Bengal has represented some 5·5 per cent. and that under rape and mustard 19·3 per cent. of the total area under these crops in British India.)

Explanatory.—Three forecasts are issued for the spring oilseed crops. The present one deals only with the area sown and the general condition of the crops.

Area sown.—Oilseeds are grown chiefly in Rajshahi, Dacca and the Presidency Divisions. In the other two divisions the cultivation is small. The total area under these crops (excepting sesamum for which separate forecasts are issued) is reported to be 1,280,000 acres this year against 1,296,800 and 1,304,800 acres respectively in the corresponding and final forecasts of last year.

Character of the season.—The rainfall in September was generally in excess of the normal in North and East Bengal and was somewhat defective in West Bengal. There was plenty of moisture in the soil for preparatory tillage which began in usual time. Light rain in October facilitated the sowings of the crops. In the early part of November, the sowings were somewhat retarded in some parts of West Bengal through lack of soil moisture, but rainfall in the middle of the month greatly facilitated matters. The outlook is, so far, reported to be promising.

DACCA,
The 17th December 1919.

R. S. FINLOW,
Offg. Director of Agriculture, Bengal.

APPENDIX I.

First Forecast of the Spring Oilseed Crops of Bengal, 1919-20.

District.	Name of spring oilseed crops.	Estimated normal area under spring oilseeds.	Estimated area under spring oilseeds. Last year (1918-19).	This year (1919-20).	Date by which the sowing of the crops was begun this year.	Remarks by District Officers.
		Acres.	Acres.	Acres.		
24-Parganas ...	Linseed	1,600	600*	600*	October to second week of November.	The sowings were normal. The weather has been favourable and condition of the crops is fair.
	Rape and mustard ...	1,500	800*	800*		
	Other oilseeds (excepting *til*).	300	300	200		
	Total ...	3,400	1,700	1,600		
Nadia ...	Linseed	59,700	32,200	33,400	October	The sowings were normal. The weather has been favourable except in the Ranaghat subdivision and in parts of the Sadar subdivision. The condition of the crops is good.
	Rape and mustard ...	23,500	14,400	15,300		
	Other oilseeds (excepting *til*).	14,900	3,300	3,700		
	Total ...	98,100	49,900	52,400		
Murshidabad	Linseed...	20,800	13,000	14,900	Middle of October.	The sowings were normal. The weather has been favourable. The condition of the crops is fair.
	Rape and mustard ...	18,900	12,300	14,700		
	Other oilseeds (excepting *til*).	8,700	3,100	3,400		
	Total ...	48,400	28,400	33,000		
Jessore ...	Linseed	24,000	9,400	8,200	October and November	The sowings were normal and the weather has been favourable. The condition of the crops is good on the whole.
	Rape and mustard ...	49,600	18,000	17,600		
	Other oilseeds (excepting *til*).	3,300	1,900	2,300		
	Total ...	76,900	29,300	28,100		
Khulna ...	Linseed	900	100	100	First week of November.	The sowings were normal. The weather has been favourable. The condition of the crops is fair.
	Rape and mustard ...	29,700	18,600	12,500		
	Other oilseeds (excepting *til*).	100	500	...		
	Total ...	30,700	19,200	12,600		
Burdwan ...	Linseed	22,500	7,700	6,400	Last week of September to the second week of November.	The sowings were normal and the weather has been favourable. The condition of the crops is good in Asansol and Katwa and fair in Kalna subdivisions. In the Sadar subdivision the crops are suffering for want of rain.
	Rape and mustard ...	21,100	8,100	8,200		
	Other oilseeds (excepting *til*).	1,500	100	800		
	Total ...	45,100	15,900	15,400		
Birbhum ...	Linseed	800	800*	800*	October	The sowings were normal. The weather has been favourable. The condition of the crops is fair.
	Rape and mustard ...	2,000	2,000	2,000*		
	Other oilseeds (excepting *til*).	200	200	300		
	Total ...	3,000	3,000	3,100		

* Conventional area.

District.	Name of spring oilseed crops.	Estimated normal area under spring oilseeds.	Estimated area under spring oilseeds. Last year (1918-19).	This year (1919-20).	Date by which the sowing of the crops was begun this year.	Remarks by District Officers.
		Acres.	Acres.	Acres.		
Bankura ...	Linseed	1,000	1,000*	1,000*	October	The sowings were normal and favourable weather prevailed. The condition of the crops is fair.
	Rape and mustard ...	7,000	3,700	4,500		
	Other oilseeds (excepting *til*).	8,000	3,600	4,000		
	Total ...	16,000	8,300	9,500		
Midnapore ...	Linseed	15,000	11,500	12,300	October	The sowings were normal and favourable weather prevailed. The condition of the crops is fair.
	Rape and mustard ...	31,000	11,000	11,200		
	Other oilseeds (excepting *til*).	14,500	14,000	15,200		
	Total ...	60,500	36,500	38,700		
Hooghly ...	Linseed	800	700*	700*	End of October ...	The sowings were late for want of rain. The weather has not been favourable. The condition of the crops is poor.
	Rape and mustard ...	7,900	3,800	3,800		
	Other oilseeds (excepting *til*).	2,700	700	700		
	Total ...	11,400	5,200	5,200		
Howrah ...	Linseed	2,000	200	300	Beginning of November.	The sowings were normal. The weather has been favourable. The condition of the crops is fair.

	Rape and mustard ...	74,000	57,8[illegible]	48,100		
	Other oilseeds (excepting *til*).	400	2,000	100		
	Total ...	102,400	74,100	62,200		
Dinajpur ...	Linseed	(40)	(30)	(30)*	Middle of October	The sowings were normal. The weather has been favourable. The condition of the crops is fair.
	Rape and mustard ...	70,000	50,500	57,500		
	Other oilseeds (excepting *til*).	...	100	100		
	Total ...	70,000	50,600	57,600		
Jalpaiguri ...	Rape and mustard ...	53 600	51,400	46,300	By the end of October.	The sowings were normal. The weather has been favourable. The condition of the crops is fair.
	Other oilseeds (excepting *til*).	200	200	200		
	Total ...	53,800	51,600	46,500		

* Conventional area.

District.	Name of spring oilseed crops.	Estimated normal area under spring oilseeds.	Estimated area under spring oilseeds. Last year (1918-19).	Estimated area under spring oilseeds. This year (1919-20).	Date by which the sowing of the crops was begun this year.	Remarks by District Officers.
		Acres.	Acres.	Acres.		
Darjeeling	Rape and mustard ...	7,000	2,800	2,800	Middle of October	The sowings were normal. The weather has been favourable. The condition of the crops is fair.
	Other oilseeds (excepting *til*).	200	200	200		
	Total ...	7,200	3,000	3,000		
Rangpur	Rape and mustard ...	160,000	118,000	124,000	Latter part of October Normal.	The sowings were normal. The weather has been favourable. The condition of the crops is good.
	Other oilseeds (excepting *til*).	1,100	200	200		
	Total ...	161,100	118,200	124,200		
Bogra	Linseed	1,000	1,600	1,800	Middle of October	The weather condition was not favourable at the sowing time but has afterwards became favourable.
	Rape and mustard ...	60,000	12,000*	14,000		
	Other oilseeds (excepting *til*).	...	200	300		
	Total ...	61,000	13,800	16,100		
Pabna	Linseed	7,600	8,500	10,800	End of October ...	The sowings were normal. The weather has been favourable. The condition of the crops is good
	Rape and mustard ...	110,000	114,500	72,900		
	Total ...	117,600	123,000	83,700		
Malda	Linseed	6,000	3,500	4,000	Middle of October	The sowings were normal. The weather has been favourable. The condition of the crops is fair.
	Rape and mustard ...	30,000	10,000	11,000		
	Other oilseeds (excepting *til*).	2,500	1,200	1,200		
	Total ...	38,500	14,700	16,200		
Dacca	Linseed	1,300*	4,600	1,400	Beginning of November.	The sowings were normal. The weather has been favourable. The condition of the crops is good. The increase in area sown, as compared with that of the last year, is due to some of the lands under winter paddy, damaged by cyclone, being utilized for growing spring [illegible] crops.
	Rape and mustard ...	88,600*	74,900	88,700		
	Other oilseeds (excepting *til*).	1,700*	...	1,700		
	Total ...	91,600	79,500	91,800		
Mymensingh	Linseed	13,800	13,800	13,800	Middle of October	The sowings were normal. The weather has been favourable. The condition of the crops is fair.
	Rape and mustard ...	430,700	472,300	472,300		
	Other oilseeds (excepting *til*).	300	300	300		
	Total ...	444,800	486,400	486,400		
Faridpur	Linseed	5,900	6,100	6,000	October ...	The sowings were normal. The weather has been favourable. The condition of the crops is good.
	Rape and mustard ...	25,700	25,700	24,300		
	Other oilseeds (excepting *til*).	1,100	1,100	1,100		
	Total ...	32,700	32,900	31,400		

* Revised on the basis of settlement records.

District.	Name of spring oilseed crops.	Estimated normal area under spring oilseeds.	Estimated area under spring oilseeds. Last year (1918-19).	This year (1919-20).	Date at which the sowing of the crops was begun this year.	Remarks by District Officers.
		Acres.	Acres.	Acres.		
Bakarganj ...	Linseed	4,500	4,400	4,400	October and November.	The sowings were normal. The weather was favourable at the beginning of the season, but rain in the middle of November has damaged about 15 per cent. of the crops. The present condition of the crops is however good. Owing to high price of mustard oil the cultivation of the crop has increased
	Rape and mustard ...	1,100	1,500	3,000		
	Other oilseeds (excepting *til*).	200	100	100		
	Total ...	5,800	6,000	7,500		
Chittagong ...	Linseed	100	100	100	October to November.	The sowings were normal. The weather has not been very favourable. The condition of the crops is fair.
	Rape and mustard ...	5,600	2,000	2,000		
	Other oilseeds (excepting *til*).	100	100	100		
	Total ...	6,800	2,200	2,200		
Tippera ...	Linseed	4,800	4,300	3,200	October ...	The sowings were normal. The weather has been favourable. The condition of the crops is fair.
	Rape and mustard ...	34,500	26,300	26,100		
	Other oilseeds (excepting *til*)	800	600	500		
	Total ...	40,100	31,200	29,800		
Noakhali ...	Linseed	5,000	6,000	7,000	November ...	The sowings were normal. The weather has been favourable for the growth of the crops. The condition of the crops is fair.
	Rape and mustard ...	600	600	600		
	Other oilseeds (excepting *til*).	700	900	900		
	Total ...	6,300	7,500	8,500		
Chittagong Hill Tracts.	Rape and mustard ..	13,000	12,000	12,100	Second week of November.	The sowings were normal. The weather was favourable so long, but the present cloudy weather attended with rains has damaged the crops to some extent.
Total Bengal	Linseed	223,100	144,400	145,200		
	Rape and mustard ...	4,358,600	1,125,400	1,097,100		
	Other oilseeds (excepting *til*).	67,600	35,000	37,700		

MONTHLY WEATHER AND CROP REPORT OF BENGAL FOR NOVEMBER 1919.

I. **Character of the season.**—During the middle of the month, rainfall was general throughout the province. The fall was above the average everywhere, excepting in Birbhum, and in some northern districts where it was defective. The usual rainfall statement is appended.

II. **Progress of agricultural operations.**—Harvesting of winter paddy commenced. Sowing of spring crops proceeded favourably, though lack of moisture in the early part of the month retarded operations somewhat in parts of West Bengal. The rainfall in the middle of the month greatly facilitated sowings.

III. **State of standing crops.**—The condition of standing crops was reported to be generally satisfactory.

IV. **Prospects and probable outturn.**—The rainfall in the middle of the month somewhat benefited the late transplanted paddy and greatly helped the growth of vegetables and other standing crops. The outturn of autumn crops was satisfactory for the province as a whole.

V. **Damage to standing crops.**—Some damage to highland winter paddy was caused by drought in Burdwan and Bankura, while early cotton in the Chittagong Hill Tracts suffered from too much rain in the middle of the month. *Ufra* disease and insects caused some damage in parts of Faridpur and Noakhali.

VI. **Condition of agricultural stock.**—The condition of live-stock was reported to be fair on the whole. Cattle-disease was, however, reported from places in Nadia, Murshidabad, Khulna, Birbhum, Jalpaiguri, Darjeeling, Malda, Mymensingh, Faridpur and Tippera.

VII. **Failure of pasturage and fodder.**—The supply of fodder was sufficient throughout the province except in parts of Khulna and Faridpur where insufficiency of fodder was reported.

VIII. **Prices of food-grains.**—During the second fortnight of the month the price of common rice rose in the districts of Khulna, Bankura, Dacca, Noakhali and the Chittagong Hill Tracts, fell in twelve districts and remained stationary in the remainder. It varied from 4½ seers a rupee in Khulna, Rangpur, Mymensingh and Bakarganj to 7 seers a rupee in Birbhum and Chittagong.

IX. **Condition of agricultural people.**—The condition of the agricultural population showed a tendency towards improvement.

DISTRICT REPORTS ON WEATHER AND CROPS.

For the week ending on the 11th December 1919.

Summary.—The week was rainless. Reaping of winter paddy is in full swing. Sowing of spring crops is fast approaching completion. The condition and prospects o standing crops are so far reported to be promising. The average price of common ric for the province has fallen by about 5·63 per cent. as compared with that of the previou week.

DEPARTMENT OF AGRICULTURE, BENGAL.

Forecast of the Winter *Til* (Sesamum) Crop of Bengal, 1919-20.

(NOTE.—On an average of the five years ending 1917-18, the area under til *in Bengal has represented about 4·9 per cent. of the total area under* til *in British India.)*

Character of the season.—Owing to uneven distribution of rainfall the weather at sowing time was, on the whole, unfavourable for the crop throughout the province. Subsequently conditions were rather better until the end of October; but continued drought since then has generally stunted the growth of the crop and, in many districts, considerably reduced the outturn in consequence. Insect-pests also caused some damage in places, especially in Rajshahi, Jalpaiguri, Nadia and Bogra. In Khulna, owing to excessive rain at sowing time, the crop could not be cultivated at all this year, and in Pabna about 3,000 acres were left unsown. On the whole, the season has not been better than last year.

Acreage.—The total area sown this year is estimated at 42,600 acres against 49,400 acres last year.

Outturn.—According to estimates of District Officers the outturn of the crop for the province as a whole works out at 68 per cent. of the normal against 62 per cent. last year. Taking 6⅛ maunds as the normal rate of yield per acre, the gross outturn for the province is estimated at 6,500 tons against 6,900 tons last year.

DACCA,
The 23rd December 1919.

R. S. FINLOW,
Offg. Director of Agriculture, Bengal.

APPENDIX I.

Forecast of the winter *til* crop of Bengal, 1919-20.

District.	Estimated normal area under winter *til*.	Estimated area under winter *til*.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which sowing generally began this year and whether that date was early, normal or late.	Date by which harvesting generally commenced this year and whether that date is early, normal or late.	Remarks by District Officers.
		Last year (1918-19).	This year (1919-20).	Last year.	This year.			
	Acres.	Acres.	Acres.					
24-Parganas ...	300	300*	300*	58	58	August. Normal...	Not yet commenced	The weather has not been favourable owing to untimely rainfall.
Nadia ...	5,300	900	1,000	42	50	July and August. Normal.	November. Normal.	The weather was not favourable at sowing time. Some damage was caused by insects and drought. Hence the outturn is expected to fall much below the normal.
Murshidabad ...	4,100	900	900	58	67	End of August to November, normal except Jangipur. Late.	Not yet commenced	The weather was not favourable at sowing time, but since then it is favourable. The outturn is anticipated below the normal owing to unfavourable weather at sowing time.
Jessore ...	1,600	900	1,100	42	83	August. Normal	November. Normal.	The increase in area is due to favourable weather at sowing time. Slight damage has been caused to the crop for want of rain in September. Hence the outturn is expected to fall below the normal.
Khulna ...	2,800	900	...	85	...	...	...	Owing to the excessive rain the cultivators could not sow the crop this year.
Burdwan ...	500	200	300	58	50	Beginning of September and October. Normal.	Not yet begun ...	The increase in area is due to favourable weather and to adoption of an assumed area for Asansol subdivision. The weather was fair, but has been dry later on. The outturn is much below the normal owing to deficient rainfall.
Birbhum ...	500	500*	500*	67	75	August. Normal	December ...	The weather and condition of the crop have been fair. The outturn is below the normal owing to want of timely rain.
Bankura ...	3,300	2,500	3,000	67	108	August. Normal	December. Normal.	The increase in area is due to high price of oil and demand for oilseeds. The weather was quite favourable at sowing time but slight damage has been caused to crop owing to drought in October. The outturn is expected to be slightly above normal.
Midnapore ...	3,000	2,300	2,300	60	75	July. Normal ...	September. Normal.	The weather has not been favourable. The outturn is, therefore, expected to fall below the normal.
Hooghly ...	1,000	700*	700*	65	50	Middle of September Normal.	End of November. Normal.	Owing to unfavourable weather the outturn has fallen much below the normal.
Howrah ...	100	(40)	(45)	83	83	Middle of October. Normal.	Middle of November. Normal.	Some damage has been done by drought. Hence the outturn is below the normal.
Rajshahi ...	3,700	600	1,100	50	50	Middle of September. Normal.	End of December. Normal.	The increase in area is due to the favourable condition of weather at sowing time and to high prices of oilseeds. The weather has been fair. Considerable damage has been caused by insect-pests in Naogaon subdivision. Hence the outturn is expected to fall much below the normal.
Dinajpur ...	800	400*	400*	60	77	August to September. Normal.	Not yet commenced	The weather has been favourable at sowing time. Owing to inadequate rainfall the outturn is expected to fall below the normal.
Jalpaiguri ...	1,000	......	500	......	50	July. Normal.	November. Normal	The crop is not grown in this district to any appreciable extent. Some people of the Falakata tahsil in the Alipore subdivision have grown the crop this year only. The weather has been favourable. About half the crop has been damaged by insect-pests.
Rangpur ...	1,300	1,500*	1,500*	100	100	October. Normal.	Will begin from January.	The weather has been favourable and a normal outturn is expected.
Bogra	1,600	600	600	50	50	Middle of August. Normal.	Middle of November. Normal.	The weather was not favourable at sowing time, but the growth of the crop has been retarded owing to absence of rain. Some damage has been caused by insects. The outturn is therefore expected to fall much below the normal.

*Conventional area.

District.	Estimated normal area under winter *til*.	Estimated area under winter *til*.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which sowing generally began this year and whether that date was early, normal or late.	Date by which harvesting generally commenced this year and whether that date is early, normal or late.	Remarks by District Officers.
		Last year (1918-19).	This year (1919-20).	Last year.	This year.			
	Acres.	Acres.	Acres.					
Pabna	7,000	6,000	3,000	65	50	Middle of September. Normal.	End of December. Normal.	The decrease in area is due to the fact that about 3,000 acres could not at all be sown owing to rain in the early part of September. Hence the outturn is much below the normal.
Malda	1,500	1,500*	1,500	50	92	September. Normal.	December. Normal.	On the whole the weather was favourable at sowing time. The falling off of outturn below the normal is due to stunted growth owing to absence of rain since middle of October.
Dacca ...	3,900	8,800	3,900	72	75	End of August. Normal.	End of November. Normal.	Figures for normal area have been revised on the basis of settlement records. Want of rain at the sowing time did some damage to the crop.
Mymensingh ...	8,600	7,800	7,800	85	95	August and September. Normal.	December and January. Normal.	The weather and condition of the crop have been generally favourable.
Chittagong ...	200	200*	200*	90	100	August. Normal	November. Normal	The weather has been good.
T[illegible]era ...	3,200	1,400	1,400	60	7[illegible]	October. Normal	Not yet commenced.	The weather has not been quite favourable. Some damage has been done by insects. Hence the outturn is expected to be below the normal.
Chitta[illegible]g Hill [illegible]acts.	13,000	10,600	10,600	35	3[illegible]	[illegible] week of May. Late.	Middle of November. Normal.	The weather and condition of the crop have not been favourable. The outturn is expected to be poor.

Dacca;
The 27th December 1919.

DEPARTMENT OF STATISTICS, INDIA.

CALCUTTA TRADE FLUCTUATIONS.

THE following tables are intended to show the trade by all routes, *i.e.*, by rail, river, canal, road, and sea, of the Calcutta block* in certain selected articles during the seven months, April to October, 1919, as compared with the corresponding period of 1918 and 1917. The statistics have been compiled from returns furnished by the Collector of Customs, Calcutta, Railway Audit Offices, Steamer Companies, the Commissioners for the Port of Calcutta, the Collectors of the 24-Parganas and Howrah, and the Assistant Engineer, Calcutta Canals.

General Summary.

Imports.—The imports of rice, including paddy†, into Calcutta* by rail, river, canal, road, and sea (coastwise) during the seven months, April to October, 1919, amounted to 14,816,000 maunds, as against 7,594,000 maunds in the corresponding period of the preceding year—an increase of 9[illegible] per cent. There was an increase (14 per cent) in the imports of coal and coke (56,569,000 maunds as against 49,511,000 maunds last year). The imports by rail, river, road, and sea (coastwise) of Indian cotton piecegoods showed an increase of 70 per cent, the total value amounting to Rs. 5,61,28,000 as against Rs. 3,32,25,000 in 1918. The quantity of indigo imported during the seven months, April to October, 1919, decreased from 5,733 maunds to 2,919 maunds. The imports of raw jute amounted to 2,564,000 bales as against 2,9[illegible],000 bales—a decrease of 13 per cent. The importations of gunny bags also showed a decrease of 29 per cent (206 million bags as against 293 millions in the preceding year). The total imports of oilseeds (linseed and rape and mustard seed) increased by 13 per cent, from 4,136,000 maunds to 4,663,000 maunds. The imports of sugar decreased by 18 per cent, from 394,000 maunds to 325,000 maunds, and those of tea by 10 per cent, from 2,023,000 maunds to 1,830,000 maunds.

Exports.—The exports of cotton piecegoods, foreign, from Calcutta by all routes during the seven months, April to October, 1919, increased by 9 per cent (Rs. 14,99,35,000 as against Rs. 13,78,69,000 last year). The exports of gunny bags (including the exports by sea to foreign countries) decreased from 825 million bags to 631 million bags, and the shipments of gunny bags to other Indian ports decreased from 24 millions to 21 millions in number in the period under review. The quantity of kerosene oil despatched from Calcutta and Budge-Budge by internal routes and by sea (coastwise) increased from 2,914,000 maunds to 3,363,000 maunds, or by 15 per cent.

* The Calcutta block consists of the town of Calcutta with Howrah and Kidderpore [illegible]

† [illegible]

TABLE I

Trade of Calcutta in certain selected articles in the seven months, April to October, 1919, compared with the corresponding months of 1918.
